Building India's Shipping Power

THE FIVE-YEAR PLAN witnessed the addition of the Great Eastern Shipping Company's fleet. Of great importance to the Indian shipping industry was the acquisition of m. t. "Jag Jyoti", the first Indian commercial tanker, and m. v. "Jag Jyoti", the first Indian dry-cargo ship on the Indian register.

In addition, Great Eastern have rededicated themselves to further expanding and strengthening the Indian maritime marine.

CONTENTS

All possible care is taken to check the information given in this volume. But the publishers cannot take responsibility for chance errors or omissions. Authoritative corrections will be gratefully received.

There is in some cases a discrepancy between the figures from the Central and a State Government relating to the same subject. This is generally pointed out in a foot-note.

State budgets for 1958-59 are given in a tabular form on page 1261. The figures given here should be taken as superseding those given under individual States.

There is an 'Errata' on page 1308.

*It's a **BIG** job....*

running an oilfield

Many special kinds of skill are required to keep India supplied with oil, from the study of fossils to the operation of complicated plant in refineries.

Consider the complexity of the Assam Oil Company's operations at Digboi, in north-east India. Here, at India's first and hitherto only oilfield, nearly a thousand wells have been drilled into the earth's rocks—a total of over 300 miles of hole. More than 600 of these wells still yield oil regularly, modern production techniques ensuring that the maximum amount of crude is recovered from the field. Science and engineering skills guide every phase of the company's work, nowhere less than in Digboi refinery which in a single day supplies the Indian market with over 320,000 gallons of high-quality petroleum products. In all branches of this full-scale industry the Assam Oil Company employs nearly 9,000 persons, while many hundred more are engaged in serving the consumer.

PHYSIOGRAPHY

GEOPHYSICALLY the mass of land today called India consists of the territories contained in the Union of India and the Portuguese possessions of Goa, Daman and Diu.

The State of Pondicherry, Karikal, Mahe and Yanam (formerly French) is a de facto but not de jure part of India, though a treaty for a de jure transfer has been signed. It may be added here that this treaty awaits ratification by the Governments of India and France.

STATES, TERRITORIES

The country is divided into 14 States and six Territories. The latter are under Central administration.

The fourteen States (with the capital towns in brackets) are:

Andhra Pradesh (Hyderabad), Assam (Shillong), Bihar (Patna), Kerala (Trivandrum), Madhya Pradesh (Bhopal), Madras (Madras), Bombay (Bombay), Mysore (Bangalore), Orissa (Bhubaneswar), Punjab (Chandigarh), Rajasthan (Jaipur),* Uttar Pradesh (Lucknow), West Bengal (Calcutta), Jammu and Kashmir (Srinagar).

The six Territories (with capital towns in brackets) are:

Delhi (Delhi), Himachal Pradesh (Simla), Manipur (Imphal), Tripura (Agartala), the Andaman and Nicobar Islands (Port Blair), the Laccadive, Minicoy and Amindivi Islands (temporary headquarters: Kozhikode, Kerala).

These States and Territories came into being on 1st November, 1956.

In addition there are two territorial units: The North-East Frontier Agency and the Naga Administrative Unit.

GEOGRAPHY

India is about 1,700 miles from east to west, and about 2,000 miles from north to south. Its land frontier is about 8,200 miles long and the sea frontier about 3,500 miles.

The total land area is 1,269,040 sq. miles.

The total population is 356,879,394† (1951 census) a little less than one-sixth of the population of the whole world.

The land frontier with Pakistan is about 4,000 miles long (east and west together).

In shape India is like a triangle with its base resting on the Himalaya Mountains in the north and its apex running far into the ocean in the south. At the southern extremity the triangle tapers with a pear-shaped curve to a point called Cape Comorin.

India lies entirely to the north of the equator. From south to north including Kashmir, it stretches from 8° north latitude to 37° north latitude, with the Tropic of Cancer cutting it roughly into two halves. West to east it stretches from about 66° 20' east longitude to 97° east longitude.

Broadly speaking, India is shut off from the mainland of Asia by the Himalaya Mountains, the highest mountain range in the world. Going from west to east along the country's land frontier are Pakistan, Chinese Turkestan, Tibet, China, Burma and Pakistan.

In the south, the country is surrounded on all sides by water—the Arabian Sea in the west, the Indian Ocean in the south and the Bay of Bengal in the east.

India is so vast and diversified that expressions like 'average rainfall', 'average temperature' have no meaning. The average annual rainfall in the Thar desert is 4 inches, while that in Cherrapunji is 425.

Similarly places in Kashmir have a minimum temperature of 49° F. while places in Rajasthan have recorded a maximum temperature of 120°

F. So one can only speak of local averages rather than of national averages.

Compared with the size of the country, the coast-line is short, as there are few bays or inlets. Hence there are also very few harbours. The fact is the west coast is rocky and the sea is deep near the coast, while in the east the sea is extremely shallow so that big ocean-going ships have to weigh anchor at some distance from the shore.

The only so-called natural harbours are Bombay and Goa, while Madras, Vishakapatnam and Port Okha are examples of purely artificial harbours built by human enterprise.

The principal ports in India are (going from west to east along the coast), Bedi Bunder, Port Okha, Porbandar, Surat, Bombay, Marmugao, Mangalore, Kozhikode (Calicut), Cochin, Alleppey, Quilon, Tuticorin, Dharmashkodi, Nagapattinam, Karikal, Cuddalore, Pondicherry, Madras, Masulipatnam, Kakinada, Vishakapatnam and Calcutta.

Of these, Marmugao belongs to Portugal while the rest are in the Republic of India.

It may also be mentioned that the new harbour at Kandla in Kutch is now in use.

MOUNTAIN WALL

India can be divided into three natural regions—1. the mountain wall, 2. the Plain of Hindustan, and 3. the Indian Plateau.

Let us take the mountain wall first. From the Pamir Knot in the far north two mountain ranges radiate one in the south-east and easterly direction called the Himalayas, and the other in a south-western direction reaching almost down to the sea, called the Sulaiman Range in the north and the Kirthar Range in the south.

In the east the mountain wall between India and Burma is called by different names in different places. In the north, for instance, it is known as the Patkoi Hills, further south as the Naga Hills. In Assam it is called Jaintia, Khasi and Garo. Southward are the Lushai Hills, then lastly there are the Arakan Yoma which finally reach the sea at Cape Negrais and continue in the Andaman and Nicobar Islands.

Of the various ranges which constitute the mountain wall of India the Himalayas are the most note-worthy. Extending like a scimitar for a distance of 1,500 miles along the northern frontiers of the country they form the loftiest mountain range in the whole world, and contain many of the highest mountain peaks, Mount Everest 29,141 ft., Mount Godwin Austen 28,250 ft., and Kanchenjunga 28,146 ft.

There are no easy ways in and out through the mountain wall which shuts off India from the rest of Asia, but there are a few difficult passes. In the very north are the Zojila Pass and the Shipki Pass which lead out of Kashmir and Punjab respectively. Then from Shipki right down to Darjeeling there is no route across the mountain wall. Across the Burma frontier again there are a few routes but they are of little use for purposes of communication.

The following is a more detailed description of the mountain region.

In the east on the border of Burma the mountain wall is much lower. Here it can more accurately be described as a range of hills rather than of mountains. This region is wet, forested and very thinly populated. The region round about Cherrapunji in Assam has the highest rainfall in the world.

Then from Darjeeling to Kashmir are the Himalayas proper, over 1,500 miles in length and 150 to 300 miles in breadth. The Himalayas are thus not a mountain chain in the proper sense of the word. They can be described

as a series of parallel but converging ranges intersected by valleys and big plateaux.

On the whole, the slopes of the mountains facing India are very steep, while those facing north are much more gentle. We say, on the whole, because though the eastern Himalayas (in West Bengal and Bihar) rise abruptly from the plains, in the west (western Uttar Pradesh and the Punjab) the rise from the plains is a little more gradual.

Hence the Himalayas themselves can be further sub-divided into three parallel zones, the Great Himalayas with an average elevation of 20,000 ft., always covered with snow; the Lesser Himalayas, the middle range, with an average elevation of 15,000 feet; and finally the Outer Himalayas lying between the Lesser Himalayas and the plains with an average elevation of about 3,500 feet.

The last are a sort of foot-hills to the Great Himalayas, and are usually described as forming the sub-Himalayan region, a region which extends from eastern Bihar to the Punjab all along the Plain of Hindustan.

In the north the altitude of the range is much lower: there are few peaks which exceed a height of 20,000 feet. The Punjab Himalayas are comparatively dry, and the snow-line is much higher than elsewhere. The northern slopes are bare while the southern slopes are forested.

Two of the longitudinal valleys which separate the mountain ranges are worth a note. They are the Vale of Kashmir and the valley of Katmandu in Nepal. Both the valleys are fertile, extensive and from a tourist's point of view a dream of beauty.

Thus it is clear the whole region possesses great variety in climate and a range of vegetation stretching from the tropics to the poles.

The north mountain wall has a tremendous influence on the physiography of the country. On the one hand it keeps out the bitterly cold winds which blow from Central Asia and Tibet during the winter, and on the other it intercepts the moisture laden winds which blow from the sea in the south so that the northern plains of the country have rain during the monsoon. Second, the melting snow and rain falling on the mountains go to form the chief source for the water of the rivers which flow from the Himalayas. Hence the rivers of Hindustan never go completely dry in the summer.

PLAIN OF HINDUSTAN

Geologically, the Ganges plain can be considered as the fore-deep of the mountains to the north of it. This fore-deep extends thousands of feet below the sea-level, though since its formation it has been filled in by deposit. In the east this deposit consists of alluvial material from the mountains, in the west it consists of material blown by the wind. All through the deposit is fine grained mud up chiefly of mud and sands.

The Plain of Hindustan extends from the Bay of Bengal in the east to the Pakistan frontier in the west; that is to say, it is about 1,600 miles long and from 150 to 200 miles broad. Throughout this vast tract of land not a hill can be seen. The slope from the mountains to the sea is so gradual that about 100 miles from the mouth of the River Ganges the surface is no more than 500 feet above sea-level.

The Plain of Hindustan is probably the most important part of the country. For one thing, it contains some of the richest soil in the world. Second, it is on the Plain of Hindustan that the whole drama of race conflict and race amalgamation was played out, a drama which finally shaped the political and cultural destiny of both India and its neighbour Pakistan.

* A committee to decide on a permanent capital is in being.

† Excluding Kashmir, the population of which was estimated at 4.41 millions in 1951. The population of India grows roughly at the rate of between four and five millions a year. The population in 1957 could therefore be roughly estimated to be in the neighbourhood of 361 millions.

Going into more detail the Plain of Hindustan is formed by the basins of three distinct river systems. In the far west are the Beas and Sutlej, tributaries of the Indus draining into the Arabian Sea. Further east is the River Ganges with its tributaries the Jamuna, Gogra, Rapti and Gandak which flows south-eastwards into the Bay of Bengal. The capital of the Indian Republic Delhi stands on the water-shed between the Indus and the Ganges river basins. The third of the three river systems, the Brahmaputra rises beyond the Himalayas, turns east and enters India at its eastern extremity and joins the Ganges before reaching the Bay of Bengal. The Brahmaputra has no important tributaries.

On the Himalayas these rivers are rushing, roaring torrents, cutting their way through steep and rocky gorges. But when they reach the vast plains they broaden out and wander slowly till they get to the sea. The land is so flat that the rivers sometimes leave their old beds and cut out new channels flooding the surrounding area.

The rivers of Hindustan are notable in three respects: 1. They give a constant supply of water, 2. The land through which they flow is broad, flat and fertile and eminently suitable for irrigation, 3. Because water flows perennially they are navigable through the greater part of the year.

As we go from west to east in the plain rainfall increases and so do the fertility of the soil and the density of population.

The whole plain can be sub-divided according to climate into a number of natural regions. There are first the plains of the north-west, comprising Punjab State, a dry area depending on the irrigation canals of the rivers Beas and Sutlej for its water. Second, there is the valley of the Upper Ganges covering the major part of Uttar Pradesh a comparatively dry region which depends for its cultivation on the irrigation canals of the Ganges and the Jamuna. Third, we have the valley of the middle Ganges embracing the State of Bihar, which is an intermediate zone, with both wet and dry cultivation. As we go further east we have the lower valley of the Ganges, which includes the whole of West Bengal, a wet region with considerable rainfall growing rice and jute.

INDIAN PLATEAU

The third of the natural regions into which the country is divided is called the Indian Plateau because it comprises a three-sided table-land covering the whole of the country in the south except for two narrow coastal strips in the east and the west.

The Indian Plateau is marked off from the Plain of Hindustan by a confused mass of hill ranges running with a general direction of east to west. Three of these ranges have been distinguished by the names of Vindhya, Satpura and Ajanta respectively. They stand from 1,500 feet to over 4,000 feet high and though pierced by road and railway at the present time were not easy to cross in the old days and thus formed a barrier of hill and jungle between the northern and the southern portions of the country.

The Indian Plateau is higher in the west and the south than in the east and north. Along the western and eastern edge of the plateau run the Western and Eastern Ghats. They start southward, from the extremities of the Vindhya mountain system and run along the western and eastern coasts of the country and unite to form a sort of upheaved angle towards their southern extremity.

The Western Ghats run through the States of Bombay and Mysore and ascend to an average height of about 3,000 feet while some of the peaks are anything between 5,000 feet and 9,000 feet high.

The Eastern Ghats stretch down the States of Andhra Pradesh and Madras and have an average elevation of 1,500 feet.

The inner triangular plateau which the Western and Eastern Ghats form far in the south is seamed with little ranges of hills exceeding 4,000 feet in height the best known among which are the Nilgiris. It is on the Nilgiris that Ootacamund the famous summer capital of Madras State stands.

Drainage Systems.—There are three systems of drainage in the Indian Plateau—one towards the north, the second towards the west and the third towards the east. The drainage from the northern or Vindhya edge of the plateau falls into the Ganges. Two rivers Narmada and Tapi carry the rainfall of the southern slopes of the Vindhya and Satpura mountains respectively in almost parallel lines into the Arabian Sea.

Further south, as we have already stated, the plateau is much higher in the west than the east. So the drainage has to make its way across the whole breadth of the plateau eastwards until it falls into the Bay of Bengal.

The most important rivers are the Mahanadi, the Godavari, the Krishna and the Cauvery. These rivers differ from the rivers of the Plain of Hindustan in three ways; 1. They are fed only by the monsoon rains and therefore do not yield a constant supply of water, 2. Their valleys are less suitable for irrigation, 3. And finally, they are not navigable for certain seasons in the year when parts of the river dry up.

From a geological point of view the Indian Plateau consists mainly of very old crystalline rocks—much older than the Himalayan fold mountains.

On some of the edges of the plateau in the north-east for instance, are areas of sedimentary rocks from which the country obtains most of its coal. About nine-tenths of the coal resources of India lie in Jharia in Bihar and Raniganj in West Bengal, though coal-bearing beds are also found in the valley of the Godavari and the northern slopes of the Vindhya.

The north-west of the plateau is covered by vast stretches of lava called the Deccan lavas. This region is one of the largest areas of lava in the world, covering as it does an area of 250,000 square miles with a total thickness of several thousand feet. In spite of the great extent of the lavas there are few or no signs of volcano.

In the rest of the Plateau valuable minerals occur here and there among old crystalline rocks. Gold is obtained in Mysore, manganese in Andhra, Mysore and Madhya Pradesh, copper and iron in Bihar and Orissa, mica in Andhra and the south-east. The point about diamonds is of some interest. They occur in sand-stones or conglomerate in Panna in Madhya Pradesh or Kurnool in Andhra, though no diamond bearing igneous rocks are found.

Natural Regions.—From the point of view of climate and vegetation the Indian Plateau can be divided into ten natural regions. There are first of all the coastal regions round the plateau. In the north covering whole of the State of Bombay is the Gujarat region, moderately dry and hilly in places. Further south is the west coast region covering part of Mysore and part of Kerala, narrow and wet.

In the east is the Carnatic or Tamil region comprising part of Madras, moderately wet but wider than in the west. In the north is what is called the Northern Circars region covering part of Andhra and part of Orissa, also moderately wet.

Then there are the dry regions lying to the north of the Vindhya mountains sloping downwards to the plains of the Ganges. There are the Thar or Great Indian Desert, the Rajasthan uplands dry and hilly, and the Central Indian Plateau comprising part of Madhya Pradesh.

Finally there is a third group of regions which can be distinguished, all lying in the Indian Peninsula proper. These are first the southern part of the plateau covering the whole of Mysore and parts of Madras and Andhra, dry, somewhat barren and thinly populated; second, the

Deccan lavas region in the north-west, containing parts of Bombay and Andhra Pradesh dry but with fertile black soil suitable for cotton and moderately thickly populated; and lastly, the north-eastern Plateau covering parts of Bihar, Madhya Pradesh and Orissa. This last mentioned region has moderate rainfall, is thinly populated, but thickly forested. The inhabitants are mainly concentrated in two river valleys.

Ceylon is the only important island lying off the coast of India to which it is joined by a line of sand flats collectively called Adam's Bridge. But Ceylon is politically separate from the sub-continent.

Two groups of very small islands in the Bay of Bengal, the Andamans and the Nicobars, and one group in the Arabian Sea the Laccadives are part of the Republic of India.

So is the quasi-island of Kutch off the Kathiawar Peninsula in western India. Kutch is a dry, rocky, treeless country.

VEGETATION

India is thickly populated and so over the greater part of the country the natural vegetation has been removed. The country has no distinctive botanical features peculiar to itself.

Where the rainfall is more than 80 inches a year there are evergreen forests on the hills. The wood from these forests is hard but the forests have not yet been commercially exploited. These evergreen forests are chiefly found on the slopes of the Western Ghats, the wetter eastern parts of the Himalayas up to a level of 5,000 feet, and in Assam.

Where the rainfall is less than 80 inches but more than 40 we have what are called the monsoon forests, so-called because the trees in these forests lose their leaves in the dry season. The monsoon forests are very valuable, because they contain two of the most useful kinds of tree, the teak and the sal. The teak is found chiefly in the western parts of the country while the sal is obtained in the lower slopes of the Himalayas and the north-east of the Plateau.

Where the rainfall is less than 40 inches, in the drier parts of the country we find small thorny trees, sometimes so small that they are more like bushes than like trees.

In the driest parts where the land is desert or semi-desert even bushes cannot grow. There we find plants with thick fleshy stems and long roots.

As we go up the mountains too the vegetation changes. In the higher reaches of the mountains, above 5,000 feet in the south, and 3,000 feet in the north the forests are similar to those found in temperate lands. Some of the trees have broad leaves and are like the oak while others are tall and have needle-shaped leaves like the pine.

On the highest parts of the mountains it is too cold and too dry for trees to grow and so we find only small bushes and short grass.

Along the sea-coasts and in the great river deltas where the land is flat and muddy grows a kind of tree called mangrove. These trees are most frequent in the deltas of the River Ganges where they are called Sundarbans.

There is not much grass land in India though in the hills in the monsoon grass patches can be seen.

The main cultivated plants include rice, wheat, pulses and grains. Among the important seeds grown are castor, sesamum and ground-nut.

The chief fruit trees include mango, coconut, arcanut and certain citrus fruit. Apples, peaches, pears, apricots and walnuts are confined chiefly to the Himalayan valleys.

There are tea plantations over large areas on the mountains in the north-east and south, while coffee, cardamom, pepper and rubber are extensively grown in the south. In some of the damper regions the cinchona is successfully cultivated.

ANIMALS

Just as natural vegetation has disappeared over the greater part of the land so have a great many wild animals. The lion, for instance, was not uncommon within historical times in the north. Today it is confined wholly to the Gir forest in Junagadh in Bombay State.

The most famous among the wild animals which survive are the tiger and the elephant. The leopard or panther is more common than the tiger and equally destructive of life and property. The cheetah or the hunting leopard is found only in the Deccan and is generally famed for hunting the antelope. Other wild Indian animals of the cat family are the marbled cat and the jungle cat.

In the open country-side wolves are plentiful and usually prey on sheep. The Indian fox is comparatively scarce but the jackal is very common. The wild dog is found in the denser angles and generally hunts in packs. Among their dogs are the pariah common in the south, and the greyhound used for hunting.

The black bear is common wherever rocky hills and forests occur. It lives on ants, honey and fruit and may often prove dangerous. The Himalayan bear which is found only in the north, stays in the mountains during the summer and comes lower down during the winter.

The rhinoceros found in the country are of three different types, two have a single horn and one has double. The rhinoceros is commonest in the Brahmaputra valley and in the Sundarans. With the rhinoceros might be mentioned the crocodile which can be very dangerous especially in the rivers of the north. The wild dog is also well-known in certain parts of the country and is very destructive of crops.

In the remote parts of the deserts of Kutch is found the wild ass but its contacts with man are few. Many wild varieties of sheep and goat are met with in the mountain ranges of the north.

The antelope proper is more widely distributed. On the coasts of Gujarat and Orissa, for instance, the herd of does accompanied by a single buck is common sight. The gazelle can also be found almost everywhere. The sambar is confined to hill forests, while the spotted deer is considered to be the most beautiful animal of the Indian angle.

In the Western Ghats, and in the hill jungles of Assam, Bombay and Madhya Pradesh is found the bison. It is a fierce animal and almost as dangerous to hunt as the tiger. Akin to the bison is the wild buffalo very common in Assam.

The rat and the mouse are a perpetual nuisance. The bandicoots some of which can be as long as 2 feet burrow under stores and godowns and are often deadly to plants, fruit or grain.

Reptiles abound in garden and jungle and even intrude into dwelling places specially during the rains. Thousands of people die every year in the country-side of snake-bite. The most dreaded of the reptiles is the cobra. There is another variety called Russell's viper whose bite is equally fatal. Generally speaking the salt-water snakes are dangerous while the freshwater ones are harmless. The bigger variety scorpion which abounds in parts of Madras and Andhra is a domestic terror.

Of all the wild animals in the country the elephant is the most interesting as well as the most useful. It generally lives in the wilder parts of the monsoon forests and being an intelligent animal can be trained to do heavy work such as dragging great logs of wood, or arranging them in neat piles. The elephant is also excellent as a transport animal as it can push its way through the thickest jungle where roads cannot be built.

Domestic Animals.—So much for the wild animals. Among the domestic animals the most useful are the oxen. It is estimated that there are about 150 million cattle in India. Milk is not a staple article of food and the oxen are chiefly used for ploughing or drawing carts. The bullocks are more valuable than the cows though in certain parts like Uttar Pradesh dairy-farming is an important industry. One handicap is that in most areas fodder has to be specially grown for the cattle.

There are 45 million buffaloes in the country. The buffalo is stronger than the bullock and is chiefly used for ploughing. The she-buffalo is the typical dairy animal.

There are 39 million sheep in the country. But they are a very poor specimen and do not give good wool or meat. Sheep

are most numerous in Madras and live chiefly on waste land which is not good enough for cattle. Goats (57 million) are found everywhere because it does not take much to keep them alive. They can feed on the poorest grass or shrub and so find enough to eat even in the driest parts of the country.

There are 1.5 million horses and ponies and about 80,000 mules and 1.2 million donkeys, most of which are used as draught animals. Mules, donkeys and camels are also used for purposes of transport: mules and donkeys on the hilly parts, and camels in the sandy desert.

The total number of live-stock in the country is 307 million.

There are also about 91 million fowls and about 6 million ducks.

The birds of India though not as gorgeous as those of some other tropical lands deserve mention. The parrot is easily the most beautiful of the Indian birds. The peacock is another beautiful bird, while the maina like the parrot lives happily in a cage and talks well. Of the vulture there are four varieties which include the common scavenger. There are many types of eagle too and some of the falcons can be trained for hawking. A bird much sought after for its plumage is the kingfisher and among the birds which are hunted for their flesh are pigeons, ducks, partridges, plover, quail and snipe. The jungle fowl, however, is not considered good for eating.

There are many beautiful butterflies in India, while among the more useful insects are the bee, the silk-worm, the *coccus lac*, that is, the insect which gives lac. Certain varieties of Indian moth and ant are very destructive. Locust invasions are not frequent but when they appear they leave complete destruction behind them. Mosquitoes abound everywhere.

In India fish is eaten fresh as methods of fish preservation are either primitive or not practised. Among the edible Indian fishes are the carp family and the cat fishes. But the most delicious is the hilsa which is also a rich food. A fish which is found in all hill streams is the mahseer.

† Data not available.

MONSOON RAINFALL SUMMARY--1957

In striking contrast with the monsoon of 1956 the 1957 monsoon had an abnormally short period of stay over the country. It advanced into most parts of the country about two weeks later and also withdrew about two weeks earlier than the normal time and thus its duration over most parts of the country was less than the normal period by about a month.

However, the activity of the monsoon, though of shorter duration, was sustained at an even pace and the associated rainfall was generally free from extreme variations, except for a brief

spell of torrential rains in Jammu-Kashmir in the last week of August.

The season's total rainfall was normal or only slightly below normal over most parts of the country.

As a result, however, of the early withdrawal of the monsoon, the rainfall during September was in moderate defect over most parts and, according to press reports, drought conditions prevailed over east Uttar Pradesh, Bihar and parts of Orissa, Gujarat and Madhya Pradesh due to failure of late monsoon rains.

The total rainfall during the season was in large excess in Jammu-Kashmir, in moderate

excess in the Bay Islands and in slight excess in Rajasthan and the State of Andhra Pradesh.

It was normal in Gangetic West Bengal, west Uttar Pradesh, the Punjab (I), west Madhya Pradesh, Saurashtra-Kutch, the Konkan, Maharashtra, Vidarbha, coastal Mysore, north Mysore and Kerala.

It was in moderate defect in west Rajasthan and in slight defect elsewhere in the country.

Averaged over the plains of India, the season's rainfall was 8 per cent in defect.

POPULATION*

Notes.—Unless otherwise stated the following article is based on the 1951 census which are the latest.

More detailed statistics where available of the States that underwent reorganization in November 1956 are given in 'Late Particulars.'

THE more important figures of the 1951 census are: Total population (excluding Kashmir and the Part B Tribal areas of Assam): 356,879,394; Males: 183,333,874; Females: 173,545,520.

Population of Jammu and Kashmir: 4.41 millions (estimate for March 1, 1951); Population of Part B Tribal Areas of Assam: 0.56 millions (unverified local estimate).

Total including Kashmir and Part B Tribal area: 361,151,669.

Increase over 1941: 42,113,014 or a mean decennial growth rate of 12.6 or percentage increase of 13.4 per cent.

Highest population: Uttar Pradesh (63,215,742); Lowest population Andamans and Nicobars (30,971).

Average density: 312 per square mile.

Highest density: Delhi (over 3,017); Lowest density: Andaman and Nicobar (10).

Registered birth-rate (1941-50): 27.2; Probable birth rate (1941-50): 40.

Registered death-rate (1941-50): 19.4; Probable death-rate (1941-50): 27.

Natural increase rate (1941-50): 13.

Infant mortality rate (1941-50): 127.1; Life expectancy: 32 years and 5 months; Life expectancy at the age 10 years: 39.

The birth-rates for 1953 and 1954 are 24.8 and 25.4. (The birth-rate for 1954 is for the former Part A States and Delhi and Coorg.).

The death-rates for 1953 and 1954 are 14.4 and 12.9. (The death-rate for 1954 is for the former Part A States and Delhi and Coorg.).

The infant mortality rates for 1953 and 1954 are 118 and 113. (The rate for 1954 is for the former Part A States and Delhi and Coorg.).

Literacy for India for 1951, 10.6.

Number of females to every 1,000 males: 947.

Total urban population: 62 millions (17.3 per cent); Total rural: 295 millions (82.7 per cent). Increase in urban population over 1941: 3.5 per cent. Highest urbanization: Delhi (83 per cent).

The total number of towns is 3,018 and of villages 558,089.

Number of cities with a population of one lakh and over: 75.

Percentage of population dependent on agriculture: 70.

If the population is divided into classes according to livelihood the percentage of each class would be as follows:—

Peasant proprietors, 47; Tenants, 9; Landless labourers, 13; Landlord or rentier, one; Industry or other non-agricultural production, 10; Commerce, 6; Transport, 2; Services and miscellaneous professions, 12.

1951 Census

The last census were taken at the beginning of 1951 (Feb. 9 to Mar. 1, 1951).

For the first time the census embraced the whole of India including the former Indian States, but excluding Jammu and Kashmir and the tribal areas of Assam. Jammu and Kashmir was omitted because of special conditions and the tribal areas of Assam because they had never been enumerated before.

Two main and two subsidiary questions in the census questionnaire related to "economic status" and "means of livelihood". These questions were: Are you a self-supporting person or a non-earning dependent or an earning dependent? If you are a self-supporting person, are you an employer or an employee or an independent worker or none of these? What is

the occupation or source of income which forms your principal means of livelihood? Have you a secondary means of livelihood? If so, what is it?

All useful data collected during the census operations will be recorded in a national register. Relevant parts of this register will be kept in every tahsil or sub-division or ward as a permanent and confidential record of the inhabitants. It is also proposed to bring out a census handbook for every district which the State Governments have been requested to publish. The State Governments have also been requested to include abstracts from these in school textbooks so that students could learn more about their region than they do at present.

1. GROWTH OF POPULATION

Year.	Population (in millions).	Increase (in millions).	Percentage Increase.
1951 ..	356.88	42.11	+ 13.4
1941 ..	314.77	39.25	+ 14.3
1931 ..	275.52	27.34	+ 11.0
1921 ..	248.18	—0.87	— 0.3
1911 ..	249.05	18.55	+ 5.8
1901 ..	235.50	—0.4	— 0.17
1891 ..	235.90	—	—

POPULATION 1952 to 1956

The following table shows the estimated mid-year population of the country from 1952 to 1956. The estimates are based on the mean rate of growth during the period 1941-50.

The figures include those for Sikkim and Kashmir.

1952	36.74 crores
1953	37.20 "
1954	37.68 "
1955	38.17 "
1956	38.65 "

2. POPULATION BY NATURAL REGIONS

Natural Region	Total Population	Males	Females	1941	Females per 1,000 males (1951)	Mean Decennial Growth Rate (1941-51)
INDIA	356,879,394	183,333,874	173,545,520	314,766,380	947	+12.5
1. Himalayan Region	17,042,697	8,982,675	8,060,022	14,827,606	897	+13.9
2. Northern Plains Region ..	139,398,043	73,022,392	66,375,651	125,072,878	909	+10.8
3. Peninsular Hills and Plateau Region	108,598,645	55,111,536	53,487,109	96,220,094	971	+12.1
4. Western Ghats and Coastal Region	39,926,793	20,371,388	19,555,405	32,518,913	960	+20.5
5. Eastern Ghats and Coastal Region	51,832,336	25,798,608	26,033,728	46,093,121	1,009	+11.7
Andaman and Nicobar Islands ..	30,971	19,055	11,916	33,768	625	— 8.6

* There have been no fresh census after the reorganization of States on 1st November, 1956.

In general out of the 28 States that existed before the reorganization nine States are not affected by the reorganization. These nine are: Assam, Orissa, Uttar Pradesh, Kashmir, Delhi, Himachal Pradesh, Manipur, Tripura and Andamans.

The present Punjab is formed by a simple amalgamation of the former Punjab and PEPSU. Hence some figures for the present Punjab can be obtained by the addition of the figures for the former Punjab and PEPSU.

The State of Rajasthan is affected by the reorganization only to a very small extent.

In the tables the States that went out of existence on 1st Nov. 1956 or were drastically reorganized as from that day are indicated with a star or dagger.

The figures are the 1951 census figures.

In the India totals the figures for Chandernagore have been added as follows: total, 49,909; males, 28,220; females, 21,689.

Unless otherwise stated, Mairas as given here should be taken as including Andhra as when the census were taken Andhra was not separated from Madras.

Figures for Himachal Pradesh and Bilaspur are given separately, though from 1st July, 1954 they formed a single administrative unit.

From October 1953 the seven talukas of Bellary District have been part of Mysore State, and have formed a District called Bellary in that State; the population of the District is 773,712. Before October 1953, that is when the census were taken, it was part of Madras.

District figures are given under each State.

The mean decennial growth rate is based on the mean population of the two census.

POPULATION

7

AREA, POPULATION, SPECIAL GROUPS

The following table gives the population, area, etc. of the States and territories forming the Indian Union :

	Area in sq. miles (a)	Population	Density of population	Anglo-Indians —1951 census (a)	Scheduled Castes—1951 estimates	Scheduled Tribes—1951 estimates
INDIA	12,66,900	36,11,51,669	312(c)	1,11,637	5,51,70,886	2,25,11,854
STATES						
Andhra Pradesh	1,05,968	3,12,60,133	295	5,502	44,15,995	11,49,919
Assam	45,767	87,72,874	178	1,055(b)	4,24,044(b)	17,61,434(b)
Bihar	76,164	3,87,84,172	572	4,379	49,13,990	38,80,097
Bombay	1,90,919	4,82,65,221	253	7,867	52,02,077	37,43,408
Jammu and Kashmir	85,861	44,10,000	51	—	—	—
Kerala	16,035	1,35,49,118	901	14,947	12,07,294	1,34,757
Madhya Pradesh	1,71,201	2,60,71,637	152	2,173	39,12,205	48,44,128
Madras	60,110	2,99,74,936	598	22,277	53,81,836	1,36,376
Mysore	74,326	1,94,01,193	261	15,569	25,83,142	80,402
Orissa	60,136	1,46,45,946	244	485	26,29,250	30,09,580
Punjab	47,456	1,61,34,890	340	1,174	34,90,983	2,661
Rajasthan	1,32,077	1,59,70,774	121	1,038	25,02,202	17,74,278
Uttar Pradesh	1,13,409	6,32,15,742	558	6,343	1,31,00,398	—
West Bengal	33,945	2,63,01,992	775	31,922	47,43,713	15,66,868
TERRITORIES						
Andaman and Nicobar Islands ..	3,215	30,971	10	—	—	—
Delhi	578	17,44,072	3,017	812	2,68,530	—
Himachal Pradesh	10,904	11,09,466	102	10	3,19,972	27,928
Laccadive, Minicoy and Amindivi Islands	10	21,035	2,144	—	—	13,486
Manipur	8,628	5,77,635	67	—	28,647	1,94,239
Tripura	4,032	6,39,029	158	94	46,608	1,92,293

(a) Provisional. (b) Inclusive of Naga Hills District now in the Naga Unit. (c) In working out the figure the area and population of Jammu and Kashmir and of the Part B Tribal areas of Assam have not been taken into account.

3. POPULATION BY ZONES AND STATES

Below we give the figures for zones and also for the States that were not affected by the reorganization (Nov. 1956) which took place after the census were taken. The figures, for the present Punjab could be got by adding where appropriate the figures for the old Punjab and PEPSU.

Zone and State	Land area in square miles	Total Popula- tion	Males	Females	1941	Females per 1,000 males (1951)	Mean Decennial Growth Rate (1941-51)*	Density per square mile
INDIA	1,269,640	356,870,394	183,333,874	173,545,520	314,766,380	947	+ 12.5	303
I—North India	113,409	63,215,742	33,098,866	30,116,876	56,531,848	910	+ 11.2	556
1. Uttar Pradesh	113,409	63,215,742	33,098,866	30,116,876	56,531,848	910	+ 11.2	556
II—East India†	261,657	90,080,597	46,315,658	43,764,639	80,873,038	945	+ 10.8	106
1. Assam††	85,012	9,048,707	4,812,166	4,231,541	7,598,037	879	+ 17.4	67
2. Manipur	8,628	577,635	283,685	293,950	512,069	1,036	+ 12.0	158
3. Tripura	4,032	639,029	335,589	303,440	513,010	904	+ 21.9	50
4. Sikkim	2,744	137,725	72,210	65,515	121,520	907	+ 12.5	—
III—South India	168,009	75,600,804	37,822,542	37,778,262	64,837,350	999	+ 15.3	—
IV—West India	149,609	40,681,115	20,982,281	19,678,834	33,249,726	938	+ 20.1	—
V—Central India	289,399	52,267,959	26,497,524	25,770,435	47,273,886	973	+ 10.0	—
VI—North-West India	284,342	34,972,597	18,569,728	16,402,869	31,966,764	883	+ 9.0	—
1. Delhi	578	1,744,072	986,638	757,534	917,939	768	+ 62.1	3,017
2. Bilaspur†††	453	126,099	64,738	61,361	110,336	948	+ 13.8	278
3. Himachal Pradesh	10,451	988,367	514,765	468,602	947,875	910	+ 3.7	94
Andaman and Nicobar Islands	3,215	30,971	19,055	11,916	33,768	625	— 8.6	10

* The mean decennial rate is based on the mean population of the two censuses, and not like the 'percentage variation' on the population according to the earlier census.

† Add Chandernagore: Total: 49,909; Males: 23,220; Females: 21,689.

†† Figures for Part B Tribal areas are not included. But area includes NEFA and the Naga Unit.

††† Merged into Himachal Pradesh after 1st July, 1954.

FUTURE GROWTH

Some calculations have been made about this from 1951 to 1981.

The estimate based on the assumption that the mean decennial rate of growth will be the same as that of the average of 1921-50 will be the lower limit, and the estimate based on the assumption that the mean decennial rate of growth will be the same as during the last decade will be the upper limit.

The figures given below are in millions :

	lower limit	upper limit
1951	361.3	361.3
1961	407.7	411.9
1971	458.5	469.7
1981	527.6	535.5

Making allowance for mortality and maternity rates the trends may be estimated as follows: The figures are in crores: 1951—36; 1961—41; 1971—46; 1981—52.

DISPLACED PERSONS

Position in March 1957: Total 88.50 lakhs. From W. Pakistan 47.40 lakhs. From E. Pakistan 41.10 lakhs.

1951 Census

The following particulars from the Census Report on Displaced Persons will be of interest (the census were taken in 1951):—

Total: 7,295,870; Males: 3,900,034; Females: 3,395,836.

From West Pakistan: 4,699,492; From East Pakistan: 2,596,300; Unspecified: 46,988.

The figures for individual States in West Pakistan are as follows: N.W.F.P.: 195,059; Sind: 776,220; Baluchistan: 24,945; West Punjab: 3,407,695; Pakistan States: 252,956; Origin unspecified: 42,608.

The figures for distinct areas in East Pakistan are as follows: East Bengal: 2,406,163; Sylhet (Assam): 137,414; Origin unspecified: 5,793.

The sex ratio among displaced persons is 871 females for every 1,000 males. The figure for displaced persons from West Pakistan is 873 females, from East Pakistan 871.

For the country as a whole, the displaced persons number 21 per 1,000. The principal concentrations are (the figures are for 1,000 of local population): Delhi 397; Punjab 231; Tripura 188; Chandernagore 115; Ajmer 115; PEPSU 113; West Bengal 92; Andamans 51.

The distribution of displaced persons by age-groups is as follows:—

0—	47,931
1—4	412,193
5—14	1,935,781
15—24	1,512,466
25—35	1,195,683
35—44	841,987
45—55	602,548
55—64	366,653
65—74	176,689
75 and over	82,118
Age not stated	10,305

The distribution of displaced persons by livelihood classes is as follows. The first figure shows the number of males and the second the number of females:—
 Cultivators of land wholly or mainly owned and their dependants: 212,591; 191,646.
 Cultivators of land wholly or mainly un-owned and their dependants: 686,705; 605,814.
 Cultivating labourers and their dependants: 167,304; 138,057.
 Non-cultivating owners of land, agricultural rent receivers and their dependants: 32,250; 30,225.
 Production other than cultivation: 461,626; 387,728.

Commerce: 922,939; 802,763.

Transport: 168,189; 140,877.

Other services and miscellaneous sources: 1,174,313; 1,061,408.

Distribution by civil condition is as follows:—
 Unmarried: 1,923,908 (males); 1,315,963 (females).

Married: 1,719,149 (males); 1,650,193 (females).

Widowed or Divorced: 182,860 (males); 392,261 (females).

The literacy is indicated by the following figures:—

Literates: 1,768,022 (males); 912,567 (females).

Illiterates: 2,057,895 (males); 2,445,850 (females).

The urban-rural distribution in lakhs is 33 lakhs in villages and 39 lakhs in towns.

The movement of persons from West Pakistan by period is as follows. The number is for every 1,000 displaced persons:—

1947 August: 292; 1947 September: 214; 1947 October: 133; 1947 November: 83; Rest of 1947: 51; 1948 January-June: 88; Rest of 1948: 27; Rest upto February 1951: 18.

The movement from East Pakistan for 1,000 displaced persons:

1946: 23; 1947: 182; 1948: 193; 1949: 128; 1950: 459; Rest upto February 1951: 51.

FOREIGNERS

The number of foreigners in India on December 31, 1952 was 77,865 excluding U.K. and Commonwealth citizens. They were distributed according to nationality as follows: Chinese, 23,481; Afghans, 7,592; U.S. nationals, 5,995; Iranians, 4,464; Tibetans, 19,549; Germans, 1,536; French, 1,351; Swiss, 768; Dutch, 816; Russians, 424; Belgians, 595; Japanese, 632.

The total number of foreigners in India on Dec. 1, 1956 was 44,557. Bombay had the largest number 15,581; next, W. Bengal 13,023; third, Bihar 2,757.

Of the 28,746 non-Commonwealth foreign citizens, as on 1st Jan. 1957, 22,190 were traders, 1,663 were students and 4,893 missionaries.

4. RELIGIOUS GROUPS

The ratio of each religious group to the total population in the country is as follows (percentage): Hindus, 84.99; Muslims, 9.93; Christians, 2.80; Sikhs, 1.74; Jains, 0.45; Buddhists, 0.06; Zoroastrians, 0.03; Other tribal religions, 0.47; other non-tribal religions, 0.03.

The following table shows the position of religious groups in India in the States which were unaffected by the reorganization that took place (Nov. 1956) after the 1951 census.

The figures for the present Punjab could be got by adding the figures for the old Punjab and PEPSU.

State	Hindus	Sikhs	Jains	Buddhists	Zoroastrians	Muslims	Christians	Jews	Other Tribals	Other Non-Tribals
Assam	5,894,733	4,107	4,245	22,675	27	1,996,456	585,399	209	527,712	8,144
Orissa	14,318,411	4,163	1,248	969	181	176,338	141,934	72	2,576	54
Punjab	8,176,430	3,831,983	37,518	1,441	77	229,080	95,293	150	—	631
Uttar Pradesh	53,762,925	197,612	97,744	3,221	1,258	9,028,992	123,876	34	—	80
PEPSU	1,704,340	1,721,935	7,578	219	93	55,913	3,565	9	—	19
Delhi	1,467,854	137,096	20,174	503	164	99,501	18,685	90	—	5
Himachal Pradesh and Bilaspur	1,088,841	5,019	34	2	—	15,253	317	—	—	—
Manipur	347,325	50	150	33	1	37,197	68,394	—	124,485	—
Tripura	480,662	35	36	15,403	1	136,940	5,262	—	690	—
Andaman and Nicobar	9,294	126	1	1,604	2	4,788	9,494	1	20	5,646
Sikkim	97,863	18	19	39,397	—	124	304	—	—	—
India††	303,186,986	6,219,134	1,618,406	180,767	111,791	55,400,117	8,157,765	26,781	1,661,897	47,148

† Persons whose enumeration records were destroyed by fire—268,602.

†† The Census booklets available at the time of preparing the article did not give the all-India totals. The figures given here are the ones worked out by adding the figures for individual States.

5. SCHEDULED CASTES AND TRIBES

Statistics about three Special Groups are given below. The Special Groups which are four in number are the Scheduled Castes, the Scheduled Tribes, the Backward Classes and the Anglo-Indians.

The main results for the Scheduled Castes and Tribes for the country as a whole are shown in the table below:

Note that there is a discrepancy between the figures here and those on page 7. The latter were published in 1956 after the reorganization of States, but are also based on the 1951 census. The discrepancy could be ascribed to a different basis of reckoning.

Groups	Number (in Lakhs)			Number per 1,000 persons		
	Population	Scheduled Castes	Scheduled Tribes	Population	Scheduled Castes	Scheduled Tribes
INDIA	3,567*	513	191	1,000	144	54
.. .. .	2,948	462	186	1,000	157	63
.. .. .	618	51	5	1,000	83	8
All Agricultural Classes	2,491	381	173	1,000	153	70
All Non-Agricultural Classes	1,076	132	18	1,000	123	17
Agricultural Classes:						
I. Cultivators of land, wholly or mainly owned and their dependants	1,674	174	125	1,000	104	75
II. Cultivators of land, wholly or mainly unowned and their dependants	318	56	19	1,000	176	59
III. Cultivating labourers, and their dependants	448	148	28	1,000	330	63
IV. Non-cultivating owners of land, agricultural rent receivers and their dependants	53	3	1	1,000	61	12
Non-Agricultural Classes:						
Persons (including dependants) who derive their principal means of livelihood from:—						
V. Production other than cultivation	377	53	7	1,000	142	20
VI. Commerce	213	9	1	1,000	44	6
VII. Transport	56	6	1	1,000	110	11
VIII. Other Services and miscellaneous sources	430	64	9	1,000	147	20

* This does not include 1.35 lakhs for whom enumeration records were destroyed by fire in the Census Tabulation Office at Jullundur. Classification details for these persons are not available. Also it does not cover Chandernagore or Sikkim, for which the figures are given below.

The figures for Scheduled Castes and Tribes for Chandernagore and Sikkim are as follows (absolute numbers) :

State		Castes		Tribes	
		Males	Females	Males	Females

Delhi	812	142	670
Bilaspur†	4	1	3
Himachal Pradesh	6	1	5
Andaman and Nicobar Islands	—	—	—

† Merged with Himachal Pradesh after 1st July, 1954.

7. RURAL AND URBAN POPULATION †

Below we give figures for the States which were not affected by the reorganization of States (Nov. 1956) which took place after the census of 1951.

The figures for the present Punjab could be obtained where appropriate by adding the figures for the old Punjab and PEPSU.

State	Total	Rural	Urban	Percentage of Rural	Percentage of Urban
INDIA	356,879,394	295,004,271	61,875,123	83	17
Assam	9,043,707	8,629,289	414,418	95	5
Orissa	14,645,946	14,051,876	594,070	96	4
Punjab	12,641,205	10,240,273	2,400,932	81	19
Uttar Pradesh	63,215,742	54,590,043	8,625,699	86	14
Patiala and East Punjab States Union	3,493,685	2,828,175	665,510	81	19
Bilaspur††	126,099	122,354	3,745	97	3
Delhi	1,744,072	306,938	1,437,134	17	83
Himachal Pradesh	983,367	941,966	41,401	96	4
Manipur	577,685	574,773	2,912	99	1
Tripura	639,029	596,434	42,595	93	7
Andaman and Nicobar Islands	80,971	22,957	58,014	74	26
Sikkim	137,725	134,981	2,744	98	2

† It should be pointed out here that whether an area is urban or rural depends on a number of factors of which population is only one. Also these factors vary from State to State.

†† Merged with Himachal Pradesh after 1st July, 1954.

The population of villages and towns respectively grew as follows from 1921 to 1951 (figures in lakhs):

Year	Population		Rate of Growth	
	Villages	Towns	Villages	Towns
1921	2,199	282	—	—
1931	2,420	334	+10.1	+18.4
1941	2,710	438	+12.0	+31.1
1951	2,950	619	+ 8.9	+41.8

The population of the 10 largest cities (town-groups) has grown as follows (figures in lakhs):

City	1951	1941-50	1931-40	1901-30
Calcutta	45.8	—	—	6.0
Bombay	28.4	11.4	3.9	4.6
Madras	14.2	6.4	1.8	1.4
Delhi	13.8	7.2	2.2	2.3
Hyderabad	10.9	3.5	2.7	0.2
Ahmedabad	7.9	2.0	2.8	1.3
Bangalore	7.8	3.7	1.0	1.5
Kanpur	7.1	2.2	2.4	0.4
Poona	5.9	2.4	0.8	0.9
Lucknow	5.0	1.1	1.1	0.2

* Area (92,780 sq. miles) and population of the State of Jammu and Kashmir and population of part of Part B Tribal Areas of Assam not included.

NO. OF TOWNS AND VILLAGES

Zone	Total number of inhabited towns and villages	Total Population
INDIA	561,107	356,879,394
North India	112,208	63,215,742
East India	185,617	90,130,206
South India	58,441	75,600,804
West India	40,127	40,661,115
Central India	102,579	52,267,959
North-West India ..	61,934	34,972,597
Andaman and Nicobar Islands	201	30,971

TOWNS AND VILLAGES WITH POPULATIONS 500 TO 100,000

Size	Number	Males	Females
Less than 500	380,020	39,956,302	38,391,389
500—1,000	104,288	37,162,941	35,767,815
1,000—2,000	51,769	36,194,476	34,962,006
2,000—5,000	20,508	30,023,792	29,085,181
5,000—10,000	3,101	10,540,836	10,212,900
10,000—20,000	858	6,016,525	5,664,243
20,000—50,000	401	6,240,152	5,563,895
50,000—100,000	111	4,020,803	3,634,715

There can be a four-fold classification of towns—cities (population of one lakh and over), major towns (population 20,000 to one lakh), minor towns (population 5,000 to 20,000), townships (under 5,000).

The average number of villagers per village is 529.

The percentage of rural population living in small villages (under 500) is 26.5; in medium-sized villages (500-2,000) is 48.8; in large villages (2,000-5,000) is 19.4; in very large villages (over 5,000) is 5.3.

A house is a building in which people live. A household is a group of people who live together and take their food from a common kitchen.

There are 112 households in every 100 houses of a typical Indian village, and 124 households in every 100 houses of a typical Indian town.

In every 100 households in a village there are 491 persons, in every hundred households in the town the number is 471.

In every 100 houses in a village 550 people live, in every 100 houses of a town 584.

Out of 491 people in every 100 rural households 252 are males and 239 are females. Out of 471 people in every 100 urban households 248 are males and 223 are females.

We can have a four-fold classification of households—small household (3 persons or less), medium (4, 5 or 6), large (7, 8 or 9), very large (10 or more).

The number of different types in 100 households in a typical village and a typical town will be as follows:

	Village	Town
Small	33	38
Medium	44	41
Large	17	16
Very large	6	5

The pattern of household relationship in a 100 households with 487 persons in them will be as follows:

	Number
Heads of households	100
Wives of heads	71
Sons of heads	108
Daughters of heads	81
Male relatives other than sons	48
Female relatives other than daughters	72
Persons unrelated to heads	7

Total .. 487

The figures for the new Punjab could be obtained by adding where appropriate the figures for the old Punjab and PEPSU.

† Chandernagore with a population of 49,009 is not included in this classification. The population is wholly urban.

†† Merged with Himachal Pradesh on 1st July, 1954.

LIVELIHOOD PATTERNS*

Out of a total population of 3,566 lakhs, 1,044 lakhs (29.3 per cent) are self-supporting; 2,143 lakhs (60.1 per cent) are non-earning dependents; and 379 lakhs (10.6 per cent) earning dependents.

Out of a total agricultural population of 2,490 lakhs, 710 lakhs are self-supporting; 1,470 lakhs are non-earning dependents; and 310 lakhs earning dependents.

Out of a total non-agricultural population of 1,076 lakhs, 334 lakhs are self-supporting; 673 lakhs are non-earning dependents; and 69 lakhs earning dependents.

The table below gives a comprehensive picture of self-supporting and dependent people and the percentage.

Under Agriculture Class I is owner-cultivator, Class II tenant-cultivator, Class III cultivating labourer, Class IV agricultural rentier.

Class V are persons engaged in non-agricultural production together with their dependents, Class VI persons in commerce and their dependents, Class VII in transport and their dependents, Class VIII in miscellaneous income recipients (non-agricultural rentiers, pensioners etc.).

The second column shows self-supporting persons; the third non-earning dependents; the fourth earning dependents; the fifth total; the sixth percentage to general population including dependents.

The figures are in lakhs.

Category	2	3	4	5	6
Class I	457	1,001	215	1,673	46.9
Class II	88	189	39	316	8.8
Class III	149	247	52	448	12.6
Class IV	16	33	4	53	1.5
Total Agricultural classes..	710	1,470	310	2,490	69.8
Class V	122	223	32	377	10.5
Class VI	59	145	9	213	6.0
Class VII	17	37	2	56	1.6
Class VIII	136	268	26	430	12.1
Total non-agricultural classes	334	673	69	1,076	30.2
General Population ..	1,044	2,143	379	3,566	100.0

The following figures show the number of dependents supported by 100 persons in each of the eight categories. The first figure in brackets shows the number of non-earning dependents and the second figure the number of earning dependents:

Class I—266 (219.47); Class II—259 (215.44); Class III—201 (166.35); Class IV—231 (206.25); All Agricultural classes—251 (207.44).

Class V—211 (185.26); Class VI—261 (246.15); Class VII—230 (218.12); Class VIII—216 (197.19); All non-agricultural classes—222 (201.21).

General Population—242 (205.37).

BROAD CONCLUSIONS

The broad conclusion of this survey is that the average self-supporting person uses his income to support himself and at least two others.

Roughly one among three self-supporting persons also provides, in addition, partial support for one earning dependent.

During the twenty years following 1931 population grew faster than cultivation. But the relative weight of dependence on agriculture for gainful employment has not declined in the

country as a whole. It is probable that it has increased slightly.

On the whole, there has been a general increase of non-earning dependency. The increase in absolute numbers of non-earning dependents has exceeded the entire increase of rural population in India as well as in each of the five zones out of six.

The increases in the percentages are not accompanied by any material change in sex ratio or age structure. They must, therefore, be regarded as a rough index of the growth of unemployment in different parts of the country.

There has been a general increase throughout the country in the number of cultivators and cultivating labourers working on the same area (say 100 acres) of cultivated land.

Material changes have occurred in the percentage of cultivating labourers to all workers in land (i.e. cultivating labourers and cultivators including their unpaid family helpers).

The fall is the natural result of increase in the number of cultivators and members of their families occupying the same area of cultivated land. The cultivators' need for employing labourers diminishes, as also their capacity to pay for their services.

Other reasons for the fall may be that labourers were unwilling to acknowledge as labourers to guard against the accrual of occupancy rights in land.

There were also many people who partook of the characteristics of both cultivator and cultivating labourer and whose classification was open to doubt.

It is also possible that because of legislation and the general social climate a conversion has taken place of many persons from the status of cultivating labourer to that of cultivator.

Among cultivators the relative proportion of cultivator owners has increased to some extent.

Agricultural rentiers formed only a small proportion of the people in 1931, and this proportion has become still smaller in 1951.

* For detailed tables see next page.

11. LIVELIHOOD PATTERNS (AGRICULTURAL CLASSES)

Delhi	2,505	6,074	1,421	3,299	6,364	337	166	5,612	4,151	71

The figures for the new Punjab could be obtained by adding where appropriate the figures for the old Punjab and PEPSU.

SELF-SUPPORTING PERSONS

There are 1,044 lakhs of self-supporting persons in the country or 29.3 per cent of the population.

The table below shows the rural-urban and sex-wise break-up.

Rural-Urban	Number (in lakhs)	Percentage
Rural males	706	47.1
Urban males	166	49.8
Rural females	151	10.4
Urban females	21	7.4
Total	1,044	29.3

Out of 1,044 lakhs of self-supporting persons 710 lakhs or 68.1 per cent are agriculturists, and 334 lakhs or 31.9 per cent are non-agriculturists.

Rural-Urban break-up	Agriculturists		Non-agriculturists	
	Number	Percentage	Number	Percentage
Rural males	566	80.2	140	19.8
Urban males	19	11.4	147	88.6
Rural females	121	80.2	30	19.8
Urban females	4	19.7	17	80.3
Total	710	68.1	334	31.9

The self-supporting agriculturists can be divided into four classes. The number in the second column in the table below is in lakhs, the number in the third column is the percentage of all agriculturists, the number in the last is percentage of all self-supporting persons.

Category	Number (lakhs)	Percentage of agriculturists	Percentage of all self-supporting persons
Cultivators of land wholly or mainly owned	457	64.4	43.8
Cultivators of land wholly or mainly un-owned	88	12.8	8.4
Cultivating labourers	149	21.0	14.3
Non-cultivating owners of land and other agricultural rent receivers	16	2.3	1.6
Total	710	100.0	68.1

Another way of describing Classes I and II is as owner-cultivators and tenant-cultivators. Thus the number of owner-cultivators is 457 lakhs and the number of tenant-cultivators is 88 lakhs. The total number of cultivators can thus be put down as 545 lakhs.

The 334 lakhs self-supporting non-agriculturists can also be divided into four sections. The number in the second column is in lakhs, the number in the third shows the percentage of all self-supporting non-agriculturists, the fourth the percentage of all self-supporting persons.

Categories	Number (lakhs)	Percentage of self-supporting non-agriculturists	Percentage of all self-supporting persons
Employers	11	3.3	1.1
Self-employed other than employers	165	49.4	15.7
Employees	143	44.3	14.2
Non-agricultural rentiers, pensioners and miscellaneous income-receivers	10	3.0	0.9
Total	334	100.0	31.9

The employees are a clear minority. Self-employed persons are more numerous than employers and employees combined.

If we deduct rentiers from both agriculturists and non-agriculturists we get the following classification of income-earners. The number in the following table is in lakhs.

Nature of income	Cultivation	Industries and Services	Total
Net profits	545	176	721
Wages and salaries	149	148	297
Total	694	324	1,018

Earners of profits are much more than twice as numerous as earners of wages and salaries.

In Industry

The 324 lakhs self-supporting persons engaged in industries and services other than cultivation may be divided as follows :

Categories	Number (in lakhs)	Percentage
Primary industries other than mining and quarrying (0)	24.0	7.4
Mining and quarrying (1)	5.7	1.8
Processing and manufacture (foodstuffs, textiles, leather) (2)	55.1	17.0
Processing and manufacture (metals, chemicals) (3)	12.4	3.8
Processing and manufacture not elsewhere specified (4)	24.3	7.5
Construction and utilities (5)	15.9	4.9
Commerce (6)	59.0	18.2
Transport, storage and communications (7)	19.0	5.9
Health, education and public administration (8)	32.9	10.2
Services not elsewhere specified (9)	75.4	23.3

The number engaged in some of the sub-divisions of the above main divisions is as follows (the figure is in lakhs) :

Plantations—10.6; Stock-raising—6.3; Fishing—4.2; Forestry (wood cutting, collection of forest produce not elsewhere specified)—2.5; Rearing of small animals and insects—27 (in thousands); hunting—9 (in thousands).

Figures for men engaged in mining (shown below) are given in thousands except for coal-mining, and mining of stone, clay and sand which are in lakhs :

Coal-mining—3.1; Mining of stone, clay, sand—1.2.

Iron ore—9; metals other than iron—57; petroleum—3; mica—33; salt, saltpetre and saline substances—22; non-metallic minerals—11. Total for this group—135.

The figures for persons engaged in various industries given below are in lakhs :

Divisions 2, 3, 4

Milling of cereals, pulses, hand pounding of rice, dehulling, grinding of food grains—4.0; Vegetable oil and dairy products—2.7; Sugar—1.4; Beverages (breweries, distilleries, toddy drawers, aerated waters)—1.6; Tobacco (preparation of raw leaf, makers of bldis, cigarettes, etc., snuff)—3.6; Other food industries—1.8; All food industries (except cultivators, housewives, hotel workers)—15.

Cotton textiles—20.6; wearing apparel (except footwear)—6.5; Other textiles (jute, wool, silk, hemp, flax, rayon, rope, twine, etc.)—7.1; Leather (leather products, footwear)—5.8.

Manufacture of transport equipment—2.2; Machinery (other than electrical) including engineering workshops—1.2; Basic manufacture of iron and steel—1.1; Manufacture of metal products otherwise unclassified—6.2.

Manufacture of wood and wood products (carpenters, turners, etc.)—10.4; Manufacture of non-metallic mineral products (potters, makers of earthenware, porcelain, crockery, glass bangles, etc.)—4.5.

Division 5

Total for construction and utilities (15.9).

Division 6

The total number engaged in commerce is 59 lakhs.

They fall into three groups: Retail trade (51.1); Wholesale trade (4.6); Money-lending, banking, insurance, real estate (3.3).

Among men in retail trade: Selling food stuffs (22.5); Selling fuel (1.9); Selling textiles and leather goods (5.0).

Division 7

Total for Transport, Storage and Communications (19.0); Transport by road (8.9); By railway (5.7); By water (2.2); By air (13 thousand).

Division 8

Total for Health, Education and Public Administration (32.9).

Medical and health services (3.8).

Total for educational services and research (7.4); of these stationed in towns (3.7); 1 villages (3.7).

These were divided as follows* : Professor-lecturers, teachers, research workers, employees in universities, colleges, research institution (39,256); other professors, lecturers, teacher (549,544).

Total for public administration (21.0). These may be divided as follows :

Employees of Central Government (5.03); Total employees of State Governments (14.20); Employees of District Boards, Municipalities and other local bodies (2.24).

These may be sub-divided as General administration (8.09); Police (other than village watchmen) (3.80); Village establishments including village watchmen (2.37); Employees of local bodies (2.24).

Division 9

Services not elsewhere specified (75.4). Of these nothing is known of 37.3 except that they are self-supporting.

The following para. gives the details about the rest of the 38.1 lakh persons (the number is in thousands) :

Domestic service (1,424); Laundries and laundry services (565); Barbers and beauty shops (511); Religious, charitable and welfare services (389); Legal and business services (230); Recreation services (214); Hotels, restaurants and eating houses (458). Arts, letters and journalism (39).

The following table shows the position in industries and services in some States in a sample of 10,000 self-supporting persons :

State.	0-1-Industry not elsewhere specified.	1-Mining and Quarrying.	2-Process- ing and Manufacture of Foodstuffs, Textiles, Leather and products thereof.	3-Process- ing and Manufacture of Metals Chemicals and products thereof.	4-Process- ing and Manufacture not elsewhere specified.	5-Construction and utilities.	6-Commerce.	7-Transport, Storage and Communications.	8-Health, Education and Public Administration.	9-Service not elsewhere specified.

The figures for the new Punjab could be obtained by adding where appropriate the figures for the old Punjab and PEPSU.

* Excludes five Districts in Bihar.

DEPENDENTS

Out of 3,566 lakhs 2,143 or 60.1 per cent have been classified as non-earning dependents.

The table below shows the rural-urban and the sex-wise break-up of non-earning dependents:

Rural-Urban	Number (in lakhs)	Percentage
Rural males ..	674	45.0
Urban males ..	152	45.6
Rural females ..	1,065	73.5
Urban females ..	252	88.1
	2,143	60.1

There are 379 lakhs or 10.6 per cent earning dependents in the country. They are dependents in the sense that left to themselves they cannot support themselves.

The table below shows the rural-urban and sex-wise break-up of earning dependents.

Rural-Urban						Number (in lakhs)	Percentage
Rural males	119	7.9
Urban males	15	4.6
Rural females	232	16.0
Urban females	13	4.5
						379	10.6

LITERACY AND EDUCATIONAL STANDARD

The test of literacy is ability to read and write a simple letter in some language.

All India percentage of literacy: 16·6; West India some: 23·8; South India: 22·8; East India: 16·8; North-West India: 13·8; Central India: 10·9; North India: 10·8.

In absolute numbers, out of 36 crores about 6 crores are literate. Out of 30 crores who are illiterate about 6 lakhs can read but not write. About 90 lakhs have reached the middle school standard, and 38 lakhs (women 5 lakhs) Higher Secondary School Standard.

The total no. of those who have reached the Intermediate standard in Arts and Science: 407,000 (men), 59,000 (women).

The total no. of the holders of degrees and diplomas: 991,000 (men), 183,000 (women).

The above figures (degree and diploma) are broken up as follows. The first figure relates to men, the second to women:

Graduates in Arts and Science: 284,000; 37,000. Post-graduates in Arts and Science: 58,000; 7,000. Teaching: 151,000; 38,000. Law: 64,000; 1,000. Health and Medicine: 64,000; 8,000. Engineering: 35,000; 1,000. Commerce: 31,000; 1,000. Agriculture and Veterinary: 12,000; 1,000.

All India percentage of male literacy 24·9, of female 7·9.

Percentage of literacy among agricultural classes: 12·1 (males 19·6, females 4·5). Among non-agricultural classes: 29·0 (males 39·7, females 17·0). In commerce in latter group: 37·9 (males 51·6, females 22·6). In Transport: 32·7 (males 41·7, females 21·7).

Percentage of literacy for those above the age of ten: urban: men 56, women 27; rural: men 24, women 6.

Analyzed age-group-wise, the literacy figures for the ten per cent sample population are:—

Ages 0—4: All 4,726,869 persons are illiterate.
Ages 5—9: Total 4,426,768; literates 411,079.
Ages 10—14: Total 4,233,507; literates 971,443.
Ages 15—24: Total 6,065,277; literates 1,437,056.
Ages 25—34: Total 5,445,111; literates 1,104,744.
Ages 35—44: Total 4,152,522; literates 739,434.
Ages 45—54: Total 2,959,170; literates 476,635.
Ages 55—64: Total 1,766,978; literates 247,630.
Ages 65—74: Total 783,033; literates 101,492.
Ages 75 and over: Total 337,957; literates 38,228.
Age not stated: Total 22,787; literates 1,724.

13. LITERACY AND EDUCATIONAL STANDARD BY STATE

The following figures for rural and urban areas for some States are based on a 10 per cent sample survey. The rest are absolute totals.

State.	Total.		Rural. †		Urban. †		Below Middle School Standard.	
	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.

* The figures for the new Punjab could be obtained by adding where appropriate the figures for the old Punjab and PEPSU.

LANGUAGES

We give below some facts and figures relating to language :

Total number of speakers of languages specified in the constitution : 323,972,607 ; Number speaking Hindi, Urdu, Hindustani, Punjabi : 149,944,311 ; Telugu : 32,999,916 ; Marathi : 27,049,522 ; Tamil : 26,546,764 ; Bengali : 25,121,674 ; Gujarati : 16,310,771 ; Kannada : 14,471,764 ; Malayalam : 13,380,109 ; Oriya : 13,153,909 ; Assamese : 4,088,226 ; Kashmiri : 5,086 ; Sanskrit : 655.

The percentage to total is as follows :

Hindi, Urdu, Hindustani : 46·3 ; Telugu : 10·2 ; Marathi : 8·3 ; Tamil : 8·2 ; Bengali : 7·8 ; Gujarati : 5·1 ; Kannada : 4·5 ; Malayalam : 4·1 ; Oriya : 4·0 ; Assamese : 1·1.

Tribal languages (with speakers numbering one lakh and over for each language) : 11,531,848 ; Other Indian languages (with speakers numbering one lakh and over) : 17,698,041 ; Other Indian languages (with speakers numbering less than a lakh) : 2,860,974 ; Non-Indian languages : 226,251 ; Unclassified population : 589,673.

Number of Hindi speakers in North India : 50,454,217 ; East India : 34,036,450 ; South India : 149,287 ; West India : 492,906 ; Central India : 20,506,477.

* The figures for the new Punjab could be obtained by adding where appropriate the figures for the old Punjab and PEPSU.

SEX RATIO

In India as a whole the total number of males is 183 millions, and of females 174 millions.

The sex ratio has varied as follows : 1921—950; 1931—951; 1941—946; 1951—947.

It may be mentioned here that in the world as a whole the sex ratio is probably 992.

The sex ratio in percentage of males to females is 51.4 per cent practically no change from 1941.

In the country as a whole the sex ratio as mentioned above is female to male 947 to 1,000. The lowest is 883 in the north-west, the highest

is 999 in south India where practical equality of the sexes exists.

In general the sex ratio is smaller in towns than in villages. For the country as a whole the sex ratio in villages is 966, while that in towns is 860.

The sex ratio in villages is lowest in north-west India (895). In the villages of south India females outnumber males (1,004).

The urban sex ratio is lowest in east India (719). It is highest in south India (977).

The difference between the rural sex ratio and the urban sex ratio is very large in east India (258). It is smallest in south India (27).

In the country as a whole there are 235 lakhs of people living in cities. Of these 132 lakhs are males and 103 are females.

The sex ratio for all cities is 787. It is lowest for east India (641) and highest for the south (940).

The sex ratio for the ten largest cities (town groups) is as follows :

Greater Calcutta, 602; Greater Bombay, 596; Madras, 921; Delhi, 750; Hyderabad, 989; Ahmedabad, 764; Bangalore, 883; Kanpur, 699; Poona, 833; Lucknow, 783.

Males and females are not born in equal numbers. They do not die in equal numbers. Hence the difference in the numbers of males and females.

15. MARITAL STATUS*

	Total			Unmarried		Married		Widowed or divorced	
	Persons	Males	Females	Males	Females	Males	Females	Males	Females
Total	349,583,524	170,433,840	179,149,684	88,147,296	65,950,673	82,253,086	82,387,097	9,033,458	21,811,014

PEPSU*	13	470	374	143	32	541	319	108
Delhi	17	496	369	118	25	623	299	53

* The State has either ceased to exist or has been drastically reorganized as from 1st Nov. 1956.

Out of every 10,000 persons in India 5,133 are males and 4,867 are females.

Among them 2,521 males (49.1 per cent) and 1,886 females (38.8 per cent) are unmarried. Together the unmarried people are about 44.1 per cent of the population.

To put it the other way round, among men 45.8 per cent are married and 5.0 per cent are widowers, and among women 48.4 per cent are married and 12.8 per cent widows.

The number of divorced persons in India is 144,786 or 0.4 per cent.

The proportion of unmarried persons is highest in south India (48.2 per cent) and lowest in central India (41.1 per cent).

The 1951 census counted 2,833,000 married males and 6,118,000 married females, 66,000 widowers, 134,000 widows all between the ages of 5 and 14.

The approximate number of marriages contracted in contravention of the law would be 91,50,000.

But there is evidence that the child marriage rate is diminishing. The percentage of married females under 15 of all married females was 9.6. This dropped to 7.4 in 1951.

The percentage of unmarried women above 15 is 6.4.

Facts concerning marital status in villages and towns separately are as follows :

In the villages, out of 10,000 persons 2,333 are married males and 2,407 are married females.

In the towns the corresponding figures are 2,429 and 2,105.

There is a fall in the proportion of widowers and also of widows. The former fell from 5.6 per cent in 1931 to 5.0 per cent in 1951. The latter fell from 16.1 per cent in 1931 to 12.8 per cent in 1951.

For maternity only married women in the age-group 15 to 44 are to be taken into account.

We have to base our findings on investigations carried out in Travancore-Cochin State during the 1951 census.

On an average a mother in the former Travancore-Cochin area (mostly part of Kerala now) where this particular investigation was conducted—a mother who lives to complete her child-bearing period gives birth to more than 6 children but not more than 7.

Out of this the number actually alive on census day was 4.6. Among the children born alive 2 had died predeceasing their mother.

Thus in the Travancore-Cochin area the child birth index is 6.6, child survival index 4.6, child loss index 2.0.

Age group	Child birth index	Child survival index	Child loss index
Under 20	1.2	1.0	0.2
20—24	1.8	1.4	0.4
25—29	2.9	2.3	0.6
30—34	4.2	3.2	1.0
35—39	5.3	4.0	1.3
40—44	6.2	4.6	1.6
45 and over	6.6	4.6	2.0
Average	4.3	3.2	1.1

The child birth indices of mothers divided into groups were as follows :

Agricultural landholders' and tenants' families	4.5
Agricultural labourers' families	4.1
Non-agricultural families	4.2
Rural	4.3
Urban	4.2

Mothers can be divided into two groups: those who commenced child-bearing during the ages 15 to 19 (Maternity Type A), and those who commenced child-bearing during the ages 20 to 24 (Type B).

Their child birth indices are as follows :

	Type A	Type B
Under 20	1.2	—
20—24	2.0	1.3
25—29	3.6	2.3
30—34	4.8	3.7
35—39	6.0	4.9
40—44	6.8	5.8
Over 45	7.3	6.4

Investigations of a different sort have given the following results :

The total number of births which occur in the course of one year among about 1,000 persons is 40. Among these 40 births, 8 births are first births, 16 births are either first births or second births; 23 births are either first, second or third births; and 17 out of 40 are either fourth births or births of a higher order.

The following table shows the child-birth indices for different age-groups of mothers and child survival and loss indices by State (pre-reorganization) from a sample census :

State (Pre-reorganization)	Age Group of Mothers					Average for all ages	All ages	
	Incomplete Maternity experience				Complete maternity experience 45 and over		Survival Index	Loss Index
	Under 15	15-24	25-34	35-44

VITAL STATISTICS

The following table shows the number of births and deaths registered in each of the three decades. The figures in the last two columns give the mean decennial registered rates. The figures in the first two columns are in lakhs. The figures in the last two columns give the mean decennial registered rates.

Year	Registered births	Registered deaths	Birth-rate	Death-rate
1921-30	669	502	33.7	25.3
1931-40	753	512	33.8	23.0
1941-50	680	486	27.2	19.4

Many births and deaths go unregistered. Making allowance for this it is calculated that the birth-rate should be around 40, and the death-rate around 27.

This would give a natural increase rate of 13 per thousand per annum during the last decade.

On the same basis the birth-rates for the various zones will be as follows :

Central India (44) ; west India (42) ; north-west India (41 or 42) ; north India (38 or 39) ; east India (38 or 39) ; south India (36 or 37).

The death-rates would be as follows :

Central India (34) ; north India (27 or 28) ; east India (26, 27 or 28) ; west India (26) ; north-west India (24, 25 or 26) ; south India (21 or 22).

The following table shows the birth, death, and infant mortality rates for the sub-continent from 1921 to 1946 and for India alone from 1947 onwards where available.

Year	Birth-rate	Death-rate	Infant mortality
1921	32	31	198
1922	32	24	175
1923	34	25	176
1924	33	28	189
1925	32	24	174
1926	33	25	189
1927	33	23	167
1928	34	24	178
1929	33	24	178
1930	33	25	189

1954*	25.4	12.9	113
1955†	27.3	11.6	100

N. A. = Not available.

* For the pre-reorganization Part A States and Coorg and Delhi.

† Excluding Bihar, M.P., Orissa.

The expectation of life for males is 32.45 and for females 31.66. In the decade 1931-40 the respective figures were 26.91 for males and 26.66 for females.

The percentage of Indian males surviving to the age 20 is now 58 as against 45 at the beginning of this century. The same idea may be expressed differently by saying that 50 per cent of Indian males survive to age 32 as against 14 previously.

The figures given below show the expectation of life at various ages as revealed by the 1951 census for the decade 1941-50 :

For males : Age 0—32.45 ; 5—40.86 ; 10—38.97 ; 15—36.24 ; 20—33.03 ; 25—29.78 ; 30—26.58 ; 35—23.50 ; 40—20.53 ; 45—17.63 ; 50—14.89 ; 55—12.39 ; 60—10.13 ; 65—8.18 ; 70—6.51 ; 75—5.13 ; 80—3.99 ; 85—3.06 ; 90—2.30 ; 95—1.52.

For females : Age 0—31.66 ; 5—40.91 ; 10—39.45 ; 15—36.56 ; 20—32.90 ; 25—29.30 ; 30—26.18 ; 35—23.52 ; 40—21.06 ; 45—18.61 ; 50—16.15 ; 55—13.69 ; 60—11.33 ; 65—9.29 ; 70—7.53 ; 75—6.03 ; 80—4.77 ; 85—3.69 ; 90—2.72 ; 95—1.59.

The figures for births and deaths are based on a sample census carried out in 20 States**. In 10 of the States** the scheme covered all the Districts, while in the remaining it covered about one-fifth of the Districts. The exceptions were Rajasthan** and PEPSU** where only one District was covered. In Uttar Pradesh the scheme covered only the rural areas. Elsewhere both urban and rural areas came under survey.

The size of the sample also differs from State to State.

The number of unregistered births per 100 registered births were also recorded to estimate the true birth-rate by correcting the registered birth-rate in some States. The published registration figures in most States suffered from serious errors and could not form the basis of any scientific estimation.

The birth-rates as calculated from the same surveys are in a majority of States between 30 and 40 but are less with two exceptions than those estimated by the Actuary for 1951 for the decade 1941-50. The trend of fall in the birth-rate may be real or it may be affected by under-enumeration of births.

The average maternal age for all orders is between 27 and 28 in a large majority of the States. The average maternal age is higher in Japan and England and lower in the U.S.A., where maternity starts almost as early as in India.

The average age for first order births is between 21 and 22 ; the average for second order is between 23 and 25.

** Pre-reorganisation.

The Indian child birth index may be placed at between 6 and 7. The size of the sample was very small in every case and is not altogether dependable.

Child survival and loss indices indicate a very high loss of human resources. For mothers of completed fertility the child loss varies in a majority of States between 20 per cent and 33 per cent.

The proportion of births is almost equally balanced for the age-groups 15-24, 25-34 in the larger States where it is higher for the age-group 15-24.

A better study would have been possible if we had had quinquennial age-groups as in U.P. instead of decennial age-groups.

The proportion of first order births is the highest in all the States in the age-group 15-24, about 80 per cent of the first births occurring during this period. The different order births also occur earlier in India than elsewhere. The family here grows earlier and faster.

In a majority of the States in India between 40 and 50 per cent of the births are of the first and second order. In the remaining States they are between 30 and 40 per cent. Taking the total of the births of the first three orders the percentage works out to between 60 and 70 in half the States and 50 and 60 in the remaining half. The proportion of the first three orders do not show much difference from one another. The decline starts after the third birth and even then it is not as steep as it is in U.S.A. or England. A considerable proportion of births in India is recorded under the fourth and higher orders.

The Census Commissioner has a theory about improvident maternity. All births after the third will lead to an unwanted increase in the size of the family in an under-developed country like India. The proportion of births of 4th and higher order is therefore the incidence of improvident maternity. This incidence was 40 to 50 in half the States and 30 to 40 in the remaining States.

In India the first and second births occupy a relatively unimportant place in the later age-groups after 34. Births of higher order assume prominence with increase in maternal age.

About births, per 1,000 females (all women, married as well as others) in the same age-group a majority of the States show fertility for all ages between 100 and 125 or 125 and over. Had it not been for a certain amount of under-enumeration the figures of fertility would have been still higher.

Fertility was the highest in the age-group 25-34 in nearly all the States. In U.P. where quinquennial age-groups were used fertility is low in the age-group 15-19 but rises sharply in the next age-group 20-24 and further rises slightly in the age-group 25-29, then a decline starts. In the age-group 30-34 the decline is gradual and continues to be gradual upto 39 after which it is steep. In the age-groups 40-44 and 45-49 it is preponderately high in comparison with figures for England, U.S.A. or Japan showing the high proportion of births in these ages.

These trends are common to all the States in India.

Rural fertility was higher than urban fertility except in two States.

The total birth-rates for all orders is above 100 in a majority of the States in India. In Japan it is 76, in U.S.A. 80, in England 50.

The fertility of married women for ages 15 to 44 was for major States between 150 and 200 or 200 and over. This indicates the figure for India as about 200. Fertility fell abruptly in the group 35-44. It was at its peak in the age-group 25 to 29.

In a majority of the States the death-rate as calculated for the sample census was between 10 and 20. This was much below the rate calculated by the 1951 census Actuary. It is possible there was an under-enumeration of deaths in the sample census.

The proportion of deaths at younger age was high. In 10 States the specific death-rate for age under one was well over 60; in 12 States for the age-group 1 to 4 over 25; in 12 States for the age-group 5 to 9 over 6.

About 50 per cent of the deaths occurred among children under 10 years. The rates for the other age-groups in a majority of the States were as follows:

Age-group 10 to 14 it is over 3; 15-19 over 3; 20-24 over 5; 25-29 over 6; 30-34 over 7; 35-39 over 8; 40-44 over 10; 45-49 over 13; 50-54 over 15; 55-59 over 20; 60-64 over 40; 65-69 over 45; 70-74 over 65.

The mortality rates were higher for females than for males in the reproductive ages 15-44.

The rate for infant mortality (number of deaths under one per 1,000 live births per year) was over 50 for a majority of the States. If it was not for under enumeration the rate would be higher still. The rate for the period 1941-50 as estimated by the 1951 census Actuary was between 160 and 250 for males and 145 and 225 for females.

The following table shows birth-rates and death-rates and other particulars by State (pre-reorganization) :-

State (Pre-reorganization)	Birth-rate registered		No. of unregis- tered births per 100 registered as verified at the sample census*	Birth-rate (regis- tered) corrected for omissions	Birth-rate (Census Actuary), 1941-50	Death-rate registered		No. of unregis- tered deaths per 100 registered as verified at the sample census	Death-rate (regis- tered) corrected for omissions	Death-rate (Census Actuary), 1941-50

			Yugoslavia	N.A.	—

(a) Number of Indians and Pakistanis registered as citizens upto March 15, 1953 in the Indian Mission was 18,500.

* Indian nationals only.

MIGRATION TABLES

The following table shows the emigration and immigration figures for 1953 and 1954 :

Country	Emigration		Immigration	
	1953	1954	1953	1954
Africa	24,604	25,692	22,239	22,864
Burma	8,361	8,960	10,989	13,392
Ceylon	90,287	47,066	1,17,008	58,294
Malaya	46,042	28,465	26,514	35,506
Others	24,186	23,394	31,193	34,124
Total	1,93,480	1,33,577	2,07,943	1,64,180

The distribution of some language groups in the countries of migration would be as follows:

Tamils
Malay-Singapore : 4,80,985; Mauritius : 10,500; Fiji Islands : 10,000.

Hindustani group
Mauritius : 2,80,000; Fiji Islands : 1,24,000; Malay-Singapore : 1,360.

Gujarati
Kenya : 69,000; Tanganyika : 61,000; Uganda : 44,000; Mauritius : 21,000; Zanzibar and Pemba : 15,000; Fiji Islands : 8,000; Nyasaland : 6,000; South Rhodesia : 4,500; North Rhodesia : 3,500; Ruanda Urundi : 2,000; Indonesia : 2,000; Malay-Singapore : 1,300; Belgian Congo : 1,200.

Punjabi
Kenya : 50,000; Malay-Singapore : 30,600; Tanganyika : 5,000; Indonesia : 4,000; Fiji Islands : 3,000; Uganda : 3,000.

Telugu
Malay-Singapore : 24,100; Indonesia : 20,000; Mauritius : 3,500.

Malayalam

Malay-Singapore : 44,400.

Sindhi

Indonesia : 12,000 ; Hong Kong : 1,600.

Marathi

Uganda : 2,600 ; Tanganyika : 1,800 ; Zanzibar and Pemba : 1,000.

Bengali

Malay-Singapore : 3,900.

EMIGRATION LAWS

Emigration out of India is governed by the Indian Emigration Act (VII of 1922) and the Rules made thereunder, as amended from time to time.

"Emigration" means departure by sea out of India of a person under an agreement or with the intention to work for hire. Emigration is not lawful except from Ports which have been notified as "Emigration" Ports. Emigration for unskilled work is not lawful to any country at present, and the very departure for engaging in unskilled work to Ceylon, Burma, Malaya and Singapore is prohibited, unless exemption is granted by general or special orders of the Central Government.

Emigration for skilled work is permissible on compliance with prescribed formalities.

The functions under the Act are performed by the Central Government through the Controller-General of Emigration and Joint Secretary to the Government of India in the Ministry of External Affairs, New Delhi, with the assistance of the Protectors of Emigrants at the Emigration Ports and the Controller of Emigration, Madras, who supervises the activities of the Protectors of Emigrants in the Madras State.

Following Ports are at present Emigration Ports under the Act. Each Port has a Protector of Emigrants.

1. Bombay (Protector of Emigrants : Army and Navy Building, 148 Mahatma Gandhi Road, Bombay 1).
2. Okha (Port Officer).
3. Porbander (Port Officer).
4. Bedi (Port Officer).
5. Madras (Protector of Emigrants : 41, Mukkur Nallamththu Chetty Street, George Town, Madras).
6. Nagapattinam (Protector of Emigrants).
7. Dhanushkodi (Protector of Emigrants : Mandapam Camp).
8. Tuticorin (Protector of Emigrants).
9. Gopalpur (The District Officer, Ganjam).
10. Calcutta (Protector of Emigrants : 4, Brabourne Road, Calcutta).

QUOTA BASIS

The following countries admit Indians on quota basis : Canada, U.S.A., Philippines, Thailand and Indonesia.

Canada. The Government of India and the Government of Canada have entered into a modified Agreement regarding the immigration of Indians into Canada in partial modification of the Agreement of 1951 under which the Government of Canada had agreed to admit annually 150 Indian citizens into Canada. The modified Agreement came into effect on the 1st of January, 1957.

Under the modified Agreement, the Canadian Government have agreed to increase the annual quota of immigrants from India from 150 to 300. Of these 300 immigrants, 150 will be "ordinary quota" immigrants and 150 will be "preference quota" immigrants. Relatives of Indians who have permanently settled in Canada or who have acquired Canadian citizenship will be admissible into Canada as "preference quota" immigrants while other applicants will be admissible under the "ordinary quota". It may be noted

that "close relatives" of all those who have become Canadian citizens will be admitted into Canada as non-quota immigrants.

A "relative" means the husband, wife, son, daughter, brother, sister (or the husband, wife or unmarried child under twenty-one years of age of any such son, daughter, brother or sister), father, mother, grandparent, unmarried orphan nephew or niece under twenty-one years of age, fiancé or fiancée.

A "close relative" means the husband, wife, unmarried child under twenty-one years of age, father over sixty-five years of age, or mother over sixty years of age.

Any person admitted to Canada as an immigrant might become a citizen of Canada after five years' continuous residence there. There is no legislation in Canada, federal or provincial, which discriminates against any group of citizens on grounds of national origin, race, language or religion.

U.S.A. The United States of America has fixed an annual quota of 100 for India of which 25 per cent is reserved for Indians born or residing outside India. The selection of immigrants is made by the U.S. Government. The main considerations on which selection is made are : (a) the immigrant must be a genuine East Indian, (b) must be free from contagious diseases or moral turpitude, (c) must not subscribe to avowed or subversive theories, (d) must not be a practicing polygamist, (e) must be literate in some foreign language, and (f) must be in possession of sufficient funds to avoid likelihood of becoming public liability.

Philippines. With effect from September 1953, 50 Indian nationals are admitted per annum for permanent settlement under the Philippines Immigration Act. Selection is made by the Philippines Government through their Legation in India.

Thailand. The quota fixed by Thailand is 200 per annum. The selection is made by the Thai Government.

Indonesia. Indonesia fixed a quota of 1,000 immigrants in 1952 to a group of four countries, viz., India, Pakistan, Ceylon and Burma. It is, however, entirely at the discretion of the Indonesian Government to permit Indians to settle in Indonesia.

FREER MIGRATION

In some of the countries, though Indians are not admitted for the specific purpose of settlement, they may be permitted to enter and reside on completion of formalities and conditions prescribed under the respective immigration and other laws of those countries. Mauritius, British East African territories of Kenya, Uganda, Tanganyika, Zanzibar, Belgian Congo, Ruanda-Urundi, Nigeria, Ethiopia, Aden, Bahrain, Iraq, Muscat, Kuwait, Saudi Arabia, Seychelles, Malaya, Indo-China, Fiji, Japan, the United Kingdom, British West Indies, British Guiana, and British North Borneo are among such countries.

The main requirements of some of the countries are indicated below :

Mauritius. An intending immigrant should be able to deposit Rs. 1,000 on entry into the Colony.

British East Africa. A person intending to engage on his own account in trade, business, agriculture, mining, and manufacture in these territories must have at his disposition prescribed capital and must obtain a certificate from the prescribed authority in the territory concerned permitting him or her to engage in a particular profession, trade or calling in that territory. Professionals like doctors, dentists, lawyers, are not required to have any prescribed capital, but should possess sufficient capital or assured income to enable them to give effect to their intention.

The Government of Kenya have announced that their future immigration policy will be largely based on economic considerations and

that Great Britain will be the primary source of immigrants of the kind the Colony needs. The scope of Indian immigration into Kenya has been further curtailed.

Fiji. Generally, permits to enter and to settle are granted to the following categories of persons :

(i) Farmers and planters if they have already acquired property in the Colony not less than 100 acres, three quarters of which must be productive land.

(ii) Professional men and women with recognised qualification intending to practise their professions.

(iii) Ministers of religion and teachers.

Malaya. Under the New Immigration Ordinance which came into force on August 1, 1953, entry permits for permanent residence will not normally be granted to fresh immigrants wishing to enter Malaya for employment or for pursuing a profession unless the applicant is a skilled artisan or his entry is considered to be in the economic interest of Malaya or Singapore, or he holds a contract of employment with a well-established business concern on terms and conditions of service of a prescribed standard, or unless he holds special qualifications to be able to pursue his profession without prejudice to the interests of persons already resident in Malaya.

British West Indies. Indians are admitted in exceptional cases, where they possess special skills that are in short supply there or who may bring capital for investment.

Belgian Congo. Entry Permits may be granted to those who can deposit a certain sum and satisfy the authorities regarding good conduct, etc.

Ethiopia. There is no particular restrictions for immigration into Ethiopia, but the Ethiopian Government's permission is required in every case.

United Kingdom. Indians are free to settle in the United Kingdom.

Switzerland. Indian nationals can go to and reside in Switzerland, subject to the laws and rules in force in that country.

ENTRY BANNED

Fresh Indian immigration is either banned or is not permitted as a matter of policy into the following countries :—South Africa, Southern Rhodesia, Northern Rhodesia, Nyasaland, Australia, New Zealand, Burma, Ceylon, most of the European and South American countries.

South Africa. Immigration of Indians into the Union of South Africa is banned.

British Central Africa. The three territories of Southern Rhodesia, Northern Rhodesia and Nyasaland were brought into a federation known as the Federation of Rhodesia and Nyasaland. Immigration is a federal subject, and it is the declared policy of the Federal Government not to admit fresh Indian immigrants excepting teachers, ministers of religion and wives and minor children of persons already settled there.

New Zealand. There is a ban on the entry of fresh Indians, but as a special case the New Zealand Government permits the entry of the children of permanent residents into New Zealand for permanent residence provided they fulfil certain conditions.

Australia. Asians, including Indians, are not allowed to immigrate into Australia for permanent settlement. However, Indians who are *bona fide* merchants and are in a position to engage in wholesale import-export business may be admitted and allowed to remain there so long as they continue in the trade, but without any citizenship or other rights. Indians already settled there can, however, take their wives and minor children and also shop assistants from India subject to certain conditions.

BURMA

Burma was a province of India till 1937 April when it was given a separate constitution. In 1931 the Indian population was reported to be over one million. Consequent upon the Japanese occupation of Burma in 1942, about 4 lakhs of Indians left Burma for India. After the liberation of Burma many did not return to that country in view of the changed conditions in Burma and the difficulty of obtaining employment there. The present population of Indians in Burma is estimated to be about 7 lakhs.

Indians are mainly agricultural, dock and casual labourers and small-scale business men. Some Indians are engaged in wholesale importing business.

With the introduction of the Burmanisation policy, no foreigner is now allowed to buy any property, nor can any property be transferred to any foreigner. Non-nationals in Government service are being replaced by nationals.

A large number of Indian land-owners in Burma have been adversely affected by the 'Land Nationalization' Scheme.

Under the Union of Burma Citizenship Act, 1948, an alien can become a Burma citizen by naturalisation, if he had resided continuously in the Union for not less than five years before the application and also fulfil other prescribed conditions.

As foreigners in the country, Indians as such have no franchise. Those Indians who have become Burmese citizens are entitled to all privileges including franchise that other Burmese are entitled to.

Rupees thirty a month can be remitted to dependents in India by Money Order. (Source of Information: Burmese Embassy). All applications for remittances of money should be passed by the Burmese Exchange Control Authorities who allow remittances for maintenance of families and other specific purposes on the strength of certificates from the District Magistrate concerned in India that the payees are solely dependent on the remittances. On leaving Burma for good, assets can be transferred to India if approved by the Exchange Control Authorities in Burma.

MALAYA

The Federation of Malaya is an independent Dominion and the term Malaya now generally denotes that country alone. The other administrative area in the Malaya peninsula is Singapore, a crown colony.

Of the total Indian population of over 7 lakhs in Malaya about 70 per cent are labourers in rubber and tin estates, and the rest are either clerks or employed in business, trade and other professions like law and medicine.

Indians do not suffer from any special disabilities.

Indians are eligible for citizenship of the Federation of Malaya, if they fulfil the prescribed conditions. Many of the Indians in Malaya are qualified or entitled to become Malayan citizens.

Elections in Malaya were held in 1955. The Legislative Council is composed of 98 members of whom 52 are elected and the remaining either nominated or ex-officio. The Legislative Council has seven Indian members. There are 16 Ministers in the Federal Executive Council of whom one is Indian.

In Singapore there is no citizenship law and the British Nationality Act applies.

Under a new law as from Oct. 1957 Commonwealth citizens who have not acquired U.K. citizenship can acquire Singapore citizenship, provided reciprocal arrangements have been entered into with respective countries.

The Colony of Singapore is under a Governor; strength of Council of Ministers 13 (two of these are Indian). The strength of the Legislative Assembly is 32 (four of these are Indian).

There are no restrictions on Indians in the matter of remittances to India.

CANADA

Indian residents of Canada are largely comprised of labourers employed in lumbering and trucking. There are a few lumber mill owners, and some are working as clerks in various establishments. The majority of Indians are in British Columbia. The Indian community is called the "East Indian Community".

There are no disabilities on Indians in the matter of owning property, engaging in trade or profession, entering Government service or residence in any locality. The period for qualification for citizenship is 5 years. In 1952, one Indian was elected to a Municipal Council.

Indians can remit to India any amount earned in Canada.

BRITISH GUIANA, WEST INDIES

Indians form the bulk of sugar plantation labour in British Guiana and Trinidad. A good number of them work also on cocoa plantations. They are the backbone of the countries' agriculture, and grow rice and vegetables. There are also a number of prominent Indian merchants, doctors and teachers.

In British Guiana, Indians constitute the largest single racial group. (46 per cent of the total population.) In Trinidad Indians are about 36 per cent of the total population.

Very few Indians have been employed in Government service. A vast majority of Indians are illiterate. In Jamaica, a large number of dairies are owned by Indians.

There is no discrimination against Indians in British Guiana or Trinidad, and they enjoy the same citizenship rights as other nationals of these territories.

Indians have been elected to the Executive and Legislative Councils of British Guiana. The Constitution of British Guiana was suspended in 1953 and all the members of the Legislative Council were nominated.

In Trinidad the first general election under the revised constitution was held on Sept. 24, 1956 in which the Peoples' National Movement won 13 of 24 Legislative Council seats. Of the 24 seats nine are held by Indians. The new Executive Council consists of 10 members, two of whom are Indian.

In Jamaica where Indians form only 1.7 per cent of the total population there is one Indian member in the Lower House comprising 32 elected members.

Money can be freely sent to India from the British West Indies.

MAURITIUS

Indians in Mauritius form about 67 per cent of the total population of the Colony. The Indian population is mainly composed of descendants of "indentured" labourers from Madras, U.P. and Bihar, but there is a sprinkling of traders from Bombay. Indians have settled there for generations and are now termed "Indo-Mauritians". A large proportion of them are farm-labourers on sugar plantations. The rest are engaged in commerce and trade or are doctors, lawyers, government servants.

Indians are mostly illiterate, and on the whole their economic and social conditions are not as satisfactory as in some other Colonies.

There is no colour bar against Indians, nor do they suffer from any political disability.

The Legislative Council of the Colony as at present constituted consists of 35 members including the Governor as President, three ex-officio, 12 nominated and 19 elected members. Of these 35 members 14 are Indian.

Fresh proposals for constitutional advance were made in 1956. Some of these were implemented later in the year. The strength of the Executive Council was raised from 9 to 12 of whom seven will be non-official members. The Executive Council will exercise collective responsibility. All members will be designated Ministers and six non-official members will be assigned portfolios.

The rest of the proposals are to be implemented in 1958, when fresh elections will be held and the number of elected members of the Legislative Council increased from 19 to 25.

There are no restrictions on remittances to India.

EAST AFRICA

British East Africa consists of the four territories of Kenya, Uganda, Tanganyika and Zanzibar.

The majority of the Indians in these territories are engaged in commercial undertakings. Artisans, technicians, Government servants, doctors, lawyers, make up most of the balance.

Indians in East Africa—numbering about 2 lakhs—are mostly concentrated in urban centres. In Kenya and Tanganyika they constitute about 59 per cent of the total non-native population of each territory; in Uganda they form the single largest community among the non-Africans, being about 82 per cent of the non-African population. Their general economic condition is on the whole very satisfactory. Many of them are quite well-to-do.

In Uganda some Indians have big factories, e.g., sugar, sisal and ginning. About 90 per cent of the total trade of Uganda passes through Indian hands.

Indians (and also other non-Europeans) are not allowed to own or lease land in the Kenya Highlands for agricultural and industrial purposes. Anti-Asiatic regulations prevent the purchase or occupation of certain residential sites in Nairobi and Mombasa (in Kenya) by Indians.

Indians are, in practice, discriminated against in the matter of appointments under the Government; they are generally excluded from appointments to higher posts. An Indian (or other non-European) gets less pay than a European for the same work. But this position is being remedied.

In Kenya, grants for social services, e.g., education, are more favourable to Europeans than to Indians.

Indian residents in these territories are entitled to acquire the citizenship of the U.K. and Colonies under the British Nationality Act. Normally one year's continuous stay or birth in the territory is necessary.

In Tanganyika, Uganda and Zanzibar there is no elective system for filling up seats in the Legislative Councils. In Kenya, the population is divided into race electorates for the election of members to the Legislative Council; the Indian electoral roll is further subdivided as between Indian Muslims and other Indians. Out of six seats two are for Indian Muslims and four for other Indians.

Indians also enjoy municipal franchise in these territories.

The representation of Indians on the Legislative and Executive Councils is shown below :

Country	*Executive Council		Legislative Council	
	Total	Indians	Total	Indians
Kenya	15	2	54 (28 non-officials).	6 (6 elected non-official— 2 Muslims and 4 other Indians). There are also a few Indians nominated official members.
Uganda	15	1	60 (28 non-officials).	6 (Nominated non-officials). There are also a few Indians nominated official members.
Tanganyika	14	1	62 (30 non-officials).	10 Asians (Nominated non-officials). The strength of the Legislative Council was increased in 1955 under proposals announced in 1954. It now consists of a Speaker (a non- official member), 31 ex-officio and nomi- nated official members and 30 non-official members (10 Africans, 10 Asians and 10 Europeans).
Zanzibar	9	-	16 (8 non-officials).	2 (Nominated non-officials).

* In Kenya and Uganda there are now Councils of Ministers.

Since 1st January 1948, Kenya, Uganda and Tanganyika have been included in a sort of loose union designated East African High Commission with a common legislature and a common administrative service for certain specific purposes. The legislature of the East African High Commission consists of 7 ex-officio members, 3 nominated official members (1 from each territory) and 13 non-official members. The 13 non-official members consist of: one elected by the non-official members of the Legislative Council of each territory, one European, one Indian and one African member appointed by the Governor of each territory (in Kenya the European and Indian members are elected by the European and Indian members respectively of the Kenya Legislative Council) and one Arab member (appointed by the High Commission).

There are no restrictions on remittances to India.

SOUTH AFRICA

Persons of Indian origin in South Africa numbering a little less than 4 lakhs are mostly labourers, traders, small farmers, factory workers, and in small numbers professionals.

Racial discrimination against Indians exists in South Africa in every walk of life and in the worst possible form. Persons of Indian origin are practically excluded from parliamentary, provincial and municipal franchise as well as from public services except in menial and subordinate posts.

"Apartheid" or racial segregation is the declared policy of the South African Government. In accordance with this policy Indians are subject to a number of restrictions as regards immigration, inter-provincial migration, residence, trade, industry, professional and other occupations. Racial segregation is also enforced in schools, post offices, railways, public transport, hotels, churches, social and religious gatherings and public utility undertakings.

The outstanding piece of anti-Asiatic legislation is the Group Areas Act, 1950. By this Act, the entire population of the Union has been divided into three main groups, White, Native and Coloured. Persons of Indian origin are

included in the Coloured group. The Government will establish by proclamation "group areas" for exclusive occupation or ownership of both, or any of the groups. The various racial communities will have to live and occupy premises for trade and professions only in areas allotted to them. Indians and other non-Europeans will thus not be able to continue to hold properties in an area declared for the European group. The Union Government has already started taking active steps for the proclamation of group areas in a number of important cities in the Union. When the Act is fully implemented, persons of Indian origin will have to move into the areas exclusively reserved for them and this will disrupt their trade and business and involve immense losses running to millions of pounds.

The Group Areas Act was further amended in 1955 (Act No. 6 of 1955) to invest increased powers to the Land Tenure Advisory Board.

In August 1956 the South African Government issued a proclamation under which more than 9,000 Indians were served with a notice to vacate the western areas of Johannesburg within two years. Of these 9,000 Indians, 750 are traders who face economic ruin. Ultimately, according to an unofficial estimate more than 22,000 Indians with property in Johannesburg worth about £10,000,000 will be uprooted. The Indians are asked to move to Lenasia, an underdeveloped suburb 22 miles from Johannesburg.

In July 1957 proclamations were also issued in the province of the Cape of Good Hope under which the Indians living there will have to move within three years to Rylands which is mostly undeveloped bush and sand-dune country.

Asians have been declared prohibited immigrants since 1913, but the right of entry into the Union of wives and children of Indians domiciled in South Africa was provided for in the Reciprocity Resolution passed at the Imperial Conference of 1915 and later in the Cape Town Agreement of 1927. Under an Act passed in 1953, the Union Government banned the entry into South Africa of the wives and children of persons of Indian origin domiciled in the

Union. But certain specified categories of wives and children of persons of Indian origin were allowed to enter South Africa till 10th February 1956.

The aim of the present South African Government in regard to Indians is their ultimate repatriation to India.

Practically all Indians domiciled in South Africa are South African citizens by law, but they are denied some of the most important rights of citizenship.

No Indian, who is not already a South African citizen, is allowed to acquire South African citizenship.

Indians have no franchise rights in the Provinces of Natal and Transvaal. In the Cape Province they enjoy limited franchise rights as for Cape Coloureds.

Indians are not eligible to a place in the Executive Council or Legislature, whether provincial or central.

There is no special limit to remittances by Indians to India.

The question of the treatment of the people of Indian origin in South Africa was placed before the General Assembly of the United Nations in 1946. In that year the U.N. General Assembly passed a resolution expressing the opinion that "the treatment of Indians should be in conformity with the international obligations under the agreements concluded between the two Governments and the relevant provisions of the Charter." Resolutions have been passed in subsequent sessions of the U.N. General Assembly in this respect, but the Union Government have paid little attention to these resolutions. In the Resolutions adopted in 1950 and afterwards the Union Government was also called upon to suspend the implementation of the Group Areas Act pending the conclusion of negotiations between the Governments of India, Pakistan and South Africa. But the Government of South Africa has proceeded with the implementation of this Act despite these Resolutions.

The General Assembly, in 1952 set up a Good Offices Commission to assist the three Governments concerned in their negotiations on this question. But the South African Government refused to recognise the Commission.

The Commission was again appointed by the 8th Session of the United Nations General Assembly in 1953 to make further efforts to arrange and assist in negotiations between the Governments of India, Pakistan and Union of South Africa. But the Commission's efforts were rendered infructuous because of the total non-co-operation of the Government of the Union of South Africa.

The 9th Session of the U.N. General Assembly passed a resolution suggesting that the three Governments concerned negotiate directly among themselves to reach a decision on the problem.

The U. N. Secretary-General nominated in June 1955 Sr. Luis de Faro, formerly Brazilian Ambassador to the Federal Republic of Germany to bring the parties together. Sr. Luis de Faro reported failure to the U. N. Secretary-General who in his turn reported the matter to the U. N. General Assembly.

The 10th Session of the U. N. General Assembly (1955) passed a resolution urging the Governments of India, Pakistan and the Union of South Africa to pursue negotiations with a view to bringing about the settlement of the question of the treatment of the people of Indian origin and report the developments to the General Assembly at its next Session.

In pursuance of this resolution, the Government of India wrote to the Government of South Africa offering to start negotiations. But the latter refused the offer.

The matter was then reported to the 11th Session of the U.N. General Assembly which again passed (Jan. 30, 1957) a resolution urging South Africa, India and Pakistan to start negotiations aimed at settling the dispute. The resolution made a special appeal to the Union Government to co-operate. It also invited the parties to report jointly or separately back to the Assembly.

In pursuance of this resolution the Government of India approached the South African Government to start negotiations. But there was no response from the South African Government. India therefore asked that the subject might be included in the agenda of the 12th Session of the General Assembly.

Accordingly the subject was so included in the face of South African protest and was debated in the Political Committee in the October session of 1957.

On Nov. 26, 1957 the U.N. passed two resolutions: The first by 59 votes to 6 with 14 abstentions that South Africa had not modified its race policies and asking that it should do so. The second resolution was passed by 64 votes to none with 16 abstentions asking South Africa to begin negotiations with India and Pakistan on the treatment of people of Indian origin.

SOUTHERN RHODESIA

Indians in Southern Rhodesia are mostly traders. Immigration of Indians into Southern Rhodesia has been prohibited since 1924, and only wives and children under 16 of domiciled Indian residents are admitted.

Although there are no discriminatory laws as such against Indians, in practice and in the interpretation of laws discrimination against them exists, particularly in the social sphere. Indians are not eligible for appointments to the Fixed Establishment of the Civil Services, and are not admitted into the Armed Forces. Indians are required to obtain special permits in order to purchase, possess or sell arms and ammunition whereas Europeans can do so on ordinary permits.

There is a common roll for all races with common qualifications. Of about 50,000 voters in the territory, between 400 and 500 are Indians.

Southern Rhodesia is a quasi-Dominion and has a cabinet of seven Ministers headed by a Prime Minister. There are no Indians in the Cabinet. The country has an elected Legislative Council consisting of 30 members, all of whom are Europeans. Because of the small number of Indian voters, no Indian has been elected to the Legislative Council so far.

Southern Rhodesia is now federated with the other two British Central African territories of Northern Rhodesia and Nyasaland. There is no Indian member in the Federal Legislative Assembly also which consists of 35 members.

There is no limit to remittances to sterling area countries

CEYLON

Out of a total of about 10 lakh persons of Indian origin in Ceylon, about 781,000 (labourers, subordinate staff, etc.) are in the tea, rubber and coconut estates. The balance is made up of merchants, shop assistants, land proprietors, and professional men such as doctors, accountants, lawyers and their families.

There is no restriction on Indians acquiring property in Ceylon, but non-Ceylonese are not allotted Crown Land. Trade in certain commodities and with certain countries like Japan and Germany is exclusively reserved for Ceylonese enterprise. Certain rights like fishing rights and the ownership of industries like public transport (omnibuses) are restricted to Ceylonese. Government service is restricted to Ceylonese except that foreigners are appointed on a contract basis when no qualified or suitable Ceylonese is available. Consequently Indians who have not acquired Ceylon citizenship have severe handicaps. Indians are also denied certain privileges such as National Insurance and unemployment relief.

The rights of Indians to citizenship are governed by two Acts enacted in 1948 after a discussion between the Indian and Ceylonese Prime Ministers. These Acts are the Ceylon Citizenship Act and the Indian and Pakistani Residents (Citizenship) Act, which provide that the Indian residents in Ceylon would be entitled to obtain the citizenship of Ceylon by registration subject to the following conditions: (a) an applicant must be resident in Ceylon when the laws came into force and must have been residing in Ceylon since January 1, 1936 if a bachelor

and since January 1, 1939 if a married man, (b) he must have adequate means of livelihood, (c) he should be in a position to comply with the laws and customs of Ceylon, and (d) the application for registration was filed and submitted to the Controller of Registration before August 5, 1951.

Consequent on an adverse Privy Council judgment, an amendment to the Indian and Pakistani Residents (Citizenship) Act was made by the Government in November 1952, providing that the wife and each minor child of an applicant for citizenship should have been continuously resident in Ceylon from January 1, 1939, or the first anniversary of the marriage, or birth, as the case may be, whichever was later, subject to certain exemptions. This has proved a hardship to many persons.

Great difficulty was encountered by applicants in proving ordinary residence in Ceylon during 1936-47 mainly due to lapse of time, lack of documents and the illiteracy of the majority of applicants and consequent inability to provide legal proof of the required residential qualifications.

An Agreement was entered into in January 1954 between the Government of India and the Government of Ceylon regarding the citizenship rights of persons of Indian origin in Ceylon. Under this Agreement the Government of Ceylon agreed to expedite the registration of citizens under the Indian and Pakistani (Citizenship) Act and to make every endeavour to complete the disposal of pending applications within two years.

At a conference held in October 1954 at New Delhi between the Representatives of Ceylon and India, it was agreed that applications for Indian citizenship by persons of Indian origin will not be refused on the ground that an applicant had earlier applied to the authorities in Ceylon for registration as a Ceylonese citizen, and that pending registration of such persons either as Ceylonese or as Indian, they will be issued Identity Certificates for travel to India by the authorities (Indian or Ceylonese as the case may be) with whom their applications for citizenship are pending. The Ceylon Government have also agreed that all those who hereafter become Indian citizens will be allowed to continue in their employment in Ceylon till the age of 55. They have further agreed to facilitate the registration of persons of Indian origin as Ceylonese citizens.

The total number of applicants for Ceylon citizenship is estimated to be about 850,000.

Out of these, the applications of about 90,000 persons were still reported as pending disposal as on August 1, 1957.

Pursuant to January 1954 Agreement, the Ceylon Government enacted the Indian and Pakistani (Parliamentary Representation) Act of 1954. Under it, for the purpose of voting the entire Island of Ceylon is made into a single Constituency, from which registered citizens of Indian origin shall elect four members to the House of Representatives. The voting will be separate till 1966, after which registered citizens of Indian origin will also be brought on the general electoral register.

The Parliament of Ceylon consists of the House of Representatives (Lower House) and the Senate (Upper House). The strength of the House of Representatives was 101, 95 elected and 6 nominated members. Under the Constitution Amendment Act, 1954 the number of members of the House of Representatives has been increased from 101 to 105 to provide for the representation of 4 members to be elected from the Indian and Pakistani Residents Constituency.

In the elections that were held in April 1956 the People's United Front swept the polls, defeating the United National Party headed by Sir John Kotelawala.

An agreement on the Ceylonization of Indian business undertakings was reached on Nov. 22, 1954. It was agreed that Indian firms could retain essential (technical, involving trust and confidence) personnel, but only Ceylonese should be employed in lower and middle ranks and that they should be trained for executive posts.

An agreement to avoid double taxation was concluded in 1956.

Remittances from Ceylon are governed by the Exchange Control Regulations in force which are altered from time to time in accordance with the financial situation in Ceylon. Under the existing Exchange Control Regulations remittances upto a maximum of one-third of proved income in Ceylon may be sent to India. All non-Ceylonese holding valid residence permits can obtain Exchange Control Cards from the Post Offices for a monthly remittance of Rs. 30 for purposes of maintenance.

The Government of Ceylon launched their scheme of repatriating Indians at the end of 1954. Indians whose temporary residence permits had expired were served with quit notices.

In April 1955 the Government of Ceylon amended their Immigrants and Emigrants Act of 1948 whereby they have shifted the onus of proof in a prosecution under the Immigrants and Emigrants Amendment Act on the accused. The employment of persons who are unable to prove their nationality, has been made illegal and the employers rendered liable to prosecution.

Till the end of June 1957, about 23,285 Indians served with quit notices returned to India.

Fiji

Indians have played an important part in the development of the economic resources of the Fiji Islands. Indian residents are the descendants of the indentured immigrants from India who started coming into the Colony in 1879. The Indian population is about 49 per cent of the whole population of the island. The majority of the Indians are independent farmers, agricultural labourers, skilled and semi-skilled workers; the rest being teachers, clerks, storekeepers, doctors, lawyers. Sugar-cane production and road transport are Indian monopolies.

There is no colour bar in Fiji and Indians suffer from no 'political disabilities'. There is also no racial discrimination against Indians with regard to appointment to the civil service. However, under the present Government regulations, Indians cannot own land which is marked as 'Native Land Reserve' or Crown Land, without the approval of Government; but there are no restrictions on their acquiring freehold land.

Indians in Fiji have franchise both in respect of Legislature and Local Town Council but the franchise is on a communal basis.

The Legislative Council consists of 31 members—16 officials and 15 non-officials. In the non-official group Europeans, Indians and Fijians have equal representation with 5 members for each group. Of the 5 Indian members 3 are elected on a communal franchise and 2 are nominated. The Executive Council consists of 4 officials (excluding the Governor) and 3 non-official members. One of the non-official members is an Indian elected from among the Indian members of the Legislative Council.

There are no restrictions on the remittance of money outside Fiji.

AUSTRALIA, NEW ZEALAND

The majority of persons of Indian origin settled in Australia are engaged in retail trade or agricultural operations.

Indians domiciled in Australia do not suffer from any disability and have all citizenship rights. In accordance with the White Australia policy, fresh Indians are, however, not admitted for permanent settlement.

The Commonwealth franchise was granted to Indians domiciled in Australia in 1925.

'The great bulk of Indians in New Zealand are engaged in the sale of fruits and groceries. Domiciled Indians are not generally subject to any disability or discrimination.

Indians have always enjoyed the right to vote both in Municipal and Parliamentary elections.

Indians can remit a limited amount to India for maintenance of wives and children. Up to April 1952, the limit was £55 for wife and £5 for each child (subject to maximum of 4 children) per quarter, but since then a 50 per cent cut has been imposed.

A TOURIST'S GUIDE*

THE following hints meant for foreign tourists may be useful:

1. Every foreign tourist entering India should be in possession of a valid passport issued by his Government.

He should also obtain before leaving his country a tourist visa from the Indian representative abroad (or the British representative in countries where there are no Indian representatives). Commonwealth citizens (except those of Pakistan and Ceylon) are exempt from the visa requirement, provided their passports are valid for travel to India. Persons of non-Indian origin domiciled in South Africa are, however, required to obtain entry permits.

Transit visas are not required for through air/ship passengers in direct transit by the same flight or by the next regularly scheduled flight irrespective of whether the flight is of the same or a different Airline. One can however leave the airport or ship by obtaining a landing permit for 72 hours and on depositing his passport.

The maximum period of stay on a tourist visa is 3 months, and on a transit visa 15 days.

For short visits not exceeding 2 weeks to Pakistan, Nepal or Ceylon tourists may obtain "no objection to return to India" certificates and return visas from the State Governments.

Visas for India are, unless otherwise specified, valid for a single journey only.

2. All non-Commonwealth tourists arriving in India are required to get themselves registered at the port of arrival and obtain certificates of registration. They will be registered as "tourists" if in possession of a tourist visa, and will not be required to report their movements to the police or registration authorities during their stay in India.

3. The Government of India have placed no health restrictions on persons entering India by sea or air, except in regard to yellow fever.

However, all persons are advised, in their own interest, to be protected against small-pox and cholera according to international requirements.

4. All baggage is open to customs examination. The duty payable on most articles varies from 25 per cent to 75 per cent according to the article.

Certain personal effects are allowed to enter free. Also alcoholic liquor up to one quart, provided the tourist can procure a permit on arrival by producing his Tourist Introduction Card. Liquor permits are issued to tourists at the Santa Cruz Airport, Bombay, on application immediately on landing.

5. Tourists are allowed to bring into India any amount of Indian or foreign currency notes or coins except in the cases specified below:

Bank of England notes up to £10 per head; Straits dollar notes up to \$45 per head; Australian notes up to £4 per head; Egyptian notes £20; Indian notes from Burma Rs. 100; Indian coins from Pakistan Rs. 5 in value; Indian coins from Afghanistan Rs. 1 in value. There is no limit on the amount of Travellers' Cheques.

The official rates of exchange are as follows: £1 equal to Rs. 13-33; U.S. \$1 equal to Rs. 4-76. The actual buying and selling rates, however, differ slightly from these rates.

Foreign currency can be exchanged at any authorized dealer or money changer.

6. Tourists are advised to arrange for clearing their baggage by one of the recognized travel agencies.

TRAVEL AGENCIES

Here is a list of recognized agencies: Messrs. American Express Co. Ltd., Oriental Building, 364, Dr. Dadabhai Naoroji Road, P.O. Box No. 507, Bombay-1; Messrs. Thos. Cook &

Son, Cook's Building, D. Naoroji Road, Bombay-1; The Oriental Express Co. Ltd., Hotel Marine, New Delhi; Jeena & Company, 10, Veer Nariman Road, P.O. Box No. 840, Bombay-1; Lee & Muirhead (India) Ltd., 12, Rampart Row, Fort, Bombay-1; Trade Wings Ltd., Travel Agents: 20 Rampart Row, Fort, Bombay-1. Box 187, Pratap Building, Connaught Circus, New Delhi; Vershaal Basarmal & Bros., 521, Kalbadevi Road, P.O. Box. 2112, Bombay; Orient Express, Petit Building, 350 D. Naoroji Road, Bombay.

TOURIST OFFICES

The following is a list of Government of India tourist offices:

1. Regional Tourist Officer, 88 Queenway, New Delhi.
2. Regional Tourist Officer, 123, Queen's Road, Churchgate, Bombay.
3. Regional Tourist Officer, 13, Old Court House Street, Calcutta 1.
4. Regional Tourist Officer, 35, Mount Road, Madras.
5. The Tourist Reception and Information Officer, 15-B, The Mall, Banaras.
6. The Tourist Reception and Information Officer, 10-A, Mahatma Gandhi Road, Bangalore.
7. The Tourist Reception and Information Officer, The Mall, Agra.
8. The Tourist Reception and Information Officer, Commissioner Road, Ootacamund.
9. The Tourist Reception and Information Officer, 'Krishna Vilas', Station Road, Aurangabad.
10. The Tourist Reception and Information Officer, Chaurastha, Darjeeling.
11. The Tourist Reception and Information Officer, The Ridge, Shimla.
12. Tourist Reception and Information Officer, Circuit House, Jaipur.
13. Tourist Reception and Information Officer, New Capital, Bhubaneswar.
14. Tourist Reception and Information Officer, Wellington Island, Cochin 3.
15. Tourist Information Officer, Rest House, Sanchi.

It may be mentioned here that a Tourist Promotion Committee with the Cabinet Secretary of the Union Government as Chairman has been formed to promote tourist traffic from abroad.

TOURIST CENTRES

Mount Abu (hill station): Pop. 4,316 (1941) in Rajasthan, about 4,000 feet above sea-level. There are two seasons in the year, the first

lasting about two and a half months from the middle of March to the beginning of June, and the second lasting about one and a half months from the middle of September to the end of October. *Places worth a visit:* 1. The Dilwara Jain temples (11th-13th century, A.D.) containing the finest marble carvings in India, 2. Achalgarh temples (15th-16th Century, A.D.) and Mandakini Kund, 3. Ruins of an ancient town called Chandravati, 4. Nakki Talao (lake), 5. Arbuda Devi, a shrine cut in rock, 6. Guru Shikhar (5,646 ft.), highest point in Abu, 7. Sunset point, 8. Palanpur point, 9. Gaumukh Temple and Agni Kund, 10. the Municipal Park. Mount Abu is electrified and has waterworks with public utility taps. The chief means of conveyance are rickshaws, taxis and buses. There are hotels, dak bungalows and inspection houses at Mount Abu. Permission is required to use the dak bungalows and inspection houses. Mount Abu is reached by railway and road. The nearest railway station is Abu Road on the metre-gauge section of the Western Railway from Ahmedabad to Delhi. From the station Abu Road is about 17½ miles by road, and there is regular motor service between the town and the station. Taxis can be hired from Mount Abu Motor Service, Abu Road.

Agra: Pop. 375,665 (1951), a city in U.P., stands on the banks of the River Jumuna. It was the capital of the Moghul Empire during the reigns of Babar, Akbar, Jehangir and Shah Jehan. *Places worth a visit:* 1. the Taj Mahal, regarded by many as the most beautiful building in the world, 2. the Fort, 3. the Juma Masjid, 4. Moti Masjid, 5. the tomb of Itmad-ud-Daula, 6. Akbar's tomb at Sikandra, about five miles from Agra, 7. Dayal Bagh, 8. Twenty-three miles from Agra is the deserted city of Fatehpur Sikri founded by Akbar.

Agra, which has many railway stations, is on the main Bombay-Delhi and Calcutta-Delhi lines and is accessible by the Central or the Western or the Northern Railway.

Ahmedabad: In Bombay State, is an important textile centre. It contains numerous monuments of the fifteenth and sixteenth centuries. Pop. 788,333 (1951).

Aiholi: near Bagalkot in Mysore State contains about fifty temples important in the development of Hindu architecture and sculpture.

Ajanta Caves: are 66 miles north of Aurangabad in Bombay State. The rock-cut caves are 29 in number (5 chaityas or shrines and 24 viharas or monasteries, all Buddhist) and present a record of a unique combination of painting, sculpture and architecture of a period extending over nine centuries from about the 2nd Century B.C. to about 7th Century A.D. Three miles from the caves are a rest-house and a travellers' bungalow under the charge of the Director of Archaeology of the State. There is a curator's office next to the rest-house from which help and information can always be obtained. The caves can be reached from Aurangabad on the railway line between Dronachellam and Manmad by the State Transport buses which regularly ply between Aurangabad Station and the Ajanta caves.

Ajmer: city of considerable antiquity, Hindu and Muslim religious centre, contains Western Railway workshop. Pop. 196,633 (1951). *Places worth a visit:* 1. the Durgah of Khwaja Sahib (tomb of Muslim saint), 2. the Magazine (Akbar's old palace now museum), 3. Ana Sagar Lake (the marble pavilions round the lake were built by Shah Jehan), 4. Adhal-din-ka-Jhoupna (Hut of two and a half days), 5. Taragarh Fortress (built by Akbar), 6. Mayo College, 7. Pushkar, the most sacred lake in India, is about seven miles away. The chief means of conveyance are buses, tongas and pao gharias. Ajmer lies on the metre-gauge section of the Western Railway line between Delhi and

* NOTE: When the population of a town is not given it may be generally assumed that it is less than 20,000.

No. of foreign tourists in 1954: 39,000; in 1951: 21,000. Foreign exchange earnings through tourist traffic were Rs. 10.1 crores in 1956. In the first half of 1957 the earnings amounted to Rs. 7.4 crores.

Ahmedabad. A line from Ajmer goes south to connect it with Khandwa on the Central Railway line between Delhi and Bombay (Rajasthan).

Allahabad: city in U.P., situated at the confluence of the Ganga and the Jumuna. It has an old fort and also an Asoka pillar. Sixty-five miles from Allahabad is Kosambi where the ruins of an ancient capital are being excavated. Pop. 332,295 (1951).

Alwar, Bikaner, Jodhpur, Kotah: famous for Rajput historical monuments.

Amritsar: city in the Punjab, sacred to the Sikhs. Pop. 325,747 (1951). Amritsar is the very centre of the Sikh religion and has a big trade in grain and textiles. *Places worth a visit:* 1. the Golden Temple standing in the Pool of Immortality, 2. Baba Atal Tower, 3. Akal Takht, 4. Ram Bagh Gardens, and 5. Fort Govind Garh. The chief means of conveyance in the city are hackney carriages. Fares are fixed. Amritsar is the Indian terminus of the frontier line from Delhi. It is on the Northern Railway.

Aurangabad: in Bombay, is note-worthy because of its proximity to Ellora and Ajanta caves and for handloom textiles. *Places worth a visit are:* 1. Bibi-ka-Muqbara—the tomb of Aurangzeb's wife which is a replica of the famous Taj, 2. Panchakki (old water-mill). The shrine of Shah Musafir, a Muslim saint, lies near by. Pop. 66,636 (1951).

Badami: in Mysore State, is famous for sculptured caves of the 6th century and for a group of Hindu temples. Fifteen miles from Badami is Pattadakal with another group of early Hindu temples (7th or 8th century) examples of pure Dravidian architecture.

Bangalore: Largest city in Mysore and a health resort, is about 3,000 feet above sea-level. It is well laid-out and up-to-date with every urban facility. *Places worth a visit:* 1. Cubbon Park, 2. Lal Bagh, 3. Band-stand, 4. Race Course, 5. Maharaja's Palace, 6. Tipu's Palace, 7. Venkateswaramaswamy Temple. The chief means of conveyance are rickshaws, jukkas, buses and taxis. Pop. 778,977 (1951).

Baroda: Capital town of the former Baroda State, now part of Bombay State, is about 250 miles to the north of Bombay, modern, pop. 211,407 (1951). *Places worth a visit:* 1. Laxmi Vilas Palace (the residence of the Maharaja, one of the most beautiful palaces in India), 2. Old Nazar Bagh Palace, 3. Museum and Public Park, 4. Jubilee Garden, 5. L. F. Battery, and 6. the city walls. The chief means of conveyance are tongas, buses, taxis. Baroda lies on the main lines of the Western Railway between Bombay and Delhi and Bombay and Ahmedabad.

Belari: in Mysore State, noted for its elaborately sculptured temples of the Hoysala period.

Benares: town in U.P. on the banks of the Ganges, very sacred to the Hindus. It is in fact the religious capital of Hindu India and contains about 1,500 comparatively large temples besides countless minor shrines. It is also reputed to be the oldest city in the country. Pop. 355,777 (1951). *Places worth a visit:* 1. Vishwanath Temple, 2. Bharat Mata Temple, 3. Man-mandir, with Jaisingh's Observatory, 4. Aurangzeb's Mosque, 5. Gyan Wapi Mosque, 6. Nandawar Kothi, 7. Ramnagar Fort, 8. Madaiaj Garden, 9. Victoria Gardens, 10. Benares Hindu University, and 11. Sarnath, a great Buddhist centre with many architectural remains, is about six miles from Benares. The chief means of conveyance are taxis and tongas.

There are also about 30 dhammasalas for Hindu pilgrims. Benares is on the branch line from Moghul Sarai to Saharanpur. It is also connected with the major towns of India by railway.

Bharatpur: town in Rajasthan is famous for its historic fort. Pop. 37,321 (1951).

Bhubaneswar: which is the new capital of Orissa, is a city of temples once said to number 7,000. *Places worth a visit:* 1. Lingaraj Temple,

visitors are not allowed inside the compound but have to see it from a platform, 2. Mukteswar Temple, 3. Parasurameswar Temple, 4. Raj Rani Temple. Nearby are the Jain and Buddhist rock-cut caves of Khandagiri and Udayagiri and Asoka's Rock Edict at Dhauili. There is a Dak Bungalow where visitors can stay with the District Board's permission. Bhubaneswar is on the main S.E. R. line between Waltair and Howrah, about 20 miles from Cuttack and 38 miles from Puri.

Bijapur: town in Mysore State, capital of the old Muslim kingdom of Bijapur is rich with the remains of palaces, mosques, and tombs of the Adil Shahi kings. *Places worth a visit:* 1. Jami Masjid (the greatest mosque in South India), 2. Gol Gumbaz (the tomb of Mahammad Adil Shah and the second largest dome in the world), also called the Whispering Gallery, 3. Methar Mahal, 4. Ashar Mahal, 5. Gagan Mahal, 6. Chini Mahal, 7. Mecca Masjid, 8. Taj-Baury (water-tank), 9. Malik-i-Maldan (Great Gun), 10. Landi-Kasab Gun, 11. Haidar Burj (tower), 12. Ibrahim Rosa (the tomb and mosque of Ibrahim II), 13. Jala Mandir (reservoir), 14. Chand Bauri (old tank), 15. Granary, 16. Jod Gombas (double tombs), 17. Bara Kaman Masjid, and 18. Begum Tank. The chief means of conveyance are taxis, lorries, tongas and bullock-carts. Bijapur is a railway station on the Gadag-Sholapur section of the Southern Railway. There are a dhammasala and a travellers' bungalow about one and a half miles from the station. Pop. 65,734 (1951).

Bombay: second city and port in India generally called the Gateway to India, is western and modern. Pop.: over 3 million; Area (Greater Bombay) 174 sq. miles. It is the principal centre of the textile industry, and the second biggest financial centre. The foreign trade of Bombay is about 46 per cent of the total trade of India. The city returns 30 per cent of the country's total income-tax, and 20 per cent of the corporation tax. It is an important communications centre, served by several air-lines and two big railways of both of which it is a terminus. May and October are the hottest months, but from November to March it is pleasant. *Places worth a visit:* 1. the Gateway of India, 2. Apollo Bunder, 3. Prince of Wales Museum, 4. the Town Hall, 5. Bombay Castle, 6. Rajabai Tower and University Building, 7. Victoria Terminus of the Central Railway, 8. the General Post Office, 9. Crawford Market, 10. Brabourne Stadium, 11. Chowpatty sands, 12. Malabar Hill, Hanging Gardens and Kamia Nehru Park, 13. Central Station, Terminus of the Western Railway, 14. Race Course, 15. Bhandarwada Reservoir and Gardens, 16. Victoria Gardens. Places near about Bombay which are worth a visit are: 1. Juhu (sea-side resort), 2. Versova (sea-side resort), 3. Vihar Lake (from which the city gets its water-supply), 4. Kanheri Caves (rock-cut caves of Buddhist origin), 5. Jogeshwari Caves, 6. Vajreshwari (temple and hot springs of medicinal property), 7. Mandapeshwar (cave temple), 8. Nirmal (temple and lake), 9. Ambarnath (temple), 10. Uran (port, with private garden and zoo), 11. Pall (hot springs and small game shooting), 12. Elephanta Caves (Brahmanical Caves). The chief means of conveyance in Bombay are trams, buses, electric railway, taxis and gharis.

Brindavan: holy place of Hindus, about six miles from Mathura in U.P. It is sacred because of its association with the birth and early life of the Hindu God Shri Krishna. *Places worth a visit:* 1. Govind Dev Temple, 2. Gopinath Temple, 3. Ranganath Mandir.

There are travellers' bungalows. Brindavan is accessible by railway or road from Mathura.

Bodhi Gaya: in Bihar, a Buddhist centre of pilgrimage. It contains the famous medieval Buddhist temple near the Bodhi Tree under which Gautam did penance and attained Enlightenment. Pop. 133,700 (1951).

Bundi: in Rajasthan is well-known for its buildings. Jungles nearby provide plenty of tiger shooting. Pop. 22,607 (1951).

Calcutta: until March, 1912, the headquarters of the Indian Government, and now, as then, the commercial capital of India. It is the terminus of three great railways, and the port of an immense river traffic. Though it lies 84 miles from the Bay of Bengal on the River Hooghly, it has a larger foreign trade than any other Indian port, and its enterprising Port Trust has the largest revenue among Indian port authorities. It is the centre of five great industries—jute, tea, hides and skins, coal and lac. Its exports include gunny bags, raw jute, tea, shellac, coal, hides and skins, rice and linseed, while it is the chief distributing centre for Lancashire piece-goods, metals and machinery, and the vast and varied requirements of the States of West Bengal, East Bengal (Pakistan), Bihar and Orissa and the tea districts. Population of West Bengal is 26-16 millions and of Greater Calcutta 4,578,071. *Places worth a visit:* 1. Victoria Memorial (contains a picture-gallery and museum), 2. the Indian Museum, 3. the Zoological Gardens, 4. the Jain Temple, 5. the Kalighat Temple, 6. Belvedere House (where the British Viceroy stayed when on visit to Calcutta), now being converted into a museum, 7. Raj Bhavan (residence of the Governor of West Bengal), 8. Marble Palace (containing art treasures property of the Mulik family), 9. Fort William, 10. the Eden Gardens, 11. the Town Hall, 12. the National Library, 13. Dalhousie Square, 14. the Race Course, 15. Dhakuria Lake, 16. the Hindu bathing ghats, 17. Dakshineswar Temple. Places near about Calcutta which are worth a visit are: 1. Bally (holy place), 2. Belur (home of the Ramakrishna Mission), 3. the Botanical Gardens (contains the biggest banyan tree in existence), 4. Diamond Harbour (fort and customs house), 5. Dum Dum (airport of Calcutta).

Cape Comorin: also called Kanya Kumari in Malras State, is the southern-most tip of India.

Conjeevaram (Kanchipuram): the city of temples, the Banaras of the South, is about 45 miles to the south-west of Madras. It is one of the seven holy cities of India and the only one in the South. The place is divided into three parts, Shiva Conjeevaram (containing Shiva temples), Vishnu Conjeevaram (containing a smaller number of Vishnu temples) and Pillayar Pallayam, a testimony to the part played by all the main Hindu religious sects in the history of the city. There are over a thousand temples in all. *Places worth a visit:* 1. Kallanath Temple (over 1,000 years old), 2. Valukuth Perumal Temple (over 1,000 years old), 3. Ekambareswar Temple (400 years old), 4. Vedaraja Perumal Temple. Pop. 84,810 (1951).

Conjeevaram is on the Renigunta-Chingleput section of the Southern Railway and is easily accessible from Madras via Chingleput.

Cooch-Bihar: in West Bengal, is known for the facilities and opportunities which it offers to shikaris in search of big game hunting. Pop. 33,242 (1951).

Coomoor: hill station on the Nilgiri Hills in Madras State, is about 6,000 feet above sea-level. The climate is mild and genial neither too hot in the summer nor too cold in the winter. The mean day temperature is 64 degrees. The north-east monsoon breaks in October and lasts about two months. The town has good water-supply and natural drainage facilities and is reputed to be one of the cleanest towns in South India. *Places worth a visit:* 1. Sim's Park (contains collection of plants), 2. Low's Waterfall, 3. Tiger Rock (hill fort). There are innumerable places for excursion and picnic purposes, e.g. the Droog, the Dolfin Nose, the Lamb's Rock, Las Falls, Lady Canning Seat, the Ralliah Dam and Catherine Falls. The chief means of conveyance are cars which can be hired.

Coomoor lies on the Mettupalayam-Ootacamund line of the Southern Railway. It is also connected by road with Ootacamund, and Kotagiri, another hill station. Pop. 23,902 (1951).

* The official name is Varanasi.

Darjeeling: hill station and summer capital of the West Bengal Government lies on the lower slopes of the Himalayas about 370 miles to the north of Calcutta. It is 7,110 feet above sea-level. The maximum temperature in the summer is about 70 degrees and the minimum in the winter is about 35. The town commands picturesque views including that of Mount Kanchenjunga and on a clear day of Mount Everest. Various sports are available during the season such as fishing, shooting, horse-riding and a number of other indoor and outdoor sports. Darjeeling has also a first-class sanatorium known as Eden Sanatorium. *Places worth a visit:* 1. Government House, 2. Town Hall, 3. Museum, 4. Observatory Hill (from where a magnificent view of Kanchenjunga can be obtained), 5. the Mall, 6. Natural History Botanical Gardens, 7. Birch Hill Park, 8. Senchal Lakes, 9. Ghoom Monastery, 10. Tiger Hill (from where the sunrise over Everest is generally viewed).

The chief means of conveyance are rickshaws, ponies and dandies. Darjeeling is the terminus of the Darjeeling-Himalayan section of the N. E. Railway and is about 27 hours' journey from Calcutta. From Siliguri where the visitor has to change, Darjeeling can also be reached by car which is quicker than travelling by the mountain railway. Pop. 33,603 (1951).

Daulatabad: in Bombay State, contains the famous rock-hewn 12th century fortress at one time so prosperous that it led Bin Tuglak to shift his capital to it from Delhi (1308). Close by is the tomb of the Moghul Emperor Aurangzeb.

Delhi (New): the capital of India and the seat of the Government. It was planned in accordance with modern ideas by the architects Sir Edwin Lutyens and Sir Herbert Baker and was formally opened in 1931. New Delhi houses the President's House (now called Rashtrapati Bhavan), the Parliament, and the Secretariat. All the buildings in New Delhi are white except the ones mentioned above. These latter are built of red sandstone. Pop. 276,314 (1951).

Delhi (Old): also called Shahjahanabad, the ancient capital of India stands on the river Jumna, and is enclosed by a stone wall with seven gates. It has a history going back to 3,000 years and within an area of 50 square miles eight Delhi's rose and fell. The seven predecessors of present-day Delhi are Kutub, Siri, Tuglakabad, Jahanabad, Ferozabad, Purana Quila and Shahjahanabad. No city in India contains as many historical remains as Old Delhi. One can trace here the growth and decay of almost every dynasty which held sway over the ancient land of Hindustan. There are a number of factories, jewellery, gold and silver embroidery and ivory carvings works for which Delhi is well-known. Pop. 914,790 (1951). Delhi is a great distributing centre for cotton, wool and silk. Industries include hardware, utensils and stoneware. Delhi is also a large market for grain. Lately tourist traffic has grown into a regular new trade. *Places worth a visit:* Red Fort, Jama Masjid, Chandni Chowk, Rajghat Samadhi, Ashoka's Pillars, Feroze Shah Kotla, Purana Quila, Humayun's Tomb, Isa Khan's Tomb, Lodi Park and Lodi Tomb, Safdar Jang's Tomb, Hauz Khas, Kutab Minar, Tughlaqabad, India Gate or War Memorial Arch, Rashtrapati Bhavan, Parliament House, National Museum, Shri Lakshmi Narayan Temple, Jantar Mantar or the Observatory, Museums.

The means of conveyance are tongas, buses, taxis, trams, cycle-rickshaws and auto-rickshaws.

Delhi is directly connected by rail and air with Bombay, Calcutta and Madras. The Central and Western Railways connect it with Bombay, the Northern and Eastern Railways with Calcutta, and the Southern and Central Railways together with Madras.

Delhi also lies on the direct East-West trans-world air routes linking India with all the major cities of the world.

Ellora Caves: are situated about 15 miles to the north-west of Aurangabad in Bombay State. The caves which are excavated in the face of a hill are 34 in number and run north to south for a distance of a mile and a quarter. The hill has the shape of a crescent the southern, the centre, and the northern being occupied respectively by Buddhist, Hindu and Jain temples. There are 12 Buddhist caves, 17 Hindu caves and 5 Jain caves. The Hindu caves are more lavishly decorated than others and Kailash Temple which is the most famous of the caves is also the biggest cave temple in India. It stands in a court averaging 154 feet wide, 276 feet long with a scarp 107 feet high at the back. Among other notable caves are caves X, XII, XIV, XV, XXIX, XXXIII, XXXIV. It is believed that the Ellora Caves are about a thousand years old. They are reached from Aurangabad by bus or car.

Ernakulam: in Kerala State, is famous for its backwaters fringed by Hindu, Muslim, Christian and Jewish settlements. Pop. 62,283 (1951).

Fatehpur Sikri: City founded by Akbar in 1569 but abandoned soon after is situated 23 miles from Agra. Akbar wished to make it his capital but it had to be abandoned because of lack of water. Here Akbar's son Salim who later became the Emperor Jehangir was born. The place contains a number of palaces, shrines, mosques built of marble and red sandstone. *The more notable among the monuments are:* 1. Buland Darwaja, the Gateway of Victory, built to commemorate the conquest of Khandesh. It is 176 feet high and is the highest gateway in India. It forms the southern gateway to the most imposing structure in Fatehpur Sikri, 2. the Jami Masjid, said to be a copy of the mosque at Mecca or Medina. Then there are 3. Panch Mahal, 4. Diwan-i-Khas (Hall of Private Audience), 5. Mariam's House, 6. Palace of Jodh Bai, 7. House of Birbal, 8. Elephant Tower and 9. Khas Mahal. Fatehpur Sikri has a railway station, and the city can be easily reached by car. There is a dak bungalow where visitors can get meals by previous arrangement.

Golkonda: 5 miles from Hyderabad is an ancient spectacular fort (Andhra).

Gopalpur-on-Sea: in Orissa is a sea-side resort for a quiet holiday.

Gulmarg: an ideal hill station about twenty-nine miles from Srinagar, is a little less than 9,000 feet above sea-level. The place boasts of all modern facilities and is particularly noted as a winter playground affording scope for skating, ski-ing, tobogganning, and golf. Round about are ideal places for walks, rides and excursions.

Gwalior: best known for its fort (which is reputed to be the most interesting and remarkable example of a Hindu palace of an early age) lies about 200 miles to the south of Delhi. *Places worth visiting:* 1. Gwalior fort (includes Man Singh's Palace and a number of temples and shrines), 2. Tansen's Tomb, 3. Rani Laxmi Bai's Chhatra, 4. the Chhatris of other Mahratta rulers, 5. Tomb of Mahomed Ghaus, 6. Jami Masjid, 7. State Museum, 8. King George Park and Zoo, 9. Gwalior Pottery Works. Seventy-two miles from Gwalior is Shivpuri or Sirpi famous for its lake and scenery. Surveys which is twelve miles again from Shivpuri contains the remains of a fortress of the early medieval period. The chief means of conveyance are tongas and buses. There are two dharmasalas open only to Hindus but at Dufferin Sarai opposite the station rooms are available for rent. Gwalior is on the main Central Railway line between Bombay and Delhi. Pop. 241,577 (1951) (Madhya Pradesh).

Halebid: in Mysore, is well known for its elaborately sculptured temples of the Hoysala period.

Hampi: in Mysore State, is the ruined capital of the Vijayanagar Empire. It is 8 miles from the Hospet Railway Station on the Southern Railway. The ruins are about 600 years old and are described as "virtually a vast open air museum of Hindu monuments in the Dravidian style of architecture".

Hardwar: in U.P. on the Inner Himalayas, is a great Hindu pilgrim centre.

Imphal: north-east frontier town and capital of Manipur. It is celebrated for the Manipur dance and handloom products.

Jabalpur: in Madhya Pradesh; fourteen miles from Jabalpur are the marble rocks. Pop. 256,998 (1951).

Jaipur: provisional capital of Rajasthan Union, is a well laid-out modern city. It is famous all over India for the beauty of its art and the skill of its artisans. Jaipur pottery, brass ware, stone carving, ivory and sandalwood work and jewellery have enjoyed a great reputation from ancient times. Pop. 291,130 (1951). *Places worth a visit:* 1. Maharaja's Palace, 2. Jai Singh's Observatory, 3. the ruins of Amber (ancient capital), 4. the Hawa Mahal, 5. the Palace Armoury, 6. Cenotaphs of the Queens, 7. Gaita (place of pilgrimage) and Ghat, 8. School of Arts, 9. Public Library, 10. Transport Gardens, 11. Museum. The chief means of transport are tongas, ekkas, phaetons, taxis, buses and palgharis.

Jaipur is on the metre-gauge line of the Western Railway between Ahmedabad and Delhi.

Jamshedpur: in Bihar, famous as India's 'steel town'. Pop. 218,162 (1951).

Jog Falls: in Mysore State, are one of the highest waterfalls in the world.

Junagadh: in Bombay, is situated below the celebrated Girnar Hill and is one of the most ancient cities in India. The temples on the hill are noted for their architecture and delicate painting. On the way to Girnar is a rock with an Asoka edict. Pop. 62,730 (1951).

In Junagadh is the famous Gir Forest—the only place in Asia where lions are found.

Kangra Valley: famous for its magnificent landscapes and historic temples, lies in the Punjab. Semi-urban hill stations are Kangra and Dharamsala. *Places worth a visit in Dharamsala are:* 1. Bhagunath Water Springs, 2. State Quarries, 3. Himalayan Snow View. The chief means of conveyance are cars and buses. There is also a dak bungalow at Dharamsala where visitors can stay. To get to the Kangra Valley a visitor has to change at Pathankot into the narrow-gauge railway which runs to Nagrota. Dharamsala can also be reached from Pathankot by car.

Kanheri: near Bombay, is famous for its Buddhist caves dating back to the 1st century A. D. It is about twenty miles from Bombay.

Kashmir: unsurpassed for the beauty of its mountains, lakes and valleys is a province of the State of Jammu and Kashmir, situated in the far north of India, 5,000 ft. above sea-level. Srinagar, the capital of the State is famous for its shawls and carpets and the exquisite beauty of its wood-work and papier-mache articles. Its fruit and vegetables are equally well-known. Well-furnished, luxurious house-boats moored along the river Jhelum or in the Dal Lake provide all necessary comforts amidst gorgeous natural surroundings. The normal recreations include Shikara rides on the lakes and canals, mountain-climbing, big and small game hunting, golf, fishing and swimming. Gulmarg, Sonamarg and Pahalgam are favourite holiday resorts in the neighbouring mountains and can be reached by motorable road. The way to Srinagar is via Pathankot, which is a railway terminus. From Pathankot one goes to Srinagar by road passing Jammu on the way. There is a regular air service from Delhi to Srinagar, and a shuttle non-scheduled air service from Pathankot to Srinagar during the tourist season. The chief means of conveyance are boats, tongas, cars or buses. *Places worth a visit:* 1. The Moghul Gardens, like a. Shalimar, b. Chashama, c. Aocchabal, d. Shahind, e. Nishat, 2. The lakes like a. Dal Lake, b. Wulur Lake, c. Anchar Lake, d. Manasbal Lake and so on. 3. Places of historical and religious interest like a. Harmandir temple, b. Pandranthan temple, c. Bhawanee caves, d. Avanti Pura and e. Pari Mahal.

Khajuraho: in Chhattarpur in Madhya Pradesh, is famous for its group of highly ornate mediæval temples (Madhya Pradesh).

Kodaikanal: famous hill station on the Palni Hills in Madras State. It is about 7,000 feet above sea-level and has a temperate climate. The average annual rainfall is 65 inches, the major part of the rain falling in October, November and December. The months of April, May and June constitute the 'season'. The town enjoys excellent water-supply and is also well-equipped with all the ordinary amenities of life. The place affords plenty of scope for such recreations as walking, hiking, boating, fishing, hill climbing and golf. Going on an excursion or picnic is yet another way of diverting oneself. For the more adventurous there is big game hunting. Kodaikanal is the delight of the gardener and flowers are in bloom all the year round. *Places worth a visit:* 1. the lake skirted by a three-mile road, 2. the water falls like a. Fairy Falls, b. Silver Cascades, c. Bear Shola Falls, d. Glen Falls, e. Pamber Falls. 3. There are view points like a. Coaker's Walk, b. Pillar Rocks, c. Prospect Point, d. Vembadi Shela Peak, e. Dolphin's Nose. Then 4. the Solar Observatory.

There are a number of boarding houses, and fully furnished flats can also be rented. Kodaikanal is reached from Kodaikanal Road railway junction on the Southern Railway via Tiruchirappalli. Kodaikanal town is 50 miles from the railway station and the journey can be done by car, taxi or bus on a very good motoring road.

Kanarak or Konark: place in Orissa, famous as the site of the Temple of the Sun God otherwise called the Black Pagoda. It is remarkable both as an example of ancient Indian architecture and sculpture and of engineering skill. A great part of the temple is destroyed but on the porch stand the huge figures of warriors and life-sized pieces of horses and elephants and the famous carved wheels at the basement. The image of the sun in the yard of the Puri Temple is generally supposed to have come from Kanarak. Kanarak is about 50 miles from Puri by bus or taxi, 40 miles from Bhuvaneshwar by bus or taxi. The road is open from November to May.

Kolar: in Mysore, is the site of the famous gold fields. Pop. 159,034 (1951).

Kotagiri: A hill station on the Nilgiris, higher than Coonoor, but lower than Ootacamund, is smaller and quieter than either. It is about 6,500 feet above sea-level and has a mean day temperature of 62 degrees. The town has electricity, a number of shops and boarding houses, a local board hospital and golf course. Kotagiri is reached from Coonoor or Ootacamund by car or bus. The roads are excellent and there is a regular bus service. Between Kotagiri and Ootacamund the road goes over Doddabetta the highest peak in the Nilgiri Hills (Madras State).

Kulu Valley: well-known for the variety of its scenery and places of historical interest is situated in the Punjab, north of Simla. It is ideal for hiking and trout fishing. The important part of the valley from the tourist's point of view is the road which runs from Pathankot or Nagrota the rail-heads into the valley. A few miles beyond Pathankot the road passes through the rich cultivation of the Kangra Valley and the extensive tea gardens surrounding Palampur and Baijnath. The traveller has a view of the majestic snow-capped mountains of the Dhauladhar range standing out in bold relief against the sky-line. He also comes across the ancient temples of Baijnath. Beyond At after Mandi the valley opens out and the final stretch through the lovely Kulu Valley mainly along the left bank of the river Beas offers an entirely different type of scenic effect. The Kulu Valley is also called the 'Valley of the Gods' as in addition to several important deities like Raghunathji at Sultanpur and Jamli of Malana every village has its own particular God. The best season is from March to May and September to November. The summer is never uncomfortably hot. The main centres of the Kulu Valley are: 1. Kulu or Sultanpur, the principal town, about 4,000 feet above

sea-level. It is the main shopping centre and has a dak bungalow, and a number of rest-houses. 2. Raison, 8 miles from Sultanpur and 4,700 feet above sea-level. The available sports are golf, tennis and swimming. Maydower and the Shacks are two hotels. 3. Katrain, is in the widest part of the Valley, 12 miles from Sultanpur and 4,800 feet above sea-level. 4. Naggar, summer headquarters, is 5,800 feet above sea-level. There is a departmental rest-house and a serai. 5. Manali, the head of the valley and terminus of the motor road, is 23 miles from Sultanpur and is situated amid typical Alpine scenery. Accommodation for visitors is available at Sunahine Orchards, Departmental rest houses and Mission Hospital. Except Manali, the road to which may be occasionally closed owing to snowfall the rest of the valley is open throughout the year. Pathankot is the rail-head for Kulu. From Pathankot Kulu is reached by bus or car, or from Pathankot to Nagrota by metre-gauge railway and from there by bus to Kulu.

Kumaon Hills: in U.P. form part of the Himalayas and are known as the sportsman's paradise. Two important summer resorts are Nainital and Ranikhet. Most mountaineering parties establish their base at Ranikhet for ascent to the Pindari Glacier.

Tiger shooting is available in the Terai and Bhabhar Forests in the Kumaon region.

Landowme: in U.P. in Garhwal about half way between Mussoorie and Nainital.

Lonavla: in Bombay State, lies in the heart of the Western Ghats and is known for the Karla Caves - 6 miles from Lonavla by car.

Lucknow: the city of gardens is the capital of U.P. It is full of places of historical interest and of architectural beauty and is generally regarded as the cultural capital of Moghul India. It is well-known for its pottery, copper and brass ware, wood and ivory carvings and gold and silver embroidery on cloth. Legend connects the founding of the city with Lakshmana, the brother of Rama, the mythical hero of the Hindus, and is sometimes called Lakshmanpur. Pop. 496,861 (1951). The chief means of conveyance are tongas, ekkas, phaetons and taxis. *Places worth a visit:* 1. Great Imambara, 2. Small Imambara, 3. tombs of Walid Ali Shah and his Begum, 4. Kaiser Bagh Palace, 5. Chattri Mansil, 6. Dilkusha Palace, 7. Moti Mahal, 8. Maschi Bhawan Palace, 9. Jumna Masjid, 10. Charbagh, 11. Alam Bagh, 12. Sikander Bagh, 13. Musa Bagh, 14. Wingfield Park, 15. Residency, 16. Havelock's Tomb, 17. Clock Tower, 18. Museum, 19. Observatory, 20. Iron Bridge. Lucknow is a big junction on the Northern Railway.

Madras: the third largest city in the sub-continent and the capital of Madras State. It is the place where the English first settled to trade. Pop. 1,418,056 (1951 census). The chief means of conveyance are rickshaws, juktas, horse carriages, taxis and buses. *Places worth a visit:* 1. Fort St. George (contains the oldest Protestant church in the country where Clive was married), 2. High Court, 3. Light House, from the top of which one can get a panoramic view of the city, 4. Marina. The Marina is one of the most beautiful promenades in the world; sea-bathing is possible at certain points, 5. The Museum, 6. Connemara Library, 7. the Zoo, 8. the Observatory, 9. Moore Market, 10. Parthasarathy Temple, 11. Mylapore Tank and Kapaleswar Temple, 12. St. George's Cathedral, 13. St. Thomas Mount, 14. Race Course, 15. Buckingham and Carnatic Mill, 16. Madras Pencil Factory and 17. Adyar, where the headquarters of the Theosophical Society are located. There are two places round about Madras which are also worth a visit: 1. the ruins of the Gingee Fort famous in the days of the Vijayanagar Empire are about 95 miles from Madras and can be reached by rail and road, 2. the seven Pagodas of Mahabalipuram are 53 miles by road from Madras and can also be reached by road from Chingleput Railway Junction. Kalakshetra is a well-known institution for music, dance and drama at Adyar.

Madurai: the second biggest city in Madras State is a great religious centre, containing as it does a number of famous temples. In the old days it was the capital of the Pandya kingdom and has always been a seat of Hindu culture particularly Hindu architecture. The silk-weaving and textile industries of Madurai are also noteworthy. *Places worth a visit:* 1. The Great Temple, actually made up of two temples one of Meenakshi and the other of Shiva. Adjoining the temple are a. Nandi Hall, b. temple of the Saints, c. the Jewel House, d. the Stable Houses. Then there is 2. Tirumal Nayak's Palace. Pop. 361,781 (1951).

Mahabaleshwar: a hill station in Bombay State, the season being April and May. It is 4,500 feet above sea-level and is noted for its bracing climate. It is also well-known for its fruit and vegetables, orchids and lilies which bloom in April and May. The chief recreations are hiking and driving in a car. Among the sports which are available are tennis, golf and polo. *Places worth a visit:* 1. The two Government Houses old and new, 2. Reay Garden and 3. the two temples Kriahna and Mahabaleshwar. Then there are a number of points from which magnificent views can be obtained, like Arthur Seat Point, Baghdad Point, Castle Rock, Carnac Point, Connaught Point, Falkland Point, Elphinstone Point, Margney and Lardwick Point and Bombay Point. Then there are the waterfalls like Chinaman's Waterfall, Dhobi Waterfall, Lingmala Waterfall and a lake called Yenna Lake. The places of historical interest are all connected with the name of the Mahratha leader Shivaji such as Karnaigarh Fort, Makrandgarh Fort, Pandavgarh Fort, Pratapgarh Fort and Raigarh Fort. Near Pratapgarh are the Bhavani Temple and the tomb of Afzulkhan. All these places are accessible by road from Mahabaleshwar.

Mahabaleshwar can be reached from Poona both by road and railway. By railway one can go as far as Wathar Station from where Mahabaleshwar is only about half-an-hour's journey by road.

Mandu: in Madhya Pradesh is one of the greatest mediæval city sites in India with extensive remains including fortifications and palaces. Seventy-eight miles west of Mandu by road via Dhar is Bagh which has a large number of caves adorned with fine old frescoes.

Matheran: the nearest hill station to Bombay is 2,650 feet above sea-level, and is famous for the magnificent views which it yields. The town looks on to the sea, and the coastal plain rises imperceptibly until it reaches the steep ascent of the Ghats. In his walk round the eighteen-mile circumference of the hill the visitor can reach no fewer than thirty-three points of which the following deserve mention: 1. Garbut Point, 2. Panorama Point, 3. Porcupine Point, 4. Louisa Point, 5. Chowk Point, 6. Alexandra Point, 7. Belvedere Point, 8. Echo Point, 9. Monkey Point. At every one of these points the visitor will find comfortable seats, shady trees and fine views. Among other places which are worth a visit are: 1. Charlotte Lake, 2. Paymaster Park, 3. Band-stand, 4. Castle Hill Tower, 5. Race Course. The chief recreations are walking and riding. Rickshaws, munchis and horses are the chief means of conveyance.

Matheran is reached from Neral Station on the main line between Bombay and Poona. From Neral there is a light railway to Matheran which is about one-and-a-half-hour's journey. Alternatively one can do the journey by rickshaw or pony by previous engagement at Matheran.

Mathura: in U.P. is an important place of pilgrimage for Hindus, because of its associations with Shri Krishna. It has also an archaeological museum. Six miles from Mathura is Brindavan. Pop. 98,552 (1951).

Mussoorie: A hill station in U.P. lies 18 miles to the north of Dehra Dun. It is 6,580 feet above sea-level. The town has excellent water-supply, electric lighting system, hospitals, nursing homes and some of the best schools in India both for boys and girls. There are also plenty of sports

and amusements. And like every Himalayan hill station one can obtain magnificent views of mountain tops and green river valleys. Hiking and going on excursion or picnic are among the main recreations. The means of conveyance are rickshaws, ponies, dandies, buses and cars. *Places worth a visit:* 1. The falls like c. Bhatta Falls, 5. Kamptee Falls, c. Bheerav Falls, d. Mossy Falls. 2. Wimper's Tank, 3. Bandstand. Mussoorie is reached from Dehra Dun by car or bus and is about two hours' journey.

Mysore (State): commemorates the destruction of Mahishasur, the demon by Chamundi who is the tutelary goddess of the royal family of Mysore. Mysore is a picturesque land of forest and mountain presenting the most diversified and beautiful scenery. In the southern forests are found wild elephants for the capture of which khedda operations are undertaken from time to time. Tigers, leopards, bears and bisons are also numerous. *Places worth a visit in Mysore State:* 1. The Chenna Kesava Temple at Belur, 24 miles from Hassan, 2. Sivasamudram Falls on the Caverry River, 3. Hoyasalewara Temple at Halebidu, 4. Gersoppa Falls also called the Jog Falls on the Shrivati River, the most famous beauty spot in Mysore. The falls are higher than Niagara, 5. Kolar Gold Fields, the biggest in India worked by electric power, 6. Nandidurg, a hill station near Bangalore, and the summer residence of Tipu Sultan, 7. Srirangapatnam of historical and religious interest as the capital of Tipu and as the city of many temples, 8. Shravanabelagola, the great Jain religious centre with the huge statue of Gomateshwara and of course the city of Bangalore and the town of Mysore.

Mysore (City): second city in the State, is built in accordance with modern standards, and contains a number of beautiful public buildings. It attracts great crowds twice a year when the city wears a gala appearance. These two occasions are the Maharaja's birthday and the Dasarah. *Places worth a visit:* 1. The various palaces (and also stables) like the Maharaja's Palace, Jagannathan Palace and so on, 2. Chamundi Hill, with the Bull and the Temple, 3. Zoological Gardens, 4. Silk Factory, 5. Sandalwood Factory, 6. Krishnarajassagar Dam and the Brindavan Gardens, among the most beautiful in the world, about 12 miles from Mysore. The chief means of conveyance are juktas, coaches, and taxis. Mysore is one of the termini of the Southern Railway. Pop. 244,323 (1951).

Naini Tal: hill station and summer capital of the U.P. Government, is about 6,350 feet above sea-level. Among the principal recreations are hiking, boating and yachting on the lake around which the town stands, and fishing and riding. One can also enjoy the Himalayan mountain scenery. *Places worth a visit:* 1. Cheena Peak, 2. Land's End, 3. Lariya Kanta Peak, 4. Sher-ka-Danda Peak, 5. Tiffin Top or Dorothy Seat, 6. Camel's Peak or Deopatta Peak. Naini Tal is reached from Kathgodam railway station which is connected with Bareilly and Mathura. From Kathgodam one goes by bus or car to Naini Tal which is 22 miles away.

Nalanda: in Bihar contains a group of ruined Buddhist temples and monasteries and a small local museum. It was the seat of an ancient Buddhist university.

Nasik: in Bombay State, is a place of pilgrimage for Hindus and is famous for Buddhist rock-cut temples of the first century B.C. and later. Pop. 97,042 (1951).

Ootacamund: hill station and summer capital of Madras State, stands 7,500 feet above sea-level on the Nilgiris. It is sometimes called 'the Queen of the hill stations.' One of the main features which distinguishes it from other hill stations is the number and length of motorable roads which go winding in and out of spacious parks or long stretches of turf studded with ornamental trees. The mean temperature for the year is 57.33°; during the winter the thermometer touches freezing point. Ootacamund is called the sportsman's paradise: plenty of fishing and big game shooting being available. There is also golf and tennis and during the season

rares and tournaments are held. *Places worth a visit:* 1. Botanical Gardens, 2. Race Course, 3. Assembly Room, 4. Dodd's Batta, the highest peak in the Nilgiris, and 5. Pykara Hydro-Electric Dam which is about 18 miles from Ootacamund. The chief means of conveyance are juktas, rickshaws and taxis. Ootacamund is the terminus of the Nilgiri mountain railway. Pop. 41,370 (1951).

Pachmarhi: hill station, was summer capital of Madhya Pradesh lies on the Mahadeo hills of the Satpura Range and is about 3,500 feet above sea-level. There are about 20 golf links in the town and plenty of game is also available in the Pipariya forest. *Places worth a visit:* 1. Bee Dam, 2. Mahadeo Caves, 3. Dhupgarh, highest point in the Satpuras, 4. Dorothy Deep Falls, 5. Duchess Falls, 6. Lansdowne Hill, 7. Nilphur springs, 8. Waters Meet, 9. Big Falls, 10. Pansy Pool, 11. Twipram Pool, 12. Saundery's Pool, 13. Pandava Caves. Pachmarhi is reached from Pipariya Station on the main Central Railway line from Bombay to Jabalpur. From Pipariya, Pachmarhi is 32 miles and the journey can be done by bus or car.

There are facilities for swimming, trekking and riding.

Padmanabhapuram: in Kerala, is the ancient capital of the former Travancore State. *Place worth a visit:* Palace.

Pahalgam: in Kashmir in the lap of the Lidder Valley is situated 60 miles from Srinagar and is famous for its camping sites, and as a base for the Amarnath Cave and Kolahoi glacier.

Palitana: in Bombay, is famous for its holy hill Shatrunjaya (see separate note) and its Jain temples. Pop. 24,097.

Patala: capital of Bihar, stands on the site of the ancient city of Pataliputra. Pop. 283,479 (1951).

Poona: in Bombay State has many old palaces and parks and one of the best race courses in India. *Places worth a visit are:* the National Chemical Laboratory, the Defence Academy and the Central Water and Power Research Station at Khadakvasla. Pop. 480,982 (1951).

Porbandar: in Bombay, is the birth-place of Mahatma Gandhi and an attractive summer resort. Pop. 58,824 (1951).

Prabhas Patan: in Bombay, is the site of the famous Somnath Temple, whose idol was reinstated in May 1951.

Puri: famous for the Jagannath Temple, is a coastal town in the State of Orissa and is the State's summer resort. The car festival when an image of Jagannath is taken in procession in a huge rath is an event of India-wide importance. The temple has a black marble pillar in front and a 24-feet high stone wall all round. There are four entrances. The presiding deities are Krishna, Balaram and their sister Subhadra. Besides the Jagannath Temple other places worth a visit are the monastic establishments (maths). Fifty miles from Puri is Konarak, famous for the Sun Temple. Pop. 49,057 (1951).

Rameshwaram: This holy town in Madras State is built on an island in the Palk Straits. It contains one of India's most venerated temples, perhaps the finest example of South Indian architecture. It is in the form of a quadrangular enclosure 650 ft. by 1,000 ft. The temple is renowned for its vast pillared corridors nearly 4,000 ft. long.

Ranichi: hill station and summer resort of Bihar, noted for its picturesque scenery and fine roads. Pop. 106,849 (1951).

Ranikhet: is a hill station in U.P. on the Kumaon Hills. Most mountaineering parties establish their bases at Ranikhet.

Sanchi: small village in Madhya Pradesh, famous for the Buddhist stupa which is the largest and the best preserved in India. The stupa is built with sand stone and is about 103 feet in diameter and 42 feet high. The sculpture is remarkable in that there is no anthropomorphic figure

of Buddha. The most striking features of the Stupa are the four gates which are profusely carved with scenes from the Jataka stories. Sanchi is on the main Central Ry. line between Bombay and Delhi. There is a State-owned dak bungalow at the place where lodging and boarding are available by previous arrangement.

Sankshiptan: in West Bengal, is the home of the famous Virsa Bharati, the international university founded by Tagore. *Places worth a visit are:* Rabindra Bhavan (the poet's residence) where his personal belongings, manuscripts, etc. are on display and the poet's mud hut where he wrote many of his famous books.

The place is 91 miles from Calcutta on the Eastern Railway and 2 miles from Bolpur Station.

Sasaram: in Bihar is famous for the magnificent tomb of Sher Shah, Emperor of Delhi. Pop. 20,265 (1951).

Seringapatam: or Srirangapatna in Mysore State, 9 miles by road from Mysore city is the ancient capital of Tipu Sultan. It has the Sultan's fort, mosque and palaces.

Sevagram: in Bombay State, is the village where Mahatma Gandhi founded his ashram.

Shatrunjaya Hills:—Shatrunjaya, near Palitana in Bombay, is also known to the Jains as Siddhagiri or Siddhachala or the Hill of the Perfected Ones. It is the most sacred place (tirtha) of Shwetambara Jains. There are a great number of temples in groups on *looks* or summits. The most important one is the *look* of Adishvara Bhagavan. The ancient image, consecrated by the prophet's son, Batubal, has been replaced. This is perhaps the most holy site within the most sacred precincts of the Shatrunjaya Hills. At this place a large number of saints are said to have attained Nirvana. A number of inscriptions have been found here, which have been utilised towards writing the history of Western India and the history of the different schools of Jainism.

Shillong: is the headquarters of the Assam Government. Thirty-six miles from here is Cherrapunji, the wettest place in the world. Pop. 53,756 (1951).

Shivpuri: also known as Sipri is in Madhya Pradesh, 72 miles from Gwalior. It is an interesting tourist resort with good hunting and boating possibilities. Pop. 21,887 (1951).

Simla: the former summer capital of the Government of India and the Government of the Punjab, is situated on a spur of the Himalayas at a height of 7,200 feet. Among the recreations of the place are hiking, riding and shooting. The roads are excellent. *Places worth a visit:* 1. President's House, 2. Race Course, 3. Jakko Hill, 4. Observatory Hill, 5. Prospect Hill, and 6. Maashobra-Mahasu, seven miles away. There is a very good road into the interior and hikers to Narkanda, Kotgarh, Rampur and Bushahr can lodge in rest-houses that line the road. There is also a motor bus service on this road and holiday-makers who leave in the morning can be back in Simla by evening. The trek route to Kulu commences at Narkanda. Simla is also well provided with a number of excellent schools. The chief means of conveyance are rickshaws and horses.

Simla is now the capital of Himachal Pradesh.

Simla is reached from Delhi via Kalka on the Delhi-Ambala line. From Kalka there is a mountain railway upto Simla. At Kalka motor cars are available for those who prefer to travel by road, the journey taking 3½ hours. For cheaper travel there are buses which regularly run between Kalka and Simla. All through the scenery is superb, with mountain peaks or luxuriant foliage. Pop. 46,150 (1951).

Somnath: see under Prabhas Patan.

Sravanabelagola: in Mysore State, is noted for its Jain temples and the colossal statue of Gomateshwara which is 60 ft. high, the tallest known monolithic statue in the world erected in 983 A.D.

Srirangam: an island on the Cavery, two miles north of Tiruchirappalli (Trichinopoly), contains the largest temple in South India. The temple is consecrated to Ranganath (Vishnu) and contains a hall of 1,000 columns. Changes were made from the 9th to the 18th centuries and inscriptions of Chola, Pandya, Hoysala and Vijayanagar are all found on it. The north gopuram is 152 feet high. Pop. 38,702 (1951).

Tanjore: in the delta of the Cavery river in Madras State is noted for its temples and palaces. It was the capital of the Cholas under whom it grew in name and fame as a great centre of culture. *Places worth a visit*: 1. the temple of Brihadishvara built by Raja-Raja the great, 2. Naik's Court, 3. Mahratha Court (the two together are often called the Palace in Tanjore), 4. Nandi, the Bull. The chief means of conveyance are juktas and taxis. There are also good dak bungalows. Tanjore is reached from Madras by the Southern Railway. Pop. 100,680.

Tiruchirappalli (Trichinopoly): the third largest city in Madras State is situated on the Cavery. It is a very ancient city and was the strategic capital of the Chola and Naik kings. Tiruchirappalli is also known as the Kashi of the South. It is now a great educational centre. *Places worth a visit*: 1. the Rock and the temple on the Rock, 2. the two huge masses of granite known as the Golden Rock and Fakir Rock, 3. the Jambukeshwar Temple, two miles north of Trichinopoly dedicated to Appulinga or Shiva. Pop. 218,921 (1951).

Travancore: (now constituent part of Kerala State): the most beautiful and fertile region in all southern India has many charms to offer the traveller within its domains. It has scenery ranging from a countryside of lakes, creeks and canals, to low hills, undulating land, rice fields and forests of coconut and areca palms, with a heavy undergrowth of pepper vines and taploes.

It has also a wonderful highland zone with mountains touching heights of from 5,000 feet to over 8,000 feet, and hills covered with the densest of virgin forest, the home of great herds of wild elephants and bison, tiger, bear, black panther and wild boar, and where lies the lovely Periyar Lake over which one may cruise in comfort and see wild life in its natural habitat.

Trivandrum, the capital of Kerala, is accessible by well-kept roads and railway, and is also now connected by air with Bombay, Madras and Colombo.

Places worth a visit: 1. the Palaces, 2. Museum, 3. Picture Gallery, 4. Zoo, 5. Aquarium.

About seven miles south of Trivandrum is Kovalam, a pleasant seaside resort with good facilities for bathing.

Cape Comorin* (Kanya Kumari), the Lands End of India, is the southernmost point of the Union where the sunrise and sunset are magnificent sights. It is a sacred spot to Hindus and a place of pilgrimage as the reputed abode of Kanyakumari, the virgin Goddess to whom the temple there is dedicated.

North of Trivandrum is the ancient town of Quilon and to the north of this again, a pleasant trip by boat along delightful backwaters or by car along a good motor road, is the busy seaport of Alleppey.

Trivandrum: See under Travancore.

Udaipur: in Rajasthan, is a city of lakes with island palaces. Seventy miles from Udaipur is Chittorgarh, the abandoned capital of Mewar, famous for its Tower of Victory. Pop. 89,621 (1951).

Ujjain: in Madya Pradesh, is one of the seven cities sacred to the Hindus. Pop. 129,817 (1951).

HOTELS

Here is a list of first-class Western style hotels:

AGRA

HOTEL IMPERIAL: 12, Mahatma Gandhi Road; **LAURIE'S HOTEL**: Mahatma Gandhi Road.

AHMEDABAD

RITZ HOTEL: Kanpur Road. Also Circuit House.

ALLAHABAD

BARNETT'S HOTEL: 14, Canning Road, Civil Lines; **ROYAL HOTEL**: 24, South Road, Civil Lines.

ALWAR

CIRCUIT HOUSE.

AMBALA CANTT.

CECIL HOTEL: Staff Road; **PARRY'S HOTEL**: Staff Road.

AMRITSAR

AMRITSAR HOTEL: Albert Road; **IMPERIAL HOTEL**: Queen's Road.

AURANGABAD

AURANGABAD HOTEL: Aurangabad.

BANARAS CANTT.

CLARK'S HOTEL: Mall Road; **HOTEL DE PARIS**: 15, The Mall.

BANGALORE

CENTRAL HOTEL, Bangalore 1.; **HOTEL EMBASSY**: 40C, Infantry Road; **LOBO'S HOTEL**: Cubbon Road and Infantry Road; **SHILTON HOTEL**: St. Mark's Road; **WEST END HOTEL**: Opp. Race course.

BARODA

BARODA HOTEL: Race Course Road.

BIKANER

CIRCUIT HOUSE: Outside Public Park.

BOMBAY

AIR LINES HOTEL: Churchgate Reclamation; **AMBASSADOR HOTEL**: Churchgate Extension; **GRAND HOTEL (BOMBAY) LTD.**: Ballard Estate; **GREEN'S HOTEL AND RESTAURANT**: Lansdowne Road, Apollo Bunder; **SEA GREEN HOTEL**: Marine Drive; **TAJ MAHAL HOTEL**: Strand Road, Apollo Bunder; **ASTORIA HOTEL**: Churchgate Reclamation; **RITZ HOTEL**: Churchgate Reclamation, Fort; **WEST END HOTEL**: 45, Marine Lines; **HOTEL WALDORF**: 16, Arthur Bunder Road.

BUNDI

CIRCUIT HOUSE.

CALCUTTA

GRAND HOTEL: 15/16, Chowringhee Road. **GREAT EASTERN HOTEL**: 1-3, Old Court House Street.

SPENCES HOTEL, LTD.: 4, Wellesley Place.

CAPE COMORIN

HOTEL CAPE.

CHANDIGARH

MOUNT VIEW HOTEL: Section No. 19.

CHATTARPUR

CIRCUIT HOUSE: For tourists going to Khajuraho. For reservation the Deputy Commissioner is to be contacted.

COCHIN HARBOUR (Willington Island).

MALANAR HOTEL: Willington Island.

COONOR (Nilgiri Hills).

HAMPTON HOTEL; **HILL GROVE HOTEL**.

DALHOUSIE

DALHOUSIE CLUB CHAMBERS: Near the motor terminus; **GRAND VIEW HOTEL**: Near the bus stand; **HOTEL METRO**: Charing Cross.

DARJEELING

BELLEVEU HOTEL: Chourasta; **HOTEL MOUNT EVEREST**: Gandhi Road; **WINDMILL HOTEL**: Observatory Hill.

DEHRA DUN

HOTEL WHITE HOUSE: 15-A, Lytton Road, Civil Lines.

DELHI

ASHOKA HOTELS: Diplomatic Enclave, New Delhi.

CLARIDGE'S HOTEL: 12, Aurangzeb Road.

GRAND HOTEL: 2, Underhill Road, Civil Lines; **HOTEL AMBASSADOR**: Sujan Singh Park, New Delhi; **HOTEL CECIL**: Civil Lines; **AIR LINES HOTEL**: Opposite New Delhi Railway Station. **HOTEL BROADWAY**: Asaf Ali Road, D.A.G. Extension.

HOTEL IMPERIAL: Queensway, New Delhi. **HOTEL JANPATH**: New Delhi.

HOTEL MARINA: Connaught Circus, New Delhi.

MAIDEN'S HOTEL: Civil Lines, Allpore Road. **SWISS HOTEL**: 2, Allpore Road.

DEOLALI

CORONATION HOTEL: Lam Road; **RUGBY HOTEL**: Rest Camp Road.

GOPALPUR-ON-SEA P.O. Gopalpur (Ganjam): **PALM BEACH HOTEL**.

GULMARG (Kashmir).

GOLF VIEW HOTEL: Upper Golf Course; **NEDOU'S HOTEL**.

GWALIOR

GWALIOR HOTEL & STATE HOUSE: Opposite Railway Station.

HYDERABAD

RITZ HOTEL: Hill Fort Palace, Hyderabad. **ROCK CASTLE HOTEL**: Jubilee Hills.

INDORE

INDORE HOTEL: South Tukoganj; **LANTERN HOTEL**: North Tukoganj.

JABALPUR

JACKSON'S HOTEL: Civil Lines.

JAIPUR

JAI MAHAL PALACE: Civil Lines; **Khetri House**.

KAISER-I-HIND HOTEL.

NEW HOTEL: Ajmer Road, Civil Lines; **CIRCUIT HOUSE**: Station Road.

JODHPUR

CIRCUIT HOUSE.

GOVERNMENT OF INDIA

THE present constitution of India was drawn up by a Constituent Assembly which first met on 9th December 1946. A draft constitution was published in February 1948. The constitution with amendments in the original draft was finally adopted on 26th November, 1949. It came into effect on 26th January 1950.

There have been amendments of the constitution since. A whole Schedule, the Ninth Schedule, was added by an amendment in 1951.

Certain articles were again amended in 1956 before the reorganization of the States was effected towards the end of that year.

India, that is, Bharat is a sovereign democratic republic.

STATES

The Republic of India, also called the Union of India, the Indian Union, is made up of 20 States.

Of these 13 are designated Part 'A' States, one Part 'B' State and six Part 'C' Territories. The 13 Part A States with their capitals given in brackets are:

Andhra Pradesh (Hyderabad); Assam (Shillong); Bihar (Patna); Bombay (Bombay); Kerala (Trivandrum); Madhya Pradesh (Bhopal); Madras (Madras); Mysore (Bangalore); Orissa (Bhubaneswar); Punjab (Chandigarh); Rajasthan (Jaipur); Uttar Pradesh (Lucknow); West Bengal (Calcutta).

The one Part B State with its capital in brackets:

Jammu and Kashmir (Srinagar).

The 6 part C Territories with their capitals in brackets are:

Delhi (Delhi); Himachal Pradesh (Simla); Manipur (Imphal); Tripura (Agartala); Laccadive, Minicoy and Amindivi Islands (Kozhikode, provisional headquarters); Andaman and Nicobar Islands (Port Blair).

The States are administered by State Governments, the Territories by the Central Government.

The one Part B State, Kashmir, is in a unique position. It enjoys rather more power than a Part A State (see under Jammu and Kashmir). It has a flag of its own.

In addition to the States and Territories mentioned above there are two administrative units—the North-East Frontier Agency, called NEFA for short, and the Naga Administrative Unit.

Both these units are administered by the Governor of Assam as agent of the Central Government.

CONSTITUTION

The constitution of India is quasi-federal in nature.

The distribution of power between the Centre and the local administrations follows the accepted principle that subjects which for convenience and efficiency ought to be administered on an all-India basis are vested in the Union Government, while others (of the nation-building sort) which can be conveniently administered on a local basis are vested in the State Governments.

Thus, defence, foreign affairs, transport and communications, currency and coinage, banking, customs and export duties, and the administration of justice at the higher level are all Central subjects, while State powers include those over police, public health, education, agriculture, forests and so on.

There is a third group of subjects that fall betwixt and between such as economic and social planning, social security and insurance, labour welfare, price control and vital statistics. On these subjects both the Centre and the State can freely legislate, it being understood that whenever there is conflict between Union and State legislation the Union laws shall prevail.

Three detailed lists of subjects are drawn up, the Union List, the State List and the Concurrent List, and the residuary power rests with the Union. That is to say, if at any time a subject which does not figure in any of the three lists, comes up for consideration the power of dealing with it lies with the Union Government.

It may be added that the Union List has 97 entries, the State List 66 and the Concurrent List 47.

Thus the constitution of India is a quasi-federation in which the Centre is the dominating partner. The Union Government controls the State Governments in certain matters. The Union has also the power to confer additional powers on the States.

Provision is made for removing differences between the various States by empowering the President to establish an Inter-State Council.

FUNDAMENTAL RIGHTS

In the Indian Union the rights of Indian citizenship are given to 1. One who is born in India, 2. Either of whose parents were born in India, and 3. Who has been a resident of India for five years. Provision is also made for persons who are affected by the partition of the sub-continent.

Details were filled in by the Citizenship Act of 1955 which also provides for the termination and deprivation of citizenship under certain conditions. The Act also empowers Government to extend the rights of citizenship to any country in the Commonwealth and the Republic of Ireland on a reciprocal basis.

Certain fundamental rights are guaranteed to every citizen for the first time. All citizens are equal before the law and no discrimination is made on grounds of religion, sex, caste, etc. All citizens have equal opportunities.

Freedom of speech and expression is guaranteed, and the right to hold meetings (without arms), to form unions and associations, to move freely in India and to reside in any part, to acquire property and to practise any profession are also assured under the Constitution.

Life and personal liberty are protected under the law, and there will not be punishment for the same offence more than once. Preventive detention is also forbidden except in certain cases.

Children under the age of 14 will not be allowed to be employed in factories and forced labour like *begar* is prohibited.

India is a secular State and as such there is freedom of conscience. Citizens are allowed to profess, practise and propagate any religion; and the State will not ordinarily interfere in religious questions. The minorities are assured of cultural and educational rights.

The State can acquire compulsorily property for public purposes, but compensation may be paid to the owner of the property concerned although questions relating to the quantum of compensation are not justiciable. But property may also be acquired without compensation in certain cases.

All titles, except military or academic, are also abolished, though honours for meritorious service may be conferred.

Untouchability is abolished.

These fundamental rights can be enforced by the Supreme Court which has the authority to issue prerogative writs such as *Habeas corpus*, *certiorari*, *prohibition*, etc.

In respect to the Defence Forces, however, Parliament has power to legislate on these fundamental rights.

It must also be pointed out that some of these fundamental rights can be suspended in case of emergency, and the remedies available for their enforcement may also be suspended by an order of the President.

There are also certain Directive Principles in accordance with which the State has to direct its policy. These principles are of a recommendatory character and cannot be enforced in a court of law. However the State is expected to look upon them as a kind of touch-stone for its policy and action.

These principles include organization of village panchayats, provision for just and humane conditions of work, maternity relief, a uniform civil code for the citizens, provision for compulsory and free education of children and separation of judiciary from executive.

UNION EXECUTIVE

The executive head of the Indian Union is the President. He is elected by the elected members of the Houses of Parliament and the Legislative Assemblies of all the States. His term of office is five years, and he is eligible for re-election. Only a person who is a citizen of India and has completed the age of thirty-five years is qualified to contest the election.

He is the Supreme Commander of the Armed Forces.

He has the power to grant pardons or remission of punishment.

The President is entitled to the use of an official residence without payment of rent, and a salary of Rs. 10,000 per month and allowances. Provision has also been made by an Act of Parliament for a pension of Rs. 15,000 per annum.

The President has the power of summoning, proroguing and dissolving Parliament. At the commencement of each session he addresses both Houses of Parliament assembled together. He has the right of sending messages to Parliament and sending back a Bill presented to him for his consent. This power however can be used by him only once.

The President has legislative powers under certain circumstances. When neither of the Houses of Parliament is in session and the President is satisfied that circumstances exist which make immediate action necessary he may promulgate an ordinance.

Such ordinance must be put before both the Houses of Parliament and will cease to operate at the expiration of six weeks from the re-assembly of Parliament.

The President can also declare emergency if he is satisfied that the security of India or any part thereof is threatened either by war or internal disturbances when the legislature is in session. Such a proclamation would give additional powers to the Union executive and the Legislature.

The Judges of the Supreme Court and the High Courts, the Attorney-General of India and the Comptroller and Auditor-General of India are all appointed by the President. The heads of the Part A States, i.e., Governors are also appointed by the President.

The President has the power of appointing ambassadors abroad and receiving diplomatic representatives of foreign States.

The President places a number of annual reports before Parliament: the Annual Financial Statement, the report of the Auditor-General of India relating to the accounts of the Government of India, the annual report of the Union Public Services Commission and the report of the Special Officer for Minorities.

All executive action of the Government of India is taken in the name of the President and it is the duty of the Prime Minister to communicate to the President all decisions of the Council of Ministers.

Provision is made for the impeachment of the President, by Parliament, for violation of the Constitution. If such a resolution is passed by a majority of not less than two-thirds of the total membership, such a resolution has the effect of removing the President from office.

In the exercise of his functions, the President has the aid and advice of a Council of Ministers, with the Prime Minister at the head of it. The President appoints the Prime Minister and other Ministers are appointed on the advice of the Prime Minister.

The Council of Ministers is collectively responsible to the Lok Sabha (the Lower House). Every Minister must be a member of either House of Parliament, and he is required to take an oath of office and secrecy.

The salaries and allowances of Ministers are determined by Parliament.

There is a Vice-President of India, who is ex-officio Chairman of the Rajya Sabha (the Upper House). The Vice-President acts as President during a casual vacancy in the office of the President. He is elected by the members of both Houses of Parliament and his term of office is five years.

UNION PARLIAMENT

The Parliament consists of the President and two Houses known as, as already mentioned, the Lok Sabha and the Rajya Sabha. It must meet at least twice a year. The maximum strength of the two Houses is fixed at 250 (12 nominated) for the Rajya Sabha and 520 for the Lok Sabha (not more than 500 from the States and 20 from the Territories).

In April 1957 the Rajya Sabha had a total strength of 232 of which 12 were nominated by the President.

In April 1957 the Lok Sabha had a total strength of 505 of which 11 were nominated.

The Rajya Sabha is elected by the elected members of the Legislative Assemblies of the States, while the Lok Sabha is elected directly by the voters in the country.

In the case of the Part C Union Territories of Himachal Pradesh, Tripura, and Manipur, the Territorial Councils form the electoral colleges for the election of members to the Rajya Sabha from these Territories. The electoral college for the Territory of Delhi consists of persons who were members of the Delhi Legislative Assembly immediately before the 1st November 1956.

The elections to the Lok Sabha are based on adult suffrage and joint electorates. There is no reservation of seats for any group except scheduled Castes and Scheduled Tribes.

The Rajya Sabha is a permanent body with one-third of its members retiring every second year. The Vice-President of the Union is also the Chairman of the Rajya Sabha. The Rajya Sabha has also a Deputy Chairman.

The Lok Sabha has a duration of five years, ordinarily. There is a Speaker and a Deputy Speaker of the House both of whom are elected by its members.

All these posts carry a salary and allowances.

Under certain circumstances, the members can be disqualified and their seats declared vacant.

Money Bills can be introduced only in the Lok Sabha. The Rajya Sabha can only return a bill with its recommendations to the Lok Sabha within a period of fourteen days of its receipt. Bills passed by Parliament are submitted to the President for his assent. Only on such assent being given does the Bill become law.

The language used in Parliament is either Hindi or English.

The distribution of seats in the Rajya Sabha is as follows:

Andhra Pradesh 18; Assam 7; Bihar 22; Bombay 27; Kerala 9; Madhya Pradesh 16; Madras 17; Mysore 12; Orissa 10; Punjab 11; Rajasthan 10; Uttar Pradesh 34; West Bengal 16; Jammu and Kashmir 4; Delhi 3; Himachal Pradesh 2; Manipur 1; Tripura 1; Total—220.

The allocation of seats in the Lok Sabha is as follows:

Andhra Pradesh 43; Assam 12; Bihar 53; Bombay 66; Kerala 18; Madhya Pradesh 36; Madras 41; Mysore 26; Orissa 20; Punjab 22; Rajasthan 22; Uttar Pradesh 86; West Bengal 36; Jammu and Kashmir 6; Delhi 5; Himachal Pradesh 4; Manipur 2; Tripura 2.

SUPREME COURT

The Supreme Court of India consists of a Chief Justice of India and not more than ten other Judges. The appointments are made by the President. The salary of the Chief Justice is Rs. 5,000 per month and of the other Judges Rs. 4,000 per month.

For purposes of constitutional law the Supreme Court has exclusive original jurisdiction in any dispute (a) between the Government of India and one or more States, (b) between the Government of India and one or more States on one side and one or more other States on the other, (c) between two or more States only in so far as the dispute involves any question on which the existence of a legal right depends.

The Supreme Court has also jurisdiction both appellate and original in matters which involve a substantial question of law as to the interpretation of the constitution.

An Attorney-General for legal advice and a Comptroller and Auditor-General of India for audit and accounts are appointed by the President. The Attorney-General has the right to appear in all courts in India.

STATE GOVERNMENT

The 13 Part A States have Governors at their heads, five Part C Union Territories have Chief Commissioners* at their head, and the Part B State of Kashmir has a Sadr-i-Riyasat (President).

The States and Union Territories are grouped into geographical zones, and for each zone there is a Zonal Council, which is an advisory body.

There are five zones: Northern zone (Punjab, Rajasthan, Kashmir, Delhi and Himachal Pradesh); Central zone (Uttar Pradesh and Madhya Pradesh); Eastern zone (Bihar, West Bengal, Orissa, Assam, Manipur and Tripura); Western zone (Bombay and Mysore); Southern zone (Andhra Pradesh, Madras, and Kerala).

The Councils consist in the main of Ministerial representatives from the Centre and the States composing the Zonal Council. The Zonal Councils will also have advisers drawn from the Planning Commission and the Chief Secretaries and Development Commissioners of the States in the Zone.

The Councils may discuss matters of common interest—and more especially problems arising out of the reorganization of States such as border disputes, linguistic minorities, inter-State transport and also economic or social planning—and advise the Central or State Governments on the action to be taken in such matters.

All questions at meetings will be decided by a majority of the members present.

The proceedings of every meeting of a Zonal Council have to be forwarded to the Central Government and the States Governments concerned.

The Governor of a State is appointed by the President. Executive power is vested in the Governor who is appointed for a term of five years, ordinarily. Only a citizen of India and one who has completed 35 years of age, is eligible for such an appointment.

The Governor, like the President has power to grant pardon, etc. He will have a Council of Ministers to aid and advise him. The Governor also appoints an Advocate-General for the State.

Nine States (Bihar, Bombay, Kashmir, Madhya Pradesh, Madras, Mysore, Punjab, Uttar Pradesh, West Bengal) have two Houses

of Legislature; the others only one. The two Houses are called the Legislative Assembly (sometimes Vidhan Sabha) and the Legislative Council. The former has a duration of five years, while the latter is a permanent body with one-third of the members retiring every second year.

The minimum strength of an Assembly is 60 and the maximum 500.

The minimum strength of a Council is 40, and the maximum one-third of the State Assembly.

The Legislature must meet at least twice a year. While the Assembly consists of members who are directly elected from territorial constituencies, the Council consists of members nominated by the Governor, elected by the Assembly and of representatives of local bodies and special interests.

The number of seats in the Legislative Assembly and the Legislative Council is as follows (the first figure shows the number of seats in the Assembly, and the second in the Council):

Andhra Pradesh: 301,—; Assam: 108,—; Bihar: 318, 72; Bombay: 396, 72; Kashmir: 100, 36; Kerala: 126,—; Madhya Pradesh: 288, 72; Madras: 205, 50; Mysore: 208, 52; Orissa: 140,—; Punjab: 154, 40; Rajasthan: 176,—; Uttar Pradesh: 430, 72; West Bengal: 252, 51.

The total number of seats in the Territorial Council of Himachal Pradesh is 41, of Manipur 30 and of Tripura 30.

The right of summoning, proroguing and dissolving the legislature is vested in the Governor, who addresses the legislature at the commencement of each session.

Like the Parliament there is a Speaker, a Deputy Speaker, a Chairman and a Deputy Chairman for the Legislative Assembly and the Legislative Council respectively. These officers of the legislatures are entitled to salary and allowances.

The language in the legislature can be either Hindi or English or any other language allowed by the Speaker.

The State Legislatures cannot discuss the conduct of any judge of the Supreme Court or of a High Court in the discharge of his duties.

As the Governor is a part of the legislature, he has certain legislative powers. He can promulgate ordinances during the recess of the legislature; such ordinances must be placed before the legislature and cease to operate at the expiration of six weeks from the reassembly of the legislature.

The salary of the Governor is Rs. 5,500 per month and he is also entitled to certain allowances.

If the Government of a State cannot be carried on in accordance with the provisions of the Constitution, and the Governor makes a report to that effect to the President, the President may by proclamation assume to himself all or any of the functions of the Government of the State. He may also declare that the powers of the State legislatures shall be exercised by Parliament, and suspend any provision of the constitution relating to the State.

However, he cannot assume to himself, or suspend any of the provisions of the Constitution relating to High Courts.

UNION TERRITORIES

For the Part C Territory of Delhi there is an Advisory Committee. A Corporation has also been set up.

In accordance with the provisions of the Territorial Councils Act of 1956 three Part C Union Territories namely, Himachal Pradesh, Manipur and Tripura have Territorial Councils.

The Councils are elected directly from territorial constituencies on the basis of adult suffrage. They will deal with local affairs such as education, public health, roads and bridges and transport generally, panchayats, local works, animal husbandry.

* The head of the sixth, Himachal Pradesh, is called Lieutenant-Governor.

A Council will meet at least once in two months. The Administrator of the Territory may attend and address a meeting of the Council. When he attends any such meeting he will preside over it.

For every Territorial Council there will be a chief executive officer appointed by the Administrator. There may also be other staff.

The Council can levy taxes on professions, trades, callings and employments and tolls on bridges and fix school fees. The taxes have to be approved by the Central Government before they become effective.

The Council has the power to borrow money with the approval of the Central Government.

The budget estimates of the Territory will be presented by a Finance Committee of the Council. The budget estimates finally adopted by the Council in the light of the suggestions made by the Administrator shall be the budget of the Territorial Council.

The Central Government may pay to a Territorial Council the net proceeds of the following taxes attributable to the area under the Council's jurisdiction:

Entertainment tax; a certain percentage of the land revenue not exceeding 10; tax on motor vehicles; taxes on passengers, goods, terminal tax.

The Central Government may also make such grants as it thinks fit.

The Administrator will have the right to give directions to the Council in regard to matters connected with education.

The Administrator can also suspend the execution of a resolution or order of the Council or prohibit any action on grounds that it is likely to lead to a breach of the peace or cause annoyance or injury to the public or to any class or body of persons. But in such cases he has to send a report to the Central Government together with explanations offered by the Council. The Central Government may then confirm, modify or rescind the Administrator's order.

The Central Government may on the report of the Administrator supersede a Territorial Council for incompetence, negligence of duty or abuse of power. In such cases a new Council will have to be elected within a period of one year.

The Central Government has the power to make rules for the purpose of carrying out the provisions of the Act, to regulate the conduct of business of the Council; regulate the employment, payment, suspension of officers and servants of the Council; the keeping of accounts.

Such rules framed by the Central Government have to be laid before Parliament for not less than thirty days, and have to be approved by it.

Any bye-laws made by the Council in regard to matters over which it has jurisdiction have to be confirmed by the Central Government. These laws are liable to alteration by the latter authority.

On the day the Territorial Council was established all Zilla Panchayats in Himachal Pradesh stood abolished, and the liabilities and assets accrued to the Council.

The strength of the Territorial Council of Himachal Pradesh is 41, of Manipur 30 and of Tripura 30. Of the 41 seats in the Himachal Council 12 are reserved for the Scheduled Castes.

The Central Government has the authority to nominate two persons who are not in the service of Government, to a Territorial Council.

For the Part C Union Territory of Delhi there is established an Advisory Committee which will be associated with the Minister of Home Affairs who is responsible for the administration of Union Territories. This Committee consists of all members of Parliament representing Delhi, the Chief Commissioner of Delhi, The Vice-Chancellor of the University of Delhi, the President of the Delhi Municipal Committee* and the Senior

Vice-President of the New Delhi Municipal Committee.

As regards Andaman and Nicobar Islands (Part C Territory), the President makes rules and regulations for the peace and good government of the State, and appoints a Chief Commissioner for administration. The President has the power of making regulations which have the effect of amending or repealing an Act of Parliament.

There is a High Court for each State and a Judicial Commissioners' Court each for the Union Territories of Himachal Pradesh, Manipur and Tripura.

The highest court for Delhi is the District Court. Appeals from here go to the Punjab High Court, a circuit bench of which sits in Delhi. For Andamans, the highest court is the Chief Commissioner's Court. Appeals go to the Calcutta High Court.

NEFA and the Naga Administrative Units are administered by the Governor of Assam, who acts as the agent of the Union Government.

The Governor of Assam has an Adviser for NEFA and an Administrator for the Naga Unit.

FINANCE

The financial relations between the Union and the States are as follows:—There is a Consolidated Fund of India and a Consolidated Fund of each State, and all money received is credited to the public account of India or the public account of the State as the case may be. Provision is also made for the establishment of a 'Contingency Fund of India' and a 'Contingency Fund of the State.'

Certain duties and taxes are levied and collected by the Government of India, such as duties in respect of succession to property, terminal taxes, taxes on railway fares and freights, etc. But the net proceeds are assigned to the States, in accordance with such principles of distribution as formulated by Parliament. Certain other taxes, like income-tax are levied and collected by the Government of India, but are distributed between the Union and the States.

These matters are fixed in accordance with the recommendations of a Finance Commission appointed for the purpose.

No moneys can be appropriated out of the Consolidated Fund of India or of a State except in accordance with an Appropriation Act by the appropriate legislature.

The property of the Union is exempt from the taxes imposed by a State, and the property and income of State are exempt from Union taxation.

The privy purse sums of the Rulers are a charge on the Consolidated Fund of India, and these sums are to be exempt from taxes on income.

There is a Public Service Commission for the Union and also for the States. Two or more States may agree to have only one Commission for the group. Actually, every Part A State has a Public Service Commission at present while the Union Public Service Commission operates for the Part C Union Territories as well. Appointment of members of the Commission are made by the President or the Governor as the case may be. The Commissions conduct examinations for appointments to the services of the Union or the States. The Union Commission submits an annual report to the President.

ELECTIONS

All elections are directed and controlled by an Election Commission. Elections to the Lok Sabha and the Legislative Assemblies of the States are on the basis of adult suffrage. Seats are reserved in the Lok Sabha for the Scheduled Castes and the Scheduled Tribes.

The President may nominate not more than two members of the Anglo-Indian community to the Lok Sabha if he thinks that the community is not adequately represented. Similar power is given to the Governor of a State.

The claims of the Scheduled Castes and the Scheduled Tribes are to be considered in making

appointments to services, and for two years after the commencement of the Constitution the Anglo-Indians were to have the same proportion in the services as they had immediately before 15th August 1947. This reservation is to be progressively reduced by 10 per cent every two years in such a way that it is to cease completely ten years after the commencement of the Constitution.

In fact all reservation including reservation of seats for Scheduled and Tribal classes are to cease ten years after the commencement of the Constitution.

A special officer for the Scheduled Castes and the Scheduled Tribes has been appointed.

The Constitution gives a certain amount of autonomy to the tribal areas within the territory of Assam. They are known as the Autonomous Districts where District Councils with certain powers of administration and taxation could be set up. They are a special responsibility of the Government of Assam.

Originally there were three such Districts. After the formation of the Naga Unit in December 1957 there are only two.

OFFICIAL LANGUAGE

Hindi in the Devanagari script is the official language of the Union and the form of numerals is the international form of the Indian numerals. The English language, however, will continue to be the official language for a period of not more than fifteen years from the commencement of the Constitution.

The official language of the Union, i.e., English will be used for communication between the Union and a State or between one State and another. However, if two States agree Hindi may be used instead of English between them.

All proceedings in the Supreme Court and High Courts, the texts of Bills and Acts passed by the legislatures and ordinances promulgated by the appropriate authorities are to be in the English language, until Parliament by law provides otherwise.

By previous consent of the President proceedings in a High Court may be conducted in Hindi or any recognised State language but judgments, decrees or orders passed by the court must be in English.

It is the duty of the Union Government to promote and spread the Hindi language. The vocabulary for the development of the language is to be drawn primarily from Sanskrit.

The States have been given the liberty of adopting any one or more languages used in their territory or Hindi as the official language of the State.

The following languages are recognised by the Constitution: (1) Assamese, (2) Bengali, (3) Gujarati, (4) Hindi, (5) Kannada, (6) Kashmiri, (7) Malayalam, (8) Marathi, (9) Oriya, (10) Punjabi, (11) Sanskrit, (12) Tamil, (13) Telugu, (14) Urdu.

A commission was to be appointed by the President, at the expiration of five years from the commencement of the Constitution, to make recommendations to him, as regards the progressive use of the Hindi language for official purposes of the Union, and other allied matters.

The Commission so appointed has now published a report.

EMERGENCY PROVISIONS

If the President is satisfied that a grave emergency exists, and the security of India or any part thereof is threatened either by war or internal disturbance, he may make a declaration to that effect. Such proclamation must be approved by both the Houses of Parliament, before the expiration of two months, otherwise it ceases to operate at the end of that period. As a result of this proclamation Parliament will be authorised to legislate on items included in the State list and the President, to issue directions to the Governor. Parliament can validate such a proclamation for a period of three years which is the maximum.

* Now superseded by the Corporation.

A request for a declaration of emergency may also come from a State authority.

This, however, would not be applicable to the functions of the High Courts. Somewhat similar provision is also made for financial emergency.

AMENDMENT OF THE CONSTITUTION

For purposes of amendment the items are divided into three classes with a different procedure for each class.

For amendment of the provision with respect to the Supreme Court and the High Courts, the distribution of legislative powers between the Centre and the States, the representation of the States in Parliament, etc., the amendment must be passed by both the Houses of Parliament by a majority of the total membership of the House and by a majority of two-thirds of the members present and voting, and must further be ratified by the legislatures of not less than one-half of the States.

In other cases no reference to the State legislatures is necessary. Parliament by itself can amend the Constitution in the manner mentioned above. In some cases amendments can be effected even by a bare majority such as is required for the passing of any ordinary law.

There were seven amendments to the Constitution from the coming into force of the Constitution on 26th January 1950 to the end of December 1957.

The Constitution (First Amendment) Act, 1951 aimed among other things at enabling the State to make special provision for the advancement

of socially and educationally backward classes. It also gave the State broader powers to restrict freedom of speech and writing in the interests of friendly relations with foreign States, public order, decency, morality and in relation to defamation or incitement to an offence.

Two new articles were added after Art 31 to save the laws relating to the acquisition of estates and the validation of certain land reforms Acts and Regulations passed by certain States. These Acts were specified in an extra Schedule added to the list, the Ninth Schedule.

The Articles affected by the First Amendment were 15, 19, 85, 87, 174, 176, 341, 342, 372 and 375. It added two new Articles 31A and 31B and a new Schedule, the Ninth Schedule.

The object of the Constitution (Second Amendment) Act, 1952 was to make adjustments in the representation in the Lok Sabha consequent on the completion of the 1951 census. The Article affected was Article 81.

The Constitution (Third Amendment) Act, 1954 changed entry No. 33 in the Concurrent List in the Seventh Schedule by adding food-stuffs, cattle fodder, raw cotton and jute whose production and supply could be controlled by the Centre if necessary.

The Constitution (Fourth Amendment) Act, 1955 enables the State to acquire private property compulsorily for a public purpose and bars any reference about the quantum of compensation fixed by the legislature to a court of law. Also, the temporary taking over of private property* in the public interest or to secure

better management is excluded from the compensation clause. Laws providing for State monopolies are also saved from invalidation. Seven new entries were made to the Ninth Schedule.

The Articles affected were 31, 31A, 81(2) and 306.

The Constitution (Fifth Amendment) Act, 1955 merely fixed a time for State legislatures to give their opinion on Central laws affecting the area, boundary etc. of the State concerned. The Article affected was 3.

The Constitution (Sixth Amendment) Act, 1956 added a new entry in the Union List in the Seventh Schedule, thus giving the Centre authority to legislate on the taxes, on the sale and purchase of goods in the course of inter-State transactions.

The Constitution (Seventh Amendment) Act, 1956 dealt with a whole host of problems thrown up by the reorganisation of the States, such as the alteration of State boundaries, the creation of new States, the classification of certain areas as Union Territory, the allocation of seats in the Rajya Sabha, the provision of a bicameral legislature for certain States. Other points the Amendment dealt with are the original jurisdiction of the Supreme Court, the High Courts and safeguards for linguistic minorities.

Some articles affected were 1, 80, 81, 82, 131, 168, 216, 217, 220, 222, 224 and the First Schedule and the Fourth Schedule. Four new Articles 290A, 350A and 350B and 372A were added.

* without affecting ownership.

PUBLIC SERVICES

THE Constitution provides for the setting up of a Public Service Commission for the Union and for each State. Two or more States may join together to have a common Public Service Commission.

The chairman and members of the Union Public Service Commission and of joint Commissions are appointed by the President of the Union, while the chairman and members of a State Commission are appointed by the Governor.

A member of the Union Commission holds office for six years or till he is 65 years. A member of a State Commission also holds office for six years but retires earlier on attaining the age of 60.

On ceasing to hold office a member of the Commission is eligible for appointment only as Chairman of the same Commission or of some other Commission but not for any other employment either under the Government of India or the State Government.

The Chairman of the Union Public Service Commission is not eligible for any Government appointment whatever. A member of a Commission can be removed only by the President on the advice of the Supreme Court.

The Union and State Commissions conduct examinations for recruitment to Government service. The Commissions also advise the Governments on the service conditions of the employees. There is a statutory obligation on a Government to consult the Commission on such questions, and if there are any rules which specifically exempt Government from such consultation these rules should be approved by the legislature.

An annual report of the Commission which also includes a list of cases in which Government did not accept the advice of the Commission together with a memorandum from Government explaining the reasons for the non-acceptance of the Commission's advice on these matters has to be placed before the appropriate legislature.

There are in all about 16 lakh Government employees out of which about 10 lakhs are railwaymen.

ALL INDIA SERVICES

- (i) Indian Administrative Service;
- (ii) Indian Police Service.

With independence two problems faced the country about Public Services. A large number of British officials left and Muslim officials opted for Pakistan. The gap thus created had to be filled by some sort of emergency recruitment. Out of about 1,000 Civil Servants about 600 are estimated to have left. The second was to replace the I.C.S. by a new service, an I.A.S.

The first problem was met by setting up an Emergency Recruitment Board in the middle of 1948 which selected the required number of men from both inside and outside the ranks of the permanent services.

The I.A.S. was to serve the same purpose as the old I.C.S. except that it would not provide officials for the judiciary.

The recruitments to both I.A.S. and I.P.S. are made through an All India Competitive Examination. 25 per cent of the senior duty posts in both the cadres are filled up by promotion from the State Civil Service and State Police Service officers respectively. It has also been provided that 15 per cent of the vacancies in the promotion quota can be filled by officers of outstanding merit and ability in the other State Services. The promotions are made in consultation with the U.P.S.C.

Between September 1956 and October 1957, 170 I.A.S. and 93 I.P.S. officers were appointed. Of the 170 I.A.S. officers, 76 were recruited through open competition, and 94 by promotion

from State Service. Of the 93 I.P.S. officers, 44 were recruited through the competitive examination and 49 by promotion from State Police Service.

The cadre strength of the I.A.S. has been increased due to the growing demand for administrative personnel for the Second Five-Year Plan. In order to fill up the gaps, so far 180 State Service Officers have been appointed to the I.A.S. under the Special Recruitment Scheme. Some more appointments were to be made on the basis of the I.A.S. (Special Recruitment) Examination, 1956.

Officers appointed under this scheme will be trained at the I.A.S. Staff College, Pimla, set up in May, 1957.

The I.A.S. and I.P.S. probationers are trained at the I.A.S. Training School, Delhi and I.P.S. Training College at Mount Abu, respectively.

The conditions of recruitment, service etc. of the two All India Services are fixed by the All India Services Act, 1951. So far 31 sets of rules and regulations relating to service conditions of these two services have been framed.

Citizens of Kashmir are now eligible for appointment to I.A.S. and I.P.S.

The present cadre strength of the I.A.S. and I.P.S. is 1,568 and 843 respectively.

CENTRAL SERVICES

The following are the Central Services:

1. Archaeological Service (Class I).
2. Botanical Survey of India (Class I).
3. Central Engineering Service (Class I).
4. Central Electrical Engineering Service (Class I).
5. Central Health Service (Class I).
6. Central Revenues Chemical Service (Class I).
7. Central Secretariat Service :—
 - (a) Selection Grade;
 - (b) Grade I.
 - (c) Grade II.
8. General Central Service (Class I).
9. Geological Survey of India (Class I).
10. Indian Audit and Accounts Service.
11. Indian Defence Accounts Service.
12. Indian Foreign Service (Class I).
13. India Meteorological Service (Class I).
14. Indian Postal Service (Class I).
15. Indian Posts and Telegraphs Traffic Service (Class I).
16. Indian Revenue Service :—
 - (a) Customs Branch (Indian Customs Service, Class I).
 - (b) Central Excise Branch Central Excise Service (Class I).
 - (c) Income Tax Branch (Income Tax Service, Class I).
17. Indian Salt Service (Class I).
18. Mercantile Marine Training Ship Service (Class I).
19. Mines Department (Class I).
20. Overseas Communications Service (Class I).
21. Survey of India (Class I).
22. Telegraph Engineering Service (Class I).
23. Zoological Survey of India (Class I).

To serve the needs of Ministries having industrial undertakings functioning under them, an Industrial Management Pool has been constituted. Recruitment to this Pool will be done by the Union Public Service Commission. At the initial constitution of the Pool its strength is to be 200.

A new service called the Central Legal Service came into being on 1st Oct. 1957. The main function of this Service was to draft legislation and to give advice on legal matters.

Proposals are also under consideration to create other All India Services like a service of Statisticians and another of Economists.

A Bill which seeks to repeal all existing domicile laws in the country which prescribe a period of residence within a particular State or Union territory for any public employment has been passed by Parliament and was awaiting the President's assent at the time of writing (11th Nov. 1957).

PAY SCALES

The pay scales of some of the more important All-India and Central services are given below:

Indian Administrative Service and Indian Foreign Service.

Junior Scale : 350-400-450-450-500-540-30-600-E.B.-30-870-40-950 (19 years).

Senior Scale : 800 (6th year or under)-50-1,000-60-1,300-50-1,800 (25 years).

Indian Police Service.

Junior Scale : 350-350-380-380-30-590-E.B.-30-770-40-860 (19 years).

Senior Scale : 600 (6th year or under)-40-1,000-1,000-1,050-1,050-1,100-1,100-1,150 (22nd year).

Selection grade : 1,250.

Indian Audit and Accounts Service.

Junior Scale : Rs. 350-350-380-380-30-590-E.B.-30-770-40-850.

Senior Scale : Rs. 600 (6th year or under)-40-1,000-1,000-1,050-1,050-1,100-1,100-1,150.

Junior Administrative grades : Rs. 1,300-60-1,600-1,600-100-1,800.

Senior Administrative grades : Rs. 1,800-100-2,000-2,000-125-2,250.

Indian Postal Service (Class I).

Junior Time Scale : Rs. 350-350-380-380-30-590-E.B.-30-770-40-850.

(Officers under training will draw pay in this time scale).

Senior Time Scale : Rs. 600-40-1,000-1,000-1,050-1,050-1,100-1,100-1,150.

Directors of Postal Services : Rs. 1,300-60-1,600.

Postmaster-General : Rs. 1,800-100-2,000.

Indian Income-tax Service (Class I).

Grade II :

Time Scale : Rs. 350-350-380-380-30-590-E.B.-30-770-40-850.

Grade I :

Time Scale : Rs. 600-40-1,000-1,000-1,050-1,050-1,100-1,100-1,150.

Assistant Commissioners of Income-tax : Rs. 1,000-50-1,400.

Commissioners of Income-tax, Grade II : Rs. 1,300-60-1,600.

Commissioners of Income-tax, Grade I : Rs. 1,800-100-2,000.

A revised All India Services (Conduct) Rules was drawn up in September 1954.

SERVICE RULES

The Rules regarding discipline and appeal of Govt. servants have been revised to delete many of the obsolete provisions and to make specific provisions in respect of many points which were previously included only in administrative instructions.

The revised rules, viz. the Central Civil Services (Classification, Control & Appeal) Rules, 1957, were promulgated on 28th Feb., 1957. The issue of these rules has contributed much to expedition in the disposal of disciplinary cases against Government servants.

Under the Central Civil Service (Conduct) Rules, 1955, Government servants are prohibited from taking part in politics, elections, accepting gifts more than of a trifling value, engaging in any private trade or business or undertaking any private employment, contracting bigamous marriage without Government's permission or speculating in investments, borrowing, etc.

The rules also require Government servants to submit annual returns of his immovable, movable and other valuable property.

The Home Ministry has announced an amendment to the General Services (Conduct) Rules 1955, declaring that no Government servant shall participate in any demonstration or resort to any form of strike in connection with any matter pertaining to his conditions of service.

A Rules Revision Committee to simplify the existing Financial and Service Rules has been appointed.

ANTI-CORRUPTION

There is a special police force at the Centre called the Delhi Special Police Establishment to investigate cases of corruption on the part of Central Government servants.

Under Section 5 of the Prevention of Corruption Act, 1947, 'criminal misconduct in the discharge of official duty' has been made an offence and a rule of evidence has also been laid down requiring the court to draw a presumption against a public servant found in possession of assets which are disproportionate to his known sources of income and which he cannot satisfactorily account for.

In the Ministry of Home Affairs an Administrative Vigilance Division has been set up under a Director of the status of a Joint Secretary, and in each Ministry and Department a Vigilance Officer has been appointed who personally deals with all cases requiring disciplinary action.

ORGANIZATION & METHODS DIVISION

The work of the Organization and Methods Division of the Government of India created in March 1954 has had considerable success in

promoting speed and efficiency in the disposal of work. Experience revealed that it was not so much the system that was at fault but the way it was worked. Studies were made in selected sections by marking files and tracing their progress. A number of devices have been adopted to increase speed and efficiency. There is, for instance, a check on the outturn of work and a record of the cases pending for more than a month. More authority is delegated to the Section Officer than before. In the disposal of important matters either within a Ministry or between two Ministries recourse is had to personal discussion rather than to the routing of files. There is now far less delay in any correspondence with the Union Public Service Commission. A 'Standing Guardfile' is now maintained for locating and putting up precedents. Dak is accepted upto the closing hour (previously it was accepted only upto 3 P.M.), and the Section Officer sends only such files up to the Under Secretary as he cannot deal with himself.

SERVICE CONDITIONS

Some of the steps recently taken to improve the service conditions of Government servants are:

In regard to pension, gratuity, leave and medical attendance certain disparities existed between class IV and other classes of Government servants. They have now been removed. About 9 lakh class IV employees are expected to benefit from this liberalisation.

The pension scheme has also been liberalised for all classes of Government servants.

All classes of Government servants and members of their families have been allowed travel concession benefits for visiting their home towns once every two years. Government's assistance will be 90 per cent of the railway fare to and fro in respect of distances exceeding 250 miles (100 miles in case of grade IV employees).

Other benefits include advance of pay to employees drawing pay less than Rs. 300 p.m. on the eve of important festivals, overtime

allowance to non-gazetted and class IV employees in Delhi, payment of railway fare for families of Government servants who die while in service, family pension, etc.

A Pay Commission has been appointed to examine the principles which should govern the structure of emoluments and conditions of service and other allied matters concerning Central Government employees.

PUBLIC SERVICE COMMISSIONS

The following is a list of Public Service Commissions in India:

1. Andhra Pradesh Public Service Commission (Hyderabad).
 2. Assam Public Service Commission (Shillong).
 3. Bihar Public Service Commission (15, Bayley Road, Patna).
 4. Bombay Public Service Commission (Bank of India Building, Mahatma Gandhi Road, Bombay).
 5. Madras Public Service Commission (Madras).
 6. Madhya Pradesh Public Service Commission (Indore).
 7. Mysore Public Service Commission (Ballabrooke, Palace Road, High Grounds, Bangalore).
 8. Orissa Public Service Commission (Cuttack).
 9. Punjab Public Service Commission (Patiala).
 10. Kerala Public Service Commission (Trivandrum).
 11. Uttar Pradesh Public Service Commission (Allahabad).
 12. Rajasthan Public Service Commission (43, Station Road, Jaipur).
 13. West Bengal Public Service Commission (Anderson House, Alipore, Calcutta).
- The Union Public Service Commission also operates for all Union Administrations.

PUBLIC SERVICE (QUALIFICATIONS FOR RECRUITMENT) COMMITTEE

A Committee was appointed by the Government of India by a resolution dated 16th April 1955 to consider the proposal that a university degree need not be insisted on as a condition for employment to Public Services.

The original members of the Committee were: Dr. A. Ramaswami Mudaliar (*Chairman*), Dr. C. P. Ramaswami Aiyar, Dr. Anur Nath Jha, Dr. J. C. Ghosh, Dr. Sushila Nayar, N. K. Subhanta, Prof. Humayun Kabir, K. P. Mushran, A. K. Roy, R. C. Dutt (*Member-Secretary*).

Before the Committee began its work, one of the members Dr. Anur Nath Jha died.

In a minute of dissent three members, Prof. Humayun Kabir, Sushila Nayar, and N. K. Subhanta say that they do not agree with the majority that entry into the highest ranks should be restricted to graduates.

A Committee of Central Government Secretaries was to report to the Cabinet on the recommendations of the Public Services Committee but no report had been made at the time of writing (Nov. 1957).

THE REPORT

The main recommendations with explanatory notes are given below:

The Public Services are divided into three categories:

- (a) Senior Officers—Executive and Administrative.
- (b) Junior Officers—Executive and Administrative.
- (c) Clerical Services.

In classifying the services in these three categories we have excluded those of a technical and professional nature for which special considerations would apply.

A university degree should definitely not be insisted upon for the clerical services. We would in fact go a step further, and while we would not disqualify graduates from entering the clerical services, we would discourage them from doing so. This we feel, can best be done by fixing the age limits at suitable levels which would preclude graduates from entering this service. Against the background of a reorganised system of education we would suggest that for clerical services the age limit should be 17—19. When the new system of education comes into force, it would not be possible for anyone to obtain a degree before the age of 20. To fix the maximum age limit at 19 would, therefore, preclude graduates from competing for such services.

It has, however, been pointed out to us that for certain types of employment it would not be appropriate to insist rigidly on the age limit 17—19 recommended by us. They are lower executive in nature and in some cases carry a marked degree of responsibility, though not perhaps much of discretion. Such posts to which our attention has in particular been drawn are posts in the lower formations of the Revenue, Railway and Communication Departments.

A higher level of maturity is obviously called for here. We agree that in such circumstances there would be good ground for deviating from the general recommendation we have made.

We suggest that each such case should be considered on its merits, and slightly higher age levels introduced as and where found necessary.

For the middle category we are of the opinion that university degree should not be made the minimum qualification, but that graduates should be given an opportunity to compete, if they so desire. We, therefore, suggest that the

age limits for this group of services should be 19—21. This would render services of this nature open to non-graduates as well as to graduates.

Finally, for the top-most grades we are definitely of the opinion that entry into these services should be restricted to graduates. This view is based on our opinion that for the highest Executive and Administrative services a maturity of outlook and cultural standard is required which by and large, can naturally be expected of graduates. For these services, therefore, we recommend the age level of 21 to 23.

It will be noted that for all levels of Government service we have recommended a span of two years as against the usual span of three years between the minimum and the maximum age limits. This recommendation has been made deliberately because we are of the opinion that the mental qualities as also the personality can best be tested in one or at the most two examinations. A person who fails to come up to 'the standard' in the first two examinations may, on the basis of his experience of the examinations and having acquired the technique thereof, be successful in the third. Such success, however, does not necessarily reflect the innate qualities of the candidate.

We have also noted that under the present system of three examinations, the first examination is often taken by the candidates without that degree of seriousness that should normally go with such an effort. It is often taken only in order to acquire some experience of the technique of examinations. This leads to the number of candidates being unnecessarily multiplied, thus adding to the administrative problem of holding examinations.

Two chances would obviate this disadvantage and to that extent, would be of benefit.

We have made no mention so far about the Scheduled Castes and other Backward Classes. We would like to point out that our recommendations are made on the basis that the concessions enjoyed by the Scheduled Castes, Scheduled Tribes and other Backward Classes are not in any way affected.

We would like to mention at this stage that our recommendation throwing open clerical as well as the middle level of Government services to non-graduates is based on the assumption that recruitment to these levels is on the basis of open competitive examinations. Where such recruitment examinations are not held, it would be necessary to fall back, as at present, on university degrees which, in the absence of any other objective test, would guarantee at least a minimum standard of the qualities required for the posts.

RECRUITMENT TESTS

We recognise that a reasonable period of notice before the introduction of the new scheme is essential to avoid hardship. Persons who have embarked on a course of university education and have perhaps faced difficulties, financial and otherwise, in the hope of obtaining employment under the Government should not certainly find employment prospects disappear on account of a change in the recruitment policy. An interim period of notice is, therefore, essential for a transition to the new system and we recommend accordingly.

For all levels of Government service, however, we are of the opinion that recruitment examinations of adequate standard should be held for the selection of candidates.

The examination should be of a comprehensive nature and should test the mental qualities rather than merely the memory or the fund of information of the candidates. Every paper in the examination for the higher services should be of the Honours standard and every candidate for such services should be required to take at least two subjects.

In addition to these tests, there should also be some test for judging the personality, attitude and aptitude of candidates. Their past career may offer some insight into these and in addition, the first three months of the probationary period should be used for forming a correct idea about their personality. Obviously, unsuitable candidates may during these three months be weeded out by a properly constituted Board in consultation with the Public Service Commission. One way of ensuring that the candidates derive full benefit from their period of probation may be to evaluate their achievements during this period and add it to the competitive examination marks for determining their final ranking in the services.

A point of view has been expressed before us that lowering the academic standard for certain levels of Government service may be unobjectionable so far as work at those levels is concerned, but that it would have the disadvantage of not qualifying such persons for promotion to higher posts.

We, therefore, recommend that as far as possible promotion from grade to grade should be made on the basis of departmental examinations.

TRAINING

We consider it an essential part of our recommendations that a proper scheme of training for all levels of Government service should be accepted and implemented by the Governments both at the Centre and in the States.

For the lower levels of Government service, particularly at the clerical level, training will obviously have to be decentralised. The period of training should be at least one year and should consist not only of professional items such as typing, maintenance of files, noting, drafting, etc., but also instruction in general subjects aimed at giving the recruits a general education to render them not only good clerks but useful citizens. For the higher levels of Government services a similar scheme should be adopted.

Social subjects, particularly Economics, are of the highest importance in the present context in administration. To a lesser extent a knowledge

of Law is essential for the Administrative services. Instruction in these subjects may well be arranged in co-operation with the universities. We, therefore, recommend that the courses of training should be arranged in consultation with and with the co-operation of the universities but under the auspices of the appropriate Government department.

We are also of the opinion that for the highest executive and administrative services a period of training abroad after they have seen different parts of India would be highly useful.

The terms of reference of this Committee have drawn our attention to the problem of numbers that would inevitably arise from any lowering of academic standards.

Apart from the problem of arranging for the examination of large numbers of candidates, the question would arise of maintaining a uniform standard with respect to all those who appear at such an examination.

We would suggest that where the number of examinees is very large, a system of weeding out by preliminary examination may be adopted. The preliminary examination should be restricted to one or two simple written papers which would test the general alertness and mental calibre of the candidates concerned. As a result of this preliminary test a number of candidates equal to a given multiple of the number to be finally recruited should be selected for the final examination.

A point which has been brought to our notice often in the course of our discussions is the lack of uniformity in the standards of the various universities all over the country.

We recommend that the Public Service Commissions should publish annually tabulated results of the examination held by them, analysing the marks obtained by candidates from different universities in different subjects. The results thus tabulated would speak for themselves and the long-term trends would clearly indicate the quality of the products of different universities in different subjects in which they are trained.

ADMINISTRATION OF JUSTICE

THE Indian Union though a dual polity has no dual judiciary at all. The Supreme Court and the High Courts form one single integrated judiciary having jurisdiction and providing remedies in all cases arising under the constitutional law, the civil law or the criminal law. This is done in order to eliminate all diversities in remedial procedure.

The writs which for generations ran over the length and breadth of the country in the name of the British Sovereign, are now issued by the Supreme Court of India and the various High Courts in the territory of India. All the laws which existed before independence continue to operate in India as before subject to adaptation and modification made therein. Article 372 of the Constitution provides *inter alia* that, subject to the other provisions of the constitution, all the laws in force in the territory of India immediately before the commencement of the Constitution shall continue in force therein until altered, repealed or amended by a competent Legislature or other competent authority.

Article 13 of the Constitution provides that all laws in force in the territory of India immediately before the commencement of the Constitution, in so far as they are inconsistent with the provisions of the Constitution relating to Fundamental Rights (Part III) shall to the extent of such inconsistency be void.

The State is also debarred from making any law which takes away or abridges the Fundamental Rights conferred by this Part, and any law made in contravention shall be void to the extent of such contravention (Art. 13 (2)).

Article 14 ensures to all persons equality before the law by providing that the State shall not deny to any person equality before the law or the equal protection of the laws within the territory of India.

The continuity of the existing laws and legal procedure is further ensured by Article 375 under which all courts of civil, criminal and revenue jurisdiction and all authorities and officers continue to exercise their respective functions subject to the provisions of the Constitution.

The indigenous law of India is personal and divisible with reference to the two great classes of the population, Hindu and Muslim. Both systems claim divine origin and are inextricably interwoven with religion, and each exists in combination with a law based on custom. The rules of the *Shastras* and the *Koran* have, however, been in some cases altered and relaxed. Instances can be found in the Bengal Sati Regulation Act of 1829, the Indian Slavery Act, 1843, the Caste Disabilities Removal Act of 1850, the Hindu Widows' Remarriage Act, 1856, and some other Acts and Codes like those which remove the civil disabilities of Harijans.

During recent years indeed there has been a determined demand on the part of social reformers, and various women's organisations in India for an amendment of the Hindu Law so as to bring it into line with progressive social opinion, in consonance with the spirit of the times.

The Draft Hindu Code that was before the provisional Parliament aimed at abolishing the archaic principles of the ancient system of law, the removal of sex and caste disabilities, and generally simplifying, secularising, and modernising the law governing all Hindus, including Lingayats, Buddhists, Jains and Sikhs. But the Code lapsed on account of the dissolution of the provisional Parliament.

The Government of India has however introduced piece-meal legislation regarding reforms in Hindu Law.

The following Acts have already been passed: The Hindu Marriage Act 1955, The Hindu Succession Act 1956, The Minority and Guardianship Act 1956, The Hindu Adoption and

Inheritance Act 1956. The new Hindu code is thus part of the statute book.

In the meanwhile, an opposite tendency has been observable among the Muslims, who by recent legislation have sought to revert to the law of the *Shariat*, discountenancing the application of Hindu Law and custom to the sections of the Muslim community who as converts from Hinduism had retained Hindu Law in matters of inheritance and succession.

Apart from this, the entire legal system which has hitherto prevailed in the country is in course of time bound to undergo a profound transformation by reason of the withdrawal of British rule and the partition of India. A Law Commission has been appointed by the Government of India for this purpose, and it has already submitted to the Government interim reports on certain laws and administration of justice.

A demand has been made for the simplification of the procedure and law for the administration of justice.

Accordingly a bill for amending the code of Criminal Procedure was passed. The amendment gives the accused certain new rights. He can now take an oath and give evidence if he so desires.

The Indian Penal Code has from time to time been amended. The rules of Civil Procedure have been embodied in the Code of Civil Procedure. The Code of Civil Procedure was remodelled in 1908 and the Code of Criminal Procedure in 1898. These Codes as amended from time to time are now in force.

The years between 1870 and 1885 saw a great deal of legislative activity in British India, and important branches of the law, like Evidence, Contract, Transfer of Property, Trusts, Negotiable Instruments, etc., were codified in the form of Acts of the Indian Legislature applicable to the whole of British India. These, amended from time to time and supplemented by rules derived from English decisions, constitute the bulk of the law administered in India today.

SUPREME COURT

Art. 124 of the Constitution provides for the establishment of a Supreme Court of India consisting of a Chief Justice of India and seven other judges. There is provision in law for the appointment in all of 10 other judges. Every judge of the Supreme Court shall be appointed by the President and shall hold office until he attains the age of sixty-five years. In the course of appointment of a Judge the Chief Justice shall always be consulted. Only a citizen of India who has been for at least 5 years a judge of a High Court, or for 10 years an advocate of a High Court, or a person, who in the opinion of the President, is a distinguished jurist, is qualified to be appointed judge of the Supreme Court.

A judge of the Supreme Court is not liable to be removed from his office except by an order of the President passed after an address by each House of Parliament, supported by a majority of the total membership of that House, and by a majority of not less than two-thirds of the members of that House present and voting, has been presented to the President in the same session for such removal, on the ground of proved misbehaviour or incapacity. No person who has held office as a judge of the Supreme Court shall plead or act in any court or before any authority within the territory of India.

The Supreme Court is a court of record with all the powers of such a court including the power to punish for contempt. The seat of the Court is to be in Delhi or such other place as the Chief Justice with the approval of the President may from time to time appoint.

The Supreme Court has exclusive original jurisdiction in any dispute (a) between the Government of India and one or more States; (b) between Government of India and one or more

States on the one side and one or more other States, on the other; (c) between two or more States, if and in so far as the dispute involves any question (whether of law or fact) on which the existence or extent of a legal right depends (Article 131).

The Appellate jurisdiction of the Supreme Court extends over all appeals from any judgment, decree or final order of a High Court, in civil, criminal or other proceedings, if the High Court certifies that the case involves a substantial question of law as to the interpretation of the Constitution. If the High Court refuses such a certificate the Supreme Court may grant special leave to appeal in a proper case (Art. 132). An appeal shall also lie to the Supreme Court from a High Court in civil matters, when the amount or value of the subject matter in dispute is not less than Rs. 20,000 or the High Court certifies the case to be a fit one for appeal to the Supreme Court (Art. 133).

In criminal matters under Art. 134 an appeal lies to the Supreme Court from any judgment, final order or sentence of a High Court, if the High Court has (a) on appeal reversed an order of acquittal of an accused person and sentenced him to death; or (b) has withdrawn for trial before itself any case from a subordinate court and has in such trial convicted the accused person and sentenced him to death; or (c) the High Court has certified that the case is a fit one for appeal.

For purposes of appeals to the Supreme Court, the Judicial Commissioners' Courts are to be considered as High Courts.

Under Art. 136 discretion is given to the Supreme Court to grant special leave to appeal from any judgment, decree, sentence or order, in any matter passed by any Court or Tribunal in the territory of India.

The Supreme Court has also power to review its own judgement (Art. 137).

The jurisdiction and powers of the Federal Court under the existing law are also exercisable by the Supreme Court (Art. 135) including the advisory power to give its opinion on questions of law or fact referred to it by the President (Art. 143).

The law declared by the Supreme Court shall be binding on all courts in the territory of India excepting the Supreme Court itself.

The dual system in the Supreme Court was abolished with effect from Jan 26, 1955.

Parliament has the power to legislate on the constitution, organisation, jurisdiction and powers of the Supreme Court.

Article 32 of the Constitution guarantees the right to move the Supreme Court by appropriate proceedings for the enforcement of Fundamental Rights; and for the enforcement of such rights the Supreme Court has power to issue directions or orders or writs, including writs in the nature of *Habeas Corpus*, *mandamus*, prohibition, *quo warranto* and *Certiorari* whichever may be appropriate.

Power is given to Parliament to enlarge the jurisdiction of the Supreme Court by appropriate legislation (Art. 138).

The jurisdiction of the Judicial Committee of Her Majesty's Privy Council over appeals from India in all matters is now abolished.

The royal prerogative to grant pardons, reprieves, respites or remissions of punishments now resides in the President (Art. 72).

Under Art. 348, all proceedings in the Supreme Court and in every High Court in India and the authoritative text of all Bills and Acts of Parliament and the State Legislatures and of all Ordinances promulgated by the President or Governors and of all orders, rules and regulations issued under the Constitution or any law shall be in the English language. If this language is to be replaced by any other language, Parliament must legislate to that effect.

All authorities, civil and criminal in the territory of India, have to act in aid of the Supreme Court (Art. 144). The independence of the judges of the Supreme Court, is secured by charging their salaries on the Consolidated Fund of India, and by prohibiting any discussion on the conduct of the judges in their official capacity.

HIGH COURTS

Every High Court is a court of record and has all powers of such court including the power to commit for contempt of itself.

Every judge of a High Court is appointed by the President after consultation with the Chief Justice of India, the Governor of the State and the Chief Justice of the particular High Court; and he holds office until he attains the age of sixty years.

A person is not qualified to be appointed a judge of a High Court unless he is a citizen of India and has either held judicial office or practised as an advocate for 10 years in any of the States.

A High Court judge is not liable to be removed from his office except in the manner provided in Art. 124 (4) for the removal of a judge of the Supreme Court of India.

No person who after the commencement of the constitution has held office as a permanent judge of a High Court could plead or act in any court or before any authority in the territory of India except the Supreme Court or High Courts.

There is provision in the Constitution for the appointment of additional or acting judges.

Power is given to the President in consultation with the Chief Justice of India to transfer a judge from one High Court to any other High Court in India. (Art. 222.)

Article 225 preserves the jurisdiction and powers of the High Courts as they existed immediately before the commencement of the Constitution. Restrictions on the exercise of the original jurisdiction in revenue matters are removed.

Art. 226 gives to every High Court in India power throughout its jurisdiction to issue to any person or authority including Government departments, orders, writs, including writs in the nature of Habeas Corpus, mandamus, prohibition, *quo warranto* and *Certiorari* for the enforcement of Fundamental Rights and for any other purpose. (Art. 226.)

The Law Commission appointed by the Government of India has offered the suggestion that the powers of the High Courts under Art. 226-227 should be curtailed.

The High Courts have powers of superintendence over all subordinate Courts and tribunals within their respective jurisdiction.

Legislation affecting constitution and organisation of the High Courts can be passed by Parliament alone.

The Law Commission has recommended to the Government of India that a High Court should not have Benches. It has also expressed the view that the establishment of tribunals will be necessary in view of the ideal of a Welfare State.

LOWER COURTS

The Code of Criminal Procedure provides for the constitution of inferior criminal courts styled courts of session and courts of magistrates.

Every State, outside the towns of Madras, Bombay and Calcutta, is divided into sessions divisions consisting of one or more districts, and every sessions division has a court of session and a sessions judge, with assistants if need be. These stationary sessions courts are like the English Assizes, and are competent to try all accused persons duly committed, and to inflict any punishment authorised by law, but sentences of death are subject to confirmation by the highest court of criminal appeal in the State.

The jury system has been abolished in Bombay State except in the Greater Bombay area.

Magistrates' courts are of three classes with descending powers. Provision is made and largely utilised in the towns, for the appointment of honorary magistrates. In the towns of Madras, Bombay and Calcutta, Presidency Magistrates deal with magisterial cases and benches of Justices of the Peace or Honorary Magistrates dispose of the less important cases.

In Bombay Honorary Magistrates or Justices of the Peace do not try cases.

Article 50 of the Constitution lays down that the States shall take steps to separate the judiciary from the executive in the public service of the States.

The State of Bombay was the first State to introduce the separation of the judiciary from the executive in public services, by a statute. The Act came into force on July 1, 1953.

There is partial separation in the following States: Andhra, Madras, Punjab, Bihar, U. P., and Kerala. It is not effected by any statute but by rules made by the Government in that behalf.

The Government of West Bengal has announced that it has decided to make the judiciary independent of the executive at all levels.

The constitution and jurisdiction of the inferior civil courts vary. Broadly speaking one district and sessions judge is appointed for each district. As District Judge he presides in its principal civil court. His functions as Sessions Judge have already been described.

For these posts members of the Indian Civil Service were mainly selected in the past though some appointments were made from the Provincial Service.

In the State of Bombay, recruitment is also made from the bar; leading practitioners are appointed as District Judges.

Next come the Subordinate Judges and Munsiffs, the extent of whose original jurisdiction varies in different parts of the country.

There are in addition a number of Courts of Small Causes with jurisdiction to try money suits up to Rs. 500. In the towns of Madras, Bombay and Calcutta where the Chartered High Courts have original jurisdiction, Small Causes Courts dispose of money suits up to Rs. 3,000.

In Bombay and Madras there are also City Civil Courts. The City Civil Court in Bombay has a pecuniary jurisdiction of upto Rs. 25,000.

As Insolvency Courts the Chartered High Courts of Calcutta, Bombay and Madras have jurisdiction in the Presidency towns. In the mofussil similar powers are conferred on the District Courts by the Provincial Insolvency Act of 1920.

There are Coroners only for the Presidency Towns of Calcutta and Bombay. Elsewhere their duties are discharged by the ordinary staff of magistrates and police officers unaided by jurors.

SPECIAL COURTS

Labour Courts and Industrial Courts now exist in most States.

A Labour Court consists of a single judge.

These Courts decide upon disputes regarding (a) propriety or legality of an order passed by an employer, (b) the application and interpretation of standing orders, (c) they also decide disputes referred to them by Government for arbitration. Legality or otherwise of strikes or lock-outs or closure, etc. is also decided by them.

An appeal against the judgment of the Labour Courts lies to the Industrial Court. This court has also original jurisdiction regarding matters referred to it by the Government or by representative Unions. It decides upon questions of law referred to it by Wage Boards and references regarding interpretation of the Act and the Rules. It has power of superintendence over Labour Courts.

The Industrial Disputes Act was passed by the Central Legislature in 1947 for the investigation and settlement of industrial disputes.

Industrial Tribunals were established under this Act. If the conciliation bodies set up under this Act fail to bring about a settlement, the matter is referred to the Industrial Tribunals.

Neither party to a dispute is entitled to be represented by a legal practitioner except with the consent of the other party and by leave of the Tribunal.

Industrial Tribunals are not permanent Courts. Whenever a matter is referred to the Government regarding an industrial dispute the Government appoints one or more persons as Industrial Tribunal to adjudicate upon the dispute.

The Industrial Disputes (Appellate Tribunal) Act was passed in 1950. It constituted a new Court, the Labour Appellate Tribunal of India. It is an appellate Court over the Industrial Tribunals and Industrial Courts. The judgments given by the Appellate Tribunal have helped to establish uniformity in labour matters.

The Industrial Disputes (Appellate Tribunal) Act was amended in 1955 by Act 29 of 1955. This Act empowered the Chairman of the Labour Appellate Tribunal to transfer applications to the Industrial tribunals constituted under the Industrial Disputes Act 1947.

The Labour Appellate Tribunals are in effect abolished by the Industrial Disputes (Amendment and Miscellaneous Provisions) Act No. 30 of 1956 which repealed the Industrial Disputes Appellate Tribunal Act of 1950.

It makes provision for the constitution of the following courts and tribunals:

1. Labour Courts to be constituted by the appropriate Government. A court is to consist of one judge only.
2. Industrial Tribunals. A Tribunal is to consist of one judge only. A person is not qualified to be a member of a Tribunal unless he has been judge of a High Court. The Tribunals will be constituted by the appropriate Government.
3. National Tribunals. These Tribunals will be constituted by the Central Government. Here also a tribunal is to consist of one judge only.

This Act came into force on 1st Sept., 1950 from which date the Tribunal was not to entertain fresh appeals, but pending appeals were to be disposed of.

The Industrial Disputes (Amendment) Act 41 of 1950 and the Dock Workers (Regulation of Employment) Act, 1948, are two other Acts with respect to labour classes.

Administration of labour laws is a divided responsibility. The Central Government has the following organisations for the administration of labour laws. (1) The Office of the Chief Labour Commissioner, New Delhi. (2) The Office of the Coal Mines Welfare Commissioner, Dhanbad. (3) The Office of the Coal Mines Provident Fund Commissioner, Dhanbad. (4) The Office of the Welfare Commissioner, Mira Mines Labour Welfare Fund, Dhanbad and Nellore. (5) The Office of the Chief Inspector of Mines, Dhanbad. (6) The Office of the Chief Adviser of Factories, New Delhi. (7) The Office of the Director-General, Employees' State Insurance Corporation, New Delhi. (8) The Office of the Controller of Emigrant Labour, Shillong. (9) The Office of the Director, Labour Bureau, Shimla. (10) The Office of the Central Provident Fund Commissioner, New Delhi.

The State Governments also have their own organisations for the administration and enforcement of labour laws.

Juvenile offenders are tried by the Juvenile Courts. In places where there are no juvenile courts the offenders are tried either by the High Court, or the Court of Session or a salaried Presidency Magistrate or a salaried Magistrate of the First Class.

Legal practitioners are not entitled to appear in any case or proceeding before a Juvenile Court. However the Court may grant permission in exceptional cases.

Probation officers are appointed by the State Government for helping the Court in the discharge of its functions. The powers and duties of such officers are laid down in the rules. Their main duty is to investigate the history of the juvenile offender and offer help to the Court. An appeal against the judgment of a Juvenile Court lies to the Chief Presidency Magistrate in Greater Bombay, and in other places to the Court of Session. If a case is decided by a Presidency Magistrate or a Court of Session the appeal lies to the High Court.

Panchayat Courts (called Nyaya Panchayat) are in existence in many States. The members of the Panchayat Court are elected by the Village Panchayat. Sections 30-44 of the Act lay down rules about the suits that may be tried and the suits that may not be tried by the Court. A Nyaya Panchayat cannot alter or revise its decision. An appeal against a decision of the Nyaya Panchayat lies to the District Judge.

LEGAL OFFICIALS

The Government of India have their own law colleague in the Law Minister of the Union Cabinet. All Government measures are drafted in his ministry after their substance is decided upon by the administrative departments concerned.

Outside the Cabinet the principal law officers of the Government of India are the Attorney-General and Solicitor-General appointed by the President. At Bombay and Calcutta the Government of India have their own solicitors.

Each of the State Governments has its own Advocate-General.

Article 76 of the Constitution of India says that for the post of Attorney-General the President shall appoint a person qualified to be appointed a Judge of the Supreme Court. It shall be the duty of the Attorney-General to advise the Government of India on such legal matters and to perform such other duties of a legal character as may be referred or assigned to him by the President, and to discharge the functions conferred upon him by the Constitution. In the performance of his duties the Attorney-General shall have right of audience in all Courts in the territory of India. The Attorney-General has a right to take part in the proceedings of Parliament and address it.

Under Article 165 the Governor of each State is authorised to appoint a person qualified to be appointed a Judge of a High Court to be Advocate-General for the State.

The Advocate-General is appointed by the Governor. He has to give advice to the Government of the State upon such legal matters and to perform such other duties of a legal character as may be referred to or assigned to him. He holds office during the pleasure of the Governor. He appears in the Court on behalf of the Government. He is the leader of the Bar and the President of the Bar Council. He is also authorised to take part in the proceedings of the State legislature, if his advice is sought.

In addition to the Advocate-General there is also a Government Pleader in many States. He usually belongs to the Appellate Side of the High Court while the Advocate-General belongs to the Original Side where the High Court has both Original and Appellate Sides. The Government Pleader is assisted by an Assistant Government Pleader and they look after criminal work.

The State Governments have their own law officers, in addition to the Advocate-General and the Government Pleader. The law officer is designated Remembrancer of Legal Affairs. He also works as Secretary to the Legal Department. He is never a practising lawyer, but a Government servant. Usually one of the District Judges is appointed Remembrancer of Legal Affairs.

The Legal Remembrancer drafts Government Bills and gives advice to Government Departments on all legal matters.

Sheriffs are attached to the High Courts of Bombay, Calcutta and Madras.

They are entrusted with the work of preparing jury lists, serving summons and other legal processes. The Sheriff in Bombay is the ex-officio Chairman of the Bombay State Permanent Famine Relief Committee. He can also convene public meetings on behalf of the citizens.

The detailed work of the office is entrusted to the Deputy Sheriff who is an officer of the High Court.

There are Official Assignees in three States—Bombay, W. Bengal and Madras. The appointment is made by the Chief Justice of the High Court concerned.

The duties of the Official Assignee are two-fold, viz. realisation and distribution of the insolvent's estate, and the control of the property of the insolvent and his conduct generally.

A party aggrieved by the decision of the Official Assignee may appeal to the Insolvency Judge of the High Court.

In addition to the Official Assignee, a Deputy Official Assignee may also be appointed. Another officer of the court is the Insolvency

Registrar who may be vested with the powers mentioned in section 6 of the Presidency Towns Insolvency Act.

There are two classes of legal practitioners, practising in the Supreme Court. They are Senior Advocates, and other Advocates (popularly known as Junior Advocates).

All Advocates of the Supreme Court are entitled to practise in High Courts. In Bombay and Calcutta an Advocate can appear on the original side only when instructed by an Attorney. An Advocate of a High Court is entitled to practise in the High Court concerned and in all the courts subordinate to it. An Attorney-at-Law if enrolled as an Advocate can also practise in the High Court, except on the original side. He, however, can plead in insolvency and chamber matters.

Pleaders are entitled to practise in the District for which they hold sanads.

In addition to these classes, there are Mukhtars in the States of Assam, Bihar, Orissa, Uttar Pradesh, West Bengal and Rajasthan. In Assam there is one more class of legal practitioners known as Revenue Agents.

The Government of India appointed a Committee called The All-India Bar Committee, under the chairmanship of Mr. S. R. Das, now Chief Justice of India. It recommended the unification of the Indian Bar. To achieve this it proposed that there should be no further recruitment of non-graduate pleaders or Mukhtars or Revenue Agents.

As regards the dual system in Bombay and Calcutta, the Committee favoured its retention. It however recommended the abolition of the dual system in the Supreme Court of India.

Accordingly the dual system was abolished in the Supreme Court on 26th Jan. 1955.

Formerly official Law Reports were published only in six series—Bombay, Allahabad, Calcutta, Madras and Nagpur. Three more series, Cuttack, Mysore and Rajasthan, have now been added.

These reports contain cases decided by the High Courts and the Supreme Court of India.

In addition to these series a "Supreme Court Reporter" is also published. It contains important decisions of the Supreme Court of India.

Besides these official reports there are a number of private agencies that also bring out reports of the decisions of the Supreme Court and the High Courts. The Law Commission is considering the desirability or otherwise of allowing private series of law reports. Reports are also published of important cases determined by Labour Courts, Industrial Courts and Labour Appellate Tribunals.

HINDU LAW REFORM

A short note on Hindu Law reform is in order as it concerns the welfare of the women of this country.

As a result of increasing consciousness on the part of Indian women of their social and political status, there has in recent years been a move to revise and codify the somewhat vague and contradictory law governing the Hindu home, especially as it affects marriage, divorce, succession to property, etc.

In 1937 the Indian Legislature enacted the Hindu Women's Rights to Property Act. This Act, for the first time, gave to Hindu widows a right to claim a share in the husband's property and demand partition.

Four years later the Government of India set up a Committee to overhaul and codify the Hindu Law. This Committee, which is known as the Rau Committee, drafted two bills dealing with Hindu intestate succession and Hindu marriage.

When the measures came up for consideration by the two Houses of the Central Legislature, a joint committee of the Houses recommended the revival of the Rau Committee with a view to the codification of the entire Hindu Law. Consequently the Rau Committee was revived early in 1944. During 1944-45, the Committee made a tour of the country and elicited public opinion

on the proposals embodied in the two measures and on the codification of the Hindu Law as a whole. They gathered evidence from leading lawyers and representative organisations of various shades of Hindu opinion on a draft Hindu Code prepared by them.

During the last five years, the Central and the Provincial Legislatures passed various Acts, which aimed at improving the condition of Hindu women.

The Hindu Marriage Disabilities Removal Act of 1946, legalised marriages between Hindus belonging to the same Gotra or Pravara.

The Hindu Married Women's Right to Separate Residence and Maintenance Act of 1946 enables a married Hindu woman to claim from her husband separate residence and maintenance on certain grounds.

The Hindu Marriage Validating Act, 1949 removed the caste-barriers from the sphere of marriages and validated even the Pratiloma marriages.

The Child Marriage Restraint (Amendment) Act of 1949 raises the marriage age of girls from 14 to 15 years.

In the State of Bombay, monogamy was made a rule by the Prevention of Hindu Bigamous Marriage Act of 1946, and dissolution of marriages by divorce was allowed under certain

conditions by the Bombay Hindu Divorce Act of 1947.

In the state of Madras, there was an Act preventing bigamous marriages and providing for divorce. The Act was called the Madras Hindu (Bigamy Prevention and Divorce) Act.

The Madras Legislature passed the Madras Devadasis (Prevention of Dedication) Act in 1947. This Act puts an end to the unhealthy practice of dedicating Hindu women as 'devadasis' to Hindu deities.

Bombay Hindu Women's Right to Property Act (Extension to Agricultural Land) extended the application of the Hindu Women's Right to Property Act, 1938 to agricultural land also. A similar law was passed in Madras.

Though the Hindu Code Bill has been dropped, the Government of India have passed several Acts as already mentioned affecting Hindu Law.

The Special Marriage Act of 1954 repeals the Special Marriage Act of 1872. Though the Act of 1954 is not a part of Hindu Code, it affects Hindus in so far as it provides for civil marriages both for Hindus and non-Hindus.

The Hindu Marriage Act of 1955 came into force on 18th May, 1955. The Act has repealed the following laws:—

1. The Hindu Marriage Disabilities Removal Act of 1946; 2. The Hindu Marriage Validity

Act of 1949; 3. The Hindu Divorce Act of 1947 (Bombay Act); 4. The Prevention of Hindu Bigamous Marriage Act of 1946; 5. The Madras Hindu (Bigamy Prevention and Divorce) Act; 6. The Saurashtra Prevention of Hindu Bigamous Marriage Act; 7. The Saurashtra Hindu Divorce Act.

Under the Hindu Marriage Act 25 of 1956, monogamy has become a rule in Hindu Society. Divorce is allowed on certain grounds. Inter-caste marriages are valid.

The Hindu Minority and Guardianship Act (32 of 1956) seeks to regularise the law regarding guardianship.

The Hindu Succession Act 20 of 1956 aims at simplifying the Hindu Law of succession. It does away with the distinction between the Mitakshara and Dayabhaga law of succession. However, special provision is made for regulating succession to the property of intestates governed by Marumakkattayam, Aliyasana or Nambudiri laws of inheritance. The Act creates two classes of heirs, preferential heirs are included in Class I. The Act confers a right to a share on a daughter, a provision unknown to the previous Hindu Law.

Heavy arrears and inordinate delay in the disposal of court cases in India was indicated by the fact that about 1,66,100 cases were pending on December 31, 1956, in all the 13 High Courts in the country.

The number of cases pending before these High Courts since 1953 totalled 39,228.

The clearance of arrears was among the main subjects discussed at the State Law Ministers' Conference in September 1957 which decided on

The Hindu Succession Act has also made the following changes, which are revolutionary, in the old Hindu Law:

All property held by a Hindu woman is now her absolute property and there are no restrictions on her rights.

The heirs of a deceased Hindu are entitled to get a share even in the undivided interest in the coparcenary property. A Hindu can make a will even of his undivided interest in the coparcenary property.

The Hindu Adoption and Maintenance Act 79 of 1956 was passed in December 1956. Under the Act the adoption of a son or a daughter is permitted. The consent of the wife is necessary for adoption, which is now purely secular in character.

Besides these laws, Parliament has passed two important Acts relating to social reform. The Suppression of Immoral Traffic in Women and Girls' Act (No. 104 of 1956) was passed in December 1956. This Act provides in pursuance of the International Convention signed at New York on 8th May 1950 for the suppression of immoral traffic in women and girls. The Women's and Children's Institutions (Licensing) Act

(No. 105 of 1956) was passed in December 1956. This Act provides for the licensing of such institutions and of matters relating to them.

The following Bills are before Parliament (April, 1957):

1. A Bill to amend the Child Marriage Restraint Act. This Bill aims at making a marriage in contravention of the Act voidable at the option of the female.

2. A Bill to provide for the restraint on Sanyas diksha of a child.

3. A Bill to provide for the better control and supervision of orphanages and widows' homes in India.

4. A Bill for the licensing of sadhus and sanyasis in India.

5. A Bill to provide for the protection and maintenance of old and infirm persons.

A private member of Parliament has introduced in the House a bill aiming at the abolition of the dowry system.

The Bombay Legislature has passed an Act for the registration of marriages.

DELAY IN LEGAL PROCEDURE

various measures to be taken to speed up the disposal of these pending cases.

The question, it would be remembered, engaged the attention of the Central Government even during the British regime when Sir Patrick Spens was the Chief Justice of India.

In 1949 the Government of India appointed a committee under the Chairmanship of Mr. Justice S. R. Das (the present Chief Justice of India) to go into this question.

The following is the approximate breakdown of the pending cases in various High Courts as on December 31, 1956, and of cases pending from 1953 respectively: Allahabad 38,000 and 12,000; Andhra 23,000 and 3,000; Assam 900 and 28; Bombay 13,000 and 2,900; Calcutta 27,000 and 10,000; Kerala 6,000 and 300; Madhya Pradesh 6,500 and 1,200; Madras 15,000 and 1,000; Mysore 6,000 and 1,000; Orissa 2,700 and 400; Patna 12,000 and 4,000; Punjab 11,000 and 2,400 and Rajasthan 5,000 and 1,000.

DEFENCE SERVICES

Chief of the Army Staff, General K. S. Thimayya.

Chief of the Naval Staff, Vice-Admiral Ram Dass Katari.*

Chief of the Air Staff, Air Marshal S. Mukerjee.

THE supreme command of all the Armed Forces of the Indian Republics vested in the President. Since the attainment of independence, the Ministry of Defence has become the central agency for formulating and obtaining policy decisions of the Government of India on defence matters and for transmitting them to, and seeing to their implementation by, the three Defence Services Headquarters.

The partition of India in 1947 was an important landmark in the history of the Armed Forces of India. They were divided between the two countries on a communal-cum-optional basis, which worked out to an approximate proportion of one-third to Pakistan and two-thirds to the Union of India. British troops, including the Royal Air Force, were completely withdrawn from India on February 28, 1948.

The nationalisation of the Armed Forces started soon after the partition. In the three Services today only a handful of British technicians are employed on a contract basis.

The order of precedence of the Defence Services has been re-arranged as Army, Navy and Air Force. With the inauguration of the new Constitution on January 26, 1950, the use of the prefix 'Royal', wherever it occurred, in the designation of a Service, regiment, corps or unit of the Armed Forces was discontinued. Similarly, the expression 'His Majesty's Indian Ship' (H.M.I.S.) before the names of ships was dropped.

DEFENCE ORGANISATION

During the British regime, the Commander-in-Chief was not only the Supreme Commander, i.e. head of the three Services, but also the Defence or War Member of the Executive Council, and, as such, occupied a specially privileged position—second only to that of

the Viceroy and Governor-General. Since August 15, 1947, each Service has been placed under a separate and independent head, their present designations being Chief of the Army Staff, Chief of the Naval Staff and Chief of the Air Staff.

With the appointment of three Service Chiefs independent of each other, the task of co-ordination of the activities of the three Services has devolved on the Defence Ministry. In order to ensure expeditious handling of work, a network of committees has been established at different levels.

At the top is the Defence Committee of the Cabinet which is, for all practical purposes, the Government so far as the Services are concerned. All important policy questions relating to defence are decided by this Committee, which is presided over by the Prime Minister. Next in importance is the Defence Minister's Committee which, besides, the Defence Minister, includes the Deputy Defence Ministers, the Defence Secretary, the Financial Adviser (Defence) and the three Service Chiefs.

The Defence Minister is responsible to Parliament for all matters relating to the Defence Services including appropriation and allotment of funds, correlation of all civil and ministerial activities for purposes of defence and control and direction of research policy.

There are a number of inter-Services organisations, directly administered by the Defence Ministry, dealing with matters of common concern to the three Services.

Some of them are the Defence Production Board, the Defence Science Organisation, the National Cadet Corps, the National Defence Academy, the Defence Services Staff College, the School of Foreign Languages, the Directorate-

General of Armed Forces Medical Services, the Resettlement Section, the Indian Soldiers', Sailors' and Airmen's Board, the Combined Inter-Services Historical Section, the Directorate of Military Lands and Cantonments, the Joint Cipher Bureau and the Ministry of Defence Security Corps.

DEFENCE SCIENCE

A Research and Development Department came into being on 1st January 1958 which includes the Defence Science Organization and the Technical Development Organization. The Department will thus include both scientists and Service officers. It is under the charge of Dr. D. S. Kothari, Scientific Adviser to the Defence Minister.

Dr. Kothari will be assisted by a Chief Scientist and a Chief Controller, the latter being a senior Service officer. He will also be closely associated with the Chiefs of Staff Committee, which, composed of the heads of the three Defence Services, is responsible for advising the Defence Minister's Committee on all military matters requiring consideration by Government.

A Defence Research and Development Committee has also been set up under the chairmanship of Dr. Kothari, with membership drawn from among the leading scientists in the country and senior officers of the three Services. There is a Policy Board and an Advisory Committee to deal with matters of scientific policy and organisation of research in relation to defence requirements. The Advisory Committee has also set up a Personnel Research Panel and an Advisory Panel for Ballistics.

A Defence Science Service has been instituted which includes all civilian scientists engaged in research, development, inspection or teaching in

* Was due to take charge in April, 1958.

any of the three Services or in the Ministry of Defence.

A Psychological Research Wing of the Organisation was formed in July 1949 under a Chief Psychologist, the main function of which is to conduct research in the assessment of human personality so that the right type of officers may be selected for the Armed Forces.

In order to meet the urgent need of training technical staff officers for the Armed Forces, the Government established an Institute of Armament Studies at Kirkee some years ago, as a constituent of the Defence Science Organisation. Apart from training Service officers, the Institute provides facilities for a comprehensive scientific study and research in the performance of weapons and equipment. It has already concluded three courses for Army, and one for Air Force officers.

Similarly, two naval laboratories, one chemical and metallurgical and the other physical, were established at Bombay and Cochin respectively to deal with science problems relating to the Navy. The former is concerned with anti-corrosion and anti-fouling paints, detection of flaws in materials and castings and welds, while the latter is engaged in research on under-water acoustics, mines and oceanography.

PRODUCTION BOARD

In order to evolve a co-ordinated policy in regard to the demand for stores and equipment for the Army, Navy and Air Force, a Defence Production Board has been constituted under the Ministry. Apart from being responsible for the efficient running of Ordnance factories, the Board pays special attention to maximum utilisation of the existing capacity for defence production.

In order to use up all surplus capacity in the Ordnance factories, after meeting the needs of the Services, it has endeavoured to increase the manufacture of a variety of goods for civilian consumption.

With the major emphasis laid on the indigenous production of defence equipment, there are at present in operation more than 500 research and developmental projects in respect of armaments, general stores, instruments and electronics, which are being actively progressed in the various technical establishments under the Controller-General of Defence Production.

More than 100 hitherto imported items can now be produced in this country.

Besides a number of Ordnance factories meeting the country's defence requirements, the other important defence industries are the Hindustan Aircraft, Ltd., the Bharat Electronics, Ltd. at Bangalore and the Machine Tool Proto-type Factory at Ambernath near Bombay.

For detailed notes on Hindustan Aircraft and Bharat Electronics see article 'Government Industrial Undertakings'.

Defence stores purchased from abroad in 1955-56: Rs. 37.11 crores; Indigenous: Rs. 26.47 crores.

In 1956-57: Rs. 55.08 crores and Rs. 27.04 crores respectively.

NATIONAL CADET CORPS

The National Cadet Corps came into being in 1948. The aim of the Corps is (1) to develop character, comradeship, ideal of service and capacity for leadership in young men and women, (2) to stimulate interest in the defence of the country, and (3) to build up a reserve of potential officers to enable the Armed Forces to expand rapidly in a national emergency. The organisation is, thus, mainly of an educational and nation-building character. Officers and cadets have no liability whatsoever for active military service. In this way it is different from the Territorial Army, which is designed to serve as a second line of defence.

With the contemplated enlargement of the Cadet Corps under the Second Five-Year Plan, it is expected that a unit of the N.C.C. will be raised in every school and college throughout the length and breadth of the country. Giving

as it did a background of military training to educated youth and inculcating in them a sense of discipline, the cadet movement caught the imagination of school and college students from the very beginning. It has proved to be the most popular and powerful youth organisation so far as the development of corporate life among students is concerned. Social service has been recognised as an essential feature of cadets' activities.

The NCC consists of three divisions: (1) Junior, (2) Senior and (3) Girls'.

The strength of the Corps as on March 31, 1957 was as follows:—

	Officers	Cadets	Total
Junior Division ..	1,662	57,205	58,867
Senior Division ..	1,016	45,873	46,889
Girls' Division ..	271	8,673	8,944

The Senior Division provides Service training to young graduates and recruitment to it is from amongst students of universities and colleges. It is composed of three wings, viz. Army, Navy and Air.

Recruitment to the Junior Division is from amongst students of secondary schools. It is also composed of Army, Navy and Air Wings.

The object of the Girls' Division is to develop all-round personality among girls. This Division has two wings, Senior and Junior, units of the Senior Wing being raised in colleges and those of the Junior Wing in schools.

To cope with the demand for military training for boys and girls in schools who cannot get admission into the N.C.C., an Auxiliary Cadet Corps has been started. This Corps has made rapid progress, and its present strength is estimated at 715,586.

The A.C.C. trains the youth of the country in team spirit, discipline and patriotism. It functions under the overall supervision of the Director, National Cadet Corps, Ministry of Defence. Instructors for this organisation are selected from schools and are trained by regular Army staff of the various NCC units.

Ten per cent. of the total intake of commissioned officers in the Army, Navy and Air Force on the basis of direct entry to the Service training institutions has been reserved for N.C.C. cadets of the three Service wings.

TRAINING INSTITUTIONS

The important training institutions common to the three Services are given below:

National Defence Academy: The Joint Services Wing of the National Defence Academy was located in Clement Town, Dehra Dun, where it started functioning as an experimental measure on January 4, 1949. The present location of the Academy is at Khadakvasala near Poona where it started functioning in January 1955. The Joint Services Wing, on its move to Khadakvasala, came to be known as the National Defence Academy. At this Academy, Army, Navy and Air Force cadets receive three years' combined basic training. This three years' course for cadets of all the three Services was introduced at Khadakvasala in July 1955. The first two years are devoted to common preliminary training and the third to specialized training in the three respective Services. Thereafter, Naval and Air Force cadets proceed to their respective Services establishments for advanced training, while the Army cadets join the Military College, Dehra Dun, for a further one-year course.

Commandant, Maj.-Gen. E. Habibullah.

Defence Services Staff College: This is located in Wellington in the Nilgiri Hills in south India. One hundred officers drawn from all the three Services, including six officers from the U.S.A. and Commonwealth countries are trained every year. The aim of the course is to prepare officers to hold second-grade or equivalent staff appointments or higher staff or command appointments.

Commandant, Maj.-Gen. P. S. Gyani.

School of Foreign Languages: This is located in New Delhi and was started on February 1, 1949. The object is to impart instruction in certain foreign languages to officers of the Armed Forces. Other Ministries also take advantage of this School, and a large number of civilian officers and non-gazetted staff attend courses.

Armed Forces Medical College: It is an inter-services post-graduate institution designed to meet the requirements of the integrated medical services of the Army, Navy and Air Force, and is located in Poona. The College has departments of medicine, surgery, pathology, hygiene, radiology, blood transfusion and dentistry. It runs the following types of courses for medical officers of the Armed Forces:

- Junior officers' course for new entrants to give them a full training in the special medical requirements of the Armed Forces.
- Senior officers' course for regular officers having 5.7 years of service to make them fit for senior appointments at a later date as also to give them refresher training in all subjects, with special emphasis on preventive and social medicine.
- Advanced courses in medicine, surgery, pathology, radiology, hygiene and psychiatry for preparing officers as specialists in the respective subjects. Clinical training is carried out at the Military Hospital, Poona.

In addition to its role as a post-graduate institution for medical officers of the Armed Forces, it gives training to other ranks, ratings and airmen in different technical trades, such as radiographers, laboratory assistants, dental technicians, X-ray assistants, laboratory assistants, blood-transfusion assistants and dental hygienists.

This institution also supplies biological and chemical reagents and blood-transfusion material and equipment to all the Service hospitals and laboratories.

One of the most important functions of the College is to undertake fundamental and applied research for the solution of practical health problems of the Armed Forces.

RESETTLEMENT SECTION

In appreciation of their services in World War II and after, the Government have given due consideration to the problem of resettlement of ex-Servicemen in civil life.

In collaboration with other Ministries of the Central Government, the State Governments, the Post-War Reconstruction Fund Trust Committees and other organisations, the Defence Ministry has formulated schemes for resettling ex-Servicemen in the Government and private service, land colonies, vocational and technical trades and motor transport services. More than 1,03,000 ex-Servicemen have already been thus rehabilitated in civil life.

In the matter of employment, the Government have accorded preference to ex-Servicemen in filling up appointments in police, excise, watch and ward and other departments for which military training is a qualification. As a result, nearly 61,600 ex-Servicemen have been placed in Government. Private organisations have absorbed nearly 37,250 ex-Servicemen.

Ex-Servicemen who have a bias for agriculture are settled on land. Special importance is attached to this mode of rehabilitation as it serves the triple purpose of reclamation of large blocks of cultivable wastelands, increase in food production, and permanent settlement of ex-Servicemen and their families. The Governments of Uttar Pradesh, Punjab, Madhya Pradesh, Andhra, Madras, Mysore, and Kerala have allotted nearly 38,670 acres of cultivable wasteland for the colonisation of about 3,370 ex-Servicemen.

Vocational and technical training has been offered for able-bodied disabled ex-Servicemen to qualify them for employment in industrial

concerns or enable them to set up independent business of their own. Ex-Servicemen have also been given training in basic agriculture and extension methods by the State Governments for absorption as Gram Sewaks in the community projects.

SOLDIERS', SAILORS' AND AIRMEN'S BOARD

The Indian Soldiers', Sailors' and Airmen's Board is the most important official institution connected with the welfare of the serving personnel of the Armed Forces and ex-Servicemen and their families. The nucleus of its funds was the residue of the Imperial Indian War Relief Fund which was handed in at the end of 1922. The face value of the securities constituting the fund amount to about Rs. 13½ lakhs, bearing an annual interest of over Rs. 40,000.

The Board has its seat at New Delhi and co-ordinates the activities of State boards which exist in each State. Under the control of these State boards, there exists throughout the country a network of district boards, reinforced in some cases by tehsil or taluka committees and other kindred bodies. These boards are established in all districts from which recruits have been obtained in sufficient numbers. The President of the district Board is the Collector or the Deputy Commissioner. Each Board has a paid Secretary, usually an ex-I.C.O. or ex-J.C.O. There are 188 District Boards.

The following are the objects and duties of the District Soldiers', Sailors' and Airmen's Boards:

- to endeavour to promote and maintain a feeling of good-will between the civilian and military classes,
- to give all possible assistance to the President of the Board in his capacity as head of the district in all administrative matters connected with the ex-Serviceman or his family,
- to demonstrate the benefit of and so promote the desire for mutual co-operation between ex-Servicemen and civilian officials,
- to represent and explain to the civil authorities all matters of particular moment to ex-Servicemen that require the attention of the local administration and
- to keep a watch over the welfare of ex-Servicemen and their families and the interests of serving personnel absent from home.

The Indian Soldiers', Sailors' and Airmen's Board Fund is now used primarily for payment of special pensions to blinded ex-Servicemen and to meet the expenditure on miscellaneous items, such as bank charges and audit fees in connection with the administration of the fund.

The other Central funds which are not under the control of the Indian Soldiers', Sailors' and Airmen's Board are:

Armed Forces Benevolent Fund, Flag Day Fund, Armed Forces Reconstruction Fund, Army Central Welfare Fund, Navy Benevolent Association Fund, Navy Amenities Fund, Air Force Benevolent Association Fund, Air Force Central Welfare Fund, Indian Gorkha Ex-Servicemen's Welfare Fund and St. Dunstan's India Fund.

GALLANTRY AWARDS

Three new gallantry awards were instituted by the President after independence for gallantry in combat with the enemy. They are designated the Param Vir Chakra, the Maha Vir Chakra and the Vir Chakra. They came into force with effect from August 15, 1947.

The Param Vir Chakra is awarded for most conspicuous bravery, or some daring or pre-eminent act of valour or self-sacrifice, in the presence of the enemy, whether on land, at sea or in the air. It ranks first among all awards.

The Maha Vir Chakra is awarded for conspicuous acts of gallantry in the presence of the enemy whether on land, at sea or in the air.

The Vir Chakra is awarded for acts of gallantry in the presence of the enemy, whether on land, at sea or in the air.

All members of the Armed Forces, including members of the Nursing Services and civilians working with the Armed Forces, are eligible for the above three gallantry awards.

A fourth gallantry decoration, named the Ashoka Chakra, in three grades, viz. Class I, Class II and Class III, was instituted for acts of gallantry other than in the face of the enemy. This also came into force with effect from August 15, 1947.

Class I of the Chakra is awarded for most conspicuous bravery, or some daring or pre-eminent act of valour or self-sacrifice. Class II of the Chakra is awarded for conspicuous gallantry and class III for gallantry.

Members of the Armed Forces and civilians alike are eligible for this award.

If a recipient of any of these Chakras again performs such an act of bravery as would have made him or her eligible to receive the same decoration, such further act of bravery is recognised by the award of a Bar attached to the ribbon by which the Chakra is suspended, and for every such additional act of bravery, an additional Bar is added, and any such Bar or Bars is/are also awarded posthumously. For every Bar awarded a replica in miniature of the Chakra concerned and in the case of the Param Vir Chakra of the 'Indra's Vajra' is added to the ribbon when worn alone.

Every recipient of any of these decorations who is junior in rank to a 2nd Lieutenant in the Army, a Sub-Lieutenant in the Navy, or a Pilot Officer in the Air Force, is entitled, from the date of the act by which the decoration has been gained, to a special pension, and each additional Bar conferred carries with it additional pension for life.

A system of Mention-in-Despatches was also instituted to recognise distinguished and meritorious service in operational areas and acts of gallantry which are not of a sufficiently high order to warrant the grant of gallantry awards. The terms of eligibility for Mention-in-Despatches are the same as for gallantry awards. Names may be included posthumously and there is no objection to a person's name being mentioned in more than one despatch. A 'lotus leaf' emblem is worn by the awardee on the ribbon of the campaign/war medal concerned.

The *inter-se* order of priority of the new gallantry decorations is Param Vir Chakra, Ashoka Chakra Class I, Maha Vir Chakra, Ashoka Chakra Class II, Vir Chakra, Ashoka Chakra Class III, followed by Campaign Medals, e.g. General Service Medal, 1947, and Commemorative Medals, e.g. Independence Medal, State Medals and Commonwealth awards in the existing order of precedence come last. The latter include all the old British awards granted prior to August 1947.

The rates of monetary allowance admissible are as follows:—

- (a) (i) Param Vir Chakra.—Rs. 50 p.m. (Rs. 70 p.m. in the case of J.C.Os. who have previously been given an award of the second order of gallantry, such as the I.O.M.).
- (ii) Each Bar to PVC.—Rs. 20 p.m.
- (b) (i) Maha Vir Chakra.—Rs. 30 p.m. (Rs. 50 p.m. in the case of J.C.Os. who have been previously given a gallantry award of the third order, such as the M.C.).
- (ii) Each Bar to M.V.C.—Rs. 10 p.m.
- (c) (i) Vir Chakra.—Rs. 20 p.m.
- (ii) Each Bar to V.C.—Rs. 5 p.m.

On the death of such a recipient of the Chakra, the pension is continued to his widow until her death or remarriage. In addition to the above allowances admissible from the Central exchequer, all the States of the Union have framed their own schemes of rewarding the gallantry award winners by cash or land grants.

The following are the details of Republican India's awards won by members of the Armed Forces (Sept. 1957):—

INDIAN ARMY

Param Vir Chakra—6 (4 posthumous).
Ashoka Chakra Class I—6 (4 posthumous).
Maha Vir Chakra—52 (20 posthumous).
Ashoka Chakra Class II—21 (6 posthumous).
Vir Chakra—290 (58 posthumous), the number including 4 bars.
Ashoka Chakra Class III—49 (9 posthumous).
Mention-in-Despatches—1,153 (35 posthumous).

INDIAN NAVY

Ashoka Chakra Class III—2.

INDIAN AIR FORCE

Ashoka Chakra Class I—1.
Maha Vir Chakra—4.
Ashoka Chakra Class II—5.
Vir Chakra—30 (2 posthumous).

INDIAN ARMY

The Army HQ., which, like the other two Service HQs, is located in Delhi, functions directly under the Chief of the Army Staff. It is divided into the following main branches: (a) General Staff Branch, (b) Adjutant-General's Branch, (c) Quartermaster-General's Branch, (d) Master-General of the Ordnance Branch, (e) Engineer-in-Chief's Branch and (f) Military Secretary's Branch. These branches are further sub-divided into directorates.

The Chief of the General Staff, who is one of the four Principal Staff Officers (holding the rank of Major-General) at Army Headquarters, deals with military operations and intelligence, staff duties, training, artillery, signals, weapons and equipment, survey and the Territorial Army.

The Adjutant-General, who is another P.S.O., deals with all matters concerning man-power, such as pay and pensions, discipline, and terms and conditions of service.

The Director of Medical Services, who is responsible for the administration of the Army Medical Corps, the Army Dental Corps and the Nursing Services, is under the A. G.'s Branch.

The A. G. is also assisted by the Judge Advocate-General in matters affecting military law and international law in its military aspect.

The third P.S.O. is the Quartermaster-General, who controls all rail and sea movement, both of personnel and stores, within and outside the country. He also deals with the quartering problems of the Army as well as labour, canteen, fire and postal services. There are three Directorates under him, namely Quartering, Supply and Transport and Remounts, Veterinary and Farms.

The Master-General of the Ordnance, who is the fourth P.S.O., is responsible for the storage, care and preservation and issue of all kinds of equipment for troops. The Directorate of Electrical and Mechanical Engineering is also under the M.G.O.

The Engineer-in-Chief is the head of the Corps of Engineers and of the Military Engineering Service. The E.-in-C.'s Branch gives technical advice on all engineering matters to the three Service Headquarters.

The Military Secretary handles confidential reports of officers and maintains their personal records.

The M. S. Branch is also responsible for postings and transfers, promotion and retirement of officers and the grant of honorary ranks and all types of commissions.

Under the Army H.Q., the Indian Army is organised into three Commands—Eastern, Western and Southern, each being under a General Officer Commanding-in-Chief of the rank of Lieutenant-General. The Commands are divided into Areas, each under the command of a G.O.C. of the rank of Major-General, and the Areas, in their turn, are sub-divided into Sub-Areas under the command of a Brigadier.

The Army consists of a number of arms and services. They are Infantry, Armoured Corps, Regiment of Artillery, Corps of Engineers, Corps of Signals, Army Service Corps, Army Medical Corps, Army Dental Corps, Corps of Electrical and Mechanical Engineers, Army Education Corps, Remounts Veterinary and Farms Corps, and Corps of Military Police.

TERRITORIAL ARMY

As no country can afford to maintain a large standing fighting force in peace-time without straining its resources in men and material, a Territorial Army was formed in India, in 1949 to serve as a second line of defence.

The Territorial Army Act, 1948, was passed by Parliament in September 1948 and the Army was inaugurated in October 1949 when recruitment was thrown open.

The Territorial Army consists of various arms and service, i.e., the Corps of Artillery, including anti-aircraft and coastal defence units, the Corps of Engineers, including port and railway units, the Corps of Signals, including P. and T. units, Infantry, the Service Corps, the Medical Corps and the Corps of Electrical and Mechanical Engineers. The units raised are of two types, i.e., provincial units recruited from rural areas which undergo annual training of two to three months' duration at a stretch, and urban units recruited from large towns where Territorial Army units have been raised. They undergo training on the weekly drill system, i.e. in the evenings, Sundays and holidays with a short camp of not less than four consecutive days.

All able-bodied persons, from the unskilled labourer to highly qualified technicians, provided they are citizens of India, are eligible for recruitment. The age limits are 18 and 35 years, relaxable in the case of ex-Service (Army, Navy and Air Force) personnel and civilians possessing technical qualifications. Government servants and employees of private concerns are also eligible to join the Territorial Army.

The country has been divided into eight zones for purposes of recruitment which is done on a zonal basis, i.e. only residents of the zone are recruited in the units which are raised from that zone.

The role of the Territorial Army is to

- (i) relieve the Regular Army of static duties and support the civil power if required.
- (ii) provide coastal defence and anti-aircraft units.
- (iii) provide units for the Regular Army if and when required.

When embodied, called out or under training, Territorial Army personnel receive the same pay and allowances as are admissible to the corresponding ranks of the Regular Army. It is obligatory for every civilian employer to reinstate a member of the Territorial Army in his civilian post on termination of his military training.

In order to provide an incentive to Territorial Army personnel for hard and meritorious work, 2½ per cent of the actual vacancies available at the Military College are reserved for such personnel. On successful completion of the course at the College they are to be granted regular commissions in the Army.

No officer or enlisted person is required to perform military service beyond the limits of India, save under a general or special order of the Central Government.

LOK SAHAYAK SENA

Ever since Independence, there has been a persistent demand in the country for imparting military training to the people. To meet these aspirations, a scheme known as the Auxiliary Territorial Force was introduced in 1950, with the aim of giving elementary military training to as large a number of people as possible.

Under this scheme, 13,000 people were trained during 1953-54. Later, when it was decided to enlarge the scope of the scheme, the ATF was wound up and its place taken by the National Volunteer Force, since re-designated Lok Sahayak Sena.

The L.S.S. was inaugurated on May 1, 1955, to train five lakh men in five years or less. All able-bodied male citizens between 18 and 40 years, except ex-Servicemen and N.C.C. cadets, are eligible to join this force. The object is not to raise a force for the defence of the country but to get people interested in national service and to inculcate in them a sense of discipline, self-reliance and responsibility.

Training in this force is imparted at camps organised throughout the country. The duration of a training camp is 30 days at which a maximum of 500 trainees are recruited. Training in this force includes drill, rifle training, elementary field engineering, first aid, hygiene and education.

For the duration of the camp, trainees are allowed free rations, accommodation, medical facilities and uniform. At the conclusion of 30 days training, each trainee is paid Rs. 15 as an out-of-pocket allowance.

Now in the third year of its existence, the L.S.S. has so far held 433 camps and trained a total of 1,95,152 people (Sept. 1957).

SCHOOLS AND COLLEGES

Recruitment for the permanent cadre of commissioned ranks in the Army is done through the National Defence Academy, Khadakvasli, and the Military College, Dehra Dun. After completion of their three-year course at the N.D.A. Army cadets have to spend another one year at the Military College before being commissioned. Direct admission to the College at higher age-levels also continues, though the number of cadets so taken is limited.

The Military College at present conducts courses for ex-N.D.A., direct-entry and N.C.C. cadets, serving personnel, and technical graduates. Regular and direct-entry cadets commissioned in the technical branches are sent on specialised post-commission courses. The technical graduates' course was specially introduced in January 1948 as a temporary measure to give military training to qualified technicians and engineers for the Corps of Engineers, the Corps of Signals and the Corps of Electrical and Mechanical Engineers to cope with the increased requirements of technicians for the Army.

Every year, a soldier has to pass certain compulsory qualification tests. The training varies from unit to unit but includes military instruction and knowledge of the arms he has to handle. Several Army schools exist for giving basic as well as advanced training in the different arms and trades and for training instructors sent by different units from all over the country. These not only train their own ranks but also officers and JCOs.

The Armoured Corps Centre and School at Ahmednagar trains recruits as well as regimental instructors. The School of Artillery at Deolali provides training in the field, anti-tank, anti-aircraft and coastal artillery branches. The Army Ordnance School at Jabalpur imparts specialised training to all officers and ORs in identification, handling and storage of various types of items, including ammunition and explosives.

The Infantry School at Mhow is the home of Infantry doctrines and a centre for developing Infantry weapons. The School also conducts courses for senior officers and junior commanders of all corps in the Army. The Army Service Corps has two schools, one at Meerut and the

other at Bangalore, giving training in organisation and administration, animal transport, mechanical transport and supplies. The Army Medical Corps has its training centres at Lucknow and Poona.

The College of Military Engineering at Kirkee, near Poona, trains officers of the Corps of Engineers, the Corps of Signals and the Corps of Electrical and Mechanical Engineers to the degree standard in civil, telecommunication and electrical and mechanical engineering respectively.

The Madras, Bombay and Bengal Engineer Groups at Bangalore, Poona and Roorkee provide basic technical and specialised Corps training to officers and ORs of the Corps of Engineers as also civilian officers of the Military Engineering Service.

The Corps of Electrical and Mechanical Engineers has its training centre at Secunderabad, while the School of Signals, which gives technical training in telecommunication engineering to personnel of the Corps of Signals, is situated at Mhow. The Army Signals School, which trains officers and ORs of all arms as instructors in regimental signals, is located at Jabalpur.

The other training institutions in the Army are the Remounts, Veterinary and Farms Centre and School at Meerut, the Education Corps School at Pachmarhi, and the Intelligence Corps School and the Physical Training School, both at Poona.

The various commissioned ranks in the Army from the top downwards are: General, Lieutenant-General, Major-General, Brigadier, Colonel, Lieutenant Colonel, Major, Captain, Lieutenant and Second Lieutenant. The ranks of the Junior Commissioned Officers and other ranks respectively are Subedar-Major/Risaldar-Major, Subedar/Risaldar, and Jemadar/Dafadar, and Havildar, Naik, Lance-Naik and Sepoy/Sowar.

INDIAN NAVY

The Naval HQ, under the Chief of the Naval Staff, exercises control over the Indian Navy through the following four operational and administrative commands:

1. Flag Officer (Flotilla), Indian Fleet.
2. Commodore-in-Charge, Bombay.
3. Commodore-in-Charge, Cochin.
4. Naval Officer-in-Charge, Vishakhapatnam.

The White Ensign was replaced by the Indian Naval Ensign on January 26, 1950. The Indian Navy dropped its title "Royal" from its name from January 26, 1950, when India became a Republic. Since that date establishments and ships are referred to as I.N.S. (Indian Naval Ship). The President's Colour was presented to the Navy by the President, Dr. Rajendra Prasad, in May 1951.

At the end of 1957 there were only five British Officers in the Navy.

EXPANDING FLEET

Today, the Indian Fleet consists of I.N.S. MYSORE, a cruiser (Flagship of the Navy), the cruiser I.N.S. DELHI, two Destroyer Squadrons (I.N.S. RAJPUT, RAJIT, RANA, GODAVARI, GOMATI and GANGA), one Frigate Squadron (I.N.S. CAUVERY, KISTNA and TIR), and three Minesweeping Squadrons (I.N.S. BOMBAY, KONKAN, MADRAS, RAJPUTANA, BENGAL, BOHILKHAND, BASSIN, BILIPATAM, KARWAR, KAKINADA, CANNANORE and CUDDALORE).

In addition, the Fleet has some survey ships, a tanker and some auxiliary craft.

The Fleet is being expanded and the programme of replacement of old ships implemented in stages. The Colony-class cruiser, I.N.S. MYSORE (formerly known as H.M.S. NIGERIA), acquired by the Navy in 1954, was commissioned in the United Kingdom in August 1957. On joining the Fleet on 30th December 1957 the MYSORE became the Flagship of the Flag Officer (Flotilla).

An anti-submarine frigate, I.N.S. KHUKRI, and an anti-aircraft frigate, I.N.S. BRAHMA-PUTRA, were recently launched in the U.K. and a dredger, I.N.S. SHAKTI, in West Germany. Six more frigates are on order from the U.K.

It is proposed to build certain simpler types of naval vessels in India and orders have been placed with the Hindustan Shipyard, Ltd., for a survey ship and a mooring vessel. Though designed primarily for the protection of convoys against aircraft and submarines, the BRAHMA-PUTRA can serve as a small-size destroyer during operations.

The survey unit of the Navy, which now comprises I.N.S. INVESTIGATOR, JUMNA and SUTLEJ, carries out the necessary survey of India's coast and approaches to harbours.

Extensive surveys of major ports, like Bombay and Madras, have already been completed. With the help of the data provided by such surveys, charts are being prepared by the Hydrographic office at Dehra Dun.

With the expansion of the Navy, the necessity arose of providing adequate docking facilities. Therefore, a scheme for the expansion of the Naval Dockyard in Bombay in five phases, spread over a number of years, commensurate with the growing needs of the Fleet, was formulated. Work on the first phase began in September 1954 and is now proceeding apace. When completed, the Dockyard will have sufficient docking and berthing facilities and workshop capacity to meet the entire needs of the Navy.

NAVAL AVIATION

The Naval Air Arm, which is one of the youngest branches of the Navy, came into being in 1948 for training aircrew, followed soon after by the setting up of a Naval Air Station at Cochin. Later, the formation of a Fleet Requirements Unit was approved, aircraft, equipment and spares acquired and officers and ratings deputed for training courses abroad. The civil airfield at Cochin was acquired for the Navy in 1953 to be converted into the first Naval Air Station. Soon after, the first batch of Sealand aircraft were purchased from the U.K. and later the station was named I.N.S. GARUDA. Early in 1955, a number of Firefly target-towing aircraft were obtained from the U.K. for providing gunnery-training facilities for the Fleet. The strength of the Fleet Requirements Unit was further augmented when three HT-2 aircraft were acquired from HAL to give instructional training to aircrew and other personnel.

As a result of the latest decision of the Government to acquire H.M.S. HERCULES, an aircraft-carrier, together with a fleet of operational aircraft, the future of naval aviation in India is assured. The HERCULES, with a 15,700-ton displacement, is at present being re-fitted and modernised in the U.K. and will become available in a few years. Meanwhile, the question of manning the carrier and training its naval aircrew is engaging the attention of the Government. As a first step, a Naval Air Training School has been set up at Cochin to train ratings in the maintenance and repair of aircraft. At

the same time, the Government are considering setting up a School for Naval Airmen for training non-technical personnel.

To meet the meteorological needs of the Fleet Requirements Unit, a Naval Weather Service Organisation, manned by trained instructor officers, was established at the GARUDA towards the end of 1952. Since then, more and more instructor officers have been trained to take over meteorological duties, both ashore and aboard ships. This organisation now also conducts courses of instruction in meteorology for naval ratings.

The training of other naval personnel is carried out in the shore establishments of I.N.S. VENDURUTHI, Cochin, I.N.S. CIRCARS, Vishakapatnam, I.N.S. ANGRE, Bombay, I.N.S. KONJALI, Bombay, I.N.S. SHIVAJI, Lonavla, I.N.S. VALSURA, Jamnagar, and I.N.S. HAMLA, Bombay. I.N.S. ASVINI at Bombay is the first naval hospital to be set up.

Since the Fleet was formed, Indian ships have visited, among others, Burma, Malaya, Siam, Indonesia, the Philippines, Borneo, Australia, New Zealand, Iran, Iraq, Arabia, Egypt, Turkey, Greece, East Africa, Italy and France. I.N.S. DELHI, RANJIT and TIR participated in the Coronation Naval Review in June 1953. Routine combined training exercises have also been carried out by Indian ships with those of the Commonwealth Navies from time to time.

The various ranks in the Navy from the top downwards are: Admiral, Vice-Admiral, Rear-Admiral, Commodore, Captain, Commander, Lieutenant-Commander, Lieutenant, Sub-Lieutenant, Branch List Officer, Midshipman, Chief Petty Officer, Petty Officer, Leading Rate, Able Rate and Ordinary Rate.

A Bill to consolidate and amend the law relating to the government of the Navy has been passed in Parliament.

INDIAN AIR FORCE

The Air HQ is divided into three main branches—Air Branch, which deals with operations, training, policy and plans, signals, reserves and intelligence, Personnel and Organisation Branch and Technical and Equipment Services Branch. Each is under a Branch P.S.O. who, in turn, has several Directorates under him.

The Indian Air Force is, in the main, divided into three major formations, namely Operational, Training and Maintenance Commands under the control of the Air HQ.

The Operational Command controls all flying units—fighter, bomber, reconnaissance and air-transport squadrons. The Training Command has under its control training schools and colleges for both officers and airmen for technical and non-technical ground training and for aircrew flying training. The Maintenance Command controls all technical and equipment units in the I.A.F.

The three Commands exercise control through their Wings and Stations located in various parts of the country. Under each Wing and Station come various flying, training, technical or other static units.

The different types of aircraft used by the IAF:

Training: Tiger-Moth, Percival Prentice, HT 2, Harvard, Spitfire and Vampire.

Fighter: Vampire, Toofan (Ouragan) and Mystere;

Transport: Dakota, Devon, C-119 (Boxcar), Viscount, Ilyushin and Helicopter.

Bomber: Liberator, Canberra.

Reconnaissance: Spitfire, Auster and Harvard.

Towards the end of 1957 the I.A.F. was due to acquire Canadian built Otter aircraft.

During the past few years, this youngest Defence Service, which will celebrate its Silver Jubilee on April 1, 1958, has attained self-sufficiency in training its personnel for flying and technical and non-technical duties.

Consequent on certain changes in their functional scope, some of the major Air Force training establishments have recently been re-designated. The Air Force Station at Hyderabad provides advanced training to aircrew. The Air Force Flying College at Jodhpur is the nursery of pilots, navigators and air-signallers. The Air Force Administrative College at Coimbatore trains officers of the ground duty branches. The Air Force Technical College at Jalahalli, near Bangalore, imparts training to engineering officers and technical airmen of certain advanced signals trades. The No. 1 Ground Training School at Jalahalli trains non-technical airmen. The No. 2 Ground Training School at Tambaram (Madras) trains technical tradesmen (airmen). The No. 3 Ground Training School at Jalahalli is intended for airmen trainees of higher signals trades.

Vampire jet fighters are being assembled at the Hindustan Aircraft Ltd., Bangalore. Folland Gnat jet fighters are also to be constructed under licence by the HAL for the I.A.F. in the near future.

In pursuance of the Reserve and Auxiliary Air Forces Act of 1952, five Auxiliary Air Force Squadrons have so far been raised at Delhi, Bombay, Calcutta, Allahabad and Madras. Similar auxiliary squadrons will be formed in other principal cities of India.

Since Independence, the Air Force has been entrusted with a number of national duties which may well be termed as full-fledged operations in peace-time. Some of these tasks were air-lift of Indian personnel of the International Supervisory Commissions in Indo-China, air-dropping of foodgrains and medical supplies in the North-East Frontier Agency and other places affected by floods and other natural calamities and carrying out of photographic surveys to assist in the planning and development of hydro-electric schemes and other projects under the Five-Year Plans.

The various commissioned ranks in the Air Force from the top downwards are: Air Chief Marshal, Air Marshal, Air Vice-Marshal, Air Commodore, Group Captain, Wing Commander, Squadron Leader, Flight Lieutenant, Flying Officer and Pilot Officer.

The men are ranked as Master Warrant Officer, Warrant Officer, Flight Sergeant, Sergeant, Corporal, Leading Aircraftman, and Aircraftman Class I and Aircraftman Class II.

EDUCATION

SINCE August 15, 1947 Education at the Centre has been constituted into a separate Ministry of Education. The State Governments are fully autonomous in regard to educational matters except in respect of educational development programmes for which they receive grants-in-aid from the Central Government. Such programme has to be approved by the Central Government who have to examine whether it is in accord with the All-India approved educational policy.

The Ministry has offices in London, Washington, Nairobi and Bonn.

It is responsible for the four Central Universities of Alligarh, Banaras, Delhi and Visva Bharati, and some institutions of higher learning. Other departments that come within the purview of the Ministry are: Anthropological Survey of India, Archaeological Survey of India, National Archives, National Library, Calcutta. The Ministry is also responsible for cultural relations with foreign countries and UNESCO.

The work of the Ministry is distributed among eight Divisions: Basic and Social Education, Secondary Education, Administration and University Education, Technical and Scientific Education, Hindi, Cultural Relations, Scholarships, and Information, UNESCO, Publications, Statistics.

In the States the Secretary, Department of Education, is the permanent head of the Department and the Director of Education acts as an expert Adviser to the Minister in charge of Education. The Director controls the inspecting staff and the teaching staff of the Government institutions. In some States the functions of Director are discharged by the Educational Officer, in others by the Education Secretary.

The authority of Government in controlling the system of public instruction is in part shared with and in part delegated to Universities, and Boards of Secondary and Intermediate Education as regards secondary education, and to local bodies as regards elementary education in some States.

Certain forms of Technical Education are under the technical departments concerned and come within the purview of the Minister in charge of those Departments.

Institutions under private management are controlled by Government and by local bodies by "recognition" and by the payment of grants-in-aid, with the assistance of the inspecting staffs employed by Government and by local bodies.

Boards of Education: There are Boards of Secondary Education in Bihar, Kerala, Delhi, Andhra, Madhya Pradesh, Madras, Orissa, West Bengal, Rajasthan, Mysore, Bombay and a Board of High School and Intermediate Education in Uttar Pradesh.

PRESENT POSITION

The present position as well as the progress made since Independence is set out below.

Primary Education

No. of primary schools in major provinces (Part 'A' States) on 31st March 1948: 1,40,121.

Total enrolment on 31st March, 1948: 11,000,964.

No. of primary schools in major provinces (Part 'A' States) on 31st March, 1956: 2,15,320.

Total enrolment on 31st March, 1956: 17,985,074.

In the country as a whole there were 2,09,671 primary schools in 1950-51 and the number of children in the age group 6-11 attending school was 186.78 lakhs. By the end of the First Plan the number of Primary Schools rose to 2,78,056, and the number of children in the age group 6-11 attending school was 2,45,18,000.

Thus against 30 per cent of the children in the age group 6-11 attending school in 1947, 53 per cent of the children in this age group attended schools in 1955-56.

In 1948 the number of areas in which primary education was compulsory was 224 towns and 10,010 villages. The corresponding figures for 1955-56 were 1,093 towns and 39,276 villages.

Basic education is now accepted as the pattern of national education.

The aims have been: to provide free and compulsory education to all children upto the age of 14 within ten years of the commencement of the Constitution, that is by 1960*; second, to convert as many primary schools as possible into Basic schools; third, to enrich the curriculum by introducing creative activity and improve the quality of text-books.

The number of Junior and Senior Basic Schools for boys and girls increased from 34,878 in 1952-53 to 47,813 in 1955-56. The number of students rose from 30,31,524 in 1952-53 to 50,60,207 in 1955-56.

The Government of India appointed an Assessment Committee in 1955. The report is under consideration by State Governments and whatever recommendations are acceptable are being implemented.

There is now a National Institute of Basic Education.

An All-India Council for Elementary Education plans and organizes studies pertaining to elementary education and assists in the production of suitable literature.

Secondary Education

No. of secondary schools in the major provinces of India in 1948: 12,693.

No. in 1956: 25,627, an increase of 102 per cent.

No. of middle schools in the whole country on 31st March, 1956: 21,730.

No. of high schools: 10,837.

Enrolment in secondary schools (middle and high): 85,26,509.

The accepted pattern of education comprises eight years of elementary (Basic) education; three years of higher secondary education with diversified courses to give it a vocational bias and make it a terminal point for entry into trade or profession; and three years of university education leading to the first degree.

At the higher secondary stage, a child should in addition to the core curriculum which would include languages, social studies, general science and one compulsory craft—a child should opt for one of the following diversified courses to be provided in reorganized multi-purpose schools:—humanities, science, technical, commerce, agriculture, fine arts or home science.

This new scheme for the conversion of high schools into multi-purpose schools was launched in 1954 along with a number of ancillary schemes, such as the training of teachers in new subjects, improvement of teaching facilities particularly in science, of school libraries, the introduction of craft in middle schools, and also other miscellaneous schemes like teachers' seminars, training of career masters, etc.

Upto October 1956, 331 multi-purpose schools with a total number of 460 diversified courses were established. Of these 331 schools 88 were of the higher secondary type. By April 1957 it was estimated that 178 more schools would be converted into multi-purpose schools with 277 diversified courses.

The Central assistance was on the basis of 66 per cent of the non-recurring and 25 per cent of the recurring expenditure.

During the First Plan period and upto the end of the first year of the Second Plan the total assistance granted was Rs. 5.19 crores.

The pattern of assistance in 1957-58 was 60 per cent of the total expenditure.

In addition there is a 50 per cent assistance for all schemes in secondary education.

There is an All-India Council for Secondary Education set up in August 1955 to help implement the recommendations of the Secondary Education Commission.

University Education

In 1948 the total number of colleges in the major States was 578. Of these the colleges devoted to general education was 449. Figures for 1956 were 844 and 516 respectively.

In 1948 the number of students for general education in the major States was 1,79,173. In 1956 it was 4,66,396. The number had increased by 76 per cent.

For India as a whole, these figures were on 31st March 1956:

No. of Arts and Science colleges (including 35 Research Institutions): 736.

No. of Technical and Professional Colleges: 346.

No. of students for general education: 5,75,271.

No. of students for technical and professional education: 1,49,140.

In 1948 the total number of graduates from Part 'A' States was 27,000. Of these graduates in Arts and Science numbered 18,000. The corresponding figures for 1956 were 69,000 and 44,000 respectively.

Expenditure on universities and colleges (general education) in the major States rose from Rs. 5.8 crores in 1948 to Rs. 17.3 crores in 1956. On professional colleges the expenditure rose from Rs. 1.82 crores to Rs. 5.5 crores in 1956. The corresponding figures for the whole of India were Rs. 22.17 crores and Rs. 6.99 crores respectively as on 31st March 1956.

By 1952 no major linguistic area in India was without a university of its own. As for the medium of instruction, the general desire was to switch over to the regional languages.

The policy in regard to university education is largely the one recommended by the Indian University Education Commission which made a report in 1949. (This report is summarized in a previous edition).

There is now a University Grants Commission. (See also the note below). Its duty is to take such steps as it thinks fit for the promotion and co-ordination of university education and for the determination and maintenance of the standards of teaching, examination and research.

In 1956-57 the Commission spent Rs. 3.42 crores by way of grants. Of this Rs. 35.29 lakhs were spent for Humanities, Rs. 68.67 lakhs for Science, and Rs. 55.8 lakhs for technology besides a grant of Rs. 36.85 lakhs for the centenary celebrations of the Calcutta, Bombay and Madras Universities.

Of the Rs. 27 crores provided for university education in the Second Plan, Rs. 3.42 crores was spent by the commission in 1956-57. A provision of Rs. 4.17 crores has been made for grants during 1957-58 which includes Rs. 2.75 crores for Plan projects.

The University Grants Commission has taken steps to revise the scales of pay of university teachers.

Loans are given for the construction of hostels for colleges, 1956-57: Rs. 38.41 lakhs. Provision for 1957-58: Rs. 14.40 lakhs. Loans are also given for staff quarters for universities and hostels. Provision for 1957-58: Rs. 30.0 lakhs.

About the three-year degree course, Delhi University adopted this in 1941 with an 11-year school course.

* This is now modified: education upto 11 for all children by the end of the Third Plan 1965-66.

† Eight Universities introduced this course in July 1957.

The Government of India appointed a Committee under the chairmanship of Mr. C. D. Deshmukh to work out the estimates of expenditure and to consider ancillary problems connected with the introduction of the three-year course. This report was submitted on 1st May, 1957 and was under consideration at the time of writing (1958 January).

About the introduction of General Education courses into the college curriculum, a beginning has been made at a few universities. A study team visited a number of universities in the U.K. and U.S.A. to study the organization of these courses and made a report which was later discussed at a number of regional conferences by University authorities.

Rural Higher Education

To look after the interests of higher education in the rural areas a National Council for Rural Higher Education was set up in 1956.

There exist ten Rural Institutes whose aim is to do for the rural areas what the universities do for the urban areas. These Institutes are to provide courses in rural services, rural and civil engineering and agricultural science.

These Institutes will confer diplomas after a three-year course preceded by a higher secondary examination. The details of the preparatory matriculation course are also being worked out.

The ten Institutes are :

Gandhigram Rural Institute, Gandhigram; Ramakrishna Mission Vidyalaya Rural Institute, Coimbatore; Lok Bharati Rural Institute, Sane-sara; Rural Institute, Anravati; Mouni Vidyapeeth Rural Institute, Gargoti; Vidya Bhavan Rural Institute, Udaipur; Balwant Vidyapeeth Rural Institute, Bichpuri, Agra; Rural Institute, Jamia Millia, New Delhi; Institute of Rural Higher Education, Sriniketan, West Bengal; Rural Institute of Higher Studies, Birouli, Bihar.

TOTAL EXPENDITURE

On 31st March, 1947, the major States and Centrally Administered Areas together spent about Rs. 205 million on education. The Central Budget was considerably less than Rs. 20 million.

The figures for three recent years, 1954-55, 1955-56 and 1956-57 show that the total budget provisions for education by the Central and State Governments together were Rs. 1,177, Rs. 1,517 and Rs. 1,798 million respectively, so that even in the course of these three years, the amount has increased by about 52 per cent.

In 1956-57 the amount provided for education was nearly 12.3 per cent of the total national budget.

The total national expenditure on education from all sources, governmental or otherwise, has also increased considerably. This was about Rs. 551 million on 31st March 1948 and rose to Rs. 1,894 million in 1956.

This is, undoubtedly, an appreciable increase, but in view of the estimate of Rs. 4,000 million that is needed to finance a truly national system of education, it is also an indication of the gap that remains to be bridged.

UNIVERSITIES

The Central Universities are four: Aligarh, Banaras, Viava Bharati and Delhi.

There were in all 35 universities in India in December, 1957. The names of the universities with the names of the Vice-Chancellors are given below :—

1. *Agra University*.—Lt.-Col. K. P. Bhatnagar, M.A., LL.B.
2. *Aligarh University*.—Col. B. H. Zaidi, B.A. (Cantab.), Bar-at-Law.
3. *Alahabad University*.—Dr. Shri Ranjan, M.Sc. (Cantab.), D.Sc. (France).
4. *Andhra University* (Waltair).—Dr. V. S. Krishna, B.A. (Oxon.), Ph.D. (Vienna).

5. *Annamalait University* (Annamalainagar).—T. M. Narayanaswamy Pillai, M.A., B.L.
6. *Banaras Hindu University*.—Dr. Veni Shanker Jha, Ph. D. (London).
7. *Baroda University*.—Mrs. Hansa Ben Mehta, B.A. (Hons.).
8. *Bihar University* (Patna).—Dr. Dukhan Ram, B.Sc., M.B., D.L.O., D.O.M.S. (Lond.).
9. *Bombay University*.—T. M. Advani, M.A.
10. *Calcutta University*.—Professor N. K. Sidhanta, M.A. (Cantab.).
11. *Delhi University*.—Dr. V. K. R. V. Rao, B.A., Ph.D. (Cantab.).
12. *Gauhati University*.—S. K. Bhuyan, M.A., B.L., Ph.D. (Lond.), D.Litt. (Lond.).
13. *Gujarat University* (Ahmedabad).—Magan-bhai P. Desai, Shakti Parangala (Guj. Vid.).
14. *Jabalpur University* (Jabalpur).—Pandit K. L. Dubey, B.A., LL.B.
15. *Jammu & Kashmir University* (Srinagar).—A. A. Fyzee, M.A. (Cantab.).
16. *Karnatak University* (Dharwar).—D. C. Pavate, M.A. (Cantab.).
17. *Kerala University* (Trivandrum).—Dr. John Matthal, B.A., B.L. (Madras), B.Litt. (Oxon.), D.Sc. (Lond.).
18. *Lucknow University*.—Prof. K. A. Subramania Iyer, M.A. (Lond.).
19. *Madras University*.—Lt.-Col. Diwan Bahadur Sir A. Lakshmanaswami Mudaliar, B.A., M.D., LL.D., D.Sc., F.R.C.O.G., F.A.C.S.
20. *Mysore University*.—K. V. Puttappa, M.A., D.Litt.
21. *Nagpur University*.—Lt.-Col. Justice K. T. Mangalmurti, I.O.S.
22. *Omanian University* (Hyderabad).—D. S. Reddy, M.A. (Oxon.).
23. *Patna University*.—Dr. Balbhadra Prasad, D.Sc. (Lond.).
24. *Poona University*.—Dr. R. P. Paranjpye, M.A. (Cantab.), D.Litt. (Poona).
25. *Punjab University* (Solani).—Dr. A. C. Joshi, D.Sc., F.N.I.
26. *Rajasthan University* (Jaipur).—G. C. Chatterjee, M.A. (Punjab), B.A. (Cantab.).
27. *Roorkee University*.—A. N. Khosla, I.S.B. (Retd.).
28. *Sardar Vallabhbhai Vidyapeeth* (Vallabh Vidyanagar, Anand Dist., Bombay).—B. D. Patel, L.C.S. (Banaras).
29. *Saugor University*.—Dr. Dwaraka Prasad Mishra, B.A., LL.B., D. Litt.
30. *S. N. D. T. Indian Women's University* (Bombay).—Dr. Premilla V. Thackersey, D. Litt. (Banaras).
31. *Sri Venkateswara University* (Tirupati, Andhra).—S. Govindarajulu, M.A., LL.B. (Cantab.), B.L., Bar-at-Law.
32. *Utkal University* (Cuttack).—Dr. P. K. Parila, M.A. (Cantab.), I.S.B. (Retd.).
33. *Jadavpur University* (Calcutta).—Dr. T. Sen, Eng. (Munich), (Rector).
34. *Vikram University* (Ujjain).—Dr. Mata Prasad, D.Sc., F.R.I.C., F.N.I.
35. *Vivek Bharati University* (Santiniketan).—Prof. Satyendranath Bose, M.Sc., F.N.I.

UNIVERSITY GRANTS COMMISSION

(C.S.I.R. Building, New Delhi)

The members and staff of the Commission are given below.

Members : C. D. Deshmukh (Chairman), Pandit H. N. Kunzru, Dr. K. S. Krishnan, G. C. Chatterji, Dr. A. Lakshmanaswami Mudaliar, Prof. N. K. Sidhanta, K. G. Sanyal, N. N. Wanchoo.

Secretary, Samuel Mathai; **Asst. Secretary,** S. H. Verma.

The statement given below shows the grants paid to the universities during 1956-57 :

CENTRAL UNIVERSITIES.—		Rs.	a.	p.
Aligarh Muslim University.		42,56,319	3	0
Banaras Hindu University.		68,40,350	9	0
Delhi University ..		44,51,563	10	0
Viava Bharati University.		13,85,496	15	0
Total ..		1,69,33,710	5	0
Constituent Colleges of Delhi University ..		15,99,787	0	0
STATE UNIVERSITIES.				
Alahabad University.		3,09,700	0	0
Andhra University ..		6,16,877	15	0
Agra University ..		20,000	0	0
Annamalait University.		5,72,560	0	0
M. S. University of Baroda.		3,84,956	0	0
Bombay University*		18,90,493	3	0
Bihar University ..		1,90,000	0	0
Calcutta University*		20,27,999	0	0
Gauhati University ..		4,24,718	12	0
Gujarat University ..		83,127	6	0
Jadavpur University ..		11,45,668	0	0
Jammu and Kashmir University ..		10,000	0	0
Karnatak University.		4,58,639	6	0
Lucknow University.		3,31,000	0	0
Madras University*		21,00,686	10	0
Mysore University ..		80,000	0	0
Nagpur University ..		2,41,560	1	0
Omanian University ..		6,80,845	7	0
Patna University ..		1,97,000	0	0
Poona University ..		2,60,000	0	0
Punjab University ..		5,48,256	0	0
Rajputana University.		1,23,816	0	0
Saugar University ..		3,51,050	0	0
Travancore University.		2,42,276	0	0
Roorkee University ..		7,70,622	0	0
Utkal University ..		5,90,411	9	0
Sri Venkateswara University ..		1,78,300	0	0
S. V. B. Vidyapeeth ..		30,000	0	0
Total ..		1,48,66,363	5	0
Total for Central Universities, Constituent Colleges of Delhi University and State Universities ..		3,33,99,860	0	0
Grant paid to CARE as import duty on Scientific equipment received under Wheat Loan Education Exchange Programme (including demurrage Rs. 70,000).		4,70,000	0	0
Grand Total		3,38,69,860	10	0

* This includes centenary grants also.

KEY REPORTS

The key reports and resolutions on which primary and secondary education systems are planned are :

Resolution of the Central Advisory Board of Education 1935 Dec.; Wood-Abbot Report; Zakir Hussain Committee Report (Wardha Scheme or Basic Education Scheme); Reports of the Central Advisory Board (14); (1) Kher Committee Reports on Basic Education; (2) Adult Education; (3) The Physical Welfare of School-children; (4) School Buildings; (5) Social Service; (6) The Recruitment, Training and Conditions of Service of Teachers in Primary, Middle and High Schools; (7) The Recruitment of Education Officers; (8) Technical (Including Commercial and Art) Education; (9) Text-books; (10) Examinations; (11) Educational Administration; (12) Agricultural Education; (13) Religious Education; (14) Selection of Pupils for Higher Education; (15) Report on Post-war Educational Development in India (Bargent Report); (16) Secondary Education Commission Report (Lakshmanaswami Mudaliar Commission); (17) Sakseena Report on Adult Education.

University education has had a report published on it (Radhakrishnan Commission).

TECHNICAL EDUCATION

IN 1947 India produced only 930 graduates in engineering and 320 graduates in technology and about 1,450 diploma holders. In 1956 the total output of graduates in this field was over 4,000 and of diploma holders about 4,200.

When the relevant schemes under the Second Plan are implemented technical institutions will be in a position to admit every year about 10,000 students for degree courses and 21,000 students for diploma courses.

Every State except Jammu and Kashmir has at least one engineering college and one polytechnic.

The All-India Council for Technical Education, the body that advises Government on technical education, has carried out a comprehensive study of the state of each technical institution in the country and has drawn up schemes for its improvement. It has also prepared detailed schemes for new institutions to be established.

The total cost of the schemes approved till March 1957 was of the order of Rs. 16.77 crores for building and equipment and Rs. 1.54 crores for staff and maintenance. Of this sum the Central Government was to provide about Rs. 11 crores for equipment and building and Rs. 84 lakhs for recurring expenditure. As against this a sum of Rs. 7.63 crores was paid upto the end of 1956.

There is provision for providing residential facilities too. Loans totalling Rs. 3.36 crores have been approved for over 100 institutions and Rs. 2 crores have been sanctioned. When the scheme is completed additional accommodation for about 15,000 students will be provided.

The establishment of the Indian Institute of Technology at Kharagpur in West Bengal as the first in a chain of four regional higher technological institutes, and the development of the Indian Institute of Science at Bangalore as a centre of advanced technology mark a new trend in the field of technological education in this country.

Fully equipped for facilities for the teaching of the humanities as well as the basic sciences they will be in a position to impart a complete education.

The Indian Institute of Technology provides facilities for education to over 1,600 students in the undergraduate courses and to 400 in post-graduate courses and research work.

By an Act of Parliament the Institute has been made an autonomous body. While the Central Government will finance it, its administration will be in the hands of a Board of Governors.

The Act describes the institution as one of national importance.

The three other regional Institutes—one in Bombay, one in Madras and one in Kanpur—are in the process of establishment.

Each Institute when completed will provide for the education of over 1,500 students in the undergraduate and 400 in the post-graduate courses.

Thus by 1961 there will be over 10,000 places for advanced engineering courses in the country and 21,000 for diploma.

The Institute in Bombay which is expected to start functioning in 1958 has secured technical assistance from the U.S.S.R. under the UNESCO Expanded Technical Assistance Programme. Equipment worth Rs. 100 lakhs, 20 Soviet experts and facilities for the training of Indian staff in the U.S.S.R. are expected to be provided.

For a fuller note on the Indian Institute of Science at Bangalore see under Bangalore District, Mysore State.

COUNCIL OF TECHNICAL EDUCATION

The All-India Council for Technical Education was set up by the Government of India in November 1945 to advise them on all matters relating to the co-ordination and development of technical education in the country after the high school stage. Its personnel has been drawn from Government of India Departments, State Governments, Parliament, industry and commerce, professional and educational bodies.

The Council during its existence of over 12 years has made a valuable contribution towards the development and expansion of facilities for technical education. It functions through certain technical and *ad hoc* committees appointed from time to time. The Council does not however, have any executive, administrative or controlling powers.

The work of the Council falls broadly into three categories:—Framing of courses of technical studies and laying down of standards; Improvement and strengthening of the existing institutions; Establishment of new institutions, and the development of facilities in new fields of technical education.

For laying down standards in technical education, the Council has appointed seven Boards of Studies, viz., Engineering and Metallurgy, Chemical Engineering/Technology, Textile Technology, Architecture and Regional Planning, Applied Art, Commerce and Management.

In addition to the seven Boards, the Council has appointed four Regional Committees—one each for the eastern, western, southern and northern regions of the country to survey the facilities of their region, determine regional needs, foster liaison between industry and technical institutions, assist and advise on co-ordinated development.

Day to day work is, however, carried on by a small committee known as the Co-ordinating Committee of the Council which has on it representatives of all the interests that constitute the Council. The Council meets once a year; the Board once or twice a year; the Co-ordinating Committee and Regional Committees more often.

SCHOLARSHIPS

In order to promote fundamental research in various branches of Science and Technology in Universities and other Educational Institutions, grants-in-aid are paid to individual research workers who experience difficulties in the pursuit of their research work. The grants are intended for the purchase of special apparatus or for its construction, for special chemicals or stores, books, etc. not available in Universities or Institutions where the research is proposed to be carried on.

Between 1952 and 1957 grants amounting to Rs. 12,52,506 were sanctioned for payment to individual research workers through the Universities concerned.

Pursuant to the recommendation of the Scientific Manpower Committee, a Research Training Scholarships Scheme was started in 1949-50 with the twin objective of promoting scientific and technological research in Universities and other educational institutions and training research workers required for various national development programmes.

These scholarships are awarded to candidates possessing M.Sc. or equivalent qualification and who are engaged in research of doctorate standard in basic sciences or to graduates in engineering or technology who are doing post-graduate research.

At present there are about 680 scholarships each of the value of Rs. 200 per month, in force, and they have been allocated to different science and technological departments of universities and other institutions on the basis of

the status of the departments and research facilities available. Each scholarship is tenable for a period of three years for a candidate and after every three years the scholarship is rewarded to a new candidate.

The scheme for the award of National Research Fellowships was initiated by the Government of India in 1955-56 to encourage brilliant young scholars of the highest possible standard in science or technology who promise to do research at any recognised University or Research Institution. Each fellowship is of the value of Rs. 400 per month.

A grant of Rs. 1,000 per year is also given to each fellowship for any special apparatus or equipment required for research. The tenure of the award is three years extendable up to five years in special cases.

Persons who have obtained a Ph.D., or D.Sc. degree in science or technology or have done research of approved equal merit are eligible for the award.

So far 46 candidates have been selected for the award of whom 31 are working under the scheme.

The Practical Training Stipend Scheme was formulated to give post-institutional practical training in industrial establishments to selected students qualifying from engineering and technological institutions. There are two categories of stipends, namely senior stipends of the value of Rs. 150 per month and junior stipends of the value of Rs. 100 per month which are awarded to graduates and diploma-holders in engineering and technology respectively. The stipends are instituted in selected Government establishments and industrial concerns who offer training under proper supervision and assume responsibility for it.

There are over 1,000 training places.

SOME INSTITUTIONS

The importance of training in business management and industrial administration are well recognized, and a comprehensive scheme on an all-India basis prepared.

Courses in Management Studies have been started at the Indian Institute of Technology, Kharagpur; the Delhi School of Economics, Delhi; the Department of Economics, Madras University, Madras; the School of Economics and Sociology, Bombay University, Bombay; the Indian Institute of Science, Bangalore; and the Institute of Social Welfare and Business Management, Calcutta. The Victoria Jubilee Technical Institute, Bombay started this course with effect from the academic session 1957-58.

An Administrative Staff College in India on the lines of the Administrative Staff College, Henley-on-Thames, England has been established at Hyderabad. The College is a joint enterprise of the Central Government, private industry and commerce. It is an autonomous organisation, and functions as a registered Society under the Societies Registration Act. The administration and management of the affairs of the College is entrusted to a Court of Governors.

The first course was started in Dec. 1957. When the college is fully organized three courses will be conducted in a year with 60 candidates for each course.

The Government of India have already paid a non-recurring grant of Rs. 7 lakhs and have agreed to give a block recurring grant of Rs. 3 lakhs for the first three years.

The object of the College is to promote and provide for the study of principles and techniques of organisation and administration in the various spheres of national life and of cognate subjects.

It has been proposed to create a Department of Mining Engineering for the First Degree Course in the following technical Institutions:

1. The Indian Institute of Technology, Kharagpur.
2. Bengal Engineering College, Shibpur.

3. Engineering College, Jabalpur, or alternatively in the new Engineering College to be established in the Bhilai Steel Project area.
4. College of Engineering, Guindy, Madras.
5. Engineering College, Osmania University, Hyderabad.
6. M. B. M. Engineering College, Jodhpur.
7. Western Higher Technological Institute, Bombay.

The annual admissions to the course in each Department would be 25 students.

The existing facilities at the Indian School of Mines and Applied Geology, Dhanbad, and the College of Mining, Engineering at Banaras, are proposed to be expanded so as to provide for an annual admission of 90 and 40 students respectively to the First Degree Course in Mining Engineering.

It has also been decided to organize National Certificate Courses in Mining Engineering in various metalliferous and coal mining areas.

The annual admission to the course in each centre would be 40 students.

The cost of the whole of this programme will be of the order of Rs. 100 lakhs non-recurring and Rs. 20 lakhs recurring.

Of the four regional schools of printing the Printing Schools at Madras, Bombay and Calcutta have already started functioning, and the school at Allahabad was expected to start in the academic year 1958.

Each school is a joint enterprise of the Central and State Governments and is designed to train 200 candidates every year.

A fifth school is proposed to be started in Delhi as part of the Delhi Polytechnic.

A School of Town and Country Planning has been set up by the Central Government as a joint enterprise with the Institute of Town Planners (India) to provide facilities for training in Town and Country Planning. The first course in Town and Country Planning commenced with effect on 16th August, 1956 with a batch of 9 students—two for the intensive course (duration one year) and seven for the diploma course (duration two years). All the students with the exception of one were State-sponsored.

The second batch consisting of 11 students—five for intensive and six for diploma—were admitted in August 1957. Eight out of the 11 were sponsored by the States. It is decided that for the first few years preference should be given to State-sponsored students.

The School is temporarily housed in the Library Building of the Delhi Polytechnic, Delhi, but a two acre plot of land in the Indraprastha Estate in the capital has been acquired, and the construction of the school building was expected to be taken in hand during 1957-58. The School has been registered as a Society under the Societies Registration Act of 1960.

The quinquennial review of the working and progress of the Indian Institute of Science, Bangalore, has been completed by a Committee under the Chairmanship of Dr. J. C. Ghosh appointed by the Visitor of the Institute. The report is under consideration.

On the recommendations of AICTE schemes costing about Rs. 18 lakhs (non-recurring) and Rs. 2.5 lakhs (recurring) have been approved for the Indian Institute of Science, Bangalore.

During the Second Five-Year Plan it is proposed to spend Rs. 80 lakhs approximately for the development of the Delhi Polytechnic, Delhi, in addition to the normal recurring expenditure.

SECOND PLAN

The Second Five-Year Plan of Technical Education as prepared by the All India Council for Technical Education includes proposals for projects which are estimated to cost Rs. 80 crores. The Plan envisages development of technical education at all levels in addition to the improvement and development of the existing institutions. The Plan provides for the establishment of three Higher Technological

Institutions in the western (Bombay), northern and southern regions. The Plan also provides for the establishment of 29 new polytechnics, 8 engineering colleges and about 61 junior technical schools. Further, there is a provision for starting refresher and summer courses for teachers, schemes for training of technical personnel.

Of the eight engineering colleges one each will be established in Andhra, Kerala, Madhya Pradesh, Orissa and Punjab and two in Assam.

Of the 29 polytechnics, six will be established in Mysore three in Andhra, one in Kerala, one in Pondicherry, five in Bombay, three in Madhya Pradesh, two in Rajasthan, two in Uttar Pradesh, one in Jammu and Kashmir, two in West Bengal, one in Tripura and one in Assam.

The junior technical schools will be located as follows: 18 in Kerala, 10 in Bihar, seven in West Bengal, six in the Punjab, five in Madhya Pradesh, four each in Rajasthan and Jammu and Kashmir, two each in Bombay and Orissa and one each in Assam, Himachal Pradesh and Tripura.

The establishment of these institutions will result in an intake of 7,500 into degree courses and 15,000 in diploma courses by the year 1960-61.

For the establishment of these institutions and for the development of the existing institutions the State and the Central Plans provide for a total outlay of Rs. 58 crores.

Even when all the above plans are implemented there will still be a shortage of technical personnel and to meet this shortage the Government of India on the recommendations of the Ghosh-Chandrakant Committee has decided to expand 19 selected engineering colleges and 60 polytechnics so as to yield 2,538 additional seats for the degree courses and 4,885 additional seats for diploma courses.

To meet the shortage of teachers it has been decided to create a pool of trained teachers for the various technical institutions. For this purpose, teaching fellowships will be instituted, and the selected persons will be apprentices to senior professors to give them teaching experience. On the completion of apprenticeship fellowships holders will form a pool and the technical institutions will be invited to select from the pool, teachers for their requirements.

SOCIAL EDUCATION

The new concept of social education is embodied in a five point programme: literacy, education in health and hygiene, training for trade, profession or calling, citizenship, and healthy recreation.

The Central Government guides, co-ordinates and helps with finance, but the actual burden of implementing the schemes lies with the State Governments.

The programme is based on the report of a committee called the Sakshna Committee which was adopted in 1949 and a target for the attainment of 50 per cent literacy in the five subsequent years was recommended.

The campaign was specially intensive in Delhi State where it was launched in December 1950. A Janata College was established at Alipur for the training of rural leaders. The chief means adopted were through an educational caravan which consisted of three or four jeeps or trailers, one serving the purpose of a mobile stage, another of a travelling library, a third an exhibition van while the fourth carried a projector. The caravan moved from place to place and organized exhibitions, training classes, plays and athletic contests.

In the country at large there are now (1957) 160 model community centres for educational development and 454 school-cum-community centres. There are also 26 Janata Colleges for training teachers.

Literature for the neo-literates is being steadily produced. Over 175 pamphlets were published through the Idara-Talim-O-Tarraqqi.

A popular encyclopaedia is to be brought out in five volumes—*Gyan Sarovar*. The first volume

is already out. And the rest are expected to come out by 1960.

To encourage production the Ministry has organized competitions among authors.

State and District libraries have been set up. At the end of March 1956, there were nine State Libraries and 150 District Libraries. That is, about half the number of Districts in the country had libraries of their own.

A Centre of Research Training and Production is likely to be set up which will among other things evaluate and produce literature for the neo-literates.

A Standing Committee on Social Education of the Central Advisory Board advises Government on social education.

BUREAUX

Brief notes are given on some institutions not noticed elsewhere.

The Central Bureau of Text Book Research was established in 1954. It helps to improve the quality of text-books by research and guidance. It has specially helped certain States which have taken steps to nationalize the production of text books.

The Central Bureau of Educational and Vocational Guidance was established in 1954. It has now a library and laboratory.

The following States have set up State Bureaux: Orissa, West Bengal, Bihar, and Madhya Pradesh.

The following States have proposals for setting up State Bureaux: Rajasthan, Madras, Mysore.

The National Board of Audio-Visual Education has its main function the co-ordinated development of audio-visual education.

The Central Film Library which serves as a circulating library for member-institutions has now 3,320 films and 1,476 film-strips. The present membership (1957) extends to 1,040 institutions spread over the entire country.

There is a quarterly journal entitled *Audio-Visual Education*, the first issue of which was published in April 1957.

Plans have been finalized (1957) for the establishment of a National Institute of Audio-Visual Education.

A committee appointed to consider the question of including Gandhian teachings in the curricula of schools and colleges made the following recommendations among others in 1957 January: Three books should be prepared incorporating Gandhiji's contribution in important fields, one each for primary, secondary and university classes; two, Gandhiji's letters to children should be published in book form.

The implementation of these recommendations will take some time.

FREE AND COMPULSORY EDUCATION

At the end of the First Five Year Plan the position was as follows:—

The percentage of children of the age-group 6-14 attending school was 49 per cent.

Compulsory education for the age-group 6-11 (approximately) was introduced in selected areas of the various states, comprising 1,093 towns and 39,276 villages.

There were 46,218 schools in these areas, with an enrolment of 60,67,412 students.

Free education for the children in the age-group 6-11 has been introduced in many states.

In a meeting held in July, 1957, the panel on education of the Planning Commission made the following recommendations:

The provision of universal, free and compulsory education upto 14 years should be regarded as the ultimate objective and an attempt should be made to realise it in a period of 15 to 20 years at the latest; and the immediate objective before

the country should be the introduction of universal, free and compulsory education for all children upto the age of 11 plus.

This target must be reached by 1965-66 at the latest.

The recommendations are yet to be considered by Government.

The position regarding free primary education in the various states and Union territories is as follows:

Assam: Primary education is free for children in the age-group 6-11.

Bihar: Education is free for children in the age-group 6-11.

Bombay: Primary education is generally free.

Jammu and Kashmir: Education in the State has been made free from primary to college level.

Madras: Primary education is generally free in the State.

Mysore: In the areas of the former Mysore State, education upto the age of 14 is free. In Bombay-Karnatak, Hyderabad-Karnatak and Madras-Karnatak areas primary education is free in the schools controlled by the Government and the local bodies. The aided schools in these areas, however, charge fees.

Orissa: Education is free for all children upto the age of 11.

West Bengal: Primary education is free upto the age of 11 in rural areas of the State and also in certain municipalities of the State.

Uttar Pradesh: Education is free in classes 1 to 3.

Delhi: Free primary education is imparted upto the age of 11 years. Concession of free education upto the age of 14 years has also been extended in all senior basic schools in rural areas of the territory.

Laccadive, Minicoy and Amindiri Islands: Primary education is free.

Tripura: Education is free in all Government schools.

Andaman and Nicobar Islands: Primary education is free.

Complete information was not available from the Governments of Andhra Pradesh, Madhya Pradesh, Kerala, Punjab and Rajasthan and the administrations of Manipur and Himachal Pradesh at the time of writing.

SCHOLARSHIP SCHEMES

The Government of India have instituted a number of schemes for studies in India and abroad.

For studies in India

1. Merit Scholarship in Public Schools: Instituted in 1953; open to age-group 5 to 11; value depends on income of parent or guardian; State Governments too have their own scholarships.

2. Post-Matriculation Studies: Instituted in 1956-57; 200 scholarships, distributed on a State-basis at Intermediate level.

3. Post-Matriculation for Study of Hindi for Non-Hindi Speaking States: Instituted in 1955-56; Sixty-six selected in 1956-57.

4. Research Scholarships in Humanities: Instituted in 1953; 100 scholarships for study in the Humanities.

5. Cultural Scholarships: About 100. For young workers of outstanding promise in music, dance, drama, etc. Instituted 1954-55.

6. Scheduled Castes, Tribes, Backward Classes: Amount sanctioned for 1956-57: Rs. 186.5 lakhs. No. of scholarships in 1956-57: about 40,000. Post-matriculation studies.

For Studies Abroad

Overseas Scholarships Schemes: For teachers in institutions of higher education; to raise standards of instruction and research; started in 1949-50; no. of places 85.

Union Territories Schemes: For persons domiciled in Delhi, Himachal Pradesh, Manipur, Tripura, Andamans and Laccadives; for post-graduate study or research; no. of places 5.

Foreign Languages Scholarships Scheme: For specialization in some major language of Europe or Asia; also for teachers of foreign languages in India; instituted in 1954-55; 30 scholarships.

Indo-German Industrial Co-operation Scheme: For training in industrial organizations 64 (1956-57); for courses at technical institutions 50 (1956-57); instituted in 1952-53; in operation every alternate year.

Scheduled Castes, Tribes, Backward Classes: Chiefly for advanced study in technical or professional subjects; instituted 1954-55; 12 scholarships.

China: To promote cultural relations with China on exchange basis; five scholarships; instituted 1955-56.

Fully-Paid Overseas Scholarships Scheme: For Government development schemes and for institutions of higher education; for improving standards of teaching and research; 20 fully-paid overseas scholarships to young and brilliant persons in the age-group 20-25; with effect from Sept.-Oct. 1957.

Agatha Harrison Fellowship (not Government of India): one fellowship at St. Anthony's College, Oxford, tenable for a period of five years, for a study of Asian problems with special reference to India.

Assistance to Eminent Indian Scientists: For visits to overseas research institutions; for study of latest developments; for attending conferences; for lecturing at universities on research in India; instituted 1946-47.

Scheduled Castes, Tribes, Classes: Free passage to students who receive foreign scholarships; 4 scholarships to each of the three groups; instituted 1954-55.

Loan Schemes: Interest-bearing loans to certain category of students to be repaid in monthly instalments commencing six months after return to India.

Colombo Plan (not Government of India): To provide technical experience. Since 1951, about 150 persons have gone abroad.

Point Four Programme: By the Government of the U.S.A. to provide technical knowledge and skill. Since 1952, 32 persons have gone abroad.

U.N. Social Welfare Schemes: For suitably qualified social welfare personnel.

UNESCO Schemes: Technical assistance programme against approved requirements of institutions. Since 1950-51, 42 persons have gone abroad.

Also, for study in specific fields; nine scholarships awarded since 1955-56.

Foreign Governments: For post-graduate study: East Germany (50); France (11), 14 for officers and technicians of Indian Administration; Italy (3); Netherlands (one); Norway (one); West Germany (7) and 802 for post-graduate study and practical training; Switzerland (2); U.S.S.R. (11).

Offers are under consideration from Czechoslovakia and Egypt.

Foreign Institutions and Organizations:

British Council: 4 for research in U.K.; Brush Abco Group—U.K.: one for training in U.K.; City of Hamburg: 10 for post-graduate study in West Germany.

International Association for the Exchange of Students: 55 for practical training; London University Institute of Education: two for investigation at the Institute; Philippines University: three for post-graduate study at University; Royal Society: two for research in U.K.; Federation of British Industries, U.K.: six for practical training in U.K.; London Transport Authority: six for training with Authority; Sir Isaac Pitman & Son Ltd.: eight at course for overseas teachers.

FIVE-YEAR PLANS

In the First Five-Year Plan about Rs. 169 crores were provided for the development of education—Rs. 44 crores at the Centre and Rs. 125 crores in the States.

More than half of this amount was provided for Elementary (including Basic) Education and the rest for the improvement of Secondary education, University education, Technical and Vocational education, Social education, etc.

The operative years of the First Five-Year Plan, in fact, started from 1953-54 and in that sense it was a Three-Year Plan in which an attempt was made to fulfil, so far as possible, the achievement of the objectives formulated.

The Second Plan allotment is Rs. 307 crores—Rs. 95 crores for Central Schemes and 212 crores for States Schemes.

The distribution of the provision between different fields of education in the First and Second Five-Year Plans is set out below:—

	(Rs. in crores)	
	First Five-Year Plan	Second Five-Year Plan
Elementary education	93	89
Secondary education	22	51
University education	15	57
Technical and Vocational education ..	23	48
Social education ..	5	5
Administration and Miscellaneous ..	11	57
Total ..	169	307

The major physical targets aimed at under the Second Five-Year Plan are:—

	From 1955-56	To 1960-61
(1) Percentage of children of age-group 6-11 to be brought under instruction to total population of the age group	51.0%	62.7%
(2) Percentage of children of age-group 11-14 to be brought under instruction to total population of the age-group	19.2%	22.5%
(3) Percentage of children of age-group 14-17 to be brought under instruction to total population of the age-group	9.4%	11.7%
(4) Number of Primary/Junior Basic schools ..	274,038	326,800

(10) Total number of Multi-purpose schools to be established ..	250	1,187

	From 1955-56	To 1960-61		From 1955-56	To 1960-61
(11) Total number of Engineering Institutes at degree level to be established	45	54	(18) Output of Diploma holders in Technology	430	450
(12) Total number of Engineering Institutes at Diploma level to be established	83	104	(19) Number of Universities	31	38
(13) Output of graduates in Engineering	3,000	5,480	<p>During the First Five-Year Plan, the Central Government assisted the States financially to enable them to appoint Special Officers in the States to speed up the work connected with the educational development programme. Experience of the First Plan pointed towards the need to set up an adequately staffed Planning and Statistical Unit in each State. The setting up of these Units, which have been made possible by financial assistance from the Centre, has helped not only in planning but in making available useful information regarding the progress of the Plan, which makes it possible to evaluate the qualitative and quantitative achievements of the various schemes implemented.</p> <p>During 1956-57, a sum of Rs. 921.99 lakhs (including Rs. 178.99 lakhs for the Relief of Educated Unemployed) was given as grants to the various State Governments for their educational development schemes.</p>		
(14) Output of Diploma holders in Engineering	3,560	8,000			
(15) Number of Technological Institutions of Degree level	25	28			
(16) Number of Technological Institutions of Diploma level	36	37			
(17) Output of Degree holders in Technology	700	800			

Compulsory Education

Universal, free and compulsory education will be provided to children between the ages of six and 14 in the Union Territories by the end of the Third Plan, i.e. by 1966.

The State Governments have promised to provide this only for the age-group six to eleven during the corresponding period.

The plan for the Union Territories, beginning in 1958 April is estimated to cost about Rs. 18 crores, of which Rs. 3 crores would be spent during the remaining period of the Second Plan.

The total school-going population in the Territories in the age-group 6 to 14 is 8.5 lakhs (5.14 lakhs in the age-group 6 to 11). Of this 4.5 lakhs are already on the rolls (3.5 lakhs in the 6-11 group).

The plan will call for 14,000 additional teachers on the basis of one additional age-group for every year, and one teacher for every 35 students.

Whether the State Governments can carry through their plans depends on the availability of finances of the order of Rs. 320 crores during the eight years 1958-66.

NON-AFFILIATED INSTITUTIONS FOR DEGREE OR DIPLOMA ENGINEERING, TECHNOLOGY, COMMERCE

[Note : For Colleges see under Universities in each State.]

ANDHRA

Andhra Polytechnic, Kakinada.
Government Ceramic Institute, Gudur.
Vuyyur Polytechnic, Vuyyur.
Central Crafts Institute, Mallepally, Hyderabad.
Government Technical College, Hyderabad.
Government Technical Training Centre, Nizamabad.
Government College of Fine Art, Hyderabad.
Warangal Polytechnic, Warangal.

ASSAM

Assam Civil Engineering Institute, Gauhati.
H.R.H. Prince of Wales Technical Institute of Engineering and Technology, Jorhat.

BIHAR

Indian School of Mines and Applied Geology, Dhanbad.
Jamshedpur Technical Institute, Jamshedpur.
Ranchi School of Engineering, Ranchi.
Tirhut School of Engineering, Muzaffarpur.
Chaibassa Technical School, Chaibassa.
Dehri Technical School, Dehri.
Ranchi Technical School, Ranchi.
Sindri School of Engineering, Sindri.

BOMBAY

Birla Vishwakarma Mahavidyalaya, Anand.
College of Engineering, Poona.
Government Leather Working School, Bandra (Greater Bombay).
Government Tanning Institute, Bandra (Greater Bombay).
L. D. College of Engineering, Ahmedabad.
Nautical and Engineering College, Bombay.
Radio Electric Institute, Bombay.

R. C. Technical Institute, Ahmedabad.
St. Xavier's Technical Institute, Bombay.
Sir Cusrow Wadia Institute of Electrical Technology, Poona.
S. N. Parulkar Parsi Polytechnic, Surat.
Victoria Jubilee Technical Institute, Bombay.
Deccan Education Society's Technological Institute, Poona.
Aurangabad Polytechnic, Aurangabad.
Lukhdhirji Engineering College, Morvi.
Shri A. V. Parikh Technical Institute, Rajkot.
Sir Bhavsinhji Polytechnic, Bhavnagar.

DELHI

Delhi Polytechnic, Delhi.

KERALA

Kerala Polytechnic, Kozhikode.

MADHYA PRADESH

Central Technical Institute, Gwalior.
Govindram Sakaria Kala Bhawan, Indore.
Polytechnic Institute, Bhopal.
Government Polytechnic, Ujjain.
Polytechnic Institute, Nowgong.

MADRAS

Arthur Hope Polytechnic, Coimbatore.
Central Polytechnic, Madras.
C. N. Technical & Industrial Institute, Vepery, Madras.
Institute of Leather Technology, Madras.
Madras Institute of Technology, Madras.
P.S.G. and Son's Charity Industrial Institute, Coimbatore.
Ramakrishna Mission Technical Institute, Madras.

Seshasayee Institute of Technology, Tennur, Tiruchirappalli.
Tamilnad Polytechnic, Madurai.

MYSORE

D. R. R. Occupational Institute, Davangere.
Indian Institute of Science, Bangalore.
National Institute of Engineering, Mysore.
Occupational Institute, Chintamani.
Silver Jubilee Technical Institute, Bhadravati.
School of Engineering, Bangalore.
S.L.V. Occupational Institute, Hassan.
Sri J. Occupational Institute, Bangalore.
Sri K. Silver Jubilee Technological Institute, Bangalore.
Rayalaseema Polytechnic, Bellary.
Dharmaprakasa C.P.C. Occupational Institute, Mysore.
B.V. Bhoomrati College of Engineering and Technology, Hubli.
Gulbarga Polytechnic, Gulbarga.
Karnatak Polytechnic, Mangalore.

ORISSA

Orissa School of Engineering, Cuttack.

PUNJAB

Engineering College, Ludhiana.
Government Hosiery Institute, Ludhiana.
Government Institute of Dyeing & Calico Printing, Ludhiana.
Government School of Engineering, Noidkheri.
Government Tanning Institute, Jullundur.
Government Technical Institute, Ambala.
Guru Nanak Engineering College, Ludhiana.
Mehar Chand Technical Institute, Jullundur.
National Institute of Engineering, Hoshiarpur.
Polytechnic, Noidkheri.

Punjab Institute of Textile Technology, Amritsar.
 Shri Vishwakarma Polytechnic, Phagwara.
 Surgical Instruments Centre and Developments Laboratory, Sonapat.
 Tara Karan S.D. Technical Institute, Balj Nath (Kangra).
 Technological Institute of Textiles, Bhiwani.

RAJASTHAN

M. B. M. Engineering College, Jodhpur.

UTTAR PRADESH

Chaudhry Mukhtar Singh Government Polytechnic, Meerut.
 Civil Engineering School, Lucknow.
 Government Wood Working Institute, Allahabad.
 Government Central Textile Institute, Kanpur.
 Government Central Weaving Institute, Banaras.
 Government Central Woodworking Occupational Institute, Bareilly.
 Government Polytechnic, Allahabad.
 Government Polytechnic, Dehra Dun.
 Government Polytechnic, Jaunpur.
 Government Polytechnic, Ghazipur, Lucknow.
 Government Technical Institute, Gorakhpur.
 Government Technical Institute, Jhansi.
 Government Technical Institute, Lucknow.
 Harcourt Butler Technological Institute, Kanpur.
 Hewett Engineering School, Lucknow.
 I. D. Technical Institute, Bahjoi.
 Indian Institute of Sugar Technology, Kanpur.
 Prem Mahavidyalaya Engineering College, Mathura.
 Technical College, Dayalbagh, Agra.
 Government Leather Working School, Kanpur.
 Government Technical Institute, Ghazipur.

WEST BENGAL

Air Technical Training Institute, Dum Dum.
 Bengal Ceramic Institute, Calcutta.
 Bengal Tanning Institute, Calcutta.
 Bengal Textile Institute, Serampore.
 Berhampore Textile Institute, Berhampore.
 Calcutta Technical School, Calcutta.
 College of Aeronautical Services, Dum Dum.
 Hooghly Institute of Technology, Hooghly.
 Indian Institute of Technology, Kharagpur.
 Institute of Jute Technology, Calcutta.
 Jalpaiguri Polytechnic, Jalpaiguri.
 Kanchrapara Technical School, Kanchrapara.
 K. G. Engineering Institute, Vishnupur, Bankura.
 Directorate of Marine Engineering Training, New Taratala Road, Calcutta.
 M. B. C. Institute of Engineering & Technology, Bardwan.
 R. K. Mission Silpa Mandir, Belur, Howrah.

AGRICULTURE

Indian Agricultural Research Institute, New Delhi; Indian Dairy Research Institute, Bangalore; Government Agricultural Institute, Bundelkhand (U.P.); Government Agricultural Institute, Chirgaon (U.P.); Government Agricultural Institute, Gorakhpur; Agriculture Institute, Laxmipur, Patna, Madhya Pradesh.

BANKING, COMMERCE AND CO-OPERATION

Co-operative Training College, Poona; Delhi Polytechnic, Delhi; Government College of Commerce, Hyderabad; Co-operative College, Trivandrum; Banatan Dharam College, Alleppey.

DOMESTIC SCIENCE

Lady Irwin College, New Delhi; Domestic Science Training College, Hyderabad; Girls' Vocational Institute, Aurangabad; Girls' Vocational Institute, Gulbarga; Girls' Vocational Institute, Warangal; Girls' Vocational Institute, Hyderabad; Girls' Vocational Institute, Secunderabad.

FORESTRY

Southern Forest Rangers College, Coimbatore; Indian Forest College, Dehra Dun; Northern Forest Ranger College, Dehra Dun.

MARINE TRAINING

Training Ship "Dufferin", Bombay.

MUSIC AND FINE ARTS

Gandharva Mahavidyalaya Mandal, Poona; Madhava Music College, Gwalior; Central College of Karnataka Music, Madras; Government School of Arts, Simla; S.S.T. Academy of Music, Trivandrum; Bhatkhande (Marris) College of Hindustani Music, Lucknow; Kamboj Sapt-kala Niketan, Meerut; Prayag Sangit Samiti, Allahabad; Sangeet Vidyalaya, Almora; All India College of Music, Arts and Crafts, Dhakuria (24 Parganas); Aryya Sangeet Vidyapeeth, 199, Landsdowne Road, Calcutta; Bengal Music College, 4, Hindusthan Road, Calcutta; Government College of Art and Craft, 28, Chowringhee Road, Calcutta; Ram Saran College of Music, Vishnupur, Bankura; Art College, Gwalior; Art College, Indore; Laxmi Kala Bhawan, Dhar; M. S. Bhand's School of Arts, Gwalior; Music College, Indore; Gita Bitan Sikshayatan, 155, Russa Road, Calcutta; Harshikesh Sangeet Vidyalaya, Nabadwip, Nadia; Ajmer Music College, Ajmer.

ORIENTAL LEARNING AND THEOLOGY

Swadhyaya Mandal, Killa-Pardi (Dist. Surat); Government Sanskrit College, Gwalior; Sanskrit Mahavidyalaya, Indore; Maharaja's Sanskrit College, Mysore; Sanskrit College, Melkote (Mysore); Sanskrit College, Siddaganga (Mysore); Sri Channarajendra Sanskrit College, Bangalore; Bidyabhushan Sanskrit College, Bolanar (Orissa); Maharaja's Sanskrit College, Parikimedi (Orissa); Sadasiva Sanskrit College, Puri; Birla Sanskrit College, Piliari; Government Sanskrit College, Alwar; Government Sanskrit College, Jodhpur; Government Sanskrit College, Sikar (Rajasthan); Government Sanskrit College, Udaipur; Maharaja's Sanskrit College, Jaipur; Khikhu Brahmarsharya Ashram Sanskrit College, Lakshmi Garh (Rajasthan); Sanskrit College, Nathdwara (Rajasthan); Shri Dadu Mahavidyalaya, Jaipur; Shri Digambar Jain Sanskrit College, Jaipur; Shri Ramanuj College, Didwana (Rajasthan); Shri Saradul Brahmarsharya Ashram Sanskrit College, Bikaner; Shri Vithal Nath Sanskrit Mahavidyalaya, Kotah; Alia Oriental College, Rampur; Darul-Uloom, Deoband (U.P.); Darul-Uloom Nadwatul Uloom, Lucknow; Government Sanskrit College, Banaras; Gurukul University, Kangri (Dist. Saharanpur, U.P.); Gurukul Vrindaban, Mathura; Kashi Vidyapeeth, Banaras; Mazhar-Uloom, Saharanpur; Calcutta Madrasah, 21, Wellesley Square, Calcutta; Prachyavani (Institute of Oriental Learning), 3, Federation Street, Calcutta; Serampore College, Serampore, Hooghly; Bhajan-Das Sanskrit Pathshala, Nayan (Rajasthan); Chamariya Sanskrit Mahavidyalaya, Fatehpur (Rajasthan); Choukhani Sanskrit Pathshala, Beongus (Rajasthan); Dhuleswar Sanskrit Pathshala, Manoharpur (Rajasthan); Ganga Sanskrit Pathshala, Bikaner; Goenka Sanskrit Pathshala, Doondalod (Rajasthan); Goverdhan Sanskrit Pathshala, Khadagada (Rajasthan); Government Sanskrit Pathshala, Bundi; Hanumat Sanskrit Vidyapeeth, Sardarshahr (Rajasthan); Harimukh Raya Sanskrit Vidyapeeth, Ramgarh (Rajasthan); Jangid Vedic Vidyapeeth, Fatehpur (Rajasthan); Khandal Vipra Vidyapeeth, Karauli (Rajasthan); Mangal Dutta Mahavidyalaya, Ratangarh (Rajasthan); Matribhasha Vidyapeeth, Karauli (Rajasthan); Pareek Vidyapeeth, Merta City (Rajasthan); Reengata Sanskrit Vidyapeeth, Bagar (Rajasthan); Sakariya Sanskrit Vidyapeeth, Chirawa (Rajasthan); Sanskrit Mahavidyalaya, Chittor;

Saraswati Vidyapeeth, Kotah; Sarvajani Sanskrit Vidyapeeth, Baran (Rajasthan); Shridhar Sanskrit Pathshala, Brahmapuri, Jaipur; Kanya Gurukul, Dehra Dun (U.P.); and Sanskrit Pathshalas at Amarsar, Banaswara, Bharatpur, Bonli, Chak, Choethwari, Chomu, Dausa, Dholal, Ganora, Kaladera, Kaushli, Karauli, Khorl, Lalot, Muchkund Dolpur, Neemkathana, Niwal, Paota, Samode, Talabgaon all in Rajasthan.

PHYSICAL EDUCATION

Andhra Training College of Physical Education, Vijayawada; College of Physical Education, Muzaffarpur (Bihar); Government College of Health and Physical Education, Patna; Kalvayadhana S.Y.M.V. Samiti, Lonavla (Bombay); Training Institute for Physical Education, Kandivli (Bombay); Academy of Physical Education of Sri Hanuman Vamshala, Hyderabad; Physical Training College, Shivpuri (M.P.); Hanuman Vyayam Prasarak Mandal, Amravati; Y.M.C.A. College of Physical Education, Saldapet, Madras; Physical Training College, Trivandrum; Government College of Physical Education, Rampur; Government College of Physical Education, 30, Ramkrishna Samadhi Road, Calcutta.

RURAL STUDIES

Shri Shivaji Lok Vidyapeetha, Amravati.

SOCIAL SCIENCES

Tata Institute of Social Sciences, Chembur, Bombay.

STATISTICS

Statistical Branch of Indian Council of Agricultural Research, New Delhi; Indian Statistical Institute, Calcutta.

TEACHERS' TRAINING

Basic Training College, Turki (Bihar); B.N.R. Training College for Women, Patna; Women's Training College, Muzaffarpur (Bihar); Teachers' Training College, Rauchi; Training College, Bhagalpur; Graduates' Basic Training Centre, Dhulia (Bombay); Graduates' Basic Training Centre, Rajpippa (Bombay); Graduates' Basic Training Centre, Dharwar; Jamia Training Institute, Jamia Millia Islamia, Jamianagar, Delhi; Lady Irwin College, New Delhi; Domestic Science Training College, Hyderabad; C. T. College, Jaora (M.P.); Government Teachers' College, Dewas (M.P.); Nai Talim Bhawan, Sevagram; Government Secondary Training School, Berhampur (Orissa); Secondary Training School, Cuttack; St. Bedes College, Simla; A.F. Mission Higher Secondary School, Dehra Dun; Balwant Rajput College, Agra; D. A. V. College, Kanpur; Dharam Sainai College, Aligarh; Gorakhpur University Foundation Society, Gorakhpur; Government Basic Training College, Lucknow; Government College of Home Science for Women, Allahabad; Government Constructive Training College, Lucknow; Government Junior Basic Training College, Allahabad; Government Junior Basic Training College, Lucknow; Government Junior Basic Training College, Muzaffarnagar; Government Nursery Training College, Allahabad; Government Training College for Women, Allahabad; Government Training College for Women, Lucknow; Kishori Raman College, Mathura; K. P. Training College, Allahabad; Lucknow Christian College, Lucknow; Meerut College, Meerut; Queen Victoria Higher Secondary School, Agra; Tilak Dhari College, Jaunpur; Women's Training College, Dayalbagh, Agra; Government Central Pedagogical Institute, Allahabad; Government School of Arts and Crafts, Lucknow; St. Mary's Convent Training College for Anglo-Indians, Allahabad; Training College for Teachers for Schools for Defectives, Lucknow; Basic Training College, Banpur (24 Parganas, West Bengal).

VETERINARY SCIENCE

Indian Veterinary Research Institute, Izatnagar (U.P.); Indian Veterinary Research Institute, Mukteswar (U.P.); Bengal Veterinary College, Calcutta.

EDUCATIONAL STATISTICS (1955-56)

Note that figures for 1955-56 are provisional. Also, the States mentioned in these tables are the ones existing before the reorganization in November 1956.

Figures for the old States are given for purposes of record.

Where available particulars about education in the new States are given in the articles on individual States.

* Unaffected by States reorganization. The figures for the present Punjab can be got by adding the figures for the old Punjab and PEPSU. Approximate figures for the present Rajasthan can be got by adding the figures for the old Rajasthan and Ajmer.

The figures for Assam include the figures for the Naga Hills District separated from Assam on December 1, 1957.

† 5 Wards of Calcutta Corporation and 8 Wards of Darjeeling.

PUBLIC HEALTH

MATTERS connected with health fall largely in the State field.

The Centre is, however, directly responsible even for State subjects in the Centrally administered areas of Manipur, Delhi, Tripura and Himachal Pradesh.

The Central Government's function in regard to matters which are primarily the responsibility of States themselves, can be stated to be co-ordination, the collection and supply of information, supply of expert technical assistance and advice, and such other assistance as can be given for the promotion of the health and well-being of the country.

Subjects for which the Ministry is primarily responsible are given below:

Relations with United Nations and foreign and International Organisations; International Sanitary Regulations; Seamen's Welfare; All-India Councils of medical and allied professions; Drugs Standard Control—under the Drugs Act, 1940 (as amended) and rules thereunder; Prevention of Food Adulteration Act; Higher Medical and Public Health training of students abroad; Medical Research; Central Plan for Medical and Public Health development; Inter-State Quarantine; Family Planning; Development of Health Services in States in particular, services relating to the control of diseases like Malaria, Tuberculosis, Venereal Diseases, Filaria, Leprosy, etc. as also the development of Maternity and Child Welfare, Nursing and Family Planning; The designing and equipment of medical institutions; Nutrition; Co-ordination of State Control of Standards of drugs manufactured and sold in the country; National Water Supply and Sanitation Schemes.

CENTRAL INSTITUTIONS

The departments and institutes under the Ministry are:

The Directorate General of Health Services; The Malaria Institute of India, Delhi; The All-India Institute of Hygiene and Public Health, Calcutta; The Central Drugs Laboratory, Calcutta; The Serologist and Chemical Examiner to the Government of India, Calcutta; The Central Research Institute, Kasauli; The Indian Cancer Research Centre, Bombay; The Central Institute of Research in Indigenous systems of Medicine, Jamnagar; Post-graduate training centre in Ayurveda, Jamnagar; The Lady Reading Health School and Ram Chand Lohia Infant Welfare Centre, Delhi; The Lady Hardinge Medical College and Hospital, New Delhi; The Kalavati Paediatric Hospital, New Delhi; The College of Nursing, New Delhi; The Hospital for Mental Diseases, Ranchi; The All-India Institute of Mental Health, Bangalore; The B.C.G. Vaccine Laboratory, Gulindy, Madras; The Indian Council of Medical Research, New Delhi; The Willingdon Hospital and Nursing Home, New Delhi; The Sadharang Hospital, New Delhi; The Leprosy Teaching and Research Institute, Chingleput, Madras; Medical Stores Depots and Factories; The All-India Institute of Medical Sciences, New Delhi; The V.D. Training Centre, Sadharang Hospital, New Delhi; Contributory Health Service Organisation, New Delhi, Port and Airport Health Organisations Offices of the Assistants Drugs Controller at Ports; The Antigen Production Unit, Calcutta; Central Quinine Office, Calcutta; The Central Food Laboratory, Calcutta.

A Central Health Service has been sanctioned; when fully constituted it will comprise about 350 Class I posts and an equal number of class II posts.

CENSUS

In 1956, it was estimated, there were about 10,000 medical institutions and about 125,000 beds. This would represent an increase during the First Plan of about 16 per cent in institutions and 10 per cent in beds.

The total outlay on public health during the First Plan was about Rs. 101 crores.

Second Plan: Rs. 256 crores.

The main facts (based on 1951 census reports) are given below:

About 380,000 persons are engaged in medical and health services in the country as a whole. Out of this 230,000 live in towns and 150,000 live in villages. These may be divided as follows (exclusive of five Districts in Bihar):

Registered medical practitioners (91,930); Vaidas, hakims and those not registered (96,147); Compounders (38,407); Nurses (31,517); Midwives (23,938); Vaccinators (5,928); Dentists (3,283); Others engaged in hospitals and private establishments rendering medical or health services but not including scavengers or sanitary staff (72,970).

Number of hospitals, 8,601 (1951); no. of beds, 113,557 (1951); no. of nursing homes, 500 (1952); no. of medical colleges (including 3 dental colleges, 3 nursing, one pharmacy), 34 (1952); no. of colleges for indigenous systems, 50 (1952); no. of special institutions (e.g., radiological) conducted by private agencies, 195; no. of maternity and child welfare centres (urban) 684, (rural) 418 (1947); no. of trained visitors (urban) 231, (rural) 136 (1947); no. of trained midwives (urban) 922, (rural) 255 (1947); no. of trained dais (urban) 1,264, (rural) 1,387 (1947).

VITAL STATISTICS

The registered birth rates, death rates and infant mortality rates are given below:

	Birth rate.	Death rate.	Infant Mortality rate.
1930 ..	33.0	25.0	189
1940 ..	33.0	22.0	160
1947 ..	26.6	19.7	146
1948 ..	25.4	17.1	130
1949 ..	26.7	15.8	123
1950 ..	24.8	16.0	127
1953 ..	24.8	14.4	118
1954 ..	25.4	12.9	113
1955* ..	27.3	11.6	100

Note: Figs. for 1930 and 1940 relate to British Indian provinces. The rest, relate to former Part 'A' States and Delhi, Ajmer, Coorg. * Excludes Bihar, M.P., Orissa.

The infant mortality rates in some of the Indian cities per mille of live births are given below.

Name of the City	1954	1955
Ahmedabad ..	147	145
Bombay ..	124	111
Calcutta ..	137	133
Delhi ..	N.A.	N.A.
Lucknow ..	124	116
Madras ..	136	143
Nagpur ..	193	N.A.

N.A. = Not available.

The following paragraph gives the maternal death-rate (deaths per 1,000 of live and stillbirths) for 1955 in some major towns in India.

Ahmedabad, 0.6; Bombay, 1.0; Calcutta, 2.6; Delhi City, 1.7; Lucknow, 1.5; Madras, 2.3.

TROPICAL DISEASES

The following table gives the number of deaths and rates (number of deaths for every 1,000 of the population) from different diseases recorded in former Part 'A' States and Delhi, Coorg and Ajmer.

	1954 †		1955*	
	Total	Rate	Total	Rate
Cholera ..	8,630	0.04	7,256	0.03
Dysentery & Diarrhoea ..	161,233	0.7	131,251	0.6

* Information not available.

Veneral Diseases: The incidence of veneral disease is particularly high in the hill tracts from Kashmir to Assam. It is also estimated that in the three States (pre-reorganization) of Madras, Bombay and West Bengal the incidence was between 5 and 7 per cent.

Fifty Veneral Diseases clinics were set up during the First Plan period, 17 of which received equipment from UNICEF.

A plant for producing Antigen has been in production since 1954. Two training centres have been established at the Safdar Jang Hospital (Delhi) and other at the Madras General Hospital.

It is proposed to establish a Central Veneral Diseases Organisation during the Second Plan Period, for which a provision of Rs. 58.67 lakhs has been made. Three clinics were to be established in 1956-57, and 18 in each of the four remaining years. Eight Headquarter Clinics, two in 1957-58 and the remaining six in the next 3 years are also envisaged.

A provision of Rs. 102 lakhs was made by the States for affording facilities for the treatment and control of veneral diseases. It was proposed to establish 71 clinics during the First Plan. The information about the number of clinics actually opened is not available.

Cancer: The number of persons who die of cancer annually is believed to be in the neighbourhood of 2 lakhs.

There are only two institutions for the treatment of cancer in India: Tata Memorial Hospital at Bombay and the Chittaranjan Hospital at Calcutta. Both are now under the Central Government.

Research is conducted at the Cancer Research Centre at the Tata Memorial Hospital in Bombay. The Indian Cancer Society has its headquarters in Bombay and its divisional headquarters in Calcutta and Madras.

Under the Second Five-Year Plan Rs. 35 lakhs have been provided to establish cancer wards and units in certain hospitals.

PUBLIC HEALTH AGENCIES

A Central Council of Health exists with the Union Health Minister as chairman and State Health Ministers as members. The Deputy Director-General of Health Services is the Secretary. The object is to consider policy in respect of health matters.

The All-India Council of Post-graduate Medical Education prescribes standards for post-graduate medical education.

The body in charge of research is the Indian Council of Medical Research.

(For a list of research institutions see under Research.)

A sum of Rs. 4 crores is provided for research programmes.

The annual grant to the Council amounts to Rs. 12 lakhs.

There are four main medical depots—one each at Bombay, Calcutta, Karnal and Madras. The depots at Bombay and Madras have factories attached to them.

The Haffkine Institute, Bombay, manufactures sulpha drugs.

The following medical bodies are in existence: The Indian Medical Council, the Indian Nursing Council, the Dental Council of India and the Pharmacy Council of India.

The object is to control and regulate the respective professions and standards of qualification.

There are State Pharmacy Councils in Punjab, W. Bengal, Bombay, Madras and M.P.

Among important Acts in force are Vaccination Act, Drugs Act of 1940, Drugs Rules of 1945. Then there are the Indian Medical Council Act, the Nursing Act of 1947, the Dentist Act, the Pharmacy Act.

CONTROL OF DISEASES

Steps are being taken to control a number of diseases that are rampant.

Malaria

National Malaria Control Programme was launched with effect from April, 1953 as a part of the first Five-Year Plan. It provided for the establishment of 136 field malaria control units to give protection to 136 million people out of the 200 million residing in the malarious areas. These units were allotted to all the 20 States forming the Republic of India according to the importance of malaria problem in each State.

During the first Five-Year Plan 162 units were allotted, each unit to cover a population of one million. 112.45 million people were protected against malaria and 25.42 lakh cases were treated.

There has been a substantial decrease in the incidence of malaria; 19.3 million cases were reported in 1955-56 as against 60.7 million in 1953-54.

Morbidity was reduced from 17.2 per mille in 1951-52 to 12.7 per mille in 1955-56.

The consumption of anti-malarial drugs fell by 67.7 per cent—of quinine and other cinchona products by 80 per cent.

The programme is being continued in the Second Five-Year Plan period. During 1956-57, 38 more units were allotted to various States bringing the total to 200 which will afford protection to 200 million people estimated to be the number exposed to risk in different parts of the country.

175 units were functioning till the end of September, 1957.

The DDT factory at Delhi has produced 904 tons of DDT 50 per cent and about 52 tons of technical DDT during the year 1956-57. The production capacity of the factory is being doubled.

The second DDT factory which is being set up at Alwaye, Kerala, was likely to go into production in 1958.

The standard spraying equipment is now being produced locally to meet the entire requirements of the country.

Training facilities at the Malaria Institute of India, Delhi has been intensified since the year 1953-54. 138 medical officers, 556 Malaria Inspectors, 23 Malaria Engineers and 32 Medical Entomologists have been trained.

During the first Five-Year Plan period Rs. 11.68 lakhs were spent on the National Malaria Control Programme. The programme is likely to cost Rs. 27 crores during the Second Five-Year Plan period.

The Government of India are considering converting Malaria Control Programme into Eradication Programme from 1958. The eradication programme during the Second Plan period including 2 years of Control Operation and 3 years of Eradication is likely to cost Rs. 52 crores.

Filaria

Among mosquito-borne diseases filaria is second only to malaria. No satisfactory cure has been found for this disease. What is aimed at is the control of the carrier species, and anti-mosquito measures have to continue for five years before results become apparent.

The National Filaria Control programme had 13 control units and 22 survey units allotted during the first Plan. Thirty-three more have been allotted, 13 during the year 1956-57 and 20 during 1957-58.

Filaria survey with the object of delimiting the extent of the filaria problem and to collect the pre-control data have been in progress in the States of Bihar, Uttar Pradesh, Orissa, the areas of the former Vindhya Pradesh, Madhya Pradesh, Hyderabad, Saurashtra, Bombay, Andhra, Madras and Travancore-Cochin.

So far representative sample of nearly 16 million persons residing in places known to be or suspected to be filarious have been surveyed.

Mass drug administration with Diethylcarbamazine (Hetrazan) is in progress as part of the control programme in the States of Uttar

Pradesh, Orissa, Andhra, Bombay, Kerala, Mysore, Andamans, and is likely to be introduced in Bihar, M.P., Madras.

Over 10.64 lakh persons have been treated.

Anti-mosquito measures are in progress in the States of Andhra, Bihar, Kerala, Orissa, Uttar Pradesh and Nicobar Islands. About 3.66 lakh houses have been sprayed with Dieldrin 50 per cent.

The course of training in filariology is being continued at the Malaria Institute of India, Delhi and another at Ernakulam has been finished.

So far 57 medical officers and 109 filaria inspectors have been trained.

The National Filaria Control Programme will cost 9 crores of rupees during the Second Five-Year Plan.

Leprosy

A number of bodies are fighting to control leprosy—Mission to Lepers, Hind Kush Nivaran Sangh (formerly Indian Council of the British Empire Leprosy Relief Association), Gandhi Memorial Leprosy Foundation, Kasturba Gandhi Trust, Maharogi Sewa Mandal.

The Mission runs 50 leper homes with about 10,000 inmates and gets grants from State Governments.

The Sangh has as its president the President of the Indian Republic. It carries on research work at the School of Tropical Medicine at Calcutta, conducts courses in post-graduate training in leprosy, undertakes surveys.

Isolation of leprosy cases in special leprosy homes was regarded in the past as the main method of control of leprosy in endemic areas. Such institutional isolation has not however yielded the results expected of it.

With the discovery of sulphone therapy in leprosy, a new approach is now available for the control of the disease. Apart from clinical improvement, sulphone therapy brings about a gradual reduction in the number of leprosy bacilli in the skin, and, by promoting healing of ulcers in nose and elsewhere. It also reduces infective discharge from patients.

The only sure method of preventing contact with infective cases is the isolation of cases in leprosy hospitals, sanatoria, or colonies. There are in all about 152 colonies, homes, asylums and hospitals for the treatment of leprosy patients and the number of beds provided is estimated at 19,600.

Treatment in out-patient leprosy clinics is also available in various parts of India. The number of such clinics is approximately 1,203 and the total number of cases taking treatment therein is roughly 1,20,000 per year.

Under the Leprosy Control Scheme of the Government of India included in the First Five-Year Plan at a cost of Rs. 30 lakhs to the Central Government alone, 4 treatment and study centres and 36 subsidiary centres were sanctioned in different States. Till the end of March 1956 four treatment and study centres and 29 subsidiary centres were established.

The scheme has been continued in a more expanded form in the Second Plan. An amount of Rs. 409.48 lakhs has been allocated for this purpose in the Second Five-Year Plan. The non-recurring expenditure will be borne in its entirety by the Central Government and the recurring expenditure shared on a 50-50 basis.

The total number of centres functioning till the end of June 1957 including those established during the First Plan was 49.

Besides adding 100 more subsidiary centres during the Second Five-Year Plan, the scheme provides for the training of medical and paramedical personnel, upgrading of leprosy clinics and in-patient institutions and treatment facilities for leprosy patients in N.E.S. Blocks.

A scheme for the training of Medical Officers in Leprosy has been sanctioned.

A Central Leprosy Teaching and Research Institute has been established at Tirumani in Madras State in association with the Lady Willingdon Leprosy Sanatorium, Tirumani and the Silver Jubilee Children Clinic for Child Leprosy, Saidapet.

A sum of Rs. 24.00 lakhs has been provided for this Institute during the Second Five-Year Plan.

Tuberculosis

Mortality figures for cities show a tuberculosis death-rate ranging from 200 to 450 per 100,000 as far as can be ascertained. Little information is available from rural areas but certain investigations have shown that in small towns the infection rate is nearly as high as in the larger cities, and that in the villages it is lower though considerable.

It can be safely estimated that there are at least 500,000 deaths from tuberculosis annually. If the ratio of 5 cases of active tuberculosis to one death from tuberculosis is accepted, there will be, at least, 2,500,000 active cases of tuberculosis in India.

The Government of India has an Adviser in Tuberculosis in its Directorate-General of Health Services. He advises the Central Government and the various State Governments on tuberculosis policy and helps in co-ordinating various tuberculosis schemes. He is also Technical Adviser to the Tuberculosis Association of India.

Prophylactic (BCG) Vaccination against tuberculosis was introduced in India in August, 1948 with the assistance of WHO. The mass campaign was started in April, 1951 and is now (March 1958) in progress in all the States except the Andamans, Pondicherry and the Laccadives. Up to the end of Dec. 1957, about 10 crore persons had been tuberculin tested of whom about 3.5 crores were vaccinated with BCG and thus given protection against tuberculosis.

The target is to cover the whole of the susceptible population of 170 millions by 1960-61.

The contribution of UNICEF and WHO would amount to over 1.48 mln dollars up to the end of 1958 to cover the services of the international personnel and provision of equipment and supplies consisting of vaccination equipment and vehicles, film projectors, public address equipment, etc.

There were in Oct. 1957, 154 technician's teams, each team consisting of one team leader (medical or non-medical) and six technicians in one team.

In furtherance of the object of introducing B.C.G. Vaccination in India, a laboratory for the manufacture of this vaccine was established by the Government of India at the King Institute, Guindy, in 1949. It supplies vaccine not only to centres in India but also to centres in South-East Asia.

In order to find out if it is possible to obviate certain difficulties experienced in the use of the liquid vaccine, a freeze drying vaccine plant for manufacturing and using dry vaccine has been installed as a pilot project.

There are at present five anti-tuberculosis demonstration and teaching centres, one each at New Delhi, Patna, Trivandrum, Madras and Nagpur. The Madras centre which was established in 1956 is beginning its career with an important research project namely the study of the role of modern tubercular drugs in the prevention of the spread of tuberculosis.

In the Second Plan it is proposed to establish eight more centres.

It is proposed to establish or upgrade about 300 TB Clinics during the Second Plan so as to have at least one Clinic in each District.

Attached to the Delhi University is the 'Patel Chest Institute' for teaching and research in T.B. and other diseases of the chest.

The needs of tuberculous children could not be attended to till recently, but now two hospitals for tuberculous children have been established, one in Delhi and the other at Arogyavaram in Andhra State.

According to the latest available figures there are for the treatment of T.B. patients, 69 sanatoria, 71 hospitals, 174 clinics, 140 wards with a strength of 22,138 beds.

These beds are meant mostly for giving treatment. Beds for isolating advanced cases of T.B. for whom such treatment is not possible, have so far been negligible, and it is proposed to establish at least 4,000 beds for the isolation of such cases during the Second Plan period.

There are about ten After Care and Rehabilitation Centres for ex-tuberculosis patients, and it may be possible to establish 8 more rehabilitation centres during the second Five-Year Plan period.

The Government of India have also provided for research in various aspects of tuberculosis by providing funds for the purpose to the Indian Council of Medical Research.

Various international bodies also co-operate with the I.C.M.R. in conducting this research on sound lines. A notable research now in progress is the national survey to find out the true incidence of tuberculosis in the urban, semi-urban and rural areas of India.

Goitre, Trachoma

The scheme for goitre control envisages estimation of the problem, the supply of iodised salts and the assessment of the results of iodine prophylaxis.

The estimated cost is about Rs. 18 lakhs. Two field Units will cover a population of 87.5 lakhs in the Second Plan period.

UNICEF assistance of 15,000 dollars was sanctioned at the UNICEF Executive Board meeting in March 1957. It has also agreed to allocate 16,000 dollars for the supply of 5 Iodisation plants which were expected by about the end of 1957.

To assess the role of flies for the spread of trachoma, a review of the fly control work and investigation in two selected villages was suggested. A Trachoma Pilot Project, has now been instituted at Allgarh. Field and laboratory investigations and mass short term intermittent treatment were conducted in selected villages near Allgarh in March and April this year.

Maternity

The maternal and child mortality as already indicated is high—the maternity death rate is over 11 and infant mortality about 100.

In all States welfare activities are in progress. There are posts of maternity and child welfare officers in Madras, West Bengal, Orissa, Assam, Delhi, U.P., Punjab, Madhya Pradesh, Bihar, Andhra, Himachal Pradesh, Kerala, Bombay and Rajasthan. The Government of India has an officer in the Directorate-General of Health Services who gives special attention to maternity and child welfare problems.

Non-official bodies engaged in welfare work are the Association of Medical Aid to Women by Women, Bombay; Mothers' and Children's Welfare Society, Bombay; the Bihar Maternity and Child Welfare Society; the Indian Council for Child Welfare, New Delhi; The Kasturba Gandhi Memorial Trust; and the Indian Red Cross which has a special bureau.

The Central Social and Welfare Board is assisting the State Boards in promoting Maternity and child welfare services. As a result, a large number of agencies are undertaking services for mothers and children and training programmes for staffing the services with trained personnel.

The total number of maternity and child health centres has now increased to over 3,000.

A sum of Rs. 50 lakhs was earmarked by the Government of India in the First Five-Year Plan for establishing Maternal and Child Health Centres in rural areas of the States.

This sum was utilised by the States, and 201 maternity and Child Welfare Units, each serving a population of 60,000 to 70,000, were established in association with the existing dispensaries.

The staff provided at each unit is one Health Visitor and 4 Midwives for the main centre as well as the 3 sub-centres distributed over the area.

It is proposed to cover 3,000 National Extension Blocks during the Second Five-Year Plan period, under the Primary Health Centre Scheme. The Maternity and Child Welfare Services will be included in the activities of Health Centres.

The programme to train Auxiliary Nurse-Midwives for Community Development Projects, was launched during the year 1954.

Sixty-six training centres in the various States have so far been approved by the Government of India to undertake training under this Scheme.

One thousand, three hundred and sixty nine students have been enrolled so far for training. Of these two hundred and thirty six have since qualified.

Seven training centres, one each in Andhra, Kerala, Orissa, Madhya Pradesh, Punjab and two in Madras, have been approved by the Government of India to undertake the scheme for integration of Public Health with the basic course in Nursing.

A sum of Rs. 4.90 lakhs has been paid by the Central Government to these centres.

One centre at Madras has started the training and the rest of the centres were to start at any time.

The large bulk of midwifery services in the villages will continue to be rendered by *dais* already practising in the villages. Under the Second Five-Year Plan a short six months course has been designed to orient them in modern techniques of asepsis, and make better and fuller use of their services, and provision has been made in the Plan for training 38,000 *dais*. A sum of Rs. 90 lakhs has been provided in the Plan for the purpose. The training will be given at health centres and at existing Maternity and Child Welfare Centres. An additional provision has been made to detail a trained midwife for purposes of supervision and continued assistance.

A sum of Rs. 45 lakhs has been provided in the Second Five-Year Plan to assist medical colleges to improve paediatric training so that medical personnel can, during the training receive adequate instruction in paediatrics and are better equipped to play their role in Child Health services.

Paediatric centres have already been established, one each in Hyderabad and Trivandrum and three more are expected to be established in Darbhanga, Agra and Delhi.

Twelve States have undertaken comprehensive Maternal and Child Health Programmes under WHO-UNICEF assistance which aims at the expansion and improvement of facilities for the training of various levels of health personnel and for the expansion of health services of mothers and children. The UNICEF provides equipment while WHO provides technical personnel. State Governments provide necessary funds and national personnel to develop the services.

The results of these programmes are encouraging in so far as it has succeeded in reducing the maternal and infant mortality of the country as a whole.

DEFECTIVES

The last census of handicapped persons (blind, deaf, crippled, mentally retarded, etc.), took place in 1931. These put the number of blind at about 600,000 and the number of deaf and hard-of-hearing at 230,000.

One important cause of personal deformity is malnutrition which can lead to blindness and deafness.

It is estimated that today the total number of blind is about 2,000,000 and the deaf about 700,000.

There is a Training Centre for the Adult Blind at Dehra Dun to impart vocational training. It imparts training in cottage-industry-type handicrafts to about 170 adult blind. There

is also a common Braille code for Indian languages known as Bharati Braille. The Central Braille Printing Press at Dehra Dun has already published several Braille books in English, Hindi and other regional languages.

The Training Centre at Dehra Dun has now a women's section.

There are in all 75 institutions for the blind and 44 for the deaf and 4 for the mentally handicapped. Four institutions cater for the orthopaedically handicapped children. About 2,000 blind children and adults and about 2,000 deaf children and adults receive training at these institutions.

A Sheltered Workshop for the Blind is functioning as part of the Training Centre where 10 blind workers are employed in chair-caning and weaving of woollen textiles. An Employment Office of the Training Centre has been functioning in Madras and another to be established in Delhi to try and secure remunerative employment for blind persons in ordinary industrial establishments. 70 persons have so far been placed by this office.

The Government of India give scholarships to blind and deaf persons over the age of 16 in order to help them to undertake higher academic education, or, professional, vocational or technical training in normal institutions of learning. Scholarships are also awarded to orthopaedically handicapped children and adults.

The number of scholarships awarded at present is 350.

In September, 1955 the Government of India appointed a National Advisory Council for the Education of the Handicapped to advise Government, to formulate new schemes, and to serve as liaison between Government and voluntary bodies.

On the advice of the Council, the Government of India have included several schemes for the education and welfare of the handicapped in the Second Plan. These schemes include the establishment of a comprehensive National Centre for the Blind at Dehra Dun consisting of the existing Training Centre for the Adult Blind and the Central Braille Press, a model school for blind children with a kindergarten section and a teacher's training department attached, an expanded sheltered workshop and a Braille Circulating Library.

On the lines of the National Centre for the Blind a National Centre for the Deaf is also proposed to be established. This will consist of a model school, a technical training centre for the Adult Blind and an audiological centre.

For the first time the Government of India will also make a beginning with the education and welfare of the mentally handicapped. A model school for the mentally retarded children is proposed to be established in Delhi during the Second Plan period.

One of the most difficult problems in the welfare of the handicapped is to secure employment for suitably trained handicapped persons. In order to deal with this problem the Government of India propose to establish a special organisation during the Second Plan period to assist handicapped persons in finding employment in the public services, industry and commerce.

A conference of the heads of 12 institutions for the orthopaedically handicapped was held in Bombay on 24th June 1957.

It should be mentioned here that the National Physical Laboratory is now working on the production of a cheap hearing aid.

Mental Disease

The number of mental cases is about one million, mental defectives one and a half million, of psycho-neurotics about three million.

There are at present three institutions for mentally retarded children.

At present there are 32 mental hospitals with accommodation for about 20,000 patients.

The Mysore Government Mental Hospital at Bangalore and the Hospital for Mental Diseases at Ranchi are the ones which are best equipped.

The following is a list of mental hospitals in India:

Mental Hospital, Tezpur; Inter-Provincial Mental Hospital, Kanke, Ranchi; Indian Mental Hospital, Kanke, Ranchi; N. M. Mental Hospital, Thana (Bombay); Mental Hospital, Ratnagiri (Bombay); Central Mental Hospital, Yeravda; Mental Hospital, Ahmedabad; Mental Hospital, Dharwar; Mental Hospital, Baroda; Mental Hospital, Nagpur; Government Mental Hospital, Madras; Government Mental Hospital, Waltair; Government Mental Hospital, Kozhikode; Punjab Mental Hospital, Amritsar; Mental Hospital, Agra; Mental Hospital, Bareilly; Mental Hospital, Banaras; Mental Hospital, Mankunda, Calcutta; Lambini Park Mental Hospital, P.O. Tiljala, 24 Parganas; Bangiyannam Ashram, 29-A, Vivekananda Road, Dum Dum; Mental Observation Ward, Bhawanipur, Calcutta; Mental Hospital, Jalna; Mental Hospital, Srinagar; Mental Hospital, Lashkar; Mental Hospital, Bongaia, Indore; Mental Hospital, Bangalore; Mental Hospital, Jaipur; Mental Hospital, Jodhpur; Mental Hospital, Calcutta; Mental Hospital, Bhavnagar; Mental Hospital, Trivandrum; Mental Hospital, Trichur.

The Hospital for Mental Diseases, Ranchi which was under the administrative control of a Board of Trustees was taken over by the Government of India, with effect from the 1st June, 1954 with a view to reorganising it and making it a model centre for treatment and training in Psychiatry.

The Government of India, in collaboration with the Government of Mysore, have established an All-India Institute of Mental Health at Bangalore in association with the Mental Hospital there, under the short term proposal made by Professor Mayer-Gross, W.H.O. Consultant in Psychiatry, who was assigned to the Government of Mysore for a short period. The Institute is managed by a Governing Body. The chief object of the Institute is to make provision for and to promote post-graduate and special studies and research in mental health.

The courses for the post-graduate diploma in Psychological Medicine (D.P.M.) and Medical (Clinical) Psychology were started on 3rd January 1955. A post-graduate course in Psychiatric Nursing was also started in 1956 January.

Increase of mental health activity in India is envisaged under the Second Five-Year Plan. The improvement and development of institutional facilities by State Governments by opening new hospitals and psychiatric clinics, the training programme already started or to be started by the Government of India at the All-India Institute of Mental Health for Psychiatrists, Psychiatric Nurses, Psychologists and ancillary personnel, the establishment of Child Guidance Clinics and homes for incurables will bring the problem of mental ill-health in the country under control within the next decade.

PUBLIC HEALTH MEASURES

There were 725 health units in the community development areas at the end of the First Plan.

During the Second Plan it is proposed to establish over 3,000 health units.

State Governments also propose to convert 131 existing dispensaries into primary health units and to set up a number of secondary health units.

The Second Plan provides about Rs. 23 crores for this programme.

Forty-four dental clinics have been sanctioned (Oct. 1957) for establishment in district hospitals in twelve States. In the Plan period it is proposed to have 350 dental clinics. There is a provision of Rs. 40 lakhs for this.

There is medical coverage for industrial labour through the Employees' State Insurance scheme (See under 'Labour' for details).

By the end of 1956 over 10 lakh persons had been covered.

All Central Government employees and their families stationed in Delhi enjoy medical facilities both domiciliary and institutional. The scheme has been in force since July 1954. The number of employees so covered in 1957 was about 88,000 and the total number of beneficiaries 4,03,765. The total expenditure on this was Rs. 35 lakhs in 1956-57, the contribution of employees ranging from 50 p.p. to Rs. 12.

Laboratory Services: The Centre had allocated Rs. 198 lakhs as its share for the development of the public health laboratory services in combination with State Governments, which would be contributing the balance of Rs. 143 lakhs.

Thus, 15 principal and 122 Regional laboratories will come into existence, serving both urban and rural areas. They will be diagnostic laboratories in respect mainly of bacteriological specimens, including water analysis and ordinary type of chemical examination of biological materials and an analysis of food under the Food Adulteration Act 1954.

The allocations of principal and regional laboratories State-wise are as follows: Orissa: 1.3; Andhra: 1.1; Rajasthan: —.21; U.P.: —.15; Punjab: 1.—; M.P.: 1.5; West Bengal: 1.14; Kerala: —.1; Bihar: 1.16; Madras: —.4; Kashmir: —.2.

WATER SUPPLY

Protected water supply is one of the most important factors in sanitation.

At the beginning of the First Five-Year Plan 128 towns with a population each of exceeding 60,000, 60 towns with population each between 30,000 and 50,000, and 210 towns with population each below 30,000 had protected water-supply.

In the First Five-Year Plan Rs. 30 crores were provided in plans for the States for water-supply and sanitation projects. This amount was divided into Rs. 14 crores and Rs. 16 crores for rural and urban areas.

Up to March 1956, 196 urban water supply schemes and 58 Drainage schemes were approved for execution in 17 States and the expenditure incurred was Rs. 8.3 crores. 134 schemes for rural areas were approved in 19 States costing Rs. 2.8 crores.

This programme was assisted to the extent of Rs. 2.5 million in equipment and material under the United States Technical Co-operation Mission programme.

The following sums have been paid to the various States for rural and urban schemes under the National Water Supply and Sanitation Scheme in 1956 and 1957:—

State	Schemes	
	Rural	Urban
	In lakhs of Rupees	
Delhi	0.25	123.96
Madras	30.00
Mysore	17.00
Kerala	2.88	5.00
Andhra Pradesh	10.00	90.00
Orissa	10.50	..
West Bengal	8.00	25.00
Rajasthan	18.58
Uttar Pradesh	2.85	45.00
Assam	3.00	..
M.P.	14.50
Bombay	9.64	..
Jammu and Kashmir	5.00	..
Himachal Pradesh	4.93	..

Second Plan: Central allotment for urban schemes: Rs. 40 crores. States' allotment: Rs. 23 crores for urban and Rs. 28 crores for rural.

INDIGENOUS SYSTEMS

General policy is based on the reports of the Chopra Committee set up in December 1946 (to enquire into the facilities available for training and research and need for control), and

the Pandit Committee set up in 1949 to work out the details concerning research in the ayurvedic and unani systems.

A Homoeopathic Enquiry Committee was also set up in 1949 November to recommend measures for the control and development of homoeopathy.

The general policy of the Government is that there should be only one system—the allopathic—and that steps should be taken to eradicate quackery from the indigenous systems and put them on a more scientific basis. It is held that in any reorganised training anatomy, physiology and surgery should be part of the curriculum.

There are about 50 colleges which afford a training in the indigenous systems of medicine and about 8 in homoeopathy.

Research is conducted at the School of Tropical Medicine, Calcutta; Central Drug Research Institute, Lucknow; the Drugs Research Laboratory in Jammu, and the Central Research Institute in Indigenous Systems of Medicine, the Ayurvedic Research Institute under the Thakurdatta Sharma Dharmarth Trust. There is also a Board in Bombay to promote research.

The Union Ministry of Health has published what is the first complete national pharmacopoeia of India. It gives information about the standards to be prescribed and tests to be used to establish the identity and purity of a number of indigenous medicinal preparations.

The Committee appointed by the Government of India to report on the question of establishing uniform standards in respect of education and regulation of practice of vaidyas, hakims and homoeopaths has published its report.

Among the recommendations are: five and a half years course of study inclusive of one year's internship with at least three months training in the rural areas; all members of the medical profession whatever the system they practise should enjoy an equal status; the existing institutions should be up-graded; new text-books should be written; post-graduate study and research facilities should be available; there should be separate Directorates for ayurvedic and unani, and for the homoeopathic systems.

Under the First Plan the States had an allotment of Rs. 95.23 lakhs to provide training and Rs. 1.06 crores for hospitals and dispensaries.

Under the Second Five-Year Plan, the States have provided Rs. 554.59 lakhs in their revised Plans. Rs. 62.2 lakhs have been provided for opening of new colleges of indigenous medicine and attached hospitals.

Out of this, Rs. 15.6 lakhs are provided by U.P. for opening one Homoeopathic College and attached hospital.

The provision for expansion of existing colleges and attached hospitals is Rs. 181.51 lakhs and Rs. 6.93 lakhs respectively. Under 'Miscellaneous Schemes' the provision for research and training is Rs. 14.17 lakhs and Rs. 6.925 lakhs respectively.

In addition to this assistance, the Centre has provided Rs. 100 lakhs for upgrading of colleges of indigenous medicine and research.

DRUGS

A Drugs Act—passed in 1940 and applied in 1947—is now in force in the whole country except Kashmir, though in Rajasthan and Mysore no machinery has yet been set up to enforce the provisions of the Act.

The Act regulates the import into, and the manufacture and distribution of drugs.

The control over import is exercised at the ports of Bombay, Calcutta, Cochin and Madras by an organization under the Drugs Controller.

There is a Central Drugs Laboratory in Calcutta set up in 1947 under the Drugs Control Act.

A Drugs Technical Advisory Board advises the Central and States Government on technical matters.

A Drugs Consultative Committee advises on how to bring uniformity in the administration of the Act.

The Indian Pharmacopoeia Committee helps to keep the Indian Pharmacopoeia first published in 1955 up-to-date.

A National Formulary Committee is constituted to prepare a list of essential drugs and their formulation.

The Drugs and Magic Remedies (objectionable Advertisements) Act, 1954 is in force to protect people from self-medication from magic remedies advertised in the lay press. The Act is administered by the State Government while the Rules are framed by the Central Government.

The most important step taken in the field of production was the establishment of a Penicillin Factory in the public sector. The Hindustan Antibiotic Ltd., Pimpri, went into trial production in March, 1955. Regular production of Penicillin was commenced from August, 1955. The factory has already achieved a production capacity of 12.5 million mega units of Penicillin.

Hormones

Three firms have been licensed under the Industries (Development and Regulation) Act, 1951 to take up the manufacture of synthetic hormones starting from the imported intermediates. The rate of production is expected to be about 50 kgs. per month for each of the hormones, viz. Testosterone, Progesterone, Ethisterone, etc.

Vitamins

One firm has been licensed to take up the production of Vitamin B-12. A scheme for the production of some other Vitamins by the same firm is under consideration of the Government.

Antibiotics

Hindustan Antibiotics (Private) Limited, Pimpri have already achieved the production rate of 12.5 million mega units of penicillin and expect to increase its capacity to 24 million mega units. They will also be taking up the production of Streptomycin.

Besides Messrs. Hindustan Antibiotics (Private) Limited, Pimpri, two other firms have been licensed to produce Penicillin.

Chloramphenicol, another antibiotic is being produced by Messrs. Parke Davis and Co., Calcutta and they hope to expand their capacity to 10,000 kgs.

Besides, MAC Laboratories, Bombay and Messrs. Neo-Pharma Limited, Bombay, have also been licensed to take up the manufacture of Chloramphenicol.

Chlortetracycline is produced by Messrs. Atul Products to the extent of 9,600 kgs. They have also taken up the production of 2,400 kgs. of Tetracycline.

Sulpha Drugs

Messrs. May & Baker, Atul Products, Haffkine Institute and a number of other firms produce sulpha drugs in the country.

All these units combined together have a production capacity of about 5,00,000 kgs. per annum.

Anti-T.B. Drugs

Messrs. Sarabhai Chemicals, Baroda, and several other firms produce INH. The estimated total annual production capacity for INH is 12,000 kgs.

PAS is produced by Messrs. Bio-Chemicals and Synthetic Products, Hyderabad with a capacity of 36,320 kgs.

Anti-Malarial Drugs

Chloroquin and Camoquin are being produced in the country on an experimental basis.

Quinine salts are being manufactured by the Government Factories in Madras and Bengal.

D.D.T. & B.H.C.

The production of DDT is being stepped up from 700 tons to 1,400 tons at Delhi.

A second DDT factory at Alwaye in Kerala is expected to produce 1,400 tons per annum. The present capacity of Benzene Hexachloride is 2,500 tons per annum.

Anti-Leprosy Drugs

Three firms have been licensed under the Industries (Development and Regulation) Act, 1951 to produce anti-leprosy drugs, viz. DDS and its derivative (sulphone) with a capacity of 7,500 kgs. per annum.

FAMILY PLANNING

The total expenditure during the First Five-Year Plan comes to Rs. 15.82 lakhs, i.e. about 20 per cent of the total provision, Rs. 65 lakhs.

The allotment during the Second Plan is Rs. 497 lakhs and the total budget provision during 1956-57 and 1957-58 is Rs. 55 lakhs.

A break-up of these figures is given below.

Up to 1957 the number of Family Clinics established was 464. In 1958-59 it is proposed to open 266 clinics.

Provision has been made in the Second Plan for opening 2,000 rural and 500 urban clinics as a phased programme.

The sum allotted for research under the Second Plan is Rs. 50 lakhs.

To give an impetus to the whole movement a Family Planning Board was formed on 1st September 1956, with a Standing Committee.

A Contraceptive Testing Centre was opened in the Indian Cancer Research Centre, Bombay and a number of contraceptives were tested for finding out their suitability.

During the First Plan efforts were directed to the building up of an active public opinion in favour of family planning and promotion of family planning advice and service on the basis of the existing knowledge. Demographic as well as medical and biological studies were also carried out.

An education and propaganda scheme was initiated in 1955-56. A number of posters and leaflets were printed and distributed free to the States, local bodies and voluntary organisations conducting family planning clinics.

Nine films about planning, biology of reproduction and child welfare were procured and shown to the public.

Twenty research programmes relating to demographic, medical and biological studies were supported at a cost of about Rs. 6.20 lakhs.

A Demographic and Research Centre was started in Bombay in 1956. This is expected to develop into a regional centre in collaboration with U.N.

Two more centres one at Delhi and the other at Calcutta have been sanctioned. A third was to be opened in a place in the south.

Family Planning Officers were to be appointed at State headquarters.

Family Planning Boards were to be set up in each State.

Up to Oct. 1957, Family Planning Officers had been appointed in the States of Andhra, Bihar, Madras, Punjab, Rajasthan and Delhi.

Family Planning Boards had been constituted in Andhra, Assam, Bihar, Madras and West Bengal.

The number of clinics approved and sanctioned during 1956-58 upto 30th September, 1957 are shown in the table below.

	Approved		Sanctioned	
	Rural	Urban	Rural	Urban
State Governments	164	45	10	11
Local Bodies	20	..	14
Voluntary Organisations	23	48	21	44
Total	187	113	31	69

The pattern of financial assistance by the Centre would be roughly as follows: 100 per cent for non-recurring; for recurring the quota would decrease rapidly year by year from 86 per cent to 20 per cent in the case of States and local bodies and more gradually from 100 per cent to 80 per cent in the case of voluntary bodies.

To provide staff for the clinics a total provision of Rs. 15.75 lakhs has been made in the Second Plan.

Before the establishment of a Training and Research Centre in Bombay (started September

1957) short term training courses were conducted in Delhi, Nagpur, Jamnagar, Junagadh, Rajkot, Amravati and Calcutta.

64 Doctors, and 97 Health Visitors and Social Workers were trained at these courses.

The first regular training course of 2 months duration, commenced on 2nd of September 1957 at the Bombay Training Centre, and 29 trainees including 20 doctors, 4 social workers and 5 health visitors were admitted to the course.

3 Doctors, 4 Nurses and 8 Health Inspectors were trained at the first training course at the Ramnagar Centre in Aug.-Sept. 1957.

The table shows the breakdown of allocation (in lakhs of Rs.) in the First & Second Plans.

Programme	First Plan Allocation	Expenditure	Second Plan Allocation	1956-57 Budget Provision	1957-58 Budget Provision
Grants for opening of Clinics ..	30.00	7.90	373.25	12.00	15.05
Training ..	8.50	0.22	15.75	3.00	2.23
Education ..	5.00	0.18	50.00	6.00	3.00
Research ..	18.30	5.34	50.00	6.00	3.56
Central Organisation ..	3.20	2.09	8.00	3.00	1.16
Total ..	65.00	15.82	497.00	30.00	25.00

AUXILIARY WORKERS

In order to meet extreme shortage of doctors in the country as a whole and particularly in the rural areas, it was proposed to introduce a new type of Auxiliary Medical and Public Health Worker.

He would not be entrusted with diagnosis and treatment of diseases beyond what is necessary as a part of ordinary first-aid work, and the training should be such as to enable him to assist the health authorities, in as large a measure as possible, in preventive measures including sanitation, health education, etc. The syllabus of training throws more emphasis on the preventive aspects of the training, rather than the curative side.

During training it was proposed to give the trainees free lodging and a stipend of Rs. 50 p.m.

NURSING

At the end of the year 1956 there were 24,724 registered nurses and 28,050 registered midwives, 836 registered health visitors and 393 auxiliary nurse-midwives. There were 7,977 registered nurse-dais and dais, but probably the number of trained dais was much larger. Separate figures in respect of these nursing personnel for urban and rural areas are not available.

The Health Survey and Development Committee recommended that there should be a ratio of one nurse to 500 of population, and one midwife for every 100 births. On this basis, the total requirements for nurses would be 7,00,000 and 87,500 midwives for the present population.

The Plan targets for 1956 were: Nurses 22,000; Midwives 26,000; Health Visitors 800; dais and nurse-dais 6,000.

The number of nurses and midwives available in India falls far short of actual requirements. In order to meet the increasing demand for health personnel in connection with the expansion of health programmes under Community Development Projects a scheme for the training of about 6,000 additional auxiliary nurse-midwives has been included in the Second Five-Year Plan at an estimated cost of Rs. 89 lakhs to be shared by the Central and State Governments concerned.

Training in nursing is offered in centres attached to almost all large hospitals. The Nursing Colleges at Delhi and Vellore offer a higher basic course leading to a B.Sc. degree in nursing.

The number of training institutions for nursing personnel and of students under training at the end of 1956 were as follows (The second figure gives the number of trainees):—

Nurses: 209, 7,100; Midwives: 265, 2,768; Health Visitors: 17, 739; Auxiliary Nurse-Midwives: 87, 1,828.

The following post-certificate courses in nursing are at present available:—

Sister Tutors' Course.

Christian Medical College, School of Nursing, Vellore (Madras).

Nursing Administration Course.

(i) Christian Medical College, School of Nursing, Vellore (Madras).

(ii) General Hospital, Madras.

(iii) College of Nursing, New Delhi

Midwife Tutors' Course.

College of Nursing, New Delhi.

Public Health Nursing Course.

All-India Institute of Hygiene and Public Health, Calcutta.

Ward Sisters' Course.

College of Nursing, New Delhi.

Psychiatric Nursing Course.

(i) Mental Hospital, Ranchi.

(ii) All-India Institute of Mental Health, Bangalore.

Tuberculosis Nursing Course.

Tuberculosis Sanatorium, Arogyavaram (Andhra).

The training of Health Visitors is being continued and expanded at the Lady Reading Health School, Delhi under the Central Government, and at 8 other Health Schools in the States. Six more Health Schools have also been established at Allahabad, Bareilly, Rajkot, Indore, Trivandrum and Ranchi, to train another 1,700 Health Visitors under the Second Five-Year Plan.

Health visitors' training centres are now at: Bombay, Calcutta, Delhi, Hyderabad, Madras, Lucknow, Nagpur, Poona, Ludhiana, Amritsar, Trivandrum, Ranchi, Indore, Patna and Vishakhapatnam.

Over 1,400 trained lady health visitors will be available during the Second Plan period to man maternity and child welfare centres—one of the most vital needs for the provision of adequate health protection to rural population—under the Community Development Programme.

At present, approximately 400 students are receiving training at eight centres. To double the number of trainees, these centres located in the States of Madras, Uttar Pradesh, Madhya Pradesh, Andhra, Punjab, Delhi and Bombay, were expanded during the First Five-Year Plan with Central assistance.

With the expanded programme, it will be possible to train 720 health visitors in the existing eight schools during the Second Plan period and 380 at the Lady Reading Health School. Besides, it is also proposed to establish six new schools where another 540 health visitors will be trained during the Second Plan period.

FIRST FIVE-YEAR PLAN

The total provision for Health schemes in the First Five-Year Plan was Rs. 140 crores: Rs. 101 crores were provided by the States and Rs. 39 crores by the Centre. During the period 1951-56 expenditure on medical and public health amounted to Rs. 105.46 crores which is about 75 per cent of the planned outlay.

The progress under broad heads of development is given below.

Rs. 30 crores were provided by the States in their plans for water supply and sanitation of which Rs. 14 crores were meant for rural and Rs. 16 crores for urban areas.

For the urban areas 196 water supply and 58 sewage schemes were sanctioned. The total amount of money sanctioned was Rs. 12.90 crores and the money paid was Rs. 8.3 crores. The number of water supply schemes actually taken in hand was 187 and of sewage schemes 42 in March 1956.

In the rural areas 134 schemes were sanctioned. The total amount of money sanctioned was Rs. 5.8 crores, and the money paid Rs. 2.8 crores upto March 1956.

The urban programme has been more successful than rural, but even here some of the schemes were just getting started and the majority only about 40 to 50 per cent complete in March 1956.

MEDICAL EDUCATION

There were at the end of 1956, 44 medical colleges and the number of admissions into the colleges was 3,858.

There were two medical schools, the Arya Medical School, Ludhiana, and the Radhabai Palitkar Medical School, Hyderabad.

There were seven dental colleges in India.

The All-India Institute of Medical Sciences was started in 1953-54, for which the Government of New Zealand donated one million pounds. It will comprise a Medical College, a Dental College, a Nursing College, a Post-Graduate Teaching Centre and a 650 bedded hospital and rural and urban organisations to provide centres for field work.

Below we give a list of medical colleges:

The Andhra Medical College, Vishakhapatnam.

The Assam Medical College, Dibrugarh.

The B. J. Medical College, Ahmedabad.

The B. J. Medical College, Poona.

The Baroda Medical College, Baroda.

The Christian Medical College, Ludhiana.

The Christian Medical College, Vellore.

The Darbhanga Medical College, Lahorisarai (Bihar).

The Gajra Raja Medical College, Gwalior.

The Grant Medical College, Bombay.

The Guntur Medical College, Guntur.

Karnatak Medical College, Hubli.

The Kasturba Medical College, Manipal (South Kanara Dist., Mysore State).

The Lady Hardinge Medical College for Women, New Delhi.

The Madras Medical College, Madras.

The Mahatma Gandhi Memorial Medical College, Indore.

The Medical College, Kanpur.

The Medical College, Ranchi.

The Amritsar Medical College, Amritsar.

The Calcutta Medical College, Calcutta.

The Medical College, Mysore.

The Nagpur Medical College, Nagpur.

The Government Medical College, Patiala.

The Trivandrum Medical College, Trivandrum.

The National Medical Institute, Calcutta.

The Niranjan Sarkar Medical College, Calcutta.

The Osmania Medical College, Hyderabad.

The Prince of Wales Medical College, Patna.

The R. G. Kar Medical College, Calcutta.
The Medical College, Agra.
The Sawal Man Singh Medical College, Jaipur.
The Reth G. S. Medical College, Bombay.
The Sriram Chandra Bhang Medical College, Cuttack.
The Stanley Medical College, Madras.
The Topiwala National Medical College, Bombay.
The Medical College, Bangalore.
The Gandhi Medical College, Bhopal.
The Jabalpur Medical College, Jabalpur.
The Jamnagar Medical College, Jamnagar.
The King George's Medical College, Lucknow.
The Madurai Medical College, Madurai.
All-India Institute of Medical Sciences, Safdarjung, New Delhi.
Aurangabad Medical College, Aurangabad (Bombay).
Medical College, Kurnool (Andhra).
Medical College, Pondicherry.

Medical Schools

The Arya Medical School, Ludhiana.
The University Medical School, Bangalore.

Dental Colleges

The Calcutta Dental College, Calcutta.
The Dental College, Amritsar.
The King George's Medical College (Dental Wing), Lucknow.
The Madras Medical College (Dental Wing), Madras.
The Nair Hospital Dental College, Bombay.
The Sir Currimbhoy Ebrahim Memorial Hospital and Dental College, Bombay.
Government Medical College (Dental Wing), Patiala.

Others

The All-India Institute of Hygiene and Public Health, Calcutta.
The College of Nursing, Delhi.
The Malaria Institute of India, Delhi.
The School of Tropical Medicine, Calcutta.
Sri Vallabhbhai Patel Chest Institute, Delhi.
All-India Institute of Mental Health, Bangalore.

AYURVEDIC AND UNANI INSTITUTIONS

Below we give a list of Ayurvedic institutions: Is not an exhaustive list:

Ayurvedic College, Gauhati, Assam.
Gopobandhu Ayurvedic Institute, Puri, Orissa.
The Asafia Tibbia College, Bhopal.
Shri Narain Prasad Awasthi Ayurvedic School, Bampur (M.P.).
Ayurvedic Vidyalyaya, Jamnagar, Saurashtra.
Ayurvedic Medical School, Bhavnagar, Saurashtra.
Govt. Ayurvedic College, Gwalior (M.P.).
Shri Raj Kumar Singh Ayurvedic College, Indore (M.P.).
Nizams Tibbi College, Hyderabad.
Govt. Ayurvedic College, Hyderabad.
Tibbi College, Delhi.
Govt. Alided S.Y.N.A. Ayurvedic College, Bhagalpur, Bihar.
Govt. Ayurvedic College, Patna.
Govt. Tibbi College, Patna.
Ayodhya Shiva Kumari Ayurvedic College, Bogusara, Monghyr, Bihar.
Ayurvedic Vibhag Vidyalyaya, Patiala.
Shri Dhanwantri College, Sangrur, Punjab.
Shri Ayurved Vidyalyaya, Barnala, Punjab.
Shri Venkateswara Ayurvedic Kalasala, Vijayavada, Krishna District, Andhra Pradesh.

Shri Ram Mohan Ayurvedic College, Guntur.
Aryavaldyapatasala, Kottakkal, Kerala.
The Venkataramana Dy & Ayurvedic College, Mylapore, Madras.
College of Indigenous Medicine, Kilpauk, Madras.
Madhava Memorial Ayurvedic College, Cannanore.
Keraleeya Ayurvedic Mahapatasala, Shoranur.
Akhila Travancore Sidhamruth, Kallioore & Siddha Medical Training College.
Govt. Ayurvedic College, Trivandrum.
J. S. Maha Gujarat Ayurvedic Medical College, Nadlad.
Shri Ochhavai N. Ayurvedic Mahavidyalaya, Surat.
Ayurveda Mahavidyalaya, Poona.
Aryanga Vaidyak Mahavidyalaya, Satara City.
Ayurveda Vidyalyaya, Jamnagar.
R. A. Podar Medical College (Ayurvedic), Worli, Bombay.
Ayurved Mahavidyalaya, Ahmednagar.
Jamini Bhushan Ashtanga Ayurved Vidyalyaya (College), Calcutta.
Vishvanath Ayurvedic Mahavidyalaya (College), Calcutta.
Shyamadar Vaidya Shastrapith (College), Calcutta.
Govt. Ayurvedic College, Jaipur.
Maharana Ayurvedic College, Udayapur.
Rajputana Ayurvedic & Unani Tibbi College, Jaipur.
Dayanand Ayurvedic College, Amritsar.
Govt. Ayurvedic & Unani College, Mysore.
Ayurvedic College, Hindu University, Banaras.
Ayurvedic College, Lucknow University, Lucknow.
Ayurvedic College, Gurukul University, Kangri.
Ayurvedic College, Gurukul Vrindaban, Distt. Mathura (U.P.).
Budelkhand Ayurvedic College & University, Jhansi.
Rishikul Ayurvedic College, Haridwar.
Lakht Hari Ayurvedic College, Pilibhit.
Kanya Kujia Ayurvedic College, Lucknow.
Ram Sahai Ayurvedic College, Meerut.
Lekh Ram Ayurvedic College, Dorli (Distt. Meerut), (U.P.).
Ayurvedic College, Dehra Dun.
Arjuna Ayurveda Vidyalyaya, Banaras.
Baldeo Ayurvedic College, Baragaon, Banaras.
Ayurvedic College, Farrukhabad.
Narendra Vidya Mandir, Kirooli (Distt. Agra).
Moolchand Hastogi Ayurvedic College, Lucknow.
Uttara Khand Vidyapith Vidyalyaya, Guptakashi (Distt. Garhwal).
Tibbia College, M.U., Aligarh.
Takmil-ut-Tib College, Lucknow.
Unani Medical College, Himmatt (Gan), Allahabad.
Tibbia College, Saharanpur.
Darshanand Ayurvedic College, Banaras.

SPECIAL TRAINING

Post-graduate medical education facilities are now available at the following institutions:

1. Osmania Medical College, Hyderabad—M.D.; M.S.; D.G.O.; D.O.; Dip. Anaesthesia.
2. Grant Medical College, Bombay—M.D. (medicine, pathology, midwifery, gynaecology, pediatrics, T.B., pharmacology); M.S. (gen. surgery, ophthalmology, E.N.T., orthopaedics); D.P.H.; D.M.H.E.; D.P.M.; D.A.; D.V.D.; M.Sc. (biochemistry); M.Sc. (microbiology); M.Sc. (medical); Ph.D. (Biochemistry, Microbiology); M.Sc. (Med.); Ph.D. (Med.).

3. College of Physicians and Surgeons, Bombay—D.O.M.S.; D.A.; D.D.V.; D.P.B.; D.G.O.; F.C.P.S.; D.P.M.; D.C.H.; D.O.R.L.; D. Ortho.

4. Topiwala National Medical College, Bombay—M.D. (Medicine, pathology, bacteriology, obstetrics, gynaecology, pediatrics); M.S. (surgery); B.Sc. (medical); D.A.; D.P.M.; Also diplomas of the College of Physicians and Surgeons.

5. B. J. Medical College, Poona—M.D. (medicine); M.D. (midwifery, gynaecology); M.D. (pathology); M.D. (pharmacology); M.S. (surgery). Also diploma courses of the College of Physicians and Surgeons.

6. B. J. Medical College, Ahmedabad—M.D. (medicine); M.S.; M.C.P.S.; B.Sc.; M.Sc. (Medical); D.P.B.; D.Ana.; D.D.V.; D.O.M.S.; D.G.O.; D.C.H.; D.O.R.L.; F.C.P.S.; F.R.C.S.

7. Medical College, Nagpur—M.D. (medicine); M.S. (surgery); M.O. (obstetrics, gynaecology); M.Sc. (medical, anatomy, pharmacology, physiology, pathology, bacteriology); M.B.; M.O.; D.O.; Ph.D.

8. Stanley Medical College, Madras—M.D. (gen. medicine); M.S. (gen. surgery); M.Sc. (anatomy, physiology, pharmacology); Ph.D. (anatomy); D.G.O.

9. Christian Medical College, Vellore (Madras State)—M.D. (medicine, pathology); M.Sc. (gen. surgery).

10. Seth G.S. Medical College, Bombay—M.D.; M.S.; D.A.; D.M.R.E.; D.V.D.; M.Sc.; Ph.D.; D.P.H.

11. Medical College, Amritsar—M.S.; D.T.D.; D.O.M.S.; B.Pharm.

12. S. M. S. Medical College, Jaipur—M.D. (medical, pathology, bacteriology); M.S. (surgery, ophthalmology); M.Sc. (anatomy, physiology, pharmacology); Ph.D.; D.Sc.

13. All-India Institute of Hygiene and Public Health, Calcutta—D.P.H., L.P.H., D.M.C.W. (Dip. in Maternity and Child Welfare); certificate in Maternal and Child Health; Dip. Diet; D.I.H.; Dip. in Nutrition; D.Sc. (Public Health); D.N.; M.E. (P.H.); Certificate courses in Public Health Nursing, Biometry Technique; Nutrition, Lab. technique, Industrial hygiene, etc.

14. Calcutta School of Tropical Medicine, Calcutta—D.T.M. & H.; L.T.M.

15. R. G. Kar Medical College, Calcutta—D.G.O., D.O.M.S.

16. Medical College, Agra—M.D.; M.S.; D.C.H.; D.O.M.S.

17. Medical College, Lucknow—M.D. (medical, pathology, physics, forensic medicine, social med. and pub. health, pharmacology, tuberculosis, radiology); M.S. (surgical, ophthalmology, obstetrics, gynaecology, anatomy, orthomology, surgical, E.N.T.); D.M.R.E. (medical, radiology and electricity); D.L.O. (laryngology, otology); D.T.D. (tuberculosis); D.O.M.S. (ophthalmic, medicine and surgical); D.G.O. (gynaecology, obstetrics); D.C.P. (clinical pathology); D. Orth. Sur. (orthopaedic surgery).

18. Institute of Ophthalmology, Aligarh Muslim University, Aligarh—D.O.

19. Lady Hardinge Medical College, New Delhi—M.D. (medicine, pathology, obstetrics, gynaecology); M.S.; M.Sc.

20. Vallabhbhai Patel Chest Institute, Delhi—D.T.D.

21. Medical College, Baroda—M.S.; M.D.; D.Ped.; D.O.; D.V. & D.; D.A.; D.M.R.E.; T.D.D.; D.L.O.

22. All-India Institute of Mental Health, Bangalore—D.P.M.; D.M.P.; D.P.N.

23. M.G.M. Medical College, Indore—M.D.; M.S.; D.C.H.; T.B.

24. G.R. Medical College, Gwalior—M.D.; M.S.; D.M.R.E.

25. Madras Medical College, Madras—Dip. in Radiology, in Clinical Lab. Science; L.P.H.; Dip. in Maternity and Child Welfare.

26. Barnard Inst. of Radiology, General Hospital, Madras—D.M.R.; Dark Room Technique (Certificate); T.D.D.

27. Medical College, Calcutta—T.D.D.; D.G.O.; D.O.M.S.

28. National Medical Institute, Calcutta—D.G.O.; D.O.M.S.

29. P.W. Medical College, Patna—M.S.; M.D.; D.T.D.; D.C.H.; D.O.; D.L.O.; D.A.; D.C.P.

Training in nursing is offered, as already mentioned, in almost all hospitals. The Nursing Colleges at Delhi and Vellore offer higher training equivalent to the B.Sc. standard.

Health visitors are trained as mentioned in Bombay, Calcutta, Delhi, Hyderabad, Madras,

Lucknow, Nagpur, Poona, Ludhiana, Amritsar, Vishakapatnam, Indore, Patna, Ranchi, Trivandrum.

Courses in malaria are conducted at the Malaria Institute of India.

Pharmacy

Facilities for training in pharmacy are being developed or improved in the following institutions:—

Department of Pharmaceutics, Andhra University; Department of Pharmacy, Banarasi University; Department of Pharmacy, Banaras Hindu University; Department of Pharmacy, Punjab University; Department of Pharmacy, Medical College, Madras; Department of Pharmacy, Birla College of Science, Pilani; L. M. College of Pharmacy, Ahmedabad; Department of Chemical Technology, Bombay University.

The total cost of the scheme for the above institutions is of the order of non-recurring Rs. 13.5 lakhs and recurring Rs. 1.73 lakhs.

The Central Government or the University Grants Commission have agreed to provide about Rs. 9.81 lakhs of the non-recurring cost and Rs. 70,000 of the recurring cost.

When the scheme is fully implemented facilities will be available for an annual admission of about 200 candidates for a three-year degree course in pharmacy.

The All-India Council for Technical Education has recommended that efforts should be made for developing at least one centre in each major State for training in pharmacy. Accordingly those States which do not have such training facilities at present have been addressed by the Central Government regarding the setting up of necessary centres.

The All-India Council is also examining the question of developing facilities for training in pharmaceuticals technology in certain selected institutions which are conducting courses in chemical engineering and chemical technology.

SOCIAL WELFARE IN INDIA

THE period under British rule (1800-1947) witnessed a destruction of the older social structure in India. In the new structure that emerged a number of reforms and institutions were introduced by bodies like the Bramho Samaj (associated with the name of Raja Ram Mohan Roy), the Prarthana Samaj, the Deccan Education Society and the All-India Social Reform Association (Justice M. G. Ranade), the Ramkrishna Mission (Swami Vivekananda), the Servants of India Society (G. K. Gokhale) and the Arya Samaj (Dayanand Saraswati). Though these organisations were in the nature of religious orders, they took it as a part of their faith to serve the needy and be suffering. The Arya Samaj and the Ramkrishna Mission sponsored social reforms, established orphanages, widows' homes, free dispensaries and relief centres in periods of emergency. The Servants of India Society is especially notable for its ramifications in the fields of labour, tribal welfare, youth welfare and emergency and relief work. An impetus to women's welfare was given by D. K. Karve's Women's University and G. K. Devadhar's eva Sadan in Poona.

During this period pioneering work in many neglected fields of service, e.g. founding homes, orphan asylums and institutions for the maimed and the handicapped, was undertaken by Christian missionaries in the country.

By 1920 Mahatma Gandhi's contribution began to gain recognition throughout the country. He provided for a number of constructive social welfare programmes through organisations like the Harijan Sewak Sangh, All-India Village Industries Association, Charkha Sangh, the Hindustani Nai Talimi Sangh, Goseva Sangh, and the Kasturba Gandhi National Memorial Trust, etc. His constructive programme also included dignity of manual labour and labour reform, prohibition of alcohol, drugs and gambling, Tribal welfare and leprosy relief.

The late '30s saw the formation of the first popular Ministries in eleven provinces in India. During the same period professional social work began to be recognised with the establishment of the Tata Institute of Social Sciences in 1936.

The new profession generally covers the following fields of social work: Community Welfare Services; Family, Child and Youth Welfare Service; Public Welfare Administration; Social Security Services; Services for the maladjusted and handicapped groups; Social Defence and Correctional Administration; Services or Emergency Relief and Rehabilitation; Social Legislation and Social Action; Social Research; Training in Social Work; Tribal Welfare and Rural Welfare.

The establishment of the Indian Conference of Social Work at a meeting of over 450 social workers assembled in Bombay in November 1947 marks a significant development in the field of social work in India. The Conference undertakes and promotes the study of social problems and endeavours to foster co-operation, collaboration and co-ordination amongst social service agencies in India and abroad. It has held sessions in Bombay (1947), Madras (1948), Delhi (1949), Jamshedpur (1950), Calcutta (1951), Hyderabad (1953), Lucknow (1954), Bangalore (1955), Jaipur (1956) and Bombay (1957).

In 1958 again the I.C.S.W. was planning to hold its third national seminar, the subject being urban community development.

In 1952, it enabled the International Conference of Social Work to hold its Sixth Session at Madras—the first International Conference in Asian soil.

The aspirations of the Indian people towards State responsibility for social welfare are

reflected in Part IV of the Constitution which lays down the "Directive Principles of State Policy", as follows:—

"The State shall strive to promote the welfare of the people by securing and protecting as effectively as it may, a social order in which justice, social, economic, and political, shall inform all the institutions of the national life."

SOCIAL LEGISLATION

Social legislation on an all-India scale dates back to 1843 when the first law abolishing slavery was passed. The earlier laws sought to reform the evil social practices existing at the time, practices such as Sati, infanticide, and child marriage. Later, social legislation began to assume a more positive and constructive role. Laws for better working conditions in factories, laws providing maternity benefits, for the abolition of traffic in women and children, and laws for the protection and care of destitute and delinquent children have all received attention in the first half of this century.

Since 1947 there has been an unprecedented increase in social legislation both at the national and the State levels.

Some of the laws which are applicable to the entire country are the Industrial Disputes Act, 1947; The Factories Act, 1948; The Coal Mines Provident Fund and Bonus Schemes Act, 1948; Minimum Wages Act, 1948; Employees State Insurance Act, 1948; The Plantation Labour Act, 1951; The Mines Act and the Provident Fund Act, 1952.

Two Acts were passed to remove caste discrimination, namely, the Caste Disabilities Removal Act XXI of 1950 and the Untouchability Offences Act XXII of 1955.

Three laws introducing changes in Hindu Law governing Marriage and Succession have been passed since 1954, namely, The Special Marriage Act 43 of 1954; The Hindu Marriage Act XXV of 1955 and the Hindu Succession Act XXX of 1956. (See also 'Laws of 1955'.)

Some of the measures in force against immoral traffic are:

The Bombay Prevention of Prostitution Act (Act XI of 1923); The U.P. Naik Girls Protection Act (Act VII of 1929); The U.P. Minor Girls Protection Act (Act VIII of 1929); The Madras Suppression of Immoral Traffic Act (Act V of 1930); The Bengal Suppression of Immoral Traffic Act (Act VI of 1933); The U.P. Suppression of Immoral Traffic Act (Act VIII of 1933); The Mysore Suppression of Immoral Traffic Act (Act VIII of 1938); The Bombay Devadasi Protection Act (Act X of 1934); The Punjab Suppression of Immoral Traffic Act (Act IV of 1935); The Bihar Suppression of Immoral Traffic Act (Act III of 1948); The Travancore Cochin Suppression of Immoral Traffic Act (Act IV of 1952); The Saurashtra Prevention of Prostitution Act (Act VIII of 1952); The Hyderabad Suppression of Immoral Traffic Act (Act XLIX of 1952); The Madras Devadasi (Prevention of Dedication) Act (Act XXXI of 1947); The Madhya Pradesh Suppression of Immoral Traffic Act (Act III of 1953); The Ajmer Prevention of Prostitution Act (Act I of 1953); The Patiala Suppression of Immoral Traffic Act (Act II of 2004 Bikrami); The Suppression of Immoral Traffic Act (Jammu and Kashmir Act of 1954).

The Madras Act is also in force in Andhra and the Bengal Act in Delhi.

Among institutions for uplifting fallen women are the Sri Sadans and the Good Shepherd Home in Madras, the Shridhanand Mahilashram in Bombay, Crispin's Home in Poona, The Salvation

Army Home, The Fendall Home, All-Bengal Women's Union Home in West Bengal and the Kushalbagh Mission Orphanage at Gorakhpur in U.P.

Some of the 80 Homes and 370 Rescue Shelters in the country attempt the rehabilitation of fallen women. A sum of rupees three crores is allotted to root out traffic in women and girls.

Children's Acts in relation to delinquency are in force in Andhra, Bombay, Kerala, M.P., Madras, Mysore, Punjab, U.P. and West Bengal. The Borstal School Acts are in force in Andhra, Bombay, Kerala, Madras, Mysore, Punjab, U.P. and West Bengal. There are also Reformatory School Acts in most of the States.

There are remand homes (67), reformatory schools (7), borstal schools (8), certified schools (49), and five juvenile jails in the country.

There are many institutions for the relief and rehabilitation of beggars. The number of institutions and capacity in some States for which figures are available are respectively as follows: Bombay: 18, 2000; Kerala: 8; Madras: 7; West Bengal: 5, 1000. There are beggar homes in Delhi, M.P., Mysore and U.P.

There are regulations against begging in the cities of Calcutta, Bombay and Madras, while begging is illegal in some of the municipal areas of M.P., Punjab and U.P.

The Acts in force against begging are: The Bhopal Prevention of Beggary Act, 1917; the Hyderabad Prevention of Beggary Act; the Bengal Vagrancy Act 1943; The Bombay Prevention of Beggary Act 1945; The Madras Prevention of Beggary Act 1945; The Cochin Vagrancy Act 1945; The Mysore Prevention of Beggary Act 1944; The Travancore Prohibition of Beggary Act 1945; The Bihar Prevention of Beggary Act 1952.

According to the Constitution of India, social legislation can be formulated and implemented both by the Central and State Governments. Most social subjects are on the concurrent list, i.e. they can be legislated upon by the Central or State Governments. These subjects include: marriage and divorce, social security and social insurance, economic and social planning, welfare of labour, charities and charitable institutions, vagrancy and mental deficiency.

Prison Reform Bills and Borstal Institutions are subjects in the State list. An informative volume entitled "Social Legislation", which contains detailed information regarding the laws pertaining to women, children, handicapped groups and social defence was published in 1956 by the Planning Commission of the Government of India.

GOVERNMENT SET-UP

In India, the Central Government does not have a special Ministry or department for social welfare. The Ministries of Health, Education, Labour, Home, Rehabilitation, Agriculture, Community Development and the Office of the Commissioner for Scheduled Castes and Tribes undertake several important social services. The States of Assam, Andhra Pradesh, Bombay, Madhya Pradesh, Punjab, Rajasthan, Uttar Pradesh and West Bengal have Departments of Social Welfare, whereas Madras possesses a Women's Welfare Department.

The expenditure allocated to Social Services in the 1st Five-Year Plan period was 547 crores of rupees out of a total outlay of 2,356 crores, which works out to 23 per cent, whereas in the Second Five-Year Plan, out of a total outlay of 4,800 crores of rupees 946 crores that is 20 per cent has been earmarked for Social Services, including Housing, Rehabilitation, etc.

To the above amount we could also add the provision of 90 crores in the First Plan period for community development and 200 crores in the Second Plan period, both of which work out to four per cent of the total outlay, respectively.

PLAN OUTLAY BY MAJOR HEADS OF DEVELOPMENT

	First Five-Year Plan		Second Five-Year Plan	
	Total Provision (Rs. crores)	Per cent	Total Provision (Rs. crores)	Per cent
(a) Education	164	7	307	6.4
(b) Health (including water supply and sanitation programme) ..	140	5.9	274	5.7
(c) Labour & Labour Welfare, Welfare of Backward Classes, Scheduled Tribes, Social Welfare	44	1.8	149	3.1
(d) Housing	49	2.1	120	2.5
(e) Rehabilitation	136	5.8	90	1.9
Total	533	22.6	940	19.6

VOLUNTARY SOCIAL WORK

The groups of voluntary social work in India largely fall under the following heads: Administrators; Professional social workers; Missionaries; The Gandhian social workers; and Voluntary social workers belonging to the various private agencies.

Of these the religious believe in the traditional form of charity, the Missionaries in institutionalised social work, the Gandhians in the 14-point constructive programme.

The group of professionally trained social workers is small though most compact. This group consists of some 1,000 alumni and teachers of the following post-graduate schools of social work in India, viz., The Tata Institute of Social Sciences, Devnar, Chembur, Bombay 38; Delhi School of Social Work, 3, University Road, Delhi 8; the Faculty of Social Work of the M. S. University of Baroda, Camp Road, Baroda; Shri Kashi Vidyapeeth, Banaras; Chavni, Banaras 2; Madras School of Social Work, 1, Jarrett Gardens (upper flat), 23-24, Casa Major Road, Egmore, Madras 8; The All India Institute of Social Welfare and Business Management, College Square West, Calcutta 7; the J. K. Institute of Sociology and Human Relations, Lucknow University, Lucknow also imparts training in social work, while the Patna University has a department to train social workers for industrial welfare work.

Voluntary Social Service Agencies operating on an All-India basis are mentioned below:—

Child Welfare

Balkan-Ji-Bari (6-A, Cooperage, Bombay 1); Society for the Protection of Children in India (2-B, Camac Street, Calcutta); Indian Council for Child Welfare, Room 14-15, Block 'A', 'B' Barracks, Queensway, New Delhi; Indian Council for Child Education (Sumanas, 39, Edward Elliotts Road, Madras 4).

Youth Welfare

Y.M.C.A. (5, Russel Street, Calcutta 16); Y.W.C.A. (Parliament Road, New Delhi); Bharat Scouts and Guides Association (Regal Building, Parliament Street, New Delhi).

Women's and Family Welfare

All India Women's Conference (6, Bhagwandas Road, New Delhi); Family Planning Association of India (Metropolitan House, Dadabhai Naoroji Road, Bombay 1); National Council of Women in India (G Block, Western House, Curzon Road, New Delhi); Kasturba Gandhi National Memorial Trust (Kasturba Gram, P.O. Indore, Madhya Pradesh).

Health

Tuberculosis Association of India (20, Red Cross Road, New Delhi 2); Indian Red Cross Society (20, Red Cross Road, New Delhi 2); All India Cancer Prevention Society (Tata

Memorial Hospital, Parel, Bombay 12); Hind Kushi Niwaran Sangh (Red Cross Road, New Delhi); Akhil Bharat Sharirik Sikshan Mahamandal (Tilak Road, Nagpur, Bombay State).

Rehabilitation of the Handicapped

Convention of the Teachers of the Deaf in India (50, Bondel Road, Ballygunj, Calcutta); All India Light House for the Blind (89, Elliot Road, Calcutta); National Association for the Blind (Victoria Memorial Blind School, Tardeo, Bombay 7); All India Blind Relief Society (11-F, Rajratnagar, New Delhi).

Rural Welfare

Sarva Sewa Sangh (Maganwadi, Wardha, Bombay State); India Village Service (I.V.S. House, Marhera, Dist. Etah, U.P.).

General Social Welfare

Servants of India Society (Poona 4); Ramkrishna Mission (Belur, Dist. Howrah); Gandhi Memorial Fund (5, Mansingh Road, New Delhi); Salvation Army (Moreland Road, Bombay 8); Friends' Service Unit (1, Upperwood Street, Calcutta 16); All India Seva Samiti (Seva Samiti Building, Allahabad); Indian Co-operative Union Ltd. (American Barracks, Queensway, New Delhi).

Rural Women's Welfare

Kasturba Gandhi National Memorial Trust (Kasturbagram, Indore, Madhya Pradesh).

Relief and Rehabilitation

United Council of Relief and Welfare (Rashtrapati Bhavan, New Delhi).

Social Education

Indian Adult Education Society (30, Fair Bazar, Delhi); Nal Talim Sangh (Wardha, Bombay); Jamia Millia (Okhla, Delhi).

Welfare of Under-Privileged Groups

Harlijan Sewak Sangh (Kingsway, Delhi); Bhartiya Adimjati Sevak Sangh (Kingsway, Delhi).

Social Defence

All India Crime Prevention Society (Behari Niwas, Kanpur, U.P.); Association for Moral and Social Hygiene in India (Room No. 211, 'P' Block, Raisina Road, New Delhi).

Co-ordination of Social Welfare

The national organization for the co-ordination of all welfare services is the Indian Conference of Social Work located at 6/A, Cooperage, Bombay 1.

There is also a South-East Asia Regional Office of the International Conference of Social Work which has been established in conjunction with the Indian Conference of Social Work in Bombay.

International Welfare Agencies in India

The following are some of the International agencies and organisations working in the country: International Conference of Social Work (South-East Asia Regional Office (6/A, Cooperage, Bombay-1); Ford Foundation (32, Ferozshah Road, New Delhi); World Health Organisation (S.E.A. Office, Patiala House, Hardinge Avenue, New Delhi); Rockefeller Foundation (Room No. 16, Indian Red Cross Society, Red Cross Road, New Delhi); International Labour Organisation, Indian Branch (Mandi House, New Delhi); International Union for Child Welfare (Consultant for Far East Asia, Rooms Nos. 14 & 15, Block A, Barracks B, Queensway, New Delhi); United Nations International Children's Emergency Fund (Patia's House, Hardinge Avenue, New Delhi); United Nations Educational, Scientific and Cultural Organisation (Old Mill Road, New Delhi); Food and Agricultural Organisation, UNO.

Bhoodan Movement

Special mention must be made of the Bhoodan Movement initiated by Acharya Vinoba Bhave, one of the ablest disciples of Gandhiji. He is effecting a silent but nevertheless remarkable social revolution within the country by the voluntary gift of land (Bhoodan), wealth (Sampattidan), labour (Shramdan) and life (Jeevan-dan).

RECENT DEVELOPMENTS

The Hyderabad State Branch (now Andhra) of the Indian Conference of Social Work has established an Institute of Radiology in Hyderabad at a cost of Rs. 10 lakhs.

The Madras State Branch has started a School of Social Work, the only post-graduate institution of its kind in South India, as well as a Juvenile Service Bureau.

The Children's Aid Society, Bombay, has initiated a Juvenile Service Bureau for Bombay City, and through a grant from the Central Social Welfare Board, a Bureau of Delinquency Statistics and Research, which has prepared a detailed Report on this subject.

The Union Ministry of Health has decided to encourage Medical Colleges to employ Medical Social Workers and Occupational Therapy Workers by granting them substantial financial assistance for the purpose.

A significant development in the movement for planned parenthood in India has been the active interest taken by the Municipalities of Bombay, Bangalore and Madras in incorporating family planning services in their welfare programmes. Several large industrial concerns are also working in this direction.

An important conference, at which 73 Indian social workers, social scientists and administrators played an important role, was the 7th Session of the International Conference of Social Work held in Toronto, Canada, in June-July, 1954.

The 3rd annual conference of the All India Council of Labour and Welfare officers was held at Nagpur in December 1955, to discuss various questions connected with labour welfare.

An annual session of the Association for Moral & Social Hygiene was held at Jaipur in January, 1956.

The First National Conference on Child Welfare was held at Delhi in May 1956.

The International Red Cross Society held its XIXth Session in New Delhi in Oct.-Nov. 1957.

The Second National Youth Hostel Conference was held at Nagpur in Oct. 1957.

In May 1956, the Indian Conference of Social Work submitted a Memorandum to the Prime Minister on the creation of a Ministry of Social Welfare at the Centre and Departments of Social Welfare in all the States. The main objective of the Memorandum is to secure the establishment of a single channel for welfare administration.

The Indian Conference has also undertaken a research survey of beggars in Bombay city, which is financed by a grant-in-aid from the Ministry of Education.

The Eighth Session of the International Conference of Social Work was held in Munich, Germany in August, 1956. About 3,000 delegates from 56 countries participated. The main theme for discussion was "The Impact of Industrialisation on the family and community". About 25 delegates from India under the leadership of Mrs. Hansa Mehta, President, Indian Conference of Social Work and the Vice-Chancellor, Baroda University attended the Conference.

The Ninth Session is to be held in Tokyo in November 1958. The main theme for discussion would be family planning.

The Prison Reforms Committees in Madras, Orissa and Kerala have published Reports.

On 1st September 1956 a Family Planning Board was set up, by the Union Ministry of Health to direct the family planning programme in the Second Five-Year Plan period. The Board consists of members whose term of office will normally be for five years, under the Chairmanship of the Union Minister for Health.

The Government of India have made a provision of Rs. 497 lakhs (Rs. 400 lakhs at the Centre and 97 lakhs in the States) for family planning work. The Board will advise on various matters and the recommendations of the Board will be implemented by the Ministry of Health.

A Central Training Institute has been set up in Bombay with Dr. Sushila Gore as Director. The Institute began its first two months' course in Sept. 1957. The course which is intended for doctors, health visitors, nurses and medical social workers, imparts training in child welfare, maternity requirements and family planning.

The Government of Madras has also plans for setting up a family planning institute.

On 18th September 1956 the Government of India announced the creation of a new Ministry of Community Development with Mr. S. K. Dey as Minister.

The creation of the new Ministry will involve no major change in the present organisation of the Community Projects Administration, but it will work in full co-operation with the Ministry of Food and Agriculture, and, when necessary, will utilize the resources of that Ministry.

The co-ordinated development programmes under Community Projects and National Extension already cover 123,000 villages and a population of 80 million. It is proposed that the entire country should be served by the National Extension Service during the Second Plan period through the creation of 3,800 additional development blocks of which 1,120 should be converted into community development blocks.

With a provision of Rs. 200 crores community development should become one of the most important activities of Government during the Second Plan period.

CENTRAL SOCIAL WELFARE BOARD

The Central Social Welfare Board was set up in August 1953 as an autonomous body under the general administrative charge of the Union Ministry of Education to promote programmes of social welfare under the First Five-Year Plan. The two main functions of the Board are:—

1. To extend financial assistance to existing voluntary welfare organisations; 2. To sponsor and aid new welfare services in uncovered areas where they are needed.

Budget estimates for 1957-58: Rs. 2 crores. For 1956-57: Rs. 1.25 crores.

The Board gave grants totalling Rs. 195.17 lakhs to 4,114 institutions between August, 1953 and August 1957.

It is estimated that at the end of the Second Plan period the number of such institutions will rise to 7,000 and the grants to Rs. 375.12 lakhs.

Grants totalling Rs. 79,950 were made available to 59 Harijan institutions.

At the end of the Second Plan period 6,660 centres would receive grants amounting to Rs. 200 lakhs, 1,600 acres of land and a total local contribution of Rs. 104 lakhs.

In fulfilment of its second function of sponsoring and aiding new services, the Board has sponsored the following schemes:—

1. Welfare Extension Projects for women and children in rural areas; 2. Urban Family Welfare projects for women in the low income groups in urban areas; 3. After-care programmes for women rescued from moral danger and for other persons discharged from correctional and non-correctional institutions.

A Welfare Extension Project in the integrated pattern will spread out over an area of 100 villages and will have nearly 17 centres.

The activities in the centres are:—

Balwadis (creches-cum-pre-basic schools), maternity services, craft classes, social education for women and recreational activities for women and children. There are nearly 350 such projects functioning all over the country.

The Board will now be in charge of welfare work for women, children and the physically handicapped in all community development blocks. The new pattern now evolved makes for collaboration between the two agencies—the Board and the Community Development Projects—"for the maximum good of the maximum number in the shortest possible time."

Under this pattern, the target is to run 20,000 centres covering about 1,20,000 villages. The Board has to raise a team of 10,000 honorary women workers who can devote all their time to social welfare work.

If the target of the Board is fully achieved by the end of the Second Plan period 1,550 welfare extension projects will have been started, with 13,250 centres in 1,19,000 villages covering a population of 71.5 million with a total expenditure of Rs. 1,505 lakhs in which the Board's contribution would be Rs. 736 lakhs.

From the beginning of January 1957, eleven Welfare Extension Projects were sanctioned by the Central Social Welfare Board—one in the Punjab, four in West Bengal, five in Bombay and one in Rajasthan bringing another 300 villages in these four States within the ambit of Welfare Extension work for women, children and the handicapped sections.

The Central Social Welfare Board will not hereafter entertain any proposals from State Social Welfare Advisory Boards for sanctioning new projects, except those in an advanced stage of consideration, in view of the scheme for the co-ordination of welfare activities for women and children in the community development blocks and Welfare Extension Projects put into effect from about April 1957.

Of the Urban Family Welfare Projects, there are four of these functioning one each at Delhi, Vijayawada, Hyderabad and Poona. These are really industrial co-operatives for the manufacture of matches. The making of match boxes was selected because of the facilities for distribution of work to women in their homes for six out of the nine processes that go into the making of match boxes. A few women work in the factories also. The capacity of each co-operative is 500.

The Ministry of Commerce and Industry provides trained personnel for running the factories, makes a contribution of Rs. 3 lakhs for each project (part loan, part grant) and also provides marketing facilities.

Under the Second Five-Year Plan, a sum of Rs. three crores had been set apart for grants-in-aid to voluntary welfare organisations. Of these, some grants will be given on an assured basis for a continued period of five years to institutions of good standing and for new effort in undeveloped areas. For smaller organisations, grants will continue to be given on a year to year basis.

The larger term grants covering the period 1956-61 were given to 478 institutions totalling Rs. 87,15,750 upto March 1958.

For Welfare Extension Projects, a provision of Rs. 8.6 crores is made in the Second Plan to provide half the cost of 1,320 projects which will include those already started.

The provision for Family Welfare Industrial Co-operatives would come from the plans of the Ministry of Commerce and Industry.

The Board has a training programme for gram-sevikas and midwives which is entrusted to existing voluntary welfare organisations like the Kasturba Gandhi National Memorial Trust, and to hospitals, etc.

The Board is negotiating with the Union Ministry of Food and Agriculture to train some of its gram-sevikas in their Home Economic Wing centres.

The total number of persons to be trained would be about 6,600 gram-sevikas and about 1,320 midwives. A total provision of Rs. 50 lakhs has been made for the purpose.

Advisory Committees

The Central Social Welfare Board appointed an Advisory Committee under the chairmanship of Mr. M. S. Gore, Principal, Delhi School of Social Work to report on the after-care programmes. The Committee came to the conclusion that the programme of Rehabilitation consists of two phases—institutional and post-institutional or after-care. After-care in its turn has two aspects, namely vocational rehabilitation and social rehabilitation.

The Committee has suggested a total outlay of Rs. 1,77,00,000 for after-care services during the Second Plan period.

The Board also appointed another Advisory Committee under the chairmanship of Mrs. Dhanvanti Rama Rau to study the problem of social and moral hygiene in the country. The Report observes that prostitution is mainly an urban problem and as many as 66.5% of women come from the rural areas in the age group 10 to 29. The causes that lead to prostitution:—55.4% economic stress, 27.7 disharmony or family mal-adjustment, and 6.9 social and religious practices. Figures for kidnapping and seducing were not available.

It is the view of the Committee that vigilance or preventive work is very scanty and the standard of rescue work by voluntary institutions needs to be improved.

As a result of the recommendation of the Advisory Committee, appointed by the Board, a programme of social and moral hygiene and after-care services has been drawn up for the Second Plan. Under these, 80 institutions would be set up in groups of five each. One of the institutions will be for the rehabilitation of women rescued from moral danger. Two institutions will be for persons discharged from correctional institutions and the remaining two, for persons discharged from non-correctional institutions. In addition, there will be a shelter in each district to receive and transmit persons to these after-care centres. Each institution will have a production unit on a co-operative basis attached to it. The capacity of each institution will be a hundred and that of the production unit five hundred. This scheme will also be run by Managing Committees consisting of officials and non-officials. A total provision of Rs. 9.5 crores has been made in the plans of the appropriate Ministries in the Government of India and also in the State plans.

By November 1957 the Board had started 20 homes and 13 shelters with 20 production units having 10,000 beneficiaries. It is estimated that by the end of the Second Plan period this number will rise to 80 homes with 380 shelters, 80 production units and cover 40,000 persons.

The Board also sanctioned a grant to the Bureau of Delinquency, Statistics and Research (Children's Aid Society, Bombay) for the preparation of a comprehensive report on juvenile delinquency and allied problems in India.

THE CO-OPERATIVE MOVEMENT

Note : The States referred to in this article are the old States before the reorganization in November 1956, unless otherwise stated.

THERE were 2,40,395 societies of all types at the end of June 1956 as against 2,19,288 societies at the end of 1955-56, representing an increase of 9.6 per cent as against a rise of 10.4 per cent during 1954-55. In the same period, the membership of primary societies rose from 16.02 million on June 30, 1955 to 17.02 million at the close of June 1956. The total working capital of all types of societies showed an increase from Rs. 390.52 crores as on June 30, 1955 to Rs. 468.82 crores during 1955-56 recording an increase of 20.1 per cent as against 11 per cent during the course of the previous year. The credit structure accounted for Rs. 353.15 crores or nearly 75 per cent of the total working capital.

The total advances made during 1955-56 showed a rise of 27 per cent over the previous year's figure as against 6.9 per cent during 1954-55. The increase was more marked in former Part 'A' States. Bombay however outstripped the other States by accounting for Rs. 51.84 crores or 36.8 per cent of the total advances. There was an improvement in the position of overdues being 15.1 per cent of the outstandings at the end of 1955-56 against 17.0 per cent at the close of 1954-55.

At the apex level the increased demand for funds was met out of increased borrowings from the Reserve Bank, Governments and commercial banks which in all amounted to Rs. 19.02 crores as against Rs. 12.14 crores in the previous year. The investments of the State co-operative banks amounted to Rs. 18.39 crores at the close of 1955-56 as against Rs. 14.38 crores a year earlier and of the Central banks amounted to Rs. 23.28 crores as at the end of June 1957, as against Rs. 19.88 crores in the previous year.

The number of agricultural credit societies, which constitute the base of the co-operative credit structure in the country, increased from 43,320 on June 30, 1955, to 1,59,939 at the end of June 1956, their membership and working capital respectively being 77,90,850 and Rs. 79.10 crores at the close of 1955-56. The upward trend in fresh advances which was noted in the preceding year was maintained during the year under report being Rs. 49.62 crores as against Rs. 35.48 crores. Overdues amounting to Rs. 14.06 crores formed 25 per cent of the outstanding loans.

The working capital of all types of societies rose 20.1 per cent higher at Rs. 468.82 crores as on June 30, 1956, as against Rs. 390.52 crores at the close of 1954-55. Of this, deposits stood 37.4 per cent and owned funds 29.8 per cent.

Co-operative societies in the long-term credit sector are most unevenly distributed among different States. At the close of 1955-56 there were nine central land mortgage banks functioning in the country. Central land mortgage banks advanced loans to the tune of Rs. 2.83 crores during the year as against Rs. 2.43 crores in 1954-55. Their membership increased from 1,59,939 to 90,786 during 1955-56. Debentures of a value of Rs. 14.94 crores were in circulation on 30th June 1956 as against Rs. 12.71 crores in the preceding year. Andhra and Madras were themselves accounted for nearly 59 per cent of the total debentures.

There were 302 primary land mortgage banks at the end of June 1956 distributed over 12 States as against 292 banks at the end of 1954-55. Their membership rose from 2,40,931 to 3,13,827 during 1955-56. These banks advanced loans amounting to Rs. 1.74 crores during the same period as against Rs. 1.45 crores during the preceding year.

Agricultural non-credit societies showed an increase in their number and a decrease in their membership at 30,268 and 23,91,826, respectively on June 30, 1956, as against 30,197 and 4,91,508 at the end of the previous year. Their working capital recorded a rise from Rs. 20.78 crores to Rs. 23.41 crores and their sales from Rs. 27.04 crores to Rs. 31.16 crores.

During 1955-56, 2,335 societies were brought under liquidation as against 2,593 societies in the previous year.

At the end of the year 14,820 societies were under liquidation as against 13,639 at the close of June 1955, with liabilities amounting to Rs. 5.93 crores and assets to Rs. 4.78 crores.

During the year under review, profits of practically all types of co-operative societies showed a general improvement. While the primary non-agricultural non-credit societies which had suffered losses to the extent of Rs. 89.53 lakhs during 1954-55, showed profits amounting to Rs. 71.59 lakhs during 1955-56. The State and Central non-credit societies, showed an increase in profits from Rs. 49.23 lakhs in 1954-55 to Rs. 123.63 lakhs in 1955-56. Agricultural credit societies also registered a substantial increase in profits. Primary agricultural non-credit societies which had suffered net losses to the extent of Rs. 19.66 lakhs in 1954-55, earned profits amounting to Rs. 2.80 lakhs in 1955-56. The net profit in 1955-56 of all the societies amounted to Rs. 628.95 crores as against Rs. 271.52 crores in 1954-55.

MAIN FACTS

The main position as at the end of 1955-56 is as follows:

Total number of Co-operative societies, 2,40,395; the total number of agricultural societies, 1,51,911; non-agricultural societies, 33,614.

If we take the average size of an Indian family as 5 this means that about 88.1 million or 22.8 per cent of the population were served by co-operative societies as against 80.1 million or 21 per cent of the population in 1954-55.

Total membership, 17.02 million; membership of agricultural societies, 101,82,676; membership of non-agricultural societies, 63,95,047.

Total number of State and Central banks and banking unions 502; of supervisory unions, 582; of State and central non-credit societies, 2,846.

Total membership of State and central banks and banking unions 3,35,949; membership of supervising unions, 39,259; membership of provincial and central non-credit societies, 19,37,609.

Total number of agr. credit societies, 1,59,939; number of non-agr. credit societies, 10,003; number of agr. non-credit societies, 30,268; number of non-agr. non-credit societies, 27,745.

Total membership of agr. credit societies, 77,90,850; membership of non-agr. credit societies, 30,72,600; membership of agr. non-credit societies, 23,91,826; membership of non-agricultural non-credit societies, 33,22,447.

Note : All the figures below are in crores of rupees.

Working capital (1956 June), 468.82; Paid-up share capital, 77.15; Loans from Co-operative institutions 80.46; from Reserve Bank 14.07; from Government 24.32; other sources 6.51; Deposits from Co-operative institutions 11.97; from primary societies 25.42; from individuals and other sources 138.03; Borrowings of land mortgage banks and societies, 27.39; Reserve and other funds, 62.27.

Loans to individuals, 140.78 crores; Loans repaid by individuals, 118.70 crores; Loans outstanding against individuals, 149.96 crores; Loans overdue from individuals, 22.62 crores.

LAND MORTGAGE BANKS

The position about central land mortgage banks is as follows (Rs. in crores):

No. of banks, 9; no. of individual members, 90,786; debentures in circulation, 14.04; working capital, 18.52; loans advanced, 2.83.

The position about primary land mortgage banks is as follows: no. of banks, 302; no. of members, 3,13,827; working capital, 11.84; loans advanced, 1.74.

CENTRAL FINANCING AGENCIES

The Central financing agencies are of two types, the central bank at the headquarters of a district and the State Co-operative bank at the headquarters of the State.

The position about State Co-operative banks is as follows (Rs. in crores): no. of State Co-operative banks, 24; no. of offices, 166; no. of individual members, 11,743; no. of banks and societies which are members, 24,651; share capital 4.37; reserves, 3.28; working capital, 63.34; loans to individuals, 9.76; loans to societies and banks, 53.58; total investments, 18.39; overdues, 3.7; investments in Government and other trustee securities, 15.98.

The position about central banks (Rs. in crores): No. of banks, 478; owned funds, 15.15; deposits, 55.71; other borrowings, 21.80; bad and doubtful debts, 1.17; working capital, 92.67; no. of individual members 1,44,006; no. of banks and societies which are members, 1,55,549; loans advanced to individuals, 9.44; loans to societies and banks, 70.4; total outstandings, 54.34; overdues, 7.88; total investments, 23.28.

The rate of interest on borrowings and lendings varies from State to State.

NON-AGRICULTURAL CREDIT SOCIETIES

The position about the non-agricultural credit societies is as follows (Rs. in crores):

No. of societies, 10,003; number of members, 30,72,600; working capital, 85.74; loans advanced, 72.06; loans due at end of year 60.87; loans overdue, 5.71; value of goods marketed, 2.27.

NON-CREDIT MOVEMENT

The position about the state non-credit societies (marketing unions) is as follows (Rs. in crores):

No. of societies, 19; no. of individual members, 4,014; no. of societies which are members, 3,535; share capital, 1.23; funds, 1.08; working capital, 2.79; goods sold, 8.48.

The position about other state non-credit societies (whole-sale stores and supply unions) is as follows (Rs. in crores):

No. of societies, 9; no. of individual members, 1,639; no. of societies which are members, 827; share capital, .06; funds, .12; working capital, .40; goods sold, 2.29.

The position about yet other state non-credit societies (industrial unions) is as follows (Rs. in crores):

No. of societies, 24; no. of individual members, 16,93; no. of societies which are members, 4,679; share capital, .74; funds, .47; working capital, 4.34; goods sold, 5.58.

The position of another type of state non-credit societies (housing societies) is as follows (Rs. in crores):

No. of societies, 5; no. of individual members, 512; no. of societies which are members, 534; share capital, .70; funds, .01; working capital, 1.33; loans advanced, .29.

The position about the rest of the state non-credit societies is as follows (Rs. in crores):

No. of societies, 25; no. of individual members, 4,295; no. of societies which are members, 1,066; share capital, .03; funds, .06; working capital, .83; goods sold, .28; loans advanced, .04.

CENTRAL NON-CREDIT SOCIETIES

The position is as follows (Rs. in crores):

Total no. 2,764; no. of marketing unions or federations, 2,354; whole-sale stores and supply unions, 114; industrial unions, 113; milk unions, 67; housing societies, 2; other types, 114; no. of individual members, 18,47,669; no. of societies which are members, 67,046; paid-up capital, 8.73; funds, 6.97; working capital, 19.93; goods sold, 57.86.

AGRICULTURAL NON-CREDIT SOCIETIES

Total no. of societies, 30,268; purchase and sale societies, 2,761; production and sale societies, 14,100; production societies, 6,530; social services societies, 5,681; housing 228; no. of members 23,91,826; share capital, Rs. 8.85 crores; funds, Rs. 5.17 crores; working capital, Rs. 28.40 crores; loans made during year, Rs. 11.65 crores; value of goods sold, Rs. 81.16 crores.

NON-AGRICULTURAL NON-CREDIT SOCIETIES

Total no. of societies, 27,745; purchase and sale societies, 8,077; production and sale societies, 11,525; production societies, 2,557; social services societies, 2,829; housing societies, 2,728; insurance, 30; no. of members, 33,22,447; share capital, Rs. 11.62 crores; funds, Rs. 15.85 crores; working capital, Rs. 58.52 crores; value of goods sold, Rs. 44.73 crores.

INSURANCE SOCIETIES

The position of life insurance societies is as follows:

No. of societies, 24; no. of members, 2,78,543; no. of policies, 2,54,762; sum assured, Rs. 27,86,97,000; premium income, Rs. 1,35,97,000; life fund, Rs. 7,05,05,000; assets, Rs. 7,82,62,000; cost of management, Rs. 35,03,000.

SUPERVISING UNIONS

The position about supervising unions is as follows:

No. of unions, 582; societies affiliated, 39,259; individual members of societies affiliated, 32.86 lakhs; working capital of affiliated societies, Rs. 54.24-94 lakhs.

The position about state unions and institutes is as follows:

No. of unions, 30; primary affiliated societies, 41,267; central affiliated societies, 713; individual members, 1,120; expenditure Rs. 45.32 lakhs.

FINANCIAL STRUCTURE

The total working capital in the movement on June 30, 1956 was Rs. 463.82 crores composed of owned funds 139.44 crores, deposits 175.43 crores, debentures 15.02 crores, and loans 125.88 crores.

RESERVE BANK

As a result of the Rural Credit Survey Committee's report, certain changes have been made in the type of assistance that is now given to rural areas.

In regard to credit societies, the resources that are now provided through the medium of the Reserve Bank by the augmentation of share capital at all stages—primary, district and the apex level—are about Rs. 5 crores.

Medium-term resources to the State co-operatives, the apex banks and the Central

This working capital was spread among different types of institutions as under :—

Institutions	No.	Working Capital (Rs. in crores)
State Banks	24	68.84
Central Banks and Banking unions	478	92.67
Primary Agricultural Credit Societies	1,59,989	79.10
Primary Non-Agricultural Credit Societies	10,003	85.74
Credit—Total	1,70,444	320.85
State Non-credit Societies	82	9.20
Central Non-credit Societies	2,764	19.94
Primary Agricultural Non-credit Societies	30,268	28.41
Primary Non-agricultural Non-credit Societies	27,745	58.13
Non-credit—Total	60,859	115.68
Central Land Mortgage Banks	9	18.53
Primary Land Mortgage Banks	302	11.35
Land Mortgage—Total	311	29.88
GRAND TOTAL	2,31,614*	466.41†

* The figure does not include 8,160 grain banks.

† The figure does not include working capital of grain banks which amounted to Rs. 2.42 crores.

Government are provided by the Reserve Bank to the extent of about Rs. 5 crores.

The Reserve Bank lends what might be called short-term money, which really means 12 months, for production and marketing through co-operatives. It is as much as Rs. 40 crores a year now; to this has to be added a sum of Rs. 35 crores a year which the societies themselves are putting up.

The Co-operative Development Board, which is working under the aegis of the Food and Agriculture Ministry, has spent over Rs. 1 crore. They have received a grant of Rs. 1 crore for the

building of godowns and for subsidising the building of godowns.

The Reserve Bank has been taking a keen interest in providing for the training of staff for a number of years in order that co-operative societies might have the services of qualified people; and the subsidies that have been given for this purpose by way of recurring expenditure amount to more than a crore of rupees.

Moreover, the Reserve Bank has also got its own training schemes on which over a period of years it has spent nearly Rs. 50 lakhs.

The following tables give the position as regards Co-operative Societies for the year 1955-56 :-

State*	CENTRAL										AGRICULTURAL									
	State and Central Banks and Banking Unions (a)			Non-Credit (b)			Central Land Mortgage Banks (c)			State Unions or Institutes (d)			Supervising Unions (e)		Credit		Non-Credit		Primary Land Mortgage Banks

* States existing before the reorganization in November 1956.

** Includes deposits and other borrowings amounting to Rs. 1,17,10 for which breakdown is not available.

† Loan transactions of the central land mortgage banks in Orissa, Saurashtra and Travancore-Cochin which advance loans to individuals direct are also included.

LABOUR

THE achievement of Independence and the emergence of India as a Republic wedded to the idea of a welfare State has made the welfare of the working classes a prime responsibility of the State. Several administrative and legislative measures of far-reaching significance have already been introduced in the country. Health, education, housing and social welfare for the masses find a prominent place in the First and Second Five Year Plans.

The general position in 1954-55 was as follows:—

Total Labour Force ..	189,800,000
(men 98,700,000; women 40,600,000).	
No. employed in factories coming under the Factories Act of 1948 ..	2,690,403
No. of trade unions on register ..	6,648
No. of trade unions which submitted returns of membership ..	8,113
No. of members of trade unions submitting returns ..	2,170,450

The Central co-ordinating authority in India for questions connected with labour legislation is the Ministry of Labour of the Government of India with the Labour Minister in charge. The administration of matters connected with the English and Indian Merchant Shipping Acts, the Mercantile Marine Department and Indian Seamen is with the Ministry of Transport. In respect of all the Railways, the Labour Minister is responsible for the administration of the Payment of Wages Act, 1936, trade disputes, hours of work for employees not covered by the Factories Act and regulation of employment of children. He is also responsible for regulation of labour and safety in respect of mines and oilfields; trade disputes in industries, businesses or undertakings carried on by the Central Government, and inter-State migration.

Among the more important Acts that govern labour conditions and relations in India are the following: 1. Indian Factories Act, 1948; 2. Indian Mines Act; 3. Payment of Wages Act; 4. Minimum Wages Act; 5. Workmen's Compensation Act; 6. Maternity Benefit Act (States); 7. Indian Trades Union Act; 8. Industrial Disputes Act; Industrial Disputes (Appellate Tribunal) Act; 9. Tea Districts Emigrant Labour Act; 10. Shop Assistants Act (States); 11. Employees' State Insurance Act; 12. Collection of Statistics Act; 13. Employees Provident Funds Act.

FACTORIES ACT, 1948

The Act covers all industrial establishments employing 10 or more workers and using power and establishments employing 20 or more workers and not using power. The State Governments have been empowered to apply the provisions of the Act to any premises, irrespective of the number of persons employed, where a manufacturing process is carried on with or without the aid of power, except where the work is done by the worker solely with the aid of his family.

The Act prescribes that every factory should be kept clean and free from effluvia arising from drains, privies, etc., and lays down stipulations regarding sweeping, cleaning, disinfecting, white-washing, ventilation, temperature, drinking water, latrines, etc.

In existing factories 350 cubic feet of space should be provided for every workman. In new factories to be built the space for each workman should be 500 cubic feet.

Elaborate provision regarding safety such as fencing of machinery, etc., has been laid down. Women and children are prohibited from employment on certain types of machinery.

Washing facilities for the workers, appliances for first-aid, rest shelters, canteens, etc., are prescribed under the Act. In every factory where 500 or more workers are employed the occupier shall employ Welfare Officers.

Weekly hours of work have been fixed at 48 and daily hours at 9. The maximum spread-over allowed is 10½ hours. No worker shall work for more than 6 hours before he has had an interval for rest of at least half an hour.

Payment for overtime has been prescribed at double ordinary rate of wages.

No woman shall be employed in any factory except between the hours of 6 a.m. and 7 p.m.

A weekly day of rest has also been prescribed.

No child who has not completed his fourteenth year shall be required or allowed to work in any factory. A child who has completed his fourteenth year or an adolescent (a person who has not completed his eighteenth year) shall not be allowed to work in a factory unless a certificate of fitness by a certifying surgeon is in the custody of the manager of the factory and he carries while at work a token giving reference to such certificate. No 'child' shall be employed or permitted to work in any factory for more than 4½ hours in a day or between the hours of 7 p.m. and 6 a.m.

Every adult worker who has completed a period of 12 months' continuous service in a factory (later amended, see below) shall be allowed during the subsequent period of 12 months leave with wages including dearness allowance for a period calculated at the rate of one day for every 20 days of work performed by him during the previous 12 months, subject to a minimum of 10 days. In the case of children the leave should be at the rate of one day for every 15 days of work subject to a minimum of 14 days.

It may be added here that the recent tendency for many units particularly in south India has been to allow holidays with pay in excess of the minimum stipulated.

In many awards given by Adjudicators leave with pay upto 14 days has been granted.

Where any worker in a factory contracts any disease specified in the schedule appended to the Act, the manager of the factory shall send notice thereof to such authorities, and in such form and within such time, as may be prescribed.

The administration of the Act is left to the State Governments. The Central Government have set up an advisory organisation, namely the Office of the Chief Adviser, Factories.

The Act was amended in 1954. Under this amendment eligibility for leave with pay would be 240 days' service during a calendar year. Proportionate leave will be granted to those whose service starts after the beginning of the calendar year.

The annual leave with wages will be exclusive of holidays during or immediately before or after the period of leave.

The leave can be carried forward from one calendar year to another provided the maximum does not exceed 30 days in the case of an adult and 40 days in the case of a child.

No prior notice will be necessary when a worker requires leave to cover a period of illness.

The Act permits six hours' work at a stretch without any interval when the total number of hours to be worked on any day in a shift does not exceed six.

It also permits newspaper printing presses to work their entire night shift of six hours at a stretch.

It allows a worker a maximum of 50 overtime hours in a quarter year which is deemed to have begun on the first day of January, April, July or October.

It enables continuous employment of workers in case some of the subsequent shift workers do not turn up in time.

For the purpose of computing the rate of wages of a person who takes advantage of the concessional sale of foodgrains and other articles the basis will be the maximum ration admissible to a standard family of a specific number of consumption units.

Women and children are prohibited from working in factories at night.

Women and children are also prohibited from cleaning, lubricating or adjusting any prime mover of transmission machinery while it is in motion if such work exposes them to risk of injury.

FACTORY STATISTICS

Under the provisions of the Factories Act, 1948, registered factories submit annual and half yearly returns on employment to the Chief Inspectors of Factories in the various States. All-India figures are compiled by the Labour Bureau and are published in the *Indian Labour Gazette*.

The number of factories on registers in the areas covered by the (pre-reorganization) Part A States and of the States of Ajmer, Coorg, Delhi and Andamans during 1954 and 1955 was 20,053 and 30,148 respectively.

In the Part B States and the remaining Part C States there were in 1952, 4,794 factories with an average daily employment of 4,50,148.

The following table sets out the statistics of the average daily numbers of persons employed in factories during the year 1955.

WORKERS EMPLOYED 1955.
(Section 2m(i) and 2m(ii) factories only.)

Industry	Average Number of Workers Employed Daily
Processes allied to agriculture (Oils and Presses)	102,924
Food except beverages	336,682
Beverages	8,007
Tobacco	134,137
Textiles	1,043,222
Footwear, other wearing apparels and made up textile goods	12,442
Wood and Cork except furniture	27,616
Furniture and fixture	8,597
Paper and paper products	25,298
Printing, publishing and allied industries	75,192
Leather and leather products (except footwear)	19,147
Rubber and rubber products	24,611
Chemicals and Chemical products	85,907
Products of petroleum and coal	11,782
Non-metallic mineral products (except products of petroleum and coal)	100,287
Basic metal industries	95,273
Metal products (except machinery and transport equipment)	60,471
Machinery (except electrical machinery)	96,359
Electrical machinery, apparatus, appliances and supplies	30,552
Transport equipment	214,469
Miscellaneous industries	129,308
Electricity, gas and steam	26,550
Water and sanitary services	5,430
Recreation services (Cinema Studios)	4,014
Personal services (Laundries, dyeing, cleaning)	15,076
Total	2,690,403

Women formed 10.9 per cent of factory employment during 1955. Adolescents and children constituted 0.48 per cent and 0.18 per cent respectively.

MINES ACT

With a view to amending and consolidating the law relating to the regulation of labour and safety in mines, the Mines Act, 1952 was passed and brought into force from July 1952. The Act extends to the whole of India except Jammu and Kashmir. The Act restricts the hours of work for adults to 9 per day and 48 per week above ground and 8 per day and 48 per week below ground. Overtime work below ground

should be paid for at twice the ordinary rate and above ground at 1½ times the ordinary rate. The Act prohibits the employment of children below 15 years of age. It also prohibits the employment of women in any part of a mine which is below the ground level. Women can be employed above ground only between the hours of 6 a.m. and 7 p.m. Adolescents who have not completed 18 years of age are not allowed to work underground unless they are certified fit to work as adults. Adolescents not certified fit to work as adults should not be allowed to work for more than 4½ hours a day. Annual leave with wages for a period of 14 days in a year in the case of monthly-paid employees and 7 days in the case of weekly-paid employees

and piece workers is granted to the workers. Provisions relating to health and safety are laid down in the Act, besides which the Central Government may direct that the Health and Safety provisions under the Factories Act, 1948 shall apply to all mines and the precincts thereof.

MINING STATISTICS

Figures are published in a Monthly Bulletin which is issued by the Chief Inspector of Mines. The average daily number of workers employed in mines in 1939, 1951, 1952, 1953 and 1954 was 298,650; 549,048; 559,196; 503,868 and 568,254 respectively. The available figures are given in the following table:—

EMPLOYMENT IN MINES IN 1954

(Figures for the Indian Union)

* Old States existing before the reorganization on November 1, 1956.

PAYMENT OF WAGES ACT

The Act applies only to wages and salaries which average below Rs. 200 per month.

According to an amending Bill passed by the Lok Sabha in December 1957 the scope of the Act will be extended. The wage limit is to be raised to Rs. 400 a month and the Act will apply to construction workers.

For purposes of the Act 'wages' means all remuneration capable of being expressed in terms of money and includes any bonus or additional remuneration but does not include travelling allowances, employers' contribution to provident funds, gratuities payable on discharge or the value of housing or other services rendered to the worker.

No wage period is to exceed one month and wages are to be paid within a prescribed time not exceeding 10 days from the end of the wage period. All wages are to be paid in coin and, or currency notes. Fines are not to exceed half anna in the rupee. Permissible deductions from wages have also been specified.

The administration of the Act, as far as factories are concerned, has been entrusted to the Inspectors of Factories in the States. In regard to persons employed in mines and in railways the responsibility of administering the Act rests upon the Chief Labour Commissioner (Central).

MINIMUM WAGES ACT, 1948

The Act covers the following industries or types of establishments. Woollen carpet making or shawl weaving; rice, flour or dal mills; tobacco manufacturing (including bidi making); plantations; oil mills; employment under any local authority; road construction or building operations; stone breaking or stone crushing; lac manufacturing; mica works; public motor transport; tanneries and leather manufacturing; and agriculture. The appropriate Governments

can extend the application of the Act to any industry wherein, in their opinion, minimum wages should statutorily be fixed.

The Act requires the Central or State Governments, as the case may be, to fix minimum rates of wages payable to persons employed in the industries mentioned above.

The Act provides for the fixation of minimum time rates, minimum piece rates, guaranteed time rates and overtime rates appropriate to different occupations, or localities and for adults, adolescents, children and apprentices. The minimum rate may consist of a basic rate and a cost of living allowance and/or cash value of concessions or it may be an all-inclusive rate.

The Act authorises the appropriate Governments to appoint Committees and Sub-Committees to hold inquiries and advise them to fix minimum rates of wages in respect of any scheduled employment or for the revision of these rates. They may also appoint an Advisory Board for co-ordinating the work of various Committees and also to advise Government generally in the matter of fixing or revising minimum rates of wages.

The Central Government have set up a Central Advisory Board for advising the Central and State Governments and for co-ordinating the work of State Advisory Boards. The Committees and Sub-Committees as well as the Central and State Advisory Boards are to consist of equal number of representatives of employers and employees, and of independent persons not exceeding a third of the total number of members.

The Central or the State Governments, as the case may be, can fix the number of hours of work per day, provide for a weekly holiday, etc., in regard to any employment in which minimum wages have been fixed under the Act.

WORKMEN'S COMPENSATION ACT

Under the Act payment of compensation has been made obligatory on all employers whose employees come within its scope, and injured workmen or the dependents of those killed can obtain compensation in all cases where personal injury has been caused by accident arising out of and in the course of employment and where, except in the case of injury resulting in death, the accident is not directly attributable to the workman having been at the time of the accident under the influence of drink or drugs or to wilful disobedience of rules or orders or wilful disregard of safety devices.

Besides bodily injuries the contracting of certain occupational diseases such as anthrax and mercury, lead and phosphorus poisoning were deemed and treated for the purposes of compensation, as injuries caused by accident, provided however, that the worker concerned was in the service of the same employer for more than six months.

The main provisions of the Workmen's Compensation Act as it stands today are as follows:

In all cases persons employed in an administrative or clerical capacity and those whose monthly earnings exceed Rs. 400 (except Railway Servants) are excluded.

As far as seamen are concerned, those employed on ships registered in India are covered. But if accidents take place within the three mile limit of the territorial waters the Act applies even to those employed on ships not registered in India.

Not only workmen employed within the precincts of a factory or a mine but also men engaged in any kind of work incidental to or connected with a factory or any mining operation are entitled to the benefits of the Act.

Any person who is covered by the Employees' State Insurance Act, 1948, and who is entitled to receive disablement or dependent's benefit from the Employees' State Insurance Corporation is not entitled to claim any compensation from the employer under this Act.

The amount of compensation payable depends, in the case of death, on the average monthly wages of the deceased workman and in the case of an injured workman both on the average monthly wages and the extent of disablement. The term 'wages' includes overtime pay and the value of any concessions or benefits in the form of food, clothing, free quarters, etc.

The amounts of compensation payable in the case of an injured workman whose monthly wages are not more than Rs. 10 are Rs. 500 for death, Rs. 700 for permanent total, and half the monthly wages for temporary disablement. For a workman whose monthly wages are between Rs. 50 and Rs. 60, the corresponding figures are Rs. 1,800, Rs. 2,520 and Rs. 15 respectively. The maxima for persons earning over Rs. 300 per month are Rs. 4,800, Rs. 6,300 and Rs. 80 per month respectively. In the case of miners the amounts of compensation for death and for permanent total disablement are at the uniform rate of Rs. 290 and Rs. 1,200 respectively, and half the monthly wage for temporary disablement.

The interests of dependents in cases of fatal accidents have been safeguarded by ensuring that (1) all cases of fatal accidents should be brought to the notice of the Commissioner; (2) in all cases where an employer admits liability the amount of compensation payable is to be promptly deposited with the Commissioner; and (3) in cases where the employer disclaims liability and there are good grounds for believing compensation to be payable, the dependents get the information necessary to enable them to judge if they should make a claim or not.

An employer is permitted to make to any dependent advances on account of compensation not exceeding an aggregate of one hundred rupees.

The Act is administered by Commissioners appointed by State Governments. In areas in which the Employees' State Insurance Scheme

has been implemented, the payment of workmen's compensation is the responsibility of the E.S.I. Corporation.

STATISTICS

An annual note on the working of the Act is published regularly in the *Indian Labour Gazette*. The latest available statistics on the subject will be found in the following table :—

Year	Total number of cases	Total compensation paid
1945 ..	67,390	Rs. 42,25,389

Facilities for accident insurance are now being provided by a number of leading insurance companies in the country and the most important of these are the Claims Bureau in Calcutta and Madras.

The Millowners' Mutual Insurance Association, Ltd., Bombay, is an organisation of employers one of whose objects is the mutual insurance of members against liability to pay compensation or damages to workmen employed by them.

The table below shows the accident rate per thousand workers and the average compensation paid in the main industry groups during 1955.

MATERNITY BENEFIT ACT

The first Maternity Benefit Act in India was passed by the Government of the former Bombay State in 1929. After that, Maternity Benefit Acts were passed by the Governments of all the pre-reorganization Part "A" States; Hyderabad, Madhya Bharat, Mysore, Rajasthan, Saurashtra and Travancore-Cochin among Part "B" States; Ajmer, Bhopal, Delhi and Tripura among the pre-reorganization Part "C" States had similar Acts.

The West Bengal Legislature passed a separate Act in 1948 for women employed in tea-plantations under the title of the West Bengal Maternity Benefit (Tea Estates) Act, 1948.

The Government of India passed the Mines Maternity Benefit Act in 1941.

The scope, qualifying conditions and rate of benefit are not uniform under the various State Acts. The Andhra, Assam, Madhya Pradesh, the Punjab, Orissa, Mysore, Hyderabad, Travancore-Cochin and Bhopal Acts apply to women employed in regulated factories. The other State Acts apply to women employed in non-seasonal factories only. The Bihar Act till recently applied to non-seasonal factories only, but by an amending Act passed in 1953 it now applies to all regulated factories except those engaged in cotton spinning, jute pressing, manufacture of lac or sugar (including gur). The Bombay Act applies to women employed in regulated factories

in certain notified districts and towns of the State. Women employed in plantations in Assam, parts of Kerala and West Bengal only are entitled to maternity benefits under the respective Acts.

The qualifying period of service is generally 9 months though under the Bihar, Orissa, Uttar Pradesh and the Mines Acts it is 6 months. The period of benefits is 8 weeks in most of the States; it is, however, 7 weeks in Madras, Andhra and Orissa and 12 weeks in Hyderabad and Travancore-Cochin under the Acts.

The rate of benefit is annas eight per day in Madras and Andhra under the Acts. In the Hyderabad Act and the Mines Benefit Act the rate is Ann. 12 or average daily earnings whichever is more. In Orissa, it is the actual daily wage or salary subject to a maximum of Ann. 12 per day. The Travancore-Cochin and West Bengal (Tea Estates) Acts provide for Rs. 5-4-0 per week. Women workers on plantations in Assam receive under the Act Ann. 11 Pies 6 per day in addition to the usual food concessions and women in other industries in the State get their average weekly earnings subject to a minimum of Rs. 2. Although maternity benefit legislation does not apply to plantations in other parts of South India, the employers' associations have recommended payment of benefit on a voluntary basis at the rate of Ann. 12 per day for a period of 8 weeks.

The Mines Maternity Benefit Act and the Assam, Bihar and U.P. Acts provide for some additional benefits which take the form of free

medical treatment, maternity bonus, provision of creches, additional rest intervals for nursing mothers etc. In the Central Act for women employed in mines and in the U.P. and Bihar Acts, an additional bonus of Rs. 9 and in Rajasthan Rs. 5 is paid if the women avail themselves of the services of a qualified mid-wife. But if such assistance is provided by or in an institution of an employer, the bonus is not paid.

The U.P. and Bihar Acts lay down that factories employing 50 or more women or where women employed form 25 per cent. or more of the workers, should maintain creches, and appoint female attendants to look after the children.

Provision is made in the Acts for protection of women against dismissal by the employers to avoid liability of payment. Nor can a woman be discharged during the period of maternity leave. Employment of women during maternity leave is a penal offence but the Assam Act permits such employment provided it is on light work during the four weeks preceding child birth. The West Bengal Maternity (Tea Estates) Act also permits such employment on light work during 6 weeks before confinement if certified fit to do such work by the prescribed medical practitioners.

The administration of the Acts in the States is the responsibility of the Factory Inspectors. The enforcement of the Mines Maternity Benefit Act in the coal mines is the responsibility of the Coal Mines Welfare Commissioner. In other mines, it is administered by the Chief Inspector of Mines.

The table below shows the figures relating to payment of Maternity Benefit in 1955 :

State†	Average No. of women employed.	No. of women who claimed maternity benefit.	No. of women who were paid maternity benefit in full or in part.	No. of cases in which a bonus was given or maternity benefit was paid for miscarriage or death.	Total amount paid.

† States before reorganization in Nov. 1956.

The average amount of benefit paid in the years 1954 and 1955 was Rs. 82 and Rs. 74 for Part 'A' States; Rs. 61 and Rs. 58 for Part 'B' States; Rs. 20 and Rs. 23 for Part 'C' States; and Rs. 38 and Rs. 39 for Mines.

TRADE UNIONS ACT, 1926

This Act was brought into operation with effect from 1st June 1927 and was slightly amended in 1928.

Apart from the necessary provisions for administration and penalties, the Indian Trade Unions Act, 1926, makes provision for three matters: (1) conditions governing the registration of trade unions; (2) the obligations to which a trade union is subject after registration; and (3) the rights and privileges accorded to registered unions. 'Trade Union' has been defined in such a way as to cover both combinations of workers and of employers but not of workers and employers. Persons under the age of 15 are debarred from membership of any registered union.

The administration of the Act is entirely on a State basis and each State Government is required to appoint a Registrar of Trade Unions. Any seven or more members of a union can apply for registration but no union can be registered unless at least fifty per cent of the executive consist of members actually engaged in the unit or group of units which the union proposes to cover.

Any union aggrieved by the refusal of a Registrar to register it or by the cancellation of its registration may prefer an appeal to a judge appointed by the State Government for the purpose; and, in the event of the dismissal of such an appeal, the aggrieved party has the right of a further appeal to the High Court.

The general funds of registered trade unions cannot be spent on objects other than those specified in Section 15 of the Act nor on political objects; but the Act makes provision for the creation of a separate political fund, subscription to which may be collected from such members as voluntarily desire to contribute to it. All registered unions are required to submit annually to the Registrar duly audited statements of accounts in prescribed forms together with changes in officers and the executive and a copy of the rules corrected up to date.

A registered trade union is immune from prosecution for criminal conspiracy in respect of an agreement, unless it is one to commit an offence, made between its members for the furtherance of a trade dispute or for restraint of trade and from any legal difficulties arising therefrom.

STATISTICS OF TRADE UNIONS

All-India Figures.—The following tabular statements show the latest available position in regard to Registered Trade Unions:—

REGISTERED TRADE UNIONS AND MEMBERSHIP

Mining	78,086	30,062	64,778	32,031
Sugar	52,830	2,182	30,265	9,974
Others	4,19,779	156,530	—	3,57,388
TOTAL	13,80,634	306,963	4,35,899	5,40,910

The INTUC figures are for Nov. 1957, the AITUC for March 1955, the HMS for Dec. 1956 and UTUC for March 1957. The figures were supplied by the parties.

INDUSTRIAL DISPUTES ACT

The Act provides for setting up of two types of organisations, namely, (1) Works Committees and (2) Industrial Tribunals for the prevention or settlement of disputes. It makes conciliation compulsory in all disputes in public utility services and optional in other cases.

Section 22 of the Act declares any strike or lock-out in a public utility service to be illegal if it is commenced or declared (i) without giving to the employer or employees, as the case may be, a notice of strike or lock-out in a prescribed manner, within six weeks before striking or declaring a lock-out, or (ii) within 14 days of giving such notice, or (iii) before the expiry of the date of strike specified in any such notice; or (iv) during the pendency of any conciliation proceedings before a conciliation officer and 7 days after the conclusion of such proceedings, etc. The Act also prohibits certain other strikes and lock-outs and declares them illegal if commenced or declared during the pendency of (i) conciliation proceedings before a Board and 7 days after the conclusion of such proceedings; (ii) proceedings before a Tribunal and 2 months after the conclusion of such proceedings, or (iii) during any period in which a settlement or award is in operation, in respect of any of the matters covered by the settlement or award.

The Act was amended once in 1953 and twice in 1956. It now provides that no workman, who has been in continuous employment for more than a year, shall be retrenched unless he has been given a month's notice or wages in lieu thereof and also compensation calculated at the rate of 15 days' average pay for every completed year of service. If a workman who has put in more than a year's continuous service is laid off, he is required to be paid compensation which should be equal to 50 per cent. of the total of basic wages and dearness allowance for a maximum of 45 days in a year unless periods of lay-off after the first 45 days are of the duration of one week or more on each occasion.

According to a decision of the Supreme Court in November 1956 on retrenchment compensation, workers cannot, under the Act, claim compensation for retrenchment in case of bona fide closure of business or termination of their services by the employer on the business being sold to another employer.

The definition of the term "workman" has been extended to cover technical personnel and supervisory staff drawing upto Rs. 500 per month.

The machinery for adjudication of disputes has been recast and a three-tier machinery consisting of National Tribunals, Industrial Tribunals and Labour Courts is brought into being. Functions of these tribunals are demarcated and the importance of the dispute will determine which tribunal should adjudicate upon it. The tribunals are authorised to appoint experts having special knowledge as assessors to advise them. Schedules covering subjects which should go before each tribunal are attached to the Act.

Every employer who proposes to effect any change in the conditions of service of his workmen in respect of wages, hours of work, rationalisation, shift-working, increase or reduction in complement, etc. is required to give 3 weeks' prior notice to the workmen concerned.

The Act also provides for voluntary reference of disputes to arbitration by agreement between the employer and the workmen. Such a reference may be made to the Tribunals constituted under the Act.

All State Acts relating to the settlement or adjudication of disputes are expressly saved and the Industrial Disputes Act will not override them.

STATISTICS

The following table sets out the number of disputes in some of the years since 1947, the number of persons affected by these disputes and the total time lost in man-days:

Year	Number of disputes	Number of workpeople involved	Number of man-days lost
1947 ..	1,811	1,840,784	16,562,666
1948 ..	1,259	1,059,120	7,837,178
1949 ..	820	685,467	6,600,695
1950 ..	814	719,883	12,806,704
1951 ..	1,071	691,321	3,818,928
1952 ..	963	809,242	3,386,961
1953 ..	772	466,607	3,382,608
1954 ..	840	477,138	3,372,630
1955 ..	1,166	527,787	5,697,848
1956 ..	1,203	715,130	6,992,040

An analysis of the disputes for the year 1956 by States is given in the following table:—

State*	No. of disputes	No. of workpeople involved	No. of man-days lost
Andhra ..	34	25,214	86,632
Assam ..	20	7,417	55,678
Bihar ..	89	40,437	509,159
Bombay ..	296	244,141	702,296
Madhya Pradesh ..	26	40,143	1,275,350
Madras ..	212	82,724	461,072
Missa ..	6	3,653	13,277
Punjab ..	36	9,718	57,819
Tamil Nadu ..	144	45,274	328,789
West Bengal ..	241	200,078	3,452,644
Ajmer ..	2	70	4,376
Delhi ..	97	16,253	44,948
Total ..	1,203	715,130	6,992,040

Classification of the disputes by causes shows that wages, allowances and bonus involved 36.1 per cent of the workers and 31.9 per cent of man-days lost; personnel, 23.0 per cent of workers and 14.4 per cent of man-days; leave and hours of work, 5.4 per cent workers and 2 per cent man-days; retrenchment, 10.1 per cent workers and 4.8 per cent man-days; loss of 18.9 per cent workers and 37.3 per cent man-days; not known 6.6 per cent workers and 4.1 per cent man-days.

Statistics presented in this section relate to industrial disputes which have resulted in work-stoppages involving 10 or more workers.

APPELLATE TRIBUNAL ACT, 1950

The divergent and sometimes conflicting decisions given by the various Tribunals set up in different States under the Industrial Disputes Act, 1947 created serious anomalies leading to discontent and bitterness among workers to industrial disputes. To meet this situation the Government of India enacted the Industrial Disputes (Appellate Tribunal) Act, 1950 to enable them to set up a Labour Appellate Tribunal which would hear appeals from awards or decisions of Industrial Tribunals, Industrial Courts, Wage Boards, and other statutory bodies set up by the Central or State Governments to adjudicate on industrial disputes.

The Appellate Tribunal consists of a Chairman and such number of other members as the Government may, from time to time, think fit to appoint. The Chairman is authorised to nominate as many benches of the Appellate Tribunal as he may consider necessary. Each bench is to consist of not less than two members, one of whom is to be appointed as the President. Four benches of the Tribunal are functioning at Calcutta, Bombay, Lucknow and Madras.

The Appellate Tribunal is empowered to hear appeals from any award or decision of an adjudicating authority if (i) the appeal involves any substantial question of law, or (ii) the award or decision relates to wages, bonus or travelling allowance, employers' contribution to any pension or provident fund, gratuity payable on discharge, classification by grades, retrenchment and any other matter which may be prescribed by rules made under the Act.

During the period of 30 days allowed for filing the appeal or during the pendency of an appeal no employer shall alter the conditions of service to the prejudice of the workmen concerned nor shall he discharge or punish any such workman without obtaining the written permission of the Appellate Tribunal.

The Industrial Disputes (Appellate Tribunal) Act, 1950 has been repealed by the Industrial Disputes (Amendment and Miscellaneous Provisions) Act, 1956 with effect from 1st September 1956. After that date no appeals were to be entertained. Pending appeals were however, to be disposed of by the Appellate Tribunal as if the Act had not been repealed.

On 30th June 1956 the number of appeals pending with the Labour Appellate Tribunal was 593 of which no less than 145 were more than one year old.

The headquarters of the Tribunal are now in Bombay.

RECENT COLLECTIVE AGREEMENTS

Some recent examples of collective agreements are given below.

The Ahmedabad Millowners' Association and the Textile Labour Association signed two collective agreements on 27th June 1955. The first Agreement provides that disputes between a member-mill of the Association and the Trade Union shall be settled by mutual negotiations and if negotiations fail by arbitration. This agreement is to be in force till 30th Dec. 1957.

The second Agreement lays down the formula for grant of bonus.

The Bombay Millowners' Association and the Rashtriya Mill Mazdoor Sangh, Bombay have also reached a similar agreement. The Bonus Agreement which was signed on 1st March 1956, is to cover the period 1952 to 1957. The pact provides for the appointment of a Commission to investigate into the requirements of industry for rehabilitation and modernisation. Finally and though this does not form a part of the Agreement, the Association has agreed to pay a sum of Rs. 50 lakhs towards industrial housing which will enable 4,000 tenements to be built.

The machinery for settlement of disputes, an agreement regarding which was signed between the parties on 18th September 1956 consists of a Committee of Assessors and a Board of Arbitrators.

There is a tendency for these agreements to be copied with appropriate changes in other centres in India.

The agreement between the Tata Iron and Steel Co. Ltd. and the Tata Workers Union reached on 8th January 1956, is to remain in force for 3 years. The most distinctive feature of the agreement is that it provides, *inter alia*, for union security, workers' participation in management and recognition of the union as the sole bargaining agent.

The Company accepts the principle of union membership security system and the collection of union dues through the pay-roll. The Union recognises the right of the Company to take disciplinary action and lay down personnel policies.

With a view to the improvement of productivity, the parties agree on the need for establishment of a standard force in each department, on the assurance that no employee will be retrenched and that if they are transferred to other jobs after training their earnings will not be adversely affected.

The agreement stipulates that a programme of job evaluation should jointly be undertaken in order to eliminate inequities in the structure of wages and other emoluments.

In a supplementary agreement reached on 4th August 1956 machinery has been devised to associate works employees with Management in the working of the industry.

A five-year Agreement between the Indian Aluminium Company Limited, Calcutta and its workers represented by the Indian Aluminium Belur Works Employees Union was reached on the 31st August 1956.

The most significant part of the Agreement is that dealing with bonus.

WORKING JOURNALISTS' ACT

(See under article on the Press)

THE EMPLOYEES' PROVIDENT FUNDS ACT, 1952

The Act was enacted to provide for the institution of provident funds for employees in factories and other establishments. It applies to factories employing fifty or more persons in the cement, cigarettes, electrical, mechanical or general engineering products, iron and steel, textiles (made wholly or in part of cotton, wool, jute or silk whether natural or artificial) industries.

The Scheme framed under the Act requires the employer and the employee to contribute at the rate of 6½ per cent of the basic wages and the dearness allowance. The Scheme which was enforced on 1st November 1952 applies to employees whose basic pay does not exceed Rs. 300 per month.

The Act does not apply to any factory belonging to the Government or a local authority and any other factory established before or after 1st November 1952 unless three years have elapsed since its establishment. The Central Government is also empowered to exempt any class of factories having regard to the financial position or other circumstances of the case by a notification in the Official Gazette.

The Scheme provides for prompt settlement of claims in case of retirement, migration, death or other circumstances. Withdrawals from the Fund are permitted subject to fulfilment of certain conditions, for payment towards a policy of life insurance.

The Scheme is administered by a Central Board of Trustees which is tripartite in character. The Central Provident Fund Commissioner is the Chief Executive Officer and is assisted by Regional Commissioners for different regions. The Act aims at the decentralisation of the administration of the Scheme by setting up State Boards with the State Commissioners as Chief Executive Officers.

Section 17 of the Act empowers the appropriate Government to exempt from the operation of all or any of the provisions of the scheme factories which provide provident fund benefits which are equal to the benefits provided under the Act; or factories where the employees are in enjoyment of benefits in the nature of provident fund, pension or gratuity which the appropriate Government considers are, on the whole, not less favourable to such employees than the benefits provided under the Act.

The opening balance of the employees' provident fund on 1st April 1957 was Rs. 28.54 crores. A sum of Rs. 1.36 crores was spent during 1956-57. Of this refunds to members amounted to Rs. 1.16 crores and administration expenses to Rs. 0.20 crores.

The Scheme which was enforced on 1st November 1952 originally applied to all employees whose basic pay did not exceed Rs. 300 per month.

Since July 1957 however, the limit of eligibility to the membership of the Fund has been raised to Rs. 500 per month inclusive of dearness allowance and cost value of food concessions.

* States existing before reorganisation in Nov. 1956.

With effect from 31st July 1956, the Act and the Scheme were applied to the factory industries of edible oils and fats, sugar, rubber and rubber products, electricity (including generation, transmission, distribution), tea, printing, stone-ware pipes, sanitary wares, electrical porcelain insulators, refractories, tiles and match and sheet glass factories. With this extension about 4 lakhs of additional workers in approximately 1,400 factories are estimated to get provident fund benefits and their monthly contribution together with the employers' share will be about 32 lakhs.

By a notification dated 3rd September 1956 the scheme was extended to four more industries viz. (1) Heavy and Fine Chemicals, (2) Indigo, (3) Lac including Shellac, (4) Non-edible Vegetable and Animal Oils and Fats. Approximately 54,000 workers in about 200 factories would be covered as a result of this extension.

In February 1957 it was decided to extend the operation of the Act to cover plantation workers in plantations employing 50 or more. This was to be effective in May 1957.

From May 1957 the provisions of the Act were further extended to tea, coffee, cardamom and pepper plantations covering an additional 3.6 lakh workers.

The Act was again extended from 31st July 1957 to the gas industry and 3,600 more workers were covered.

At the end of 1955, the Act covered about 2,146 factories of which 522 factories had been permitted to run their own schemes of provident fund. The total number of subscribers to the Fund as on 31st January 1956 was 14.55 lakhs of whom 9.15 lakhs were in exempted factories.

The total collection of subscriptions till the end of November 1957 was about 73 crores.

To supervise the administration of the scheme, the Central Government constituted six Regional Committees in the States* of Bombay, Bihar, Madras, Madhya Bharat, Uttar Pradesh and West Bengal.

Provident fund for workers in the coal industry was introduced by an Ordinance, namely, the Coal Mines Provident Fund and Bonus Schemes Ordinance, promulgated in December 1948. The Ordinance was later repealed by an Act which authorised the Central Government to frame a scheme for bonus and another for provident fund in coal mines. The scheme applies to the coal mines, in Bihar, West Bengal, Orissa, the former Madhya Pradesh, the former Vindhya Pradesh, Assam, Rajasthan and the former Hyderabad. The rate of contribution is one anna per rupee of the total of basic wages, dearness allowance and value of food concessions in cash or in kind. An equal contribution is paid by the employer. About 3.5 lakhs of workers are members of the Fund. In the middle of 1956, the provisions relating to forfeiture of employer's contribution to the provident fund were liberalised. The employer's contribution will now not be forfeited in the case of members who retire after reaching the age of 50 years though they have not completed 5 years service as members. The proportion of forfeiture of employer's contribution for varying periods of service has also been reduced. There will be no forfeiture at all in the case of employees who have been members of the fund for 15 years or more.

The Coal Mines Provident Fund Scheme had at the end of 1957 a membership of about 3.3 lakhs and the accumulation was Rs. 11 crores.

TEA DISTRICTS EMIGRANT LABOUR ACT

The Tea Districts Emigrant Labour Act, 1952, was brought into effect from the 1st of October 1953.

State Governments are empowered, subject to the control of the Government of India to impose control over the forwarding of assisted emigrants (chapter III) or over both their recruitment and their forwarding as occasion may dictate (chapters III and IV).

The forwarding of recruits to Assam must be made through the prescribed routes where arrangements for feeding, rest and medical treatment have been made and by authorised forwarding agents. It is made unlawful to assist persons under 16 to migrate unless they are accompanied by their parents or guardians. A married woman who is living with her husband may only be assisted to emigrate with the consent of the husband.

Repatriation.—It is provided that where an employer fails to make all the necessary arrangements for the repatriation of a worker within fifteen days from the date on which a right of repatriation arises to an emigrant labourer, the Controller may direct the employer to despatch such labourer and his family or to pay him such compensation as may be prescribed within such period as the Controller may fix (sections 13 and 15).

Section 3 of the Act makes provision for the appointment of a Controller of Emigrant Labour with some staff and possibly one or more Deputy Controllers for supervising the general administration of the system which the Act seeks to establish. The charges for this establishment are to be met from an annual cess called the Emigrants Labour Cess which is to be levied at such rate not exceeding Rs. 9 per emigrant as the Central Government may determine for each year of levy.

The cess is collected by the Controller by the sale of certificates of emigration. Every assisted emigrant has to be provided by the employing interest on whose behalf he was recruited with such a certificate. All particulars about the emigrant together with a running record of the details of his employment in Assam are given on it. Failure to provide a certificate is punishable with a fine which may extend to Rs. 500. The rate of the cess is fixed at Rs. 5.

According to the statistics collected under the Act the labour force in Assam in 1954 consisted of 349,982 adults and 336,689 children.

The number of new emigrants dropped from 38,593 in 1952 to 3,881 in 1953 and to 534 in 1954. The acute fall since 1953 is due to the request made to employers by the Government of Assam not to recruit labour from outside the State but to meet their requirements by transfer of labour from gardens having surplus workers.

The number of emigrants repatriated and of those who postponed their right to repatriation during the year 1954 was 17,641 and 19,960 respectively.

SHOPS AND COMMERCIAL ESTABLISHMENTS ACTS

Subject to certain exceptions the Acts apply to shops, commercial establishments, restaurants and places of amusement in certain selected urban centres. Some employers such as those employed in a confidential capacity and those whose work is of an intermittent character are excluded from the scope of the Acts.

The Bombay, Madhya Pradesh and Assam Acts have fixed daily hours of work at nine. In the U.P. and Madras Acts the daily hours are eight while in the West Bengal and the Punjab Acts a ten-hour day has been prescribed. Rest intervals, of half an hour are prescribed in the West Bengal, U.P. and the Punjab Acts while an hour's interval has been granted in the Assam, Bombay, U.P. and Madras Acts. Opening and closing hours have also been fixed by the Acts. The Assam and West Bengal Acts, however, prescribe only closing hours. Most of the Acts also fix the maximum overtime work that can be taken from the employees. In some cases slightly different hours of work have been fixed for employees of commercial establishments, restaurants and places of amusement.

Provision has been made in all the Acts for weekly closure of shops and establishments although in some Acts, for example the Bombay

and Assam Acts, theatres, hotels, etc. are exempted from this provision. In addition to the weekly holiday, provision for privilege leave of 12 to 15 days in a year has been made in all the Acts. The Assam, West Bengal, Madras and U.P. Acts make further provision for casual leave and sick leave of 10 to 12 days and 12 to 30 days respectively.

All the Acts, except the Bengal Act, have made provision for the regulation of employment of children and young persons. The minimum age for the employment of children in the Assam, and Madhya Pradesh Acts is 12 while in the Madras and U.P. Acts it is 14. The hours of work for children and young persons are 7 per day in the Punjab, Madras and Madhya Pradesh Acts and 6 in the Bombay and U.P. Acts. Children cannot work after 7 p.m. according to the Bombay, Madras and the Punjab Acts and after 9 p.m. according to the Madhya Pradesh Act.

The Bombay Act empowers the Government to apply the provisions of the Payment of Wages Act to establishments covered by the Shops and Commercial Establishments Act. By a notification issued under Section 38(1) of the Bombay Shops and Establishments Act, 1948, the Government of Bombay made the Payment of Wages Act applicable to all establishments in the local areas of Greater Bombay, Ahmedabad, Poona, Sholapur, Surat, Belgaum †, Hubli ‡, Kolhapur and Baroda Cities.

By the Madras and U.P. Acts the wage period should not exceed one month and by the Punjab Act it should not exceed a fortnight. The Assam Act fixes the wage period at one month. After they become due wages should be paid within 10 days in Assam and West Bengal, 7 days in U.P. and 5 days in Madras. In the area covered by the former Punjab wages should be paid on demand at the expiry of the wage period. Overtime wages are payable at twice the ordinary rates in Madras, U.P. and the Punjab, at one and a half times in Bombay and the area covered by the former Madhya Pradesh and at one and a quarter times the ordinary rate in West Bengal. Hotels, restaurants and other eating places in Bombay are, however, required to pay overtime wages at twice the ordinary rate. Fines and deductions are regulated under the Madras and U.P. Acts.

One month's previous notice or one month's wages in lieu of notice before discharge is stipulated in the Acts of U.P., Punjab, Madras and Madhya Pradesh. The Bombay Act provides for only 14 days' notice or pay in lieu thereof. The Madras and Bombay Acts make provisions relating to cleanliness, ventilation, lighting and precautions against fire in establishments covered by the Acts.

Delhi, Bihar, Ajmer and Saurashtra (former States)† passed similar legislation.

The total number of establishments covered by the various State Acts and the persons employed therein were 917,392 and 1,149,423 respectively during the year 1955.

The Weekly Holidays Act, 1942 provides for a weekly closure of shops and for the grant of a weekly holiday to employees. The Act has been in force in the areas of the former Bihar, Ajmer, Coorg, Orissa, Rajasthan, Vindhya Pradesh and Hyderabad States.

INDUSTRIAL EMPLOYMENT (STANDING ORDERS) ACT, 1946

The Industrial Employment (Standing Orders) Act, 1946 which applies to industrial establishments employing 100 or more workers provides for the framing of Standing Orders laying down the conditions of employment of workers employed in the establishments.

The Act extends to the whole of India except the State of Jammu and Kashmir, and is administered both by the Central and State Governments.

* Pre-reorganization.

† That is, before the reorganization in Nov. 1956.

‡ Now in Mysore.

So far as the Central Government is concerned it is responsible for administering the Act on railways, major ports, mines, oil-fields and other establishments under its control. Both the Central and the State Governments have been empowered to extend the scope of the Act to establishments in any industry employing less than 100 workers or to any other class or classes of establishments or to exempt any establishment from any of the provisions of the Act.

In exercise of these powers the Government of Uttar Pradesh has extended the Act to all establishments which are members of the Employers' Association of Northern India and the U.P. Oil Millowners' Association and to the glass industry, electricity supply undertakings and water works.

The Government of Assam has extended the Act to all industrial establishments employing 10 or more workers excepting mines, quarries, oil-fields and railways.

In January 1952 the Government of West Bengal extended the Act to all industrial establishments employing 50 or more workers.

In December 1955 by an amendment of the Act the Government of Bombay made the Act applicable to establishments employing 50 or more workers and provided that so long as a set of Standing Orders has not been certified for an industrial establishment the Model Standing Orders framed under the Act will apply.

Till the end of the year 1955, 3,991 establishments had certified Standing Orders in the then Part A States, 589 in the then Part B States and 128 in the then Part C States.

The total number of employees covered was 20,45,000.

Besides these figures there were 857 Central Undertakings with 3,87,000 employees which had certified Standing Orders.

COLLECTION OF STATISTICS ACT, 1953

This Act which replaces and embodies the main provisions of the Industrial Statistics Act is designed to facilitate the collection of statistics of certain kinds relating to industries, trade and commerce. It empowers the Central and the State Governments to direct that statistics shall be collected about—

- any matter relating to any industry or class of industries,
- any matter relating to any commercial or industrial concern or class of commercial or industrial concerns and in particular any matter relating to factories, and
- any of the following matters, so far as they relate to the welfare of labour and the conditions of labour, namely, (1) price

of commodities, (2) attendance, (3) living conditions including housing, water supply and sanitation, (4) indebtedness, (5) rents of dwelling houses, (6) wages and other earnings, (7) provident fund and other funds, (8) benefits and amenities provided for labour, (9) hours of work, (10) employment and unemployment, (11) industrial and labour disputes, (12) labour turnover, and (13) trade unions.

The Central or State Government can appoint an officer to be the Statistics Authority for the purpose of collecting any statistics and such authority has the power to call upon the owner of an industrial or commercial concern to furnish the necessary information. He has also the right of access to any relevant records or documents in the possession of any person required to furnish the information and can enter any premises where he believes such records or documents are kept for the purpose of inspecting them or taking copies. The Act prescribes penalties for improper disclosure of information or returns or for wilfully furnishing false information.

WAGES

No serial statistics of wages and earnings are available in India except for those compiled under the Payment of Wages Act. The returns under the Act, however, relate only to persons in receipt of wages and salaries of Rs. 200 per month.

AVERAGE ANNUAL EARNINGS OF FACTORY EMPLOYEES DRAWING LESS THAN Rs. 200 PER MONTH.

(Excludes railway workshops, the groups of food, beverages, tobacco, gins and presses.)

State (before reorganization)	1939	1953	1954	1955

	Calcutta ..	30 0 0	—	—

The most important wage revision during the year 1956 was in the collieries. By an award of the All-India Industrial Tribunal (Colliery Disputes) which was published on the 26th May 1956 and which came into force from that date, the minimum daily wages of the lowest category of male and female workers were fixed as under:

	Male Workers	Female Workers
Basic wages ..	Rs. a. p. 0 15 0	Rs. a. p. 0 11 3
Dearness Allowance (150 per cent) ..	1 6 6	1 0 11
	2 5 6	1 12 2

Inclusive of the statutory bonus, the minimum wage will be Rs. 2-10-6 for male and Rs. 1-15-11 for female workers. Those working underground will get an allowance of 12½ per cent of basic wages.

* June 1956.

† December 1955.

†† September 1955.

The Chief Inspector of Mines in his Monthly Coal Bulletin publishes figures of average weekly earnings of certain categories of workers in different coalfields. The position in Dec. 1955 (the latest available information) is given in the table below :

AVERAGE WEEKLY EARNINGS IN COAL MINES.*

(December, 1955).

Category	Assam	Raniganj	Jharia	Madhya Pradesh	Rewa	Orissa	Hyderabad	Rajasthan	Indian Union

* The States existing before the reorganization in November 1956.

Employees of about 228 plantation estates in the districts of the Nilgiris, Ma'abar, Coimbatore, Salem, Madurai and Tirunelveli have been awarded revised scales of pay and dearness allowance by the Industrial Tribunal for plantations. It has fixed the rate for first and second grade workers at Rs. 2-4-0 and Rs. 1-12-0 respectively while a child worker will get Re. 1 per day. This revision is to be given, according to the decision, retrospective effect from 24th March 1952.

It has been mentioned elsewhere that by a collective agreement employees of the Tata Iron and Steel Co. Ltd., Jamshedpur have been given an increase in wages.

DEARNESS ALLOWANCE

The scale of the allowance varies not only from centre to centre and industry to industry, but also, except where these matters are adjudicated upon, from unit to unit in the same industry at the same centre.

In coal mines dearness allowance is paid on the basis of a percentage of basic wages. In Bihar and Bengal the dearness allowance is 150 per cent of basic wages for those earning up to Rs. 30 per month.

In the engineering industry in West Bengal dearness allowance is graded according to income and ranges from Rs. 25 per month in the case of those getting basic wages up to Rs. 50 per month to Rs. 50 for those getting more than Rs. 200.

In Bombay some concerns pay at a flat rate and others on a graded scale. Several Adjudicators have granted dearness allowance either at the Bombay Millowners' Association scale which was Rs. 70-8-0 in August 1956, or at a percentage, varying from 66½ per cent to 85 per cent, of that scale. The rate of dearness allowance payable to Bombay City cotton mill workers itself was increased by a decision of the Labour Appellate Tribunal by 5 per cent when the Bombay Cost of Living Index Number is between 325 and 335; by 7½ per cent when it is between 336 and 350; and by 10 per cent when it is above 350. The enhanced rate was given retrospective effect from May 1953; the average dearness allowance for a month of 28 working days now comes to Rs. 71-11-0 for 1954 and Rs. 64-12-0 for 1955.

In Madras the rate varies from 8 annas to Re. 1-9-6 per day and in a number of concerns it is paid at a flat rate of Rs. 25 per month. In the tanneries and leather goods industry dearness allowance paid is around Rs. 25 per month in West Bengal and Madras, about Rs. 30 in Bombay and between Rs. 40 and 60 in Kanpur.

The Committee on Fair Wages appointed by the Government of India examined the question of dearness allowance and came to the conclusion that for the lowest categories of employees the target should obviously be compensation to the extent of 100 per cent of the increase in the cost of living, but that in the case of higher categories

a lower rate of compensation should apply and that the amount of compensation should be based on salary scales or slabs.

BONUS

As in the case of dearness allowance the practice in regard to the quantum of profit bonus varies from centre to centre and industry to industry.

In Bombay City and Ahmedabad the cotton mill workers received for the year 1951 a bonus equivalent to 25 per cent of basic wages earned. In 1952 the cotton textile workers of Bombay got 20 per cent of their wages as bonus. In Madras cotton mills workers received 3 months' basic wages.

A five-year agreement to settle the problem of bonus for about 250,000 textile workers in Bombay City was entered into on 1st March, 1956 between the Bombay Millowners' Association and the Rashtriya Mill Mazdoor Sangh. The agreement will assure the workers of both profit and non-profit making mills a bonus ranging from 15 days to 3 months basic wages for every year of service for 5 years from 1953 to 1957 both years inclusive. The quantum of bonus will be decided by the profit made by each unit. Mills whose bonus disputes for 1952 were pending before the courts were also covered by the agreement for that year. There were 20 of these employing about a third of the textile labour.

Subsequently, it was calculated that about 250,000 textile workers in 56 mills would receive by the end of 1956 about Rs. 6 crores as bonus for the first three years of the agreement starting from 1953.

For the year 1955 the workers received as bonus an amount of about Rs. 2-5 crores which was paid at the time of the Diwali festival in 1956. As many as 21 mills paid their workers bonus equivalent to 3 months' basic wages.

The Millowners' Association also agreed to contribute Rs. 50 lakhs during the five years 1956 to 1961 towards housing schemes which the State Government might undertake for industrial workers. It is estimated that this might finance the construction of 4,000 tenements.

The Textile Labour Association and the Ahmedabad Millowners' Association have also entered into an agreement laying down a procedure for the grant of bonus. This agreement applies to all member mills of the Association in Ahmedabad, in respect of bonus claims for the years 1953 to 1957.

Claims are to be determined on the basis of published balance sheets and profit and loss accounts for the year adopted by each mill company. It is provided that a claim for bonus would only arise if there is an available surplus of profit after making provision for all the prior charges including a return on paid-up capital and on reserves employed as working capital in accordance with the formula laid down by the Full Bench of the Labour Appellate Tribunal. In no case will a mill pay to its workers by way of bonus less than 4-8 per cent, or more than 25 per cent of the basic wages earned during the year. If in any year the mill has an available surplus of profit which according to the Full Bench formula is adequate for granting bonus at a higher quantum than the ceiling of 25 per cent of basic wages, then such a mill will be deemed to have set aside a part of the residue not exceeding 25 per cent to a reserve for bonus for purpose of adjustment in subsequent years, provided, however, that such amount shall at no time exceed an amount equivalent to 25 per cent of basic wages. On the other hand, a mill whose profit is not adequate to provide for any prior charges or has suffered a loss and which will, in any case, be required to pay the minimum bonus of 4-8 per cent, of the basic wages will be entitled to set off the amount so paid against the amount of bonus payable in subsequent years.

Though under the provisions of the Bombay Industrial Relations Act, the parties are free to terminate the agreement after a period of one year, the parties to the bonus agreement have agreed not to exercise the right of termination of the agreement for a period of five years.

The amount of bonus for the year 1955 distributed to the workers before the Diwali festival in 1956 totalled Rs. 1-2 crores.

No bonus has so far been paid in the jute mill industry in West Bengal.

By an agreement with the Workers' Union the Madura Mills, Madurai paid their 24,000 workers bonus equal to Rs. 35 lakhs for the financial year 1955. The bonus was distributed in April 1956.

The dispute regarding bonus for the year 1955 to the textile workers of Coimbatore was decided by a board of arbitrators representing employers and labour with the District Judge as Chairman. As a result of the decision, employers of 44 mills were required to pay varying amounts of bonus to their workers before Diwali. Two mills which incurred losses were exempted. As many as 23,000 workers in 21 mills got bonus equal to 6 months' basic wages.

The dockyards in West Bengal generally pay an annual bonus amounting to a month's wages. Some of the dockyards in Bombay pay two months' wages as bonus.

The Tata Iron and Steel Co. at Jamshedpur pay a good attendance bonus amounting to 10 to 12 per cent of basic wages and a performance bonus of 10 to 50 per cent of basic wages is also given to workers. To the latter, however, only skilled and semi-skilled workers are entitled. Under the Company's revised Profit Sharing Scheme, the employees are entitled to a share of 27½ per cent of the annual net profit of the company and such share is credited to and/or distributed among the employees of the company in proportion to the basic salaries and wages earned or deemed to be earned by such employees respectively during the year in which such net profits were earned by the Company. In 1961-62 this bonus amounted to 3 months and 8 days wages. The Indian Iron and Steel Company pays bonus at the rate of 2 days' wages for every one per cent dividend declared by the company.

The Board of Conciliation appointed for the coal-mining industry recommended the grant of an annual bonus equal to four months' basic wages, split into two parts. An attendance bonus of two months' basic wages to those fulfilling specified minimum attendance requirements, and a production bonus related to output and basic earnings and subject to their qualifying for it on the basis of a minimum attendance of 66 days per quarter in the case of surface workers and 54 days per quarter in the case of underground workers in the case of collieries in Bihar and West Bengal. Bonus on the above basis is also to be paid, according to the Fact-Finding

Committee's recommendations subject to a minimum attendance of 60 and 66 days in a quarter in the case of underground and surface workers respectively in Madhya Pradesh, Andhra and Orissa collieries. In Assam, the existing rate of bonus has been raised by fifty per cent so as to raise the amount of bonus earned to a sum equal to four months' wages per year.

An agreement between the representative of the Indian Tea Association and the workers' representatives regarding bonus for the years 1953, 1954, 1955 and 1956 was reached on 7th January 1956. According to the agreement the claims for 1953 and 1954 will be met by lump sum payments to male and female adult workers who have completed at least 240 and 175 days of work in the year 1954. The payments are Rs. 130 for the Assam and Doars Zones, Rs. 100 for Terai, Rs. 65 for Tripura and Cachar and Rs. 55 for Darjeeling. Workers who have not put in the requisite number of days will receive *pro rata* bonus. It was also agreed that the figures for bonus laid down for 1953 and 1954 will be the base upon which entitlement of bonus for 1955 and 1956 shall be calculated.

The demand for bonus made by the Sindri Fertilizer Factory was not conceded, but the Government decided to give on an *ad hoc* basis a sum of Rs. 16 lakhs, partly in cash and partly in the form of special amenities.

PAY STRUCTURE

As for wages, allowing for minor differences and considering the major industries and the important centres it can be stated that in the jute industry in West Bengal and in the plantations the wages are generally paid weekly. The system of wage payment in the cotton textile industry in Bombay City and Sholapur is monthly. A peculiarity of Ahmedabad is that the wages are paid per *hapta* which varies from 14 to 16 days. The month is the accepted wage period for the railways. In some concerns wages are paid daily to certain types of workers, weekly to others, fortnightly to yet others and monthly generally to the clerical and supervisory staff.

Mining labour is mostly paid on a weekly basis.

A study was recently made by the Labour Bureau of the Government of India of the wage periods in factories covering about 7½ lakhs workers in the former Part 'A' States of Andhra, Bihar, Bombay, Madhya Pradesh, Madras and the Punjab where the total employment is over

14 lakhs; about ½ lakh of workers in Part 'B' States of Hyderabad, Saurashtra and PEPSU out of a total of 1½ lakhs; and almost the entire employment of about ½ lakh workers in Delhi, Ajmer, Bhopal and Coorg. The study showed that 81.2 per cent of the workers were paid monthly, 3.7 per cent fortnightly and 15.1 per cent weekly. In the textiles the percentage of monthly paid workers was as high as 95.7 per cent. The industries in which the proportion of weekly paid workers is higher than that of monthly paid workers were food (except beverages), tobacco, wood, cork and non-metallic mineral products.

The wage structure just before Independence was chaotic. Reform in this sphere was brought about through the agency of industrial tribunals, industrial courts, etc. As a result, not only was an increase in wages to conform with the rise in the cost of living granted but also a degree of rationalisation and standardisation was introduced in the wages schemes. The Planning Commission had advised that during the First Plan period an upward movement of wages should be discouraged in order to arrest inflationary tendencies, but wage increases should be allowed to remove anomalies and to restore the pre-war real wage as a first step towards a living wage. The table below shows the comparison between the real wages in 1939 and in the post-war years:

An interesting departure from normal practice was recently suggested by the Ministry of Labour.

The Union Ministry of Labour and Employment has recommended that all State-owned industrial undertakings should try to increase productivity by introducing the system of payment by results as recommended by the Planning Commission.

The Labour Ministry circulated a memorandum in November 1957 directing those Ministries of the Government of India employing industrial labour to investigate the possibilities of bipartite agreements at the unit level in all industrial undertakings under their control to give effect to this system of payment of wages.

The Planning Commission had recommended that in addition to a basic minimum wage, all extra earnings of the workers should be based on a piece-rate system to step up productivity.

The Commission added, however, that adequate measures should be taken to avoid fatigue and undue speed-up of production.

INDEX OF EARNINGS (1939 = 100)

Year	All India Consumer Price Index	Factory workers		Miners	
		Index of earnings	Index of real earnings	Index of earnings	Index of real earnings
1946	285	208.6	73.2	250.7	88.0
1947	323	253.2	78.4	342.8	106.1
1948	360	304.0	84.4	361.8	100.6
1949	371	340.3	91.7	376.2	101.4
1950	371	334.2	90.1	391.9	105.6
1951	387	356.8	92.2	413.0	106.7
1952	379	385.6	101.8	436.9	115.3
1953	385	384.6	99.9	437.4	113.6
1954	371	381.2	102.7	441.9	119.1

According to a decision of the Bombay Industrial Court delivered on 29th Nov. 1956, textile workers in Bombay were to get gratuity upto a maximum of fifteen months basic wages if their services were to be terminated after 15 years' service.

The award was to have retrospective effect from 22nd Nov. 1954.

They would get this gratuity whether they were mentally or physically handicapped for further service or, voluntarily retired after 15 years' service.

The gratuity was to be calculated at the rate of one month's basic wages for every completed year, for the period before the coming into force of the Provident Fund Act, 1952, and half a month's basic wages for each completed year of service thereafter, subject to a maximum of 15 months' basic wages to be paid to them or their heirs or executors or nominees as the case might be.

A similar award was given by the Industrial court in respect of textile workers in Ahmedabad.

The gratuity scheme came into operation in Ahmedabad from 15th September 1957.

CENTRAL PAY COMMISSION

On 21st August 1957, the Government of India appointed a 6-member Commission of Enquiry under the Chairmanship of Mr. Justice B. Jagannath Das, Judge of the Supreme Court to examine the structure of emoluments and conditions of service of Central Government employees and recommend changes therein.

The Commission is required to recommend, in particular, the extent to which benefits could be given in the shape of amenities and facilities.

In making their recommendations, the Commission will take into account the historical background, the economic conditions and the implications and requirements of developmental planning, and the disparities in the standards of remuneration and conditions of service between the Central Government employees and employees of State Governments and local bodies.

A Central Wage Board for the Cotton Textile Industry has been appointed by the Government of India to evolve a wage structure based on the principles of fair wages as enunciated in the Fair Wages Committee Report.

The Board consists of two independent members, two representatives each of employers and workers with an independent Chairman.

In evolving the wage structure the Board will take into consideration the needs of the industry in a developing economy, the requirements of social justice and the need for adjusting wage differentials in such a manner as to provide incentives to workers for advancing their skill.

The Board will also bear in mind the desirability of extending the system of payment by results keeping in view the safeguards against overwork and undue speed.

There is also a similar Wage Board for the sugar industry.

HOURS OF WORK

The most important happening in regard to hours of work in factories was the reduction of the weekly hours of work for adults to 48.

Actually, in many industries in this country the hours of work were not in excess of 8 per day. In the coal-mines in Bihar and West Bengal the workers seldom work for more than five to six hours in the day or for more than four to five days in the week. According to a recent investigation the average weekly attendance of a coal-miner was 4.56 days. The cotton textile industry in almost all centres normally works a uniform 8-hour day.

In all cases where continuous production is necessary such as in electricity generating plants and certain water pumping stations, cement factories, etc., work is arranged on a system of

three shifts—the different shifts changing over every week or fortnight. The change-over is so arranged that every workman gets a rest period of at least twenty-four continuous hours once in one week.

As far as railways are concerned, hours of work in railway workshops are regulated by the Indian Factories Act. Most of the larger running sheds have also recently been classified as factories and work in these large sheds is arranged on the basis of three shifts of 8 hours each. In the smaller sheds where work is of a fairly intermittent character, systems of two shifts of 12 hours each obtain but the work of the individual is so arranged as not to work each operative for more than 8 hours.

The question of hours of work of railway servants was one of the points submitted for adjudication to the late Justice Rajadhyaksha of the Bombay High Court who made the following recommendations:

The employment of railway servants under the Hours of Employment Regulations should be classified under any one of the following heads:

- (i) Intensive.
- (ii) Continuous.
- (iii) Essentially Intermittent.
- (iv) Excluded.

(i) The statutory limit of weekly hours for persons whose employment is classified as intensive should be fixed at 75 hours a week on the average in a month;

(ii) The statutory maximum limit for the employment of continuous workers should be fixed at 54 hours a week on the average in a month;

(iii) The statutory maximum for staff classified as essentially intermittent should be 75 hours a week; and

(iv) For excluded workers no statutory minimum limit can be prescribed but this should not absolve the Administrations of their responsibility on humanitarian grounds, of seeing that unreasonable conditions are not imposed. The Government of India accepted these recommendations and by an Order dated 15th June 1948 declared them binding for a period of three years. These regulations are still in force.

The Plantations Labour Act, 1951 has restricted hours of work to 54 per week for adults and 40 per week for children and adolescents.

COST OF LIVING

The Government of India has sponsored family budget inquiries—the enquiry was to start in November 1957—covering factory workers, miners and plantation labour with a view to compiling a new series of consumer price index numbers on a uniform basis.

It is stated that the existing series of consumer price index numbers are based on old and out-of-date inquiries and, therefore, do not reflect correctly the present cost of living of industrial workers.

The enquiry is undertaken by the Labour Bureau of the Central Government with the help of the National Sample Survey Organisation.

The Government has selected 50 industrial centres where the family budget inquiries are to be conducted on all-India basis.

Of them, 32 have factory workers, eight miners and ten plantation workers.

Centres with factory population include Jamshedpur, Bombay city, Ahmedabad, Madras, Kanpur, Calcutta, Howrah, Bangalore, Ernakulam, Ludhiana and Delhi.

Among the mining centres are Jharia, Nellore, Asansol, and Kolar Gold Fields.

The plantation centres include Doom Dooma (Assam), Coonoor, Darjeeling and Munnar (Kerala).

The cost of living indices now in use are based on enquiries conducted by the Government of India in consultation with State Governments during the War. This scheme which was started in 1942 was completed in 1946. Over 27,000 family budgets were collected in some 28 centres.

The indices were published regularly in the *Indian Labour Gazette*, the base being 1944 = 100.

At the completion of the enquiries now set on foot there will be a new basis.

INDEX FIGURES

Owing to the variations in the method of compilation of these indices, they are not strictly comparable, but the table below shows the movement of the working class cost of living index numbers in selected centres for the twelve months of the year 1956:—

(Base shifted to August 1949 = 100).

STATE (Pre-Reorganization).	BOMBAY				UTTAR PRADESH	MADHYA PRADESH	MADRAS	TRAVANCORE- COCHIN		MYSORE			HYDER- ABAD

1955	99	83	98	77	82	89	99	97	87	86	99	84	79	84	92	94	93	87	78	77
1956	100	95	106	87	95	88	106	108	96	99	110	92	94	100	102	104	102	99	91	91

The Original base for all these series is calendar year 1944 except as follows :

(i) Madras Plantation Centres—January to June 1949. (ii) Bhopal—Calendar year 1951. (iii) Beawar—August 1951 to July 1952. (iv) Satna—Calendar year 1953. The group House Rent is not included in the indices for Jharia, Mercara and Madras Plantation Centres. In all other centres, it is kept constant at 100.

The group fuel and lighting is not included in the index for Madras Plantation Centres as the priced items of this group have been included in the miscellaneous group.

STANDARD OF LIVING

The Bombay Labour Office carried out two family budget enquiries for working classes in Bombay City, one in 1921-22 and the other in 1932-33 and the results were published in the years 1923 and 1935 respectively. Similar enquiries were also conducted in Ahmedabad and Sholapur cities and the results of both these enquiries were published in the year 1928. In Madras, the Director of Industries published in 1938 the results of an inquiry into the family budgets of industrial workers in organized and unorganized industries in Madras City conducted under the direction of the Commissioner of Labour. A number of family budgets were also collected at Kanpur, Nagpur and Jabalpur with the object of compiling cost of living indices.

The statement below contains in a tabular form the main results of some of these surveys.

COMPOSITION OF THE FAMILY, THE AVERAGE MONTHLY INCOME AND EXPENDITURE AND THE ACTUAL AND PERCENTAGE DISTRIBUTION OF EXPENDITURE ON DIFFERENT IMPORTANT GROUPS

EMPLOYMENT

Many of the larger and more progressive concerns have Labour Officers who are directly responsible for all new recruitment.

The evils in connection with recruitment were most marked in the case of casual or substitute labour. The Millowners' Association, Bombay, have dealt with the problem by establishing what is known as the "Badi Control System." Daily casual vacancies are filled only from card holders and whenever there is a permanent vacancy it is filled from these card holders. The evil influence of the jobber is thus eliminated. A recent development in this matter is the 'decasualization' scheme of the Government of Bombay which has been introduced in some of the textile centres.

In the jute mill industry during recent years, many of the mills have established what are known as Labour Bureaux one of whose functions is to recruit labour.

In this connection mention might also be made of the Employment Exchange started by the Northern India Employers' Association in Kanpur. Some progressive cotton mills in the south have also opened special Labour offices through which only recruitment is made.

The Millowners' Association, Bombay conducts special classes for the training of Mill Labour Officers and actively supervises and controls the work done by all such Officers where they have been appointed through the Association. Following the example of the Millowners' Association, Bombay, the University of Calcutta, in co-operation with the Indian Jute Mills Association, has a special course of social work for giving suitable training to Labour Welfare Officers engaged in jute mills. Among other institutions imparting training for Labour Officers mention may be made of the Tata Institute of Social Sciences, Bombay; Institute for Training of Welfare Workers, Bombay; Delhi School of Social Work, Delhi; Institute of Social Sciences, Banaras; Xavier Labour Relations Institute, Jamshedpur; Department of Labour and Social Welfare, Patna University; J. K. Institute of Sociology and Human Relations, Lucknow University, and the training course conducted by the Madhya Bharat Millowners' Association, Indore.

The Directorate-General of Resettlement and Employment set up by the Government of India organises technical training.

There were 456 training centres in June 1957 and the number of persons undergoing training in these centres was as follows:—

Technical training	10,957
Vocational training	1,439
Apprenticeship training	964
Vocational training—women	494

TOTAL .. 13,854

The number of registered unemployed was 792,345 in July 1956, of whom 391,869 were unskilled and 231,109 were clerks.

A survey conducted by the National Sample Survey in some towns towards the end of 1953 revealed that approximately 2-6 per cent of the population in these towns was unemployed. The towns covered were over 175 and each had a population of over 50,000. The four big cities of Calcutta, Bombay, Madras and Delhi, however, were not covered by the Survey. Of the 2-6 per cent unemployed 1-16 were seeking employment for the first time and about 1-44 per cent were out of work. The Survey also disclosed that 55-85 per cent of the population belonged to working age-group (16-61).

WORKING OF THE EMPLOYMENT EXCHANGES IN INDIA

1956	No. of exchanges at the end of the period	No. of registrations during the period	No. of applicants placed in employment during the period	No. of applicants on the live registers at the end of the period	Monthly no. of employers using the exchanges	No. of vacancies notified during the period	No. of vacancies being dealt with at the end of the period

Position Dec. 1957 :

Employment Exchanges secured 15,625 placements during December 1957 as compared with 17,641 in the previous month.

The decrease in placements was mainly reported from Bihar, Bombay, Kerala, Madras and Uttar Pradesh.

Of those placed during December, 4,049 were under Central Government, 7,548 under State Governments, 1,715 under quasi-Government establishments and local bodies and the remaining 2,313 under other employers.

Employment Exchanges effected 1,68,797 registrations during December, which was 4,732 less than the registrations in the previous month.

The number of employers who made use of Exchanges was 5,886 as compared with 6,006 in November.

In all, 24,400 vacancies were notified by them as against 26,675 in the preceding month.

The decrease in the number of vacancies notified was conspicuous in Bihar, Bombay, Kerala, Madras, Punjab, Uttar Pradesh and West Bengal. A significant increase was, however, recorded in Assam and Rajasthan.

The number of persons seeking employment assistance through Exchanges at the end of December was 9,22,090, which was 35,816 more than the figure at the close of the previous month.

A study to ascertain the pattern of unemployment among graduates has shown that the problem is more widespread in West Bengal, Uttar Pradesh, Bombay and Delhi than in other States. The highest incidence of unemployment among women graduates is in Kerala.

This is the first of a series of employment and unemployment studies, which are being undertaken by the Manpower Division of the Directorate of Employment Exchanges, Ministry of Labour and Employment.

The analysis was made on the basis of registration details furnished by 151 Exchanges in the country regarding graduates seeking work through Exchanges, as on May 15, 1957.

Particulars of 26,297 graduates were received from the Exchanges and a detailed analysis was made of 25,785.

Of the total number seeking employment, 24,425 (92.8 per cent) were men and 1,872 (7.2 per cent) women.

Eighty-four per cent of the unemployed graduates held Bachelor's degree in Arts, Science or Commerce. Of this, 48.5 per cent were B.A.s, 22.7 per cent B.Sc.s and 12.8 per cent B.Com.s.

In order to examine the relative incidence of unemployment among various degree holders, the annual out-turn from universities was taken into consideration as it provided an indication of the addition to the labour force every year. Comparing this with the percentage of unemployed registrants degree-wise, it was found that unemployment was relatively high among those holding B.Com. and B.Com. (Hons.) degrees than those with B.Sc. and B.A. degrees. It was also found that unemployment among M.Com.s was more acute than among M.Sc.s.

Among the unemployed graduates in arts, a large number had specialised in economics, history, politics and philosophy. Science graduates had mostly specialised in the group, physics, chemistry and mathematics.

Of the total number of unemployed graduates, only 2.3 per cent had secured first class, 24.8 per cent second class and the remaining 72.9 per cent third class which included those who took degrees where no class was assigned.

An analysis was also made of the age composition of the unemployed graduates. It was found that 65.4 per cent were below 25 years, 31.2 per cent between 25 and 35, while the remaining 3.4 per cent were 35 and above.

The study also revealed that 76.7 per cent of the unemployed graduates had no previous employment and only 23.3 per cent had reported previous employment. A high proportion of B.A.s and B.Com.s had previous employment as compared with B.Sc.s.

Analysing the nature of employment sought by the graduates, it was found that 60.4 per cent registered for clerical jobs, 19.5 per cent for professional and technical jobs, 15.7 per cent for administrative and executive jobs and the remaining 4.4 per cent for other types of jobs.

Nearly 95 per cent of those seeking clerical posts were graduates with Bachelor's degree in Arts, Science or Commerce.

Another investigation by the Director-General of Resettlement and Employment revealed that the number of engineering graduates on the register of employment exchanges decreased from 690 in September 1956 to 354 at the end of March 1957. Among the graduates, 47 per cent were inexperienced, 37 per cent had acquired experience through on-the-job training, without being in paid employment, and 9 per cent had an experience of 2 years or more.

About 75 per cent of these graduates were in search of jobs for less than a year, while 6 per cent were unemployed for 2 years or more.

As regards salary, 66 per cent of the graduates expected a minimum pay between Rs. 200 and Rs. 300 per month, and 24 per cent desired a salary of Rs. 300 or more.

As in the case of the graduates, the number of engineering diploma holders decreased from 718 in September 1956 to 459 at the end of March 1957. About 65 per cent of these had no experience either in gainful employment or by way of on-the-job training, 22 per cent had acquired experience through on-the-job training, without being in paid employment, and 10 per cent had an experience of 2 years or more.

About 62 per cent of the diploma holders were unemployed for less than a year, while 18 per cent were seeking jobs for 2 years or more.

Over 26 per cent of the diploma holders, of whom a large number was inexperienced, were ready to accept a salary of less than Rs. 100, 57 per cent expected a salary ranging from Rs. 100 to 200 and a few, who had experience of 2 years or more, demanded a salary of not less than Rs. 300.

The employment position in Central Government establishments (excluding railways) in June 1957 was : 67,119 in administrative and executive positions, 223,432 in clerical posts, 143,856 as skilled and semi-skilled workers, 240,227 as unskilled workers ; making a total of 674,634.

There are over 10 lakh Government employees on the railways.

SHIVA RAO COMMITTEE

A Committee, with Mr. B. Shiva Rao as Chairman, was appointed in November 1952 to inquire into the future set up of the Organisation of the Director-General of Resettlement and Employment. The Committee submitted its report in April 1954.

The Committee recommended that the Employment Exchange Organisation should be placed on a permanent footing and its administration should be handed over to the States. The Central Government, however, should lay down national policies, standards and programmes to be followed by the Exchanges. Private employers should be required on a compulsory basis to notify all vacancies to the exchanges, and the Employment service should develop standardised aptitude tests. A Central Advisory Committee representing employers, labour and other important public interests should be formed to advise the Director.

The Government of India accepted in principle the recommendation of the Shiva Rao Committee that all recruitment to Government posts not filled through Public Service Commis-

sions or by competitive examinations, should be made through employment exchanges. Now that the administration of the employment services is transferred to the State Governments, this recommendation will be taken up by them.

The Union Government bears 60 per cent of the expenditure in respect of the Exchanges while the State Governments meet the remaining 40 per cent.

Provision has been made in the Second Five-Year Plan for opening an additional 125 employment exchanges, bringing the total number of exchanges at the end of the Plan period to 256. In locating the new exchanges the need for developing the employment service uniformly in all states as well as the requirements of specific local areas would be kept in view.

Government has also decided to set up a National Council for Training in Vocational Trades with the Union Labour Minister as the Chairman. The Council includes representatives of Central and State Governments, employers' and workers' organisations, and professional bodies. Its functions are to co-ordinate vocational training of national importance throughout the country, to advise Government of India in the framing of training policy and to establish and award national trades certificates.

A pilot scheme to help the educated unemployed enter into avenues of employment other than 'white collar' jobs was sanctioned by the Government of India in February 1957.

Under the scheme, four work and orientation centres were to be set up in the country, one each in the States of Kerala, Delhi, West Bengal and Uttar Pradesh.

At each of the proposed work and orientation centres 250 educated unemployed of the matriculation to university standard and registered with the exchanges will be given an orientation course for about six months. They will also be paid a stipend.

The centres will give vocational counselling, manual work and some theoretical and practical instruction in occupations selected with reference to the aptitudes of the participants. The plans of Government to develop small scale industries, the loans available and the facilities accessible to co-operative societies will also be explained at the centres.

The scheme will not guarantee subsequent placement in life, though some may get placed in positions in which shortages are felt. The instruction and orientation given, however, will be directed to giving them the necessary 'know how' to set up business either by themselves as entrepreneurs or in co-operatives.

The centres will be guided by Local Advisory Committees, consisting of officials and non-officials and will maintain close liaison with important local employers. The centres will be organised and administered by the State Governments.

EMPLOYMENT IN FOREIGN COMPANIES

The position in regard to employment of Indians and non-Indians on salaries of Rs. 1,000 and above in foreign concerns on the 1st January each year was as follows :—

Year	Indians	Foreigners	Total
1947 ..	504	5,844	6,348
1948 ..	742	6,360	7,102
1949 ..	1,085	6,709	7,794
1950 ..	1,406	6,871	8,277
1951 ..	1,784	6,953	8,737
1952 ..	2,290	7,104	9,394
1953 ..	3,346	7,008	10,354
1954 ..	3,995	6,810	10,805
1955 ..	4,685	6,566	11,251
1956 ..	5,614	6,025	11,639

Eighty-eight per cent of the foreigners were British and 3.6 per cent Americans.

The break-up of the salary groups, shows that Indians occupied 80 per cent of the posts in the Rs. 1,000-1,500 category, in 1957 as against 67.9 per cent in 1956. In the Rs. 1,501-Rs. 3,000 range 40.9 per cent were Indians in 1957 as against 34.0 per cent in 1956. In the group of above Rs. 3,000 11.4 per cent of the posts were filled up by Indians in 1957 as compared to 10.6 per cent in 1956.

ABSENTEEISM
One of the commoner complaints of Indian industrialists has been the high percentage of absenteeism and the large labour turnover in Indian factories, mines, etc. The percentage of absenteeism amounts to about 8 to 15 per cent in factories, about 10 to 15 per cent in mines and about 20 per cent in plantations. It is noteworthy that in factories in which the conditions of work

and wages are satisfactory and also where there is a system of granting leave with pay apart from the statutory holidays with pay, the incidence of absenteeism is not so high as is otherwise the case. The available statistical data on absenteeism in certain types of concerns for the years 1950, 1951, 1952, 1953, 1954, 1955 and the twelve months of 1956 are given in the tabular statement below :—

ABSENTEEISM IN MANUFACTURING INDUSTRIES IN INDIA

(Percentage of man-shifts lost to man-shifts scheduled to work)

EMPLOYEES' STATE INSURANCE CORPORATION

It may be mentioned at the outset that the Central Government is working out (Dec. 1957) comprehensive social security insurance scheme for the five million industrial workers of the country. The scheme will amalgamate health,

life insurance, provident fund, gratuity and old age pension.

The Employees' State Insurance Act, 1948 applies to all factories including factories belonging to Government other than seasonal factories and covers employees in receipt of wages or salaries up to Rs. 400 per month. The administration of the Act is entrusted to an autonomous

body called the Employees' State Insurance Corporation. A Standing Committee is to act as the executive of the Corporation. There is also to be a Medical Benefit Council to advise the Corporation on matters relating to administration of medical benefit, certification, etc. All these bodies are tripartite in character. The scheme is contributory but the

Central Government is to make an annual grant to the Corporation during the first five years of a sum equivalent to grds of the administrative expenses of the Corporation. The rates of contribution payable in respect of an employee have been fixed as follows:—

Group of employees	Employees' contribution (recoverable from employees)	Employers' contribution			Total contribution (employees' and employers' contribution)		
	Rs. As. Ps.	Rs.	As.	Ps.	Rs.	As.	Ps.
1. Employees whose average daily wages are below Rs. 1	Nil	0	7	0	0	7	0
2. Employees whose average daily wages are Rs. 1 and above but below Rs. 1-8-0	0 2 0	0	7	0	0	9	0
3. Employees whose average daily wages are Rs. 1-8-0 and above but below Rs. 2-0-0	0 4 0	0	8	0	0	12	0
4. Employees whose average daily wages are Rs. 2-0-0 and above but below Rs. 3-0-0	0 6 0	0	12	0	1	2	0
5. Employees whose average daily wages are Rs. 3-0-0 and above but below Rs. 4-0-0	0 8 0	1	0	0	1	8	0
6. Employees whose average daily wages are Rs. 4-0-0 and above but below Rs. 6-0-0	0 11 0	1	6	0	2	1	0
7. Employees whose average daily wages are Rs. 6-0-0 and above but below Rs. 8-0-0	0 15 0	1	14	0	2	13	0
8. Employees whose average daily wages are Rs. 8-0-0 and above	1 4 0	2	8	0	3	12	0

The insured persons are entitled to the following benefits:

(i) sickness benefit, (ii) maternity benefit, (iii) disablement benefit, (iv) dependents benefit and (v) medical benefit.

Amounts (Rs.) distributed in form of cash benefits in 1956-57 are as follows:—

State	Sickness Benefit	Maternity Benefit	Temporary Disablement Benefit	Permanent Disablement Benefit	Dependent Benefit
	Rs.	Rs.	Rs.	Rs.	Rs.
1	2	3	4	5	6
Delhi	589	4	68	43	9
Punjab	116	2	28	11	6
Rajasthan	3
Madhya Pradesh	647	36	68	5	1
Uttar Pradesh	708	2	105	25	8
Bombay	5,949	229	712	95	44
West Bengal	1,457	25	270	9	8
Andhra	188	31	22	2	4
Madras	686	85	78	3
Kerala	5
Total	10,430	414	1,359	193	80

* Amounts below Rs. 500.

The implementation of the scheme throughout the country simultaneously being attended with practical difficulties, a plan of phased application of the scheme in different places was drawn up. Under this plan, it was proposed to introduce the scheme in Kanpur and Delhi in July 1956. The proposal had to be postponed at the last

moment owing to objections received from employers in Kanpur that the introduction of the scheme in selected places, without its simultaneous application elsewhere, would place industries in those areas at a competitive disadvantage. To overcome these objections, and to remove a few other lacunae, the Employees'

State Insurance Act, 1948, was amended in 1951. Under the amended Act, the employers' contribution is levied from employers throughout the country in a manner which makes the extra cost on all employers as equitable as possible.

The scheme was inaugurated in Kanpur and Delhi on 24th February 1952.

The Schemes covered over 11.78 lakh employees in Dec. 1957.

The number of employees covered in different areas are:

Delhi (40,000); Kanpur (80,000); seven cities of the Punjab State (30,000)—namely, Amritsar (including Chhahrata), Ambala, Batala, Bhiwani, Jagadhri-Abdullapur, Jullundur and Ludhiana; Nagpur (22,000); Greater Bombay (4,70,000); Coimbatore (36,000); Indore, Gwalior, Ujjain and Ratlam (50,000); Hyderabad (12,000); Calcutta City and Howrah District (2,30,000); seven industrial centres of Andhra State (12,000)—namely, Vishakapatnam, Chittivasa, Nellimarla, Guntur, Mangalagiri, Eluru and Vijayawada; and Madras City and suburbs (50,000); Agra, Saharanpur and Lucknow (17,000); Akola and Hinganghat (10,000); Quilon, Alleppey, Ernakulam and Trichur (30,000); Madurai, Amba-samudram and Tuticorin (38,000). Six cities of Rajasthan: Jaipur, Jodhpur, Pali, Bikaner, Bhilwara, Lakhari, (12,000); Beawar (5,000); Burhanpur (4,000); Jabalpur (4,000); Allahabad, Varanasi, Rampur and Kalyanpur (11,500); Patna, Katihar, Monghyr and Samastipur areas of Bihar (14,500).

A Scheme to liberalise benefits to insured workers suffering from T.B. was put into force from 1st June 1956. After exhausting his sickness benefit of 56 days, an insured person suffering from T.B. who has put in two years continuous service in a factory will get additional sickness benefit at half the sickness benefit rate subject to a minimum of Annas 12 and a maximum of sickness benefit rates for 18 weeks more. Insured persons with three years continuous service will receive free medical treatment for an extra period of about one year.

The Government of India has decided to extend medical care under the scheme to families of insured persons as soon as possible. Cooperation of the State Governments is being sought to implement this decision. The rates of contribution from employers will then be raised from 1½ per cent. to 3½ per cent. in the implemented and from ½ per cent. to 1½ per cent. in the non-implemented areas. The insured employees will pay the scheduled rates of contribution in the implemented areas and nothing in the non-implemented areas.

Sickness and Maternity Benefits became payable from the date of commencement of the first benefit period and the remaining three benefits from the date of implementation in each area which are indicated below:—

State	Area	Date of Implementation	Date of commencement of first benefit period
1	2	3	4
Delhi	Delhi State.	24-2-1952	23-11-1952
Punjab	Ambala, Amritsar (Chhehrata), Batala, Bhiwani, Jammunagar, Jullundur and Ludhiana.	17-5-1953	14-2-1954

ACCIDENTS

The Mill-owners' Association, Bombay, has done a considerable amount of good work of a pioneering character in connection with Safety-First measures. Working in conjunction with the Safety-First Association of India, the Association drew up a Safety Code for the Cotton Textile Industry and this Code was published and put into operation from August 1940.

It is of interest to note that most cotton mills in Ahmedabad had also established safety-first committees by the end of the year 1939.

The Indian Factories Act requires the manager to report all accidents which cause death or bodily injury whereby the person injured is prevented from returning to his work

in the factory during the 48 hours next after the occurrence of the accident.

It is the duty of the Inspector of Factories to make an investigation as soon as possible into the causes of and the responsibility for a fatal or serious accident, and to take steps for the prosecution of the person concerned if it is found that the death or serious injury resulted from any infringement of the provisions of the Act or of the rules framed under the Act.

Provision has been made for the training of miners in first-aid. There are also in the mining areas two rescue training centres where training has been given for fighting fires, etc. in coal mines.

The Department of Mines has been strengthened to facilitate more frequent inspection of mines. As an emergency measure, the Coal Mines (Temporary) Regulations, 1955 have been promulgated for the prevention of apprehended danger and for the speedy remedy of the conditions likely to cause danger. The entire codes of coal and non-coal mines regulations are being revised to provide for more comprehensive measures for safety in mines.

The Government of India has constituted four Committees for collection of the basic data for preparing safety pamphlets on different types of machinery.

An unofficial Council of Industrial Health, Hygiene and Safety was formed in Bombay with a view to promoting interest in safety measures. The Council works in close co-operation with the State factory inspectorate and the industry.

The Office of the Chief Adviser, Factories now issues from time to time valuable literature on the subject of industrial safety.

The table below shows the number of accidents in Indian factories and mines in the years 1939 and 1941 to 1954.

Year	FACTORIES				MINES			
	Fatal	Serious	Minor	Total	Fatal	Serious	Minor	Total
1939	221	6,837	29,948	36,006	286	1,410	10,584	12,280
1941	271	8,374	40,091	48,736	303	1,489	10,969	12,761
1942	323	9,111	44,740	54,174	342	1,484	10,871	12,697
1943	361	10,016	48,799	59,176	328	1,509	9,000	10,837
1944	348	10,638	56,336	67,322	365	1,568	8,946	10,879
1945	342	11,006	58,775	70,123	307	1,441	8,724	10,472
1946*	252	8,423	48,460	57,135	328	1,275	9,312	10,915
1947†	214	8,675	49,892	58,781	263	1,450	8,137	9,850
1948	259	9,132	58,673	68,064	272	1,295	8,518	10,085
1949	194	6,613	46,902	53,609	271	1,558	16,529	18,358
1950‡	248	72,168	..	72,416	278	2,033	15,616	17,922
1951	234	75,713	..	75,947	425	2,658	N.A.	2,993§
1952	257	91,033	..	91,290	453	3,887	N.A.	4,340
1953	256	93,431	..	93,687	383	4,226	N.A.	4,674
1954	297	92,709	..	92,976	407	4,491	N.A.	4,898

* Excluding the Punjab and the N.W.F.P. in the case of factories.

† From 1950 onwards figures for Serious and Minor accidents have been combined into Non-fatal accidents.

‡ The figures relate to 12 States of the Indian Union, known as Provinces before the 1950 constitution whereas the previous figures relate to the pre-partition British India.

§ Excluding Punjab and West Bengal in the case of factories.

¶ Since Statistics for minor injuries are incomplete, total figures for 1951 onwards in respect of mines are not strictly comparable with those for the previous years.

N. A. Not available.

WELFARE ACTIVITIES

The Reports of the Labour Investigation Committee on labour conditions in 26 industries as also their Main Report as well as the issues of the Indian Labour Year Book published by the Labour Bureau of the Government of India contain detailed and comprehensive information regarding labour welfare undertaken in various States and industries.

Until recently the Government of India had not undertaken any activities to promote the welfare of industrial labour employed in Central concerns. Recently, however, they have done a great deal in this respect. Welfare Funds have been instituted in coal and mica mines. The Central Government have issued directives to all employing departments to constitute Labour Welfare Funds in all Government undertakings. The Fund is to be utilised for providing indoor and outdoor recreation, reading rooms, etc., to workmen employed in the undertakings. The

Fund will be financed partly by Government grants.

Welfare work had been done directly by the Governments of the pre-Reorganization States of Assam, Bihar, Bombay, Madhya Pradesh, Punjab, U.P., West Bengal, Hyderabad, Madhya Bharat, Mysore, Rajasthan, Saurashtra, Travancore-Cochin, Coorg, Delhi and Tripura in the areas which these States covered.

HOUSING

In the past the policy of Government as well as of industrial employers was to leave the matter of housing more or less in the hands of private enterprise. The rapid growth in industrial employment made the housing problem serious and the influx of large numbers of workers to urban centres during the war further aggravated the situation.

In April 1948 the Government of India announced as part of their industrial policy a scheme for the construction of a million workers'

houses to be completed within a period of ten years but on account of financial stringency much headway could not be made in the furtherance of the scheme.

The Government of India introduced a Subsidised Industrial Housing Scheme in 1952. Under the Scheme, houses are to be constructed for industrial workers through the agency of State Governments, Statutory Housing Boards, employers and registered co-operative housing societies of industrial workers. The Central Government would assist financially these agencies both in the form of subsidies and loans. For housing schemes undertaken by State Governments or Housing Boards the subsidy will be to the extent of 50 per cent of the cost of construction and the loan also to the extent of 50 per cent. In the case of other housing schemes the subsidy and loan will be to the extent of 25 per cent and 37½ per cent respectively. The Government of India also allotted during 1952-53 a sum of Rs. 716.625 lakhs for the industrial housing scheme. As a result of the review of the working of the scheme during 1952-53 certain important modifications were later made in the scheme.

The scale of financial assistance to the employers and workers' co-operatives under the Government of India Subsidised Housing Scheme was liberalised for the period 1953-1956. The percentage of loan payable to co-operatives under the original scheme was 37½. This was raised to 50 to offer better incentive to workers' co-operatives. The employers and workers' co-operatives may get as much as 25 per cent of the approved cost of a project as subsidy; in addition 37½ per cent of the cost is advanced as loan to employers and 50 per cent as loan to co-operatives. The loan to employers is repayable in 15 years and bears an interest of 4½ per cent. In the case of workers' co-operatives, the period is 25 years and the rate of interest 4½ per cent.

The draft outline of the Second Five-Year Plan gives rough figures of the total number of houses constructed during the First Plan period in the public and private sectors, as follows:—

Public construction	No. of houses/tenements
Industrial Housing	77,000
Low Income Group Housing	40,000
Refugee Housing	323,000
Housing by Central and State Governments	300,000
Total	740,000
Estimated Private Construction	750,000
Grand Total	1,490,000

Upto 31st March 1957, over 54,000 tenements were built in India by State Governments, private enterprises and corporations under the Subsidised Industrial Housing Scheme.

A sum of Rs. 25,28,99,000 was sanctioned for the construction of 89,408 tenements upto 31st March 1957. Of this amount Rs. 13,02,56,000 will be loan and Rs. 12,26,43,000 subsidy.

A sum of Rs. 16,60,56,000 was disbursed as loans and subsidies to various State Governments, private enterprise and corporations.

Provision has been made to the extent of Rs. 45 crores for this scheme under the Second Five-Year Plan and 1,50,000 tenements are expected to be ready during the Plan period.

The subject of industrial housing has also been engaging the attention of several State Governments in recent years. The pre-reorganization Governments of Bihar, Bombay, Madhya Pradesh, Punjab, U.P., Madhya Bharat, Mysore, Travancore-Cochin, had in hand schemes of industrial housing and some of the States, as for instance Bombay, Bihar, and U.P., made substantial progress in regard to the construction of new houses.

As regards housing accommodation provided by employers, the standards vary widely. In the cotton mill industry only a small proportion of the workers is provided with houses. The jute mills in and around Calcutta have provided housing for about a third of their workers but the standards of housing provided leave much to be desired. In the engineering industry only

the larger units generally provide housing for their employees. The Tata Iron and Steel Co. for instance, have provided 12,000 houses at Jamshedpur. As many as 8,600 houses have also been built by the employees themselves on the company's land leased to them at very low rates. The cement industry in India is much ahead of other factory industries in regard to the proportion of workers housed as well as the standards of housing provided.

The Scindia Shipyard at Vishakhapatnam houses about 25 per cent of their workers in a special housing colony. In the sugar industry, the employers provide housing for about 30 to 50 per cent of their labour force.

In the coal mines up to 80 per cent of the workers are housed in dhowrahs free of rent. Under the housing scheme of the Coal Mines Labour Welfare Fund constituted by the Government of India for coal miners over 1,500 houses have been completed. The mining companies in the Kolar Goldfields in Mysore provided about 12,800 houses for their employees.

In the plantations nearly all the settled labour force have been provided with housing but the scale and standard of houses provided are far from adequate. However, in recent years the industry has become keenly alive to the urgency of the problem and at a Tripartite Conference held in November 1950, the planting interests agreed to replace the then existing sub-standard houses by stages spread over 12 years. The number of houses provided for plantation labour up to September 1951 was as follows: Assam and Bengal 323,865; Bihar 1,531; Madras 22,864; Orissa 40; U.P. 108; Mysore 2,171; Travancore-Cochin 18,216; Coorg 1,877.

On Government Railways there were on 31st March 1952, 230,988 units of residential quarters for the use of class III and class IV employees. During 1952-53, 7,323 quarters were constructed. During the year 1953-54 further 6,848 tenements of various types were added.

Several co-operative housing societies have recently been formed in Ahmedabad through the efforts of the Ahmedabad Textile Labour Association.

LABOUR WELFARE

Section 47 of the Factories Act, 1948 makes it obligatory for all factories employing more than 150 workers to provide adequate shelters and a suitable lunch room for the use of workers during periods of rest. Almost all large industrial establishments had provided tiffin rooms and rest shelters for their workmen. Most concerns had also permitted the establishment of tea stalls on the premises but apart from this, little effort had been made to run co-operative canteens on the lines of those which are associated with most of the large factories in the West.

The Act of 1948 provides for the setting up of canteens in factories that employ more than 50 women.

Except for the Ahmedabad Textile Labour Association, the Railwaymen's Unions, and the Masdoor Sabha of Indore labour unions have not done much by way of labour welfare. This has been due largely to lack of funds. Some of the Railwaymen's Unions have organised co-operative societies, and various kinds of funds for the provision of specific benefits, such as, legal defence, death and retirement benefits, unemployment and sickness benefits and life insurance, etc.

In 1939, the Bombay Government first organised model welfare centres. In July 1953, the Government of Bombay transferred all welfare activities to the Bombay Labour Welfare Board constituted under the Labour Welfare Fund Act, 1953.

Labour welfare centres are classified under four heads: 'A', 'B', 'C' and 'D'. 'A' class centres have a full-time nursery school for children; a women's section providing literacy, sewing and embroidery classes and suitable games; outdoor games and gymnasium with all facilities for men; and separate arrangements for water-taps and shower baths for both

men and women. Static as well as circulating libraries are attached to these centres; radio sets are provided; monthly cinema shows are arranged; and well equipped dispensaries are attached. 'B' class centres are intended to be a replica of 'A' class centres but on a very much smaller scale. 'C' class centres provide indoor recreation and educational facilities, static and circulating libraries and dispensaries. 'D' class centres provide only outdoor recreation, such as games and sports.

Welfare centres were also opened in the areas covered by the pre-Reorganisation States of Assam, Bihar, Madhya Pradesh, Punjab, U.P., West Bengal, Hyderabad, Madhya Bharat, Mysore, Rajasthan, Saurashtra, Travancore-Cochin, Delhi and Tripura.

Although the Factories Act requires that provision should be made for washing especially in factories where workers come into contact with injurious or obnoxious substances, very little effective provision exists in this regard because most factories only provide water for washing but not soap, soda, towels, etc. As for bathing facilities, extremely few employers provide this amenity. Section 42 of the Factories Act, 1948 provides for the maintenance of such facilities in every factory.

Other types of welfare work done by factories relate to the provision of recreational facilities, amenities for the education of workers and their children, the provision of cost price grain shops, the establishment of co-operative societies, etc.

On railways there are educational facilities for the children of the employees mostly free of charge. Staff Benefit Funds have also been created which give monetary help to the children and widows of the deceased employees.

Medical facilities provided by employers range from first-aid posts and dispensaries to first-class hospitals. There are some examples, in which first rate medical facilities are provided. The Tata Iron and Steel Co. maintain a large well-equipped hospital with 400 beds, and also 8 outdoor dispensaries. The Delhi Cloth Mills maintain a hospital which is fully equipped with X-ray apparatus and other modern appliances, and which gives free medical aid to both mill workers and their families and free food to indoor patients. The hospital at the Kolar Goldfields is a model of its kind. The Buckingham and Carnate Mills of Madras and the three important groups of employers of the Assam Oil Co. at Digboi have also provided adequate medical facilities. In all railways in India there are medical departments under the control of chief medical and health officers with divisional medical officers seconded by a number of assistants.

The total amount of money spent by the Central Government on labour welfare except for railways during the year 1955-56: Rs. 157.10 lakhs.

The amount spent by Railways on labour welfare during 1955-56: Rs. 948.50 lakhs.

COAL MINES WELFARE FUND

This Fund was constituted under the Coal Mines Labour Welfare Fund Act of 1947. The principal objects for which this fund is to be utilised are defined in the Act. These are: (1) the improvement of standards of living including housing and nutrition, the amelioration of social conditions and the provision of recreational facilities for the benefit of the labour employed in the coal mining industry; (2) the provision of transport to and from work; (3) the improvement of educational facilities; (4) the provision of improvement of supplies of water; and (5) the improvement of public health and sanitation, the prevention of disease, the provision of medical facilities and the improvement of existing medical facilities. The Act makes provision for the appointment of an Advisory Committee consisting of Government Officers and an equal number of members representing colliery owners and workers employed in the coal mining industry of whom one has to be a woman.

Both the cost of administration of the fund and the salaries and allowances of the officers appointed in connection therewith are to be defrayed from the fund itself.

At present a cess of six annas per ton of coal or coke has been levied for being credited to the welfare fund. The principal activities of the fund which are financed out of this cess are:—

- (i) Housing
- (ii) Hospitals
- (iii) Prevention of disease
- (iv) Water supply
- (v) Pit-head baths and creches and others.

The cess is now being apportioned between the Housing Account and the General Welfare Account of the fund in the ratio 2:7. A Coal Mines Labour Housing Board consisting of eight members has been set up.

The fund gives certain grants and subsidies to various other funds such as the Leper Fund.

Regional hospitals and maternity child welfare centres at Katras and Tisra in the Jharia coalfield and Chora and Searosole in the Raniganj coalfield have been opened. A central hospital for Jharia coalfield has been opened and the construction of a central hospital for the Raniganj coalfield has started.

For the prevention of disease, grants are being made to the Mines Boards of Health and a scheme for the treatment of tuberculosis has been drawn up. Anti-malaria work is also in full progress.

The construction of pit-head baths and of creches has now been made compulsory.

Mica Mines Labour Welfare Fund.—The Mica Mines Labour Welfare Fund Act, 1946, which was designed to constitute a similar fund for the benefit of mica workers, provides for the levy of an *ad valorem* duty not exceeding 6½ per cent on all mica exported from India. Under the Act Advisory Committees for Bihar, Madras, and Rajasthan were constituted. In Madras three dispensaries have been started for use by mica miners and five radio sets have been installed in selected mica mining centres.

In June 1956, the Fund was running 13 primary schools, one middle school and 10 adult education schools at its own expense and was giving financial and other aids in the shape of buildings, furniture, books, etc. to 10 schools.

WORKERS' EDUCATION

The Government of India in co-operation with the Ford Foundation appointed an International Team to suggest steps to be taken for (a) education of trade union representatives in the techniques of trade union organisation, management and financing, (b) education of union members for intelligent participation in union affairs and (c) education of union representatives in responsible and effective participation in management.

The Team submitted its report in June 1957.

The main recommendations of the Team are:

1. A central board with semi autonomous authority and having a sufficiently representative character should be established for the purpose of formulating the policy and administering the educational programmes.

2. A similar board should be established in States or Regions and in important industrial centres.

3. The objective of workers' education programme should be to provide to any worker who wishes the opportunity to understand what a trade union is and how it operates and to develop the necessary skill, confidence and knowledge to participate in any level of trade union activity.

4. The nature of instruction should aim at inculcating knowledge of the structure, functions and traditions of trade unions; first hand experience regarding conducting of meetings, negotiations with employers and participation in welfare development programmes; and acquaintance with labour laws and regulations as well as workers' participation in management.

5. To make workers' education really effective and continuous, it should be conceived of as a life saving process and large variety of courses and conferences differing in duration and in their venue should be adopted.

6. Programme of training of teachers and teacher administrators should be inaugurated forthwith.

EVENING CLASSES TRAINING

The Government of India have decided to start evening classes at important centres like Bombay, Bangalore, Calcutta and Kanpur to help industrial workers to better their prospects.

About 10,000 workers are expected to benefit under the scheme during the second Five Year Plan period.

The subjects of instruction will be shop arithmetic, blue-print reading and trade theory.

The evening classes will be held for 2 hours thrice a week and the course will be of two years' duration. Any literate worker sponsored by the employer will be eligible for training.

Similarly, in pursuance of the recommendation of the Shiv Rao Committee, the Ministry of Labour, Government of India, have formulated the Pre-employment In-Plant Training (Apprenticeship) Scheme.

The scheme was expected to be implemented first in cities like Bombay, Calcutta and Gwalior in 1957 with 675 seats.

By the end of the second Five Year Plan the number of seats will be increased to 5,000 in all States. The Planning Commission has included a sum of Rs. 89.6 lakhs in the Plan for organising apprenticeship programmes. The expenditure will be shared between the Government of India and the participating States in the ratio of 6 : 4.

PENSIONS, GRATUITIES

All monthly and time-rated workmen in the industrial establishments of Government are entitled to pensions on retirement provided that a minimum of ten years' service as been put in. Outside Government concerns, pensions on retirement are almost non-existent although some concerns give small pensions to old employees who have put in long periods of trusted and faithful service at these are mostly *ex gratia* and cannot be claimed as of right.

All railway employees and the employees of local and public bodies and a few of the larger public companies receive gratuities on retirement. Gratuities are also paid to non-ferrous workers who have put in not less than thirty years' service in Government concerns.

In all cases specified periods of qualifying service have to be put in before gratuities can be earned. The rules of individual administrations vary widely but the most generally accepted principle is half a month's pay for each year of service limited to fifteen months' pay in all. Permanent Government servants who have put in less than ten years' active service are entitled to gratuity if they are compelled to retire on medical certificate.

The workers in Jute Mills in West Bengal have been awarded gratuity by the Industrial Tribunal in the following lines: On retirement, resignation or retrenchment after 15 years service: $\frac{1}{4}$ month's basic wages per year of service subject to a maximum of 15 months' basic wages. On reaching the age of superannuation or termination or retirement on medical grounds and on death: a month per year of service with a maximum of 15 months' basic wages.

No gratuity is payable to a worker dismissed or mis-conduct.

For the period for which provident fund has been in operation no gratuity will be payable.

Schemes of gratuity have been introduced in several engineering concerns by awards of Tri-

bunals, the pattern followed being similar to that in the case of the Jute mills.

The Employees' Provident Funds Act, 1952 provides as already mentioned for compulsory provident funds for employees in many industries.

A few large industrial establishments in India have started their own Retirement Benefit schemes where an account is opened for every individual worker to which a fortnight's or 13 days' pay is credited every year: interest is allowed and the amount standing to a worker's credit is paid to him on retirement.

Compulsory contributory schemes are provided for all permanent workmen in the factories owned by certain public bodies such as the Bombay Port Trust; whilst both compulsory and optional non-contributory and contributory schemes obtain for permanent workmen in the factories owned by most municipalities. Most of the larger public utility companies and corporations such as the Tata electricity generating and distributing plants, and the Burmah-Shell Corporation, mention only a few of many, provide contributory schemes for the benefit of the majority of their workmen. Several others have schemes for their supervisory and clerical establishments but not for their workmen.

The most usual amount of deduction from pay is one-twelfth of the monthly pay but the amount contributed by employers varies from 50 per cent to 100 per cent of the amount put in by the employee.

The Provident Fund Rules of different State Governments in India are by no means uniform. The Government of the former Bombay State by a notification dated 20th March 1941, made it compulsory for all Government servants in receipt of a monthly income of Rs. 50 per month who joined Government service before that date or of Rs. 25 per month who joined after that date to subscribe to the Government Provident Fund. Pensionable Government servants can only join the non-contributory section of the Fund.

Profit sharing in this country has mostly taken the form of payment of bonuses according to the profit making ability of a concern. The question of bonus has already been dealt with elsewhere.

AGRICULTURAL LABOUR

Out of 58 million rural families in India nearly 17.6 million are those of agricultural labourers having an average annual income of Rs. 447 per family as against an expenditure of Rs. 468, according to an inquiry into the working and living conditions of agricultural labour conducted by the Union Labour Ministry in 800 villages representative of the Indian Union.

The object of the agricultural Labour Enquiry was to collect data on employment, earnings, cost of living, living standards and indebtedness of agricultural labourers in the Indian Union with a view to considering what protective and ameliorative measures, including the fixation of minimum wages, should be undertaken to improve conditions.

The enquiry was conducted in three stages viz. General Village, General Family and Intensive Family Surveys in about 800 villages selected on the principles of stratified random sampling. The General Family Survey covered 104,000 families and the Intensive Survey about 11,000 agricultural labour families. The data collected during the Intensive Family Survey related to the year March 1950 to February 1951. For administrative convenience the Inquiry was divided into six zones namely, North, East, South, West, Central and North-West, which corresponded with the Census Zones of 1951.

FINDINGS

The more important findings of the Enquiry are summarised below:—

Earning Strength.—On an average the total earning strength (which included helpers) per family was about 2.6. Work was done by almost

all the men and a little over half the women and the children above 10 years of age. The proportion of women was more in south, west and central India.

Employment.—The Zonal differences in the average number of days employed on wages were considerable. Male agricultural labourers were employed for 289 days in North, 245 in Central, 224 in East, 202 in North West, 196 in West and 181 in South India.

Most women undertook casual employment mainly to supplement the family income. The average employment of women workers was 120 days in agricultural and 14 in non-agricultural labour. Of the total number of man days worked by casual labourers, men contributed 62 per cent, women 35 per cent and children the remaining 3 per cent.

Unemployment.—In the Indian Union as a whole as many as 97 per cent of the attached workers reported wage-jald employment every month; and on the average they were unemployed for only 19 days during the year. The problem of unemployment concerned essentially the casual workers, of whom 82 per cent at a monthly average reported unemployment during an average of 8 days per month. On the average in the whole of India, an agricultural worker had jald employment for 218 days in the year, cultivated his own land for 49 days and was unemployed for 98 days.

Wages.—The actual payment of wages was made in a variety of ways, wages in cash and in kind, wages partly in cash and partly in kind. Payment on time basis and on a piece basis, with or without perquisites in the form of mid-day meal, tea or tobacco.

Of the total man days worked by adult casual workers in the Indian Union, payment on a piece basis accounted for only 5.5 per cent. Time wages amounted to 94.5 per cent.

In the total wage employment in agriculture 37.7 per cent of the man days were paid in cash, 32.2 per cent in kind and the balance 10.1 per cent partly in cash and partly in kind. The practice of supplying perquisites prevailed to the extent of 33 per cent of the total man days worked by adult workers.

The average daily wage rate of the casual worker was found to be 17.5 annas for the whole of India. It was 23 annas in the North-West, 20 in the East, 19 in the North, 18 in the West, 16 in the South and 13 in Central India.

The average daily wage of women workers amounted to 82 per cent of the men's average daily wages. The wage rates of women workers in South, West and Central India were proportionately much lower than in other zones.

Of the male workers about 58 per cent could secure additional non-agricultural employment during an average of 56 days per annum. Among women about 34 per cent were employed on non-agricultural labour for an average of about 41 days a year.

Unlike casual workers attached workers, who were mostly men, received fixed wages that were generally for a period of one year irrespective of the seasonal nature of the work.

Minimum wage rates have so far been fixed for agricultural workers under the Minimum Wages Act, 1948 by the States of Punjab, Delhi, Kutch, Himachal Pradesh, Uttar Pradesh, Bihar, Assam and Rajasthan, in Kutch, in Bombay, in Coorg, in Mysore, and in the former Vindhya Pradesh area in Madhya Pradesh.

In the Indian Union as a whole children formed 4.6 per cent of the total agricultural labour force. On the average they were employed for 150 days in agricultural and 15 days in non-agricultural work during the year. The daily wage was 11.1 annas in agricultural and 9.9 in non-agricultural employment.

Income.—The family had as an economic unit various sources of income, including agricultural and non-agricultural labour, the cultivation of its own land, and occupations other than farming. The average annual income per family worked out to Rs. 447 of which Rs. 287 accrued from agricultural labour. About 57 per cent of the total income from agricultural wages accrued from cash payments and the remaining 43 per cent from payment in kind, including perquisites.

The average income of an attached worker's family was Rs. 489 and that of a casual worker's family Rs. 442.

Cost of Living.—The income of the agricultural labour families being low, it was the necessity to subsist that guided their expenditure and there was hardly any problem of preference as regards goods and services on which money should be expended.

With an all India average income of Rs. 447 the expenditure per agricultural labour family was Rs. 468 including Rs. 7 on ceremonies. There was thus a deficit of Rs. 14 on consumption alone. Of the 461 rupees spent on recurring items of expenditure, Rs. 393 (85.3 per cent) was spent on food, Rs. 29 (6.3 per cent) on clothing, totalling 91.6 per cent on food and clothing alone. Considered by zones, the annual income per family was Rs. 551 for North, Rs. 506 for East, Rs. 382 for South, Rs. 391 for West, Rs. 417 for Central, and Rs. 651 for North-West.

Taking the Indian Union as a whole the caloric intake of an agricultural worker was 2,220 and thus short of the normal requirement (3,000 calories) by about 25 per cent.

Indebtedness.—About 45 per cent of the agricultural labour families were indebted, the average debt per family being Rs. 47. Taking into account only the indebted families, the average debt was Rs. 105. The percentage of indebted families was the highest in North-West (75.8) and lowest in North. The percentage of casual workers families in debt was 44 and of attached workers families 51. The amount of debt per indebted family was Rs. 100 for casual workers and Rs. 143 for attached workers. The higher indebtedness of the latter was accounted for by the fact that it was easier for them to secure loans from their employers, generally as advances from wages. Debts were incurred mainly for production, consumption and social purposes, the debt on consumption alone being Rs. 78 out of an average debt of Rs. 105 per indebted family.

The biggest single source of borrowing was moneylenders; next in importance came employers. The amounts borrowed were Rs. 38 from the former and Rs. 22 from the latter. Shopkeepers lent Rs. 6 and Co-operative Societies only Re. 1.

CENTRAL LABOUR INSTITUTE

As a step towards meeting the need for an agency designed to afford facilities for the scientific study of the various aspects of industrial development as relating to the human factor, the Planning Commission, as part of the First Five Year Plan, recommended the establishment of a National Museum of Industrial Safety, Health and Welfare. The Museum is to serve as a nucleus of an Institute for conducting specialised courses of training and education in labour problems.

The Institute will be a composite one, comprising (1) a Museum of Industrial Safety, Health and Welfare, (2) an Industrial Hygiene Laboratory, (3) a Training Centre, (4) a Library-Information Centre, (5) a Productivity Centre, and (6) a Training-within-Industry Centre.

A course in Training-within-Industry has started functioning with a well-equipped staff. It provides facilities for the training of nominees of industrial concerns as T.W.I. instructors. The Centre which is designed to cater to the needs of the industry in the country is at present located in the Industrial Assurance Building,

Churchgate, Bombay 1, and is under the direction of Mr. P. K. Sathe, Deputy Adviser (Factories), Ministry of Labour, Government of India.

The Government of Bombay have made available free of cost a 13 acre plot of land on the Kuria Hills just behind the Santa Cruz Aerodrome at Bombay. A capital grant of Rs. 10 lakhs has been sanctioned by the Central Government for the construction of the main Institute building. An Operational Agreement has been signed between the U.S. Government and the Government of India under which a sum of \$100,000 has been made available for the purchase of plant, equipment and technical publications of the Institute. The Institute was expected to start functioning by the middle of 1957.

TRIPARTITE LABOUR MACHINERY

The Tripartite Labour Machinery at the centre consists of (a) Indian Labour Conference, (b) Standing Labour Committee and (c) Industrial Committees. Besides, there are such bodies as the Joint Consultative Board, the Central Advisory Council, the Labour Ministers' Conference etc.

Indian Labour Conference

The Indian Labour Conference is composed of 24 members representing the Central and State Governments and 9 members each representing the employers and workers, nominated by the Government of India in consultation with the all-India organisations of employers and workers.

The function of the Conference as laid down at the fourth Indian Labour Conference is to "advise the Government of India on any matters referred to for advice taking into account suggestions made by the Provincial Governments, States and Chamber of Princes and the representative organisations of employers and workers recognised for the purpose of the Conference".

The Indian Labour Conference has held 15 sessions upto July 1957. No meetings were held in 1946, 1949 and 1953. The last session was held in New Delhi in July 1957.

The 15th session of the Indian Labour Conference which was held in New Delhi on the 11th and 12th July 1957 with Mr. Gulzari Lal Nanda, Union Minister for Labour & Employment in the chair, endorsed the recommendations regarding workers' education contained in the report of the Ford Foundation Team on the subject, and decided to intensify the Training-within-Industry Programme.

As regards worker participation in management, as the employers were willing to introduce schemes of worker participation in selected industrial units on a voluntary basis it was not considered necessary to legislate in the matter (See below).

The main functions of the joint council were to include provision of means of communication, improvement of working and living conditions, improvement in productivity and assistance in the administration of laws and agreements.

The council would be entrusted with some administrative responsibilities in the management of welfare schemes.

The conference agreed on certain principles to be followed by both employers and workers in the matter of discipline.

These include (1) no strike or lock-out without notice and no go-slow tactics, (2) no acts of violence, intimidation or coercion, (3) utilisation of existing machinery for settlement of disputes and (4) speedy implementation of awards and agreements.

The conference also drew up a model agreement to guide employers in regard to rationalisation, the underlying principles being that there should be no retrenchment or loss of earnings of the existing employees, that there should be

a proper assessment of work-loads by experts and that there should be an equitable sharing of benefits of rationalisation as between the community, the employer and the worker.

Dealing with wage policy during the second Five-Year Plan, the conference adopted norms which would be a guide for all wage fixing authorities in the determination of the minimum wage.

The standard working class family should be taken to comprise three consumption units for one earner and its food requirements should be calculated on the basis of the diet recommended by Dr. Akroyd.

Clothing should be estimated at 18 yards per annum per head and in respect of housing, the rent corresponding to the minimum area provided for under Government's Industrial Housing Scheme should be taken into consideration.

Fuel, lighting and other miscellaneous items of expenditure should constitute 20 per cent of the total minimum wage.

The conference also felt that a Tripartite Wage Board was the appropriate machinery for wage fixation.

The conference decided to popularise the Subsidised Industrial Housing Scheme among employers and Co-operative Societies and recommended that the quantum of financial assistance to them should be raised.

Standing Labour Committee

The Standing Labour Committee was constituted by a resolution of the Indian Labour Conference adopted in August 1952. At present the Committee consists of 5 representatives each of the employers and workers and 12 representatives of the Governments. The representatives are nominated by the Government of India in consultation with the all-India organisations of employers and workers.

The function of the Committee is to consider and examine such questions as may be referred to it by the Plenary Conference or the Central Government.

The Committee has met 16 times so far, the last session being the one held in New Delhi in October 1957.

Both the Conference and the Committee have so far considered no less than 80 items each and besides promoting such legislation as Industrial Employment (Standing Orders) Act, 1946, Minimum Wages Act, 1948, and the Employees' Provident Funds Act, 1952, they were responsible for the appointment of the Labour Investigation Committee, introduction of health insurance schemes for industrial workers etc.

Tripartite Machinery in the States

Bombay was the first State to set up a tripartite Labour Advisory Board in March 1947. This example was followed by Uttar Pradesh, Bihar, West Bengal, Madras, etc.

The function of these boards is to help maintain harmonious industrial relations and advise Government on matters affecting labour.

WORKERS' PARTICIPATION IN MANAGEMENT

A study group set up to report on the question of workers' participation in management published its report at the end of May 1957.

The study group was led by the Secretary to Government, Ministry of Labour (at the time Mr. Vishnu Sahay). Before it completed its study the group visited the U.K., Sweden, France, Belgium, Switzerland and Yugoslavia.

The main recommendation of the group is that the Government of India should put through enabling Legislation to direct selected industries to operate given schemes relating to workers' participation in management.

The report emphasises that management councils should not rival trade unions. A demarcation of functions is necessary and collective bargaining matters touching wages, bonus and workers' grievances should be left to the latter.

The objective of the joint councils should be to collaborate in raising productivity, provide a means of communication, improve working and living conditions, encourage suggestions and assist in the administration of laws and agreements.

The councils may be consulted on matters such as alterations in standing orders, retrenchment, rationalisation, closure, or reduction of operations, introduction of new methods, procedures for engagement of labour and punishment.

They can also receive information and make suggestions about the general economic position of the concern, market trends, production and sales programmes, organisation, methods of manufacture and the balance sheet.

The division of functions between the joint councils and the unions should be flexible and left to be settled by consultation between the management and the representative trade union.

To counteract the danger of apathy, it is suggested that the councils of management may also be given some administrative responsibility. These may cover the administration of welfare schemes, the supervision of safety measures, the operation of training and apprenticeship schemes, the preparation of working-day and holiday schedules and payment of rewards for valuable suggestions.

On balance, legislation may help to create the climate and the necessary sense of obligation.

Government should have the power to decide where the law should be applied. The consideration that will apply may be a minimum size of industry in terms of employment, the absence of rival unions, and the stability of the industry.

It should not apply to industries that are complex or in which the workers have to be protected under the Minimum Wages Act.

For undertakings spread over several places, there may be separate councils at the local, regional and national levels.

The report suggests the inclusion of technicians in the joint councils and stresses the importance of workers' education in schemes of labour participation in management. The workers must have knowledge of their industry and some general economic background apart from mere industrial skill to participate usefully and effectively.

The study group has, therefore, recommended that the Government should undertake the responsibility for organising a sustained educational campaign in collaboration with the unions and employers' organisations.

A member of the study group said that the textile and sugar industries might be a suitable starting point.

As already mentioned the Indian Labour Conference which met in July 1957 appointed a tripartite Committee to compile a list of major industries in the public and private sectors in which workers' participation in management could be introduced.

This Committee compiled a list early in August.

The industries selected from the private sector are: cotton textiles, jute, engineering, chemicals, tobacco, paper, sugar, cement, mines and plantations.

Those from the public sector include: railway workshops and yards, posts and telegraphs, ports, shipyards, transport workshops, mines, printing presses and electricity undertakings.

The committee decided that the State Governments should also be requested to name suitable industrial undertakings under their control for inclusion in this experiment of workers' participation in industrial management.

The criteria for selecting undertakings where the scheme can be introduced include: (a) The undertaking should have a well-established, strong trade union functioning; (b) The size of the undertaking in terms of employment

should be at least 500 workers; (c) The employer should be a member of one of the leading employers' organisations so far as the private sector is concerned, likewise, the trade union should be related to one of the central federations; and (d) The undertaking should have had a fair record of industrial relations.

The committee also recommended that representatives of employers and workers from the selected industrial units should be invited to a seminar convened by the Labour Ministry to settle the various phases for the implementation of the scheme. In addition, employers' and workers' organisations should be asked to furnish a list of experts with knowledge of labour problems at the unit level who will constitute an advisory panel to provide guidance to both employers and workers in implementing the scheme.

At the time of writing only the list submitted by the Government of Kerala was available (Dec. 1957). The list of industries in which workers' participation in the management could be tried was as follows:

(1) Kerala State Transport; (2) P.W.D. workshops in Trivandrum; (3) The Travancore Fertilisers and Chemicals Factory in Alwaye; (4) The Rubber Factory in Trivandrum; (5) Kundra Ceramics near Quilon; and (6) some units of the coir industry in the private sector where the managements are willing.

In regard to the Kerala State Transport, the State Government has already included workers' representatives on the advisory board.

It should be added here that in Madras the Simpson group has given the workers an opportunity to participate in the management through joint Councils. The group comprises 14 companies and 7,000 employees. On the council the workers as well as the management have an equal number of representatives that is, 15.

The Government-owned Transport engineering work has a similar joint council.

The two other concerns where workers participate in management are: The Tata Iron and Steel Company, Jamshedpur and the Modi Spinning and Weaving Mills, Modinagar, U.P.

SEMINAR

A seminar on labour-management co-operation was held in New Delhi on 31st Jan. 1957. Workers' and employers' representatives from more than 30 units attended the seminar which lasted two days. The Union Minister for Labour presided.

The model agreement approved by the seminar says by way of preamble that the object of the joint councils would be among other things, to step up productivity in the interests of the unit, the workers and the country generally, and to impart to the employees a sense of participation in the enterprise.

The councils will administer welfare activities and supervise safety measures and schedules of work and holidays. They will be entitled to discuss and make suggestions with regard to the economic situation of the concern, production and sales programmes and the general running of the undertaking. They will be consulted by the management in the administration of standing orders and about closures or reduction in operations.

The total membership shall range between six and 12, and decisions have to be unanimous to be valid. The trade union shall elect half the members, the other half being nominated by the management. One non-employee member can be elected except where the management is agreeable to this limit being raised to two, which is the maximum.

The council shall hold office for two years. The posts of chairman and vice-chairman shall rotate between the workers' and managements' representatives.

LABOUR ADMINISTRATION

Apart from dealing with labour legislation and labour conditions and attempting and bringing about uniformity of standards in the different States the Ministry of Labour of the Government of India has undertaken additional responsibilities for the placement of civil and military

demobilised personnel, refugees, etc. It has continued active co-operation with organised employers and labour organisations through the Tripartite Labour Conference and Standing Labour Committee.

Apart from the main Secretariat of the Ministry of Labour it has several attached and subordinate offices. The activities of some of these have been described in the relevant sections, such as Miners' Welfare Fund, and notes on some others are briefly given below.

Labour Bureau.—To meet the ever growing needs of Government, industry and labour for accurate and reliable information relating to labour conditions, labour legislation, etc., the Central Government established on 1st October 1946, a Labour Bureau.

Among other things the Bureau edits the *Indian Labour Gazette* and the *Year Book*.

Chief Labour Commissioner.—The Central Government, in the Ministry of Labour, have also appointed a Chief Labour Commissioner. This officer is in charge of industrial relations and conciliation, labour welfare, operation of labour laws, and maintenance of information regarding wage rates and conditions of work in Central undertakings. There are a number of deputies working under him known as Regional Commissioners.

Chief Adviser of Factories.—In order to ensure uniformity in the administration of the Indian Factories Act and to improve conditions generally in Indian factories, the Government of India have appointed an officer designated the Chief Adviser of Factories. The Chief Adviser has a number of deputies, including deputies who attend to matters relating to the health of the workers and the sanitation and cleanliness of factories.

INDIA AND THE I. L. O.

India joined this organisation at the very start and since 1922 has been one of the eight countries of chief industrial importance and as such has been allotted a permanent seat on the Governing Body of the Organisation. India also contributes liberally towards the finances of the Organisation. In 1956 India's contribution amounted to U.S. \$252,194 which is 3.41 per cent. of the total contribution of all member States. India's share in the appointments of the office is, however, somewhat inadequate.

At the headquarters in Geneva the number of Indian nationals employed at the end of 1955 as Assistant Members of division and above was twelve. Among these the highest post is held by Mr. R. Raghunath Rao who is the senior-most Assistant Director General and the only Asian holding such a post. The Indian Branch at New Delhi employs 19 persons including the Director. The Asian Field Office of the I.L.O. at Bangalore which has been supervising the technical assistance programme in countries of South and East Asia employs 15 Indians.

Industrial Committees

The Eighth session of the Indian Labour Conference decided to establish Industrial Committees to discuss various specific problems special to industries covered by them and submit their reports to the Conference. The first Industrial Committee to be set up in pursuance of the decision was that on Plantations in January 1947. In 1948 Industrial Committees were set up for four important industries viz. Cotton Textiles, Coal Mining, Cement and Leather goods, and in 1955 for Building and Construction industry. There is no uniformity in the representation accorded to Government, employers and workers in these Committees but the representation given to employers and workers is equal in all cases.

Barring the Plantation Committee which has met seven times so far, the other Committees have not been very active. The Plantation Labour Act, 1971, the extension of the Industrial Disputes (Amendment) Act, 1953 relating to lay-off and retrenchment compensation to plantation labour, grant of sickness benefit of two weeks in a year are some of the achievements of this Committee.

Joint Consultative Board

The Joint Consultative Board for Industry and Labour was constituted to promote agreements between employers and workers and to ensure their proper implementation following a recommendation in that regard made by the Development Committee on Industries in 1951. The Board as originally constituted consisted of three representatives each of employers and workers with the Union Minister for Planning as Chairman. Since February 1954 the Board has been reconstituted as a purely bi-partite body and it now consists of 8 members, 4 representing employers and 4 workers. It considers such questions as rationalisation, productivity studies, payment by results, association of workers with management, etc. At its last meeting held in September 1956 the Board decided to set up a subsidiary Joint Consultative Board for the Cotton Textile Industry.

India has so far ratified 23 out of the 103 Conventions adopted by the International Labour Organisation. Twelve of these were ratified upto 1951. She has in addition incorporated into her national legislation the essential features of many other Conventions.

The following is a list of Conventions ratified by India together with the dates of ratification within brackets :—

†1. No. 1 Hours of Work (Industry), 1919 (14-7-1921).

@2. No. 2 Unemployment, 1919 (14-7-1921).

3. No. 4 Night Work (Women), 1919 (14-7-1921).
4. No. 5 Minimum Age (Industry), 1919 (9-9-1955).
5. No. 6 Night Work of Young Persons (Industry), 1919 (14-7-1921).
6. No. 11 Right of Association (Agriculture), 1921 (11-5-1923).
7. No. 14 Weekly Rest (Industry), 1921 (11-5-1923).
8. No. 15 Minimum Age (Trimmers & Stokers), 1929 (10-12-1922).
9. No. 16 Medical Examination of Young Persons (Sea), 1921 (20-11-1922).
10. No. 18 Workmen's Compensation (Occupational Diseases), 1925 (30-9-1927).
11. No. 19 Equality of Treatment (Accident Compensation), 1925 (30-9-1927).
12. No. 21 Inspection of Emigrants, 1926 (14-1-1928).
13. No. 22 Seamen's Articles of Agreement, 1923 (31-10-1932).
14. No. 26 Minimum Wage-Fixing Machinery, 1928 (10-1-1955).
15. No. 27 Marking of Weight (Packages Transported by Vessels), 1929 (7-9-1931).
16. No. 29 Forced Labour, 1930 (30-11-1954).
17. No. 32 Protection Against Accidents (Dockers) (Revised), 1932 (10-2-1947).

- @18. No. 41 Night work (Women) (Revised), 1934 (21-11-1935).
19. No. 45 Underground Work (Women), 1935 (25-3-1938).
20. No. 80 Final Articles Revision, 1946 (17-11-1947).
21. No. 81 Labour Inspection, 1947 (8-4-1949).
22. No. 89 Night Work (Women) (Revised), 1948 (27-2-1950).
23. No. 90 Night Work of Young Persons (Industry) (Revised), 1948 (27-2-1950).

In April 1951 the I.L.O. and the Government of India concluded an agreement for provision of technical assistance to India. In consequence of this three experts visited India in September 1952 to advise the Government of India on the implementation of the Employees' State Insurance Scheme. A team of five experts on productivity came to this country in December 1952 to show how productivity and earnings of workers could be improved by the application of modern techniques of work-study, plant organisation and payment by results. To prepare plans for a national Training within Industry Centre an expert arrived in this country in August 1953 and demonstrated the utility of the system in mills in Ahmedabad and Baroda. Besides this assistance, I.L.O. experts have also advised on vocational training, employment information and occupational classification.

† Conventions containing special provisions applicable to India.

@ Ratification denounced.

FORESTS

TOTAL Forests: 278,083 sq. miles;
Percentage of Forests to Land: 22.3.

Average annual revenue: Rs. 23.08 crores (average of 1953-55).

Allotment under First Five-Year Plan: Rs. 11.69 crores.

Under Second Plan: Rs. 24.40 crores.

Forest area in India is relatively small, the forests are unevenly distributed and the production is also proportionately low.

Systematic management and administration of forests in India dates back to over a century. The first enunciation of policy was in 1894, when forests were classified into four classes: (a) protection forests; (b) timber forests; (c) minor forests; and (d) pasture lands.

The limited outlook of this policy was enlarged upon by the Government of India, and the new forest policy laid down in 1952 provides for the following:

(1) An objective of one-third of all land in the country under forests, with a larger proportion in the hills (20 per cent in plains, 80 per cent in hills); (2) the reconditioning of our mountainous regions, river valleys and coastal lands by preserving and establishing protection forests; (3) the immobilisation of deserts and shifting sands; (4) sustained yield management of national forests, aiming at national self-sufficiency; (5) regulated development and utilisation of village forests; (6) development of tree lands more systematically; (7) State control over and guidance of working of private forests; (8) preservation of wild life; and (9) for State policies to be in conformity with the general principles laid down in the National Forest Policy.

Most of the country's forests are worked according to Forest Working Plans prepared by special staff. On the basis of present conditions and past working, these plans lay down, for a 10-15 year period at a time, silvicultural systems, schedules for thinning and other cultural work, methods of management, staff requirements and exploitation programmes, besides development schemes for roads, buildings.

The formation of forest plantations involving a long-term policy for increased production, is now-a-days an important feature of Indian Forestry, e.g. the very valuable and extensive plantations of Teak, Bluegum, Wattle, Casuarina, Sal, Deodar, as also evergreen species and soft-woods for matches.

'Forests' are a State subject.

The Government of India, however, are responsible for forest research and forest education. The Ministry of Agriculture in the Government of India co-ordinates forest activities in the country, but no forests are directly worked by it except the Andaman forests. The Inspector-General of Forests is their technical adviser in forest matters.

All States have separate Forest Departments. Usually a Chief Conservator of Forests (C.C.F.) heads the Department.

For purposes of administration the States are divided into one or more Forest Circles, each in charge of a Conservator of Forests.

Each Circle is in turn divided into four to six Divisions, each under a Divisional Forest Officer. The unit of administration and execution

of forest works is the Forest Range, managed by a Range Forest Officer. Five or six of these are included in each Division. A Division may be coextensive with Civil districts or larger or smaller than them depending on the importance of the locality.

EDUCATION AND RESEARCH

Forest research and education are centralised in one large institution known as the Forest Research Institute and Colleges located at Dehra Dun.

The Forest Research Institute as such came into being in 1908 as an adjunct to the Imperial Forest College, as it was then called. Through progressive stages of development the Institute has now attained a position which has earned for it international prestige as evidenced by its recognition by the Food and Agricultural Organisation of the United Nations as a Centre for training in Forestry for South-East Asia.

The Forest Research Institute and Colleges are under the administrative control of the Ministry of Agriculture of the Government of India. Its administrative Head is designated the President.

The education wing of the Institute comprising three Colleges is in the charge of the Director of Forest Education.

The Indian Forest College trains recruits of the State Governments to their gasetted forest services. The course stretches over a period of three years.

The Northern Forest Ranger College (Dehra Dun) and the Southern Forest Ranger College (located in Coimbatore) offer training for two years to rangers selected by State Governments in the northern and southern regions of the country respectively.

The research wing of the Institute is organised under two main heads—biological and utilisation. Research on the biological side pertains to the rearing and protection of forests and is conducted in the Silviculture, Botany, Mycology and Entomology branches, while that on the utilisation of forest products is undertaken in the Wood Anatomy, Wood Seasoning, Wood Preservation, Composite Wood, Timber Mechanics, Timber Engineering, Minor Forest Products, Chemistry of Forest Products and Cellulose and Paper and Logging Branches.

Silviculture is under the direction of a Silviculturist. Much of the actual research work is, however, decentralised and done by local State silviculturists in the States, but the Central Silviculturist co-ordinates their work, does all the statistical computing and acts as an information bureau on silvicultural matters for the whole of India.

The Institute also runs a Service Branch, a Statistical Branch and a Publicity and Liaison Branch.

An advanced Diploma course in Pulp and Paper technology, the duration of which is one academic year was started in August, 1957 in the Cellulose and Paper Branch of the Institute. The minimum qualification for admission to the course is a degree in Chemical Engineering.

In pursuance of the decision of the Government of India to establish a regional Centre for forest research in the south, the administrative control of the Forest Products Laboratory, Bangalore, was transferred to the Forest Research Institute and Colleges from April 1957, and it now functions as a nucleus for this centre.

A large number of bulletins and other publications are issued by the Forest Research Institute. Of these a list can be obtained from the Publicity and Liaison Officer, Forest Research Institute, New Forest, Dehra Dun.

FOREST PRODUCE

Forest produce is divided into two main heads—(1) Major produce, i.e., timber and firewood, and (2) Minor produce, comprising all other products, such as bamboos, canes, leaves, fruits, fibres, grasses, gums, resins, essential oils, medicinal and poisonous plants, fatty oils and fats, dyes, tans and animal and mineral products.

The annual outturn of timber and fuel from all sources averages about 539 million cubic feet.

The bulk of the timber supply is used for railway sleepers, constructional requirements, furniture, plywood (especially for tea chests), matches, etc.; but the country imports timber for specialized uses such as jute and textile mill accessories.

Exports from India are limited to selected rosewood logs for high grade furniture to Europe, teak poles for the Middle East and a few other items. Up-to-date, Indian rural economy (and perhaps only to a slightly less extent even its urban population) depends on wood fuel, much of which is derived from the forests. The large-scale use of bamboos and some forest grasses in the expanding paper industry, the exports of sandalwood and its oil and the development of medicinal plants deserve mention in connection with the utilisation of other forest produce.

In the Andamans, the North Andaman forests are leased out to a private agency for working the virgin forests of these islands. The Middle and South Andamans continue to be worked departmentally, mainly to meet the needs of the mainland especially for matchwood and plywood logs. The Andamans also contribute in an increasing measure (by restricting on exports abroad) towards the needs of railways, etc. on the mainland for Padauk, Gurjan and other hardwoods.

Nearly two million people are estimated to be employed on forest work; but the figures are probably below the actuals, as much forest labour is not full-time labour, devoting seven or eight months in the year to agriculture and the rest to forest work.

The general practice of the Forest Departments in the various States is to dispose of standing timber and forest produce by open auctions. Departmental conversion and sales of the produce itself are resorted to only where special considerations necessitate them, e.g. working of sandalwood because of its great value.

Timber production in India is not sufficient to meet internal needs. While foreign markets could be readily developed for Indian timber, exports are limited to small quantities of ornamental timbers for European countries, teak poles for the Middle East from the west coast and traditional despatches to markets in Pakistan.

Exports are regulated by quotas which are periodically re-examined.

Imports are regulated by protective or revenue duties and are restricted to such specialised items as are not readily obtainable from local production.

Revenue, Expenditure and Surplus of Forests in India (1954-55) (Rupees in thousands)

State (existing before the reorganization).	Revenue	Expenditure	Surplus
Andhra	89.13	31.00	8.13
Assam	67.07	52.91	14.16
Bihar	76.33	65.14	11.19
Bombay	4,82.03	1,51.44	2,30.59
Madhya Pradesh	4,09.60	1,44.23	2,65.32

Forest Research Institute and Colleges	5.21	25.13	(-) 19.92
GRAND TOTAL	27,12.09	12,58.98	14,53.11

Note:—The following States were unaffected by the reorganization: Assam, Orissa, U.P., Kashmir, Delhi, Himachal Pradesh, Manipur, Tripura, Andamans.

Figures for the present Punjab can be got by adding figures for the old Punjab and PEPSU.

Approximate figures for Rajasthan can be got by adding figures for Rajasthan and Ajmer.

For the rest of the States figures are given where available under individual States.

The area and classes of forest State-wise (States before the re-organization) in 1954-55 are shown in the table below:

State (pre-reorganization)	Forest Area in Sq. Miles.			
	Reserved	Protected	Unclassed	Total
Andhra	9,700	2,057	1,916	13,673
Assam	6,373	110	12,961	19,444
Bihar	1,492	11,497	898	13,887
Bombay	14,044	1,290	5,529	20,863
Madhya Pradesh	26,184	10,453	25,967	62,604
Madras	8,633	1,301	..	9,933

Manipur	388	857	1,080	2,325
Tripura	1,020	2,438	..	3,458
Vindhya Pradesh	5,613	101	4,204	9,918
TOTAL	9,664	6,633	7,254	23,551
The Andaman and Nicobar Islands	1,498	555	447	2,500
GRAND TOTAL	138,056	62,604	80,236	280,896

Note:—The following States were unaffected by the reorganization: Assam, Orissa, U.P., Kashmir, Delhi, Himachal Pradesh, Manipur, Tripura, Andamans.

Figures for the present Punjab can be got by adding figures for the old Punjab and PEPSU.

Approximate figures for Rajasthan can be got by adding figures for Rajasthan and Ajmer.

For the rest of the States figures are given where available under individual States.

SECOND FIVE-YEAR PLAN

In the Second Five-Year Plan, forest development will be co-ordinated and assisted by the Centre on a large scale, in the period 1956-61. States have adopted many schemes for raising commercial, industrial and fuel plantations, for increased output of timber and other produce, for afforestation of degraded forests and waste lands, for making forests more accessible for extensive working, for conservation of wild life and for amenities for forest labour and staff.

On all this an expenditure of about Rs. 25 crores is proposed and the Centre will help the States with loans and grants. The Government of India has also plans for an expenditure of over Rs. 2 crores for expanding their research and training organizations.

The general aim is to rehabilitate about 380,000 acres of forest, and to bring 13,000 acres under wattle and blue gum, 2,000 acres under medicinal plants, 50,000 acres under matchwood and another 50,000 acres under commercially important species like teak.

A Forestry Commission might be set up for management and development.

Achievement under the first Plan includes: bringing under State control about 20 lakh acres of forest land, construction of 3,000 miles of forest roads, rehabilitation of 75,000 acres, and an increase in matchwood area at the rate of 3,000 acres a year.

AGRICULTURE

INDIA is predominantly an agricultural country. About half of the country's national income is derived from agriculture and allied activities which absorb nearly 2 of its working force (of about 152 million in 1956 inclusive of dependents).

The gross value of the agricultural commodities produced in the country (1950-51) was Rs. 48,660 million (and net value Rs. 41,120 million).

The values of the principal crops were:—
Rice: Rs. 11,990 million; Wheat: Rs. 3,340 million; Barley: Rs. 800 million; Jowar: Rs. 1,940 million; Bajra: Rs. 810 million; Gram: Rs. 1,470 million; Arhar: Rs. 830 million; Coconut: Rs. 760 million; Groundnut: Rs. 2,160 million; Rape and Mustard: Rs. 690 million; Chillies: Rs. 680 million; Tobacco: Rs. 710 million; Sugarcane: Rs. 3,050 million; and Cotton: Rs. 1,190 million.

India virtually holds the monopoly in lac, leads the world in groundnut and tea production, and is the second largest producer of rice, jute, raw-sugar, rape, sesamum and castor seeds.

Some major facts about Indian agriculture (1954-55): Area of India, 811 mil. acres; area available for land utilization, 721 mil. acres (rest is mostly unsuitable for cultivation); uncultivated area 406 mil. acres (forest 133 mil. acres, area not available for cultivation 122 mil. acres, other uncultivated area 94 mil. acres and fallow 54 mil. acres); area actually sown 315 mil. acres; total cropped area taking into account area sown more than once 352 mil. acres; area sown with food crops 267 mil. acres; area sown with non-food crops 85 mil. acres; total area irrigated 54 mil. acres.

Average rainfall 45"; deficiency of 25 per cent is classed dry; deficiency of 40 per cent severe drought; usually one year in five is a dry year, one in ten, a year of severe drought, one in 20 to 25 years wide-spread severe drought.

Out of the total cultivated area in the Indian Union of 315 million acres about 54.4 million acres are irrigated annually. Of this area 22.3 million acres are irrigated by canals, 9.8 million acres by tanks, 16.4 million acres by wells, and 5.9 million acres from other sources. The percentage of irrigated area to total culti-

vated area is, however, small, being only a little over 17 per cent. Protective irrigation works have made agriculture stable instead of precarious in many districts.

About one-fifth of the total irrigation of the country is got from lifting water from wells ranging in depth from a few feet to over fifty feet.

Tank irrigation is common in central and southern India.

Obstruction of temporary Bandharas across streams and small rivers after heavy monsoon period is over, is also common in parts of Bombay and Madras States for irrigation during the drier Rabi period.

The great bulk of agricultural land in India is deficient in organic matter. In India, cattle dung is largely utilised as village fuel and only about 40 per cent of it is used for manurial purposes.

The following table will show the area under principal crops and the yield:

Crops	Area under crops (Thousand acres)			Production (Thousand tons)		
	1954-55 (a)	1955-56 (a)	1956-57 (a)	1954-55 (a)	1955-56 (a)	1956-57 (a)

Notes:—(a) Figures for 1954-55 and 1955-56 are based on revised and partially revised estimates respectively, hence subject to revision. (b) Figures for tea and rubber relate to the calendar year (i.e. for 1955-56 relate to 1955 and so on) and production (of tea, rubber and coffee) is mentioned in thousand pounds. (c) Coconut production is mentioned in terms of 1,000 nuts. (d) Estimates of area and production of non-food-crop crops (i.e. banana, papaya, sweet potato, tapioca, turmeric, sann-hemp, indigo, lac, opium, coconut, and pulses excluding gram and redgram (tur) are made on ad hoc basis, and hence subject to revision. (e) Rice production is estimated in terms of cleaned or husked rice; sugarcane in terms of raw sugar or gur; groundnut unshelled; cotton as lint (of bales of 392 lbs.); jute and mesta as fibre (in bales of 400 lbs.); pepper as dry black pepper, ginger and chillies dry. (f) In the case of banana, papaya, sweet potato, tapioca, turmeric, sann-hemp, indigo the acreage is in acres (and not in thousand acres) and production in tons (and not in thousand tons). Similarly also opium, the production of opium and lac is however expressed in maunds (of 82 2/7 lbs.). N.A. stands for data not available.

The agricultural season is divided into two main sub-divisions the Kharif season of the monsoon and the Rabi season of the cold weather. This is not well-marked in the extreme east or extreme south.

The ground is generally prepared for cultivation in April and May for kharif crops, and by the end of October or early November for rabi crops, i.e., after the kharif crops have been harvested. Kharif crops are sown in the monsoon, generally after the first shower. The usual time for sowing of rabi crops is the middle of November. The crops are harvested from the middle of March to the end of April.

The chief Kharif crops are: rice, jowar, bajra, maize, cotton, sugarcane, sesamum and groundnut. The chief Rabi crops are: wheat, barley, tea, gram, linseed, rape and mustard; and in south India rice, jowar and cotton.

The harvest comes on the market as follows: Kharif crop (Nov. 1), Rabi crop (May 1), Rice (Nov. 1), Wheat (May 1), Sugarcane (Nov. 1), Cotton (Sept. 1), Jute (July 1), Kharif oil-seeds (Nov. 1), Rabi oil-seeds (April 1), Tea (Jan. 1), Coffee (July 1), Sugar (Jan. 1).

SOILS

Four main soil groups can be recognised in the sub-continent, viz., (1) the red soil derived from rocks of the Archaean system which characterizes Madras, Mysore and the south-east of Bombay and extends through Andhra Pradesh and Madhya Pradesh to Orissa, Chota Nagpur and the south of W. Bengal; (2) the black cotton or *regur* soils which overlie the Deccan tract and cover the greater part of Bombay, Berar and Andhra Pradesh with extensions into central India and Bundelkhand; *regur* soils also occur in Madras though not so typical as proper *regurs*; (3) the great alluvial plains, agriculturally the most important tract in the country as well as the most extensively cultivated includes mainly the Indo-Gangetic plain embracing northern Rajasthan, most of the Punjab area, the plains of Uttar Pradesh, most of Bihar and the West Bengal area and half of Assam and (4) the laterite and lateritic soils which are found in the east a belt round the Peninsula and extend through West Bengal into Assam and Burma. Besides these soils there are much soils in Kerala and forest soils in the northern part of India.

Saline and Alkali soils also form an important group of Indian soils which are known as *reh* or *usar* in Uttar Pradesh, *zalkar* and *thar* in the Punjab and *chapan* or *kari* in Bombay State. Such soils are characterized by a high degree of impermeability and "stickiness" together with high alkalinity and frequent presence of large excess of free salts. They are usually poor in nitrogen and humus and unsuitable for crop growing without previous reclamation.

Marshy and peaty soils are found in coastal areas of Orissa and West Bengal, North-West Bihar, Almora district of U.P., south-east coast of Madras, and in Kerala.

Under the Technical Co-operation Administration Programme a research project on soil fertility and fertilizer use has come into operation at the Indian Agricultural Research Institute. Under this project the twenty major soil regions of India have been grouped into six zones (Poona, Delhi, Kanpur, Nagpur, Coimbatore and Sabour) for purposes of soil survey and collection of soil data.

The fertility status of these soils is being examined by manurial trials at 40 centres throughout the country.

The important question of soil conservation and development is receiving great attention. A sample soil conservation survey conducted over 80,000 acres of the scarcity tract of Bombay State reveals that over 71 per cent of the land surface has been denuded either partially or severely, out of which about 32 per cent is unfit for crop growing.

The organization of soil conservation work in the States and Territories is the responsibility of the respective Governments. The co-ordination of work between these is achieved through the agency of the Central Soil Conservation Board which was set up in the Ministry of Food

and Agriculture in 1958. Similar boards are also set up in most of the States and Territories.

Altogether seven research-cum-training centres have been established at the following places:—

1. Ootacamund (Madras) for erosion control in the Nilgiri and other hills;
2. Bellary (Mysore) for soil conservation studies in black soils;
3. Kotah (Rajasthan) with sub-centre at Agra for erosion control in the Chambal and Jumna ravines;
4. Jodhpur (Rajasthan) for afforestation in the Rajasthan desert;
5. Dehra Dun (U.P.) for studying problems of afforestation in the Siwalik hills with the sub-station at Chandigarh (Punjab) for training *chok* (hill torrents);
6. Vasad (in the Gujarat tract of Bombay) for erosion control in the ravines along rivers in Gujarat.
7. Research-cum-training centre at Hazaribagh (in Bihar) under the Damodar Valley Corporation.

Financial assistance of 13 million rupees in the form of subsidies and loans has been given by the Board to 12 States and 4 Union Territories during the year.

AGRICULTURAL ECONOMICS AND STATISTICS

The Directorate of Economics & Statistics is one of the main organizations under the Central Government which deals with all agro-economic problems in the sphere of food and agriculture.

Steps initiated during the First Five-Year Plan continued during the 2nd Five-Year Plan as well and a provision of Rs. 5 million is provided in the State plans for schemes of improvement of land records and statistics. State plans will be aided on a half and half basis and Rs. 0.8 million is provided in the 1957-58 budget for these purposes.

A research division has been set up in the Directorate to co-ordinate Farm Management investigations and also to conduct research in production economics.

The statistical wing of the Indian Council of Agricultural Research is a sister organisation.

The statistics about Japanese method production are given below:

	1953-54	1954-55	1955-56	1956-57
Area under Japanese Method (in Million acres)	0.402	1.320	2.096	2.374
Additional production (of rice in million tons) due to Japanese Method ..	0.131	0.496	0.89	0.800*
Yield in Maunds per acre (of rice) by				
(a) Japanese Method	25.82	23.46	24.89	19.90*
(b) Local Method	16.92	12.93	13.33	13.33*

*Provisional, and hence subject to Revision.

In the Second Plan it is proposed to cover 8 million acres with Japanese methods—1.6 mn. acres every year.

The seasonal rice crop has different names in different States:

State	Autumn	Winter	Spring
Andhra	Sarava, abi	Dalua, Tabi
Assam	Ahu, aus	Sali, Bao	Boro
Bengal	Aus	Aman	Boro
Bihar	Bhadol	Aghani	Boro
Bombay	Early	Middle
Kerala	Viruppu	Mundakan	Punja
Madras	Kar, Kuruval	Samba	Navara
Mysore	Haino
Orissa	Beali	Sarad	Dalua
Punjab, U.P. and Madhya Pradesh	Karif

WHEAT

The area under wheat is about 32.0 million acres and production about 0.1 million tons. Wheat is grown widely throughout the north as a winter crop, U.P., M.P. and Punjab supplying over 72 per cent of the total output in the country. This crop occupies, on an average, about 10 per cent of the total cultivated area.

More than one-third of the crop is irrigated.

The majority of the varieties grown belong to the species *Triticum vulgare*; *T. durum* is also cultivated to some extent particularly in Peninsular India.

RICE

Rice crop occupies the largest area in the Indian Union, over 78 million acres giving 28.1 million tons of cleaned rice.

Madras, Bihar, Bengal, Orissa, Madhya Pradesh, Uttar Pradesh, Assam, Andhra and Bombay are the main rice growing States and they together claim about 95 per cent of the total rice area in India. About a third of the crop is irrigated, the bulk of the rice is winter crop, i.e., sown in June-July and harvested in November-December, but there are rice grown in different seasons the harvest coming in summer, autumn or winter.

Rice yield in India is, however, one of the lowest in the world. The average yield is a fourth of that of Spain and Italy, a third of Japan, and half of what the Chinese and the American rice farmers obtain. But, in recent times the 'krishi Pandits' have produced 74 mds. of Taddy per acre in 1949-50; 124 in 1950-51 and 136 in 1951-52. The production was however only 102 mds. in 1954-55. At present 76 research stations spread almost all over the States of the country are working on similar problems of rice. Though about 4,000 distinct types of rice differing in essential characteristics occur in this country, 455 superior strains giving an average of 10 to 20 per cent better yield than the farmers varieties have been evolved. But they cover only a very insignificant percentage of the total rice area: Andhra 70 per cent; Assam 8 per cent; Bengal 10 per cent; M.P. 16 per cent; Orissa 10 per cent; Jammu and Kashmir 10 per cent and U.P. about 12 per cent.

Rice farming practices vary considerably from region to region and even from place to place depending upon such factors as climate, soil type, and rainfall.

Japanese Method

In the last few years the Japanese method has been tried with good results specially in areas of assured water supply. But many individual steps in this were evolved through research in India.

The crop is generally grown after a summer fallow and except in irrigated tracts, depends largely on the conservation of the soil moisture from the previous monsoon. The crop is generally harvested in February to April and the threshing and winnowing go on up till the end of May.

Unfortunately, wheat is subject to a virulent fungus disease called rust, which is the potent factor limiting its larger production in all wheat growing regions of the world, including India. The magnitude of the loss to wheat crop due to this fall disease during periods when it occurs in an epidemic form is very great indeed. In

normal years, the loss is about 5 per cent involving about sixty million rupees. In other wheat growing countries, generally, one kind of rust only is a serious menace. Though in Peninsular India only black rust is serious, northern India with the largest wheat area has to face the onslaughts of three different rusts, i.e., black, red and yellow, each with a number of races.

Systematically planned work on the development of rust resistant wheats is being done under the aegis of the Indian Council of Agricultural Research and a large number of rust resistant varieties have been produced.

Besides these, varieties which have greater adaptability and yielding power are also bred.

But the coverage of the total wheat area by the improved varieties is yet to be pushed up. At present improved varieties form only 16 per cent in M.P., 33 per cent in U.P. and about 70 per cent in the Punjab, of the wheat area of the respective States.

BARLEY

Barley is an important cereal in Northern India, particularly in U.P., Rajasthan, Bihar and Punjab. It is specially important in the hills and is grown even at considerable altitudes. The area under this crop in India is over 8 million acres, and production over 2.7 million tons, with an average yield of 748 lb. per acre. The advantage in the crop is that it can be grown on soils unsuited for wheat and that it generally matures earlier.

Improved varieties of barley have been evolved at Pusa.

MAIZE

Maize is cultivated over an area of about 9.2 million acres and gives an annual production of over 3.0 million tons. The average yield is about 633 lbs. per acre. It occupies the largest area in U.P., Bihar, and Rajasthan, but is also grown on a quite extensive scale in several other States. Maize crop is of special importance as the staple diet of the inhabitants of sub-montane, hilly regions. In the northern parts of the country it is extensively grown also as a fodder crop. The variety grown is mostly the "flint" type. Maize is grown both under rain-fed and under irrigated conditions.

According to the Directorate of Economics and Statistics, Ministry of Food and Agriculture, the first estimate of maize for 1957-58 puts the current year's area under the crop at 8,627,000 acres as against the corresponding adjusted estimate of 8,265,000 acres for 1956-57. This increase in acreage has been shared mainly by Bihar and to a lesser extent by Madhya Pradesh. This estimate generally covers the period up to middle of October 1957 and does not cover the entire area sown to maize crop during 1957-58.

MILLETS

Mostly of short duration (2½ to 6 months from seed to seed) millets are grown in localities and in conditions where most of the other cereal crops are not grown, such as poor and infertile soils and low rainfall (of 20-50"). They are associated with the staple diet of the lower than the upper strata of society, and provide the chief cereal supplement for all regions outside the main rice and wheat tracts. Millet stalk form the chief food of the cattle population for about half the year in the millet regions of the country either in green or dry form. Some of them like jowar are grown in substantial areas solely for fodder purposes and special varieties are developed for fodder purposes. Associated as they are with poor land, dry conditions, and the chief crops of the rain-fed and dry farmed tracts of the country, they respond to both manuring and irrigation. The major types of millets such as jowar, bajra and ragi require better land than others and are raised under irrigation also and sometimes with manuring with advantage.

Millets are grown in India on about 86 million acres annually and their production is estimated to be about 15 million tons. They are raised in almost all the States, particularly in the dry

areas extending at a tangent from Punjab and Bombay in the north-west to Tinnevely in Madras, in the south-east.

The more common millets cultivated in India are:—

Jowar (*Sorghum* sp.), Bajra (*Pennisetum typhoides*), Ragi (*Eleusine coracana*), Kora or Kangni (*Setaria italica*), Kodon (*Paspalum scrobiculatum*), Same or Kutki (*Panicum miliare*), Chena or Varagu (*P. miliaceum*), Oodalu or Sanwak (*Echinochloa frumentacea*) and Sawan (*P. crusgalli*).

Jowar:—Among the millets jowar occupies a premier position because of the size of the crop and the economic importance of the grain. Annually about 42 million acres are grown under this to yield about 7 million tons of grain. Bombay, Madhya Pradesh, Andhra and Rajasthan contribute to about 89 per cent of the national acreage. Though mostly grown under rain-fed conditions about 3 per cent are raised by irrigation. Jowars require better land than the Bajras and the distribution of the two crops follow the quality of the soil. There are also two main types, dry or juicy. The former is mostly grown in the dry Deccan areas though those with the juicy stem are more relished by cattle. The duration of the crop ranges from 3 to 6 months.

The average yield is about 4½ mds. per acre.

According to the Directorate of Economics and Statistics, Ministry of Food and Agriculture, the first estimates of Jowar for 1957-58 puts the current year's area under the crop at 25,776,000 acres as against the corresponding adjusted estimate of 25,538,000 acres for 1956-57. This increase in acreage has been shared mainly by Bombay and Mysore and generally covers the period upto middle of October 1957 and the area sown to Kharif crop only.

Bajra:—Bajra covers over 27 million acres to yield about 3 million tons of grain. The average yield of the crop is about 3.6 mds. of grain per acre. Bombay, U.P., Rajasthan, and Punjab are the chief growing tracts. The duration of the crop varies from about 2½ to 5 months.

Ragi:—Ragi ranks the third in importance among the Millets and occupies over 6 million acres to produce about 1.9 million tons of grain. Its average yield is rather high, 9 mds. per acre. More than half the area is in Mysore, Madras and Andhra. Sixteen improved strains of ragi evolved in Madras and two in Mysore are being grown in these States.

Other Millets:—The others grouped under lesser or minor millets form about 1/6 of the total area under millets and are grown in about 12 million acres and yield about 2 million tons of grain. Some of them are of regional or local importance only and also of limited consumer demands. The most important among them are Kora or Kangni, Kodon, Cheena or Varagu, Oodalu, and Sawan.

PULSES

Pulses form an important group of crops occupying about 1/7 of the cultivated area in India. The total acreage is about 54 million and production over 10 million tons. They form the primary source of protein for the vegetarian population of the country. Some of them form a source of nutritious fodder, while others make excellent green manure crops. Being leguminous plants they enrich the soil and rightly form an inevitable component in mixed cropping as well as the linch pin in most crop rotation.

The major pulse crops of India are:—Gram or Bengalgram (*Cicer arietinum*), Redgram (*Caesalpinia casia*), Blackgram (*Phaseolus mungo*), Greengram (*P. aureus*), Horsegram (*Dolichos biflorus*), Peas (*Pisum* sp.), Khesari (*Lathyrus sativus*), Lentil (*Lens culinaris*), Moth (*Phaseolus acutifolius*), Guar (*Cyamopsis tetragonoloba*), Soyabean (*Glycine hispida*), Cowpea (*Vigna catjang*).

Gram is the most important pulse crop as it occupies about 40 per cent of the total pulse area and accounts for about 50 per cent of the total pulse production.

The main tracts of production are in U.P., Punjab, M.P. and Rajasthan where it is used to some extent as a substitute for cereal. Elsewhere it is considered merely as a pulse.

Redgram is the second important pulse crop covering about 11 per cent of the pulse area and responsible for about 16 per cent of the total pulse production. It is produced in U.P., M.P., Bihar, Andhra, Bombay and Madras.

Blackgram accounts for 6 per cent of the total pulse area and 4 per cent of the production. Improved varieties in this crop have been evolved in Bihar (BR. 10, 11, 68 and ST. 8); U.P. (Type 9 and 27); Madras (Vsm. 1) and Orissa (S. 1601). Mixed cropping of early autumn (beal) paddy with blackgram has been found to be more profitable than farming these crops alone in Orissa.

Greengram comes next as an important pulse crop with 6 per cent in the total pulse area and 2 per cent of the total pulse production. High yielding quality types of greengram is produced in Bihar (BR. 1-6 and S. 7); Bombay (781 and 1/49); and Madhya Pradesh (two strains). Also, one each in Orissa (S-150), Madras (Co. 1), and in U.P. (Type 1).

Horsegram covers 5 per cent of the total pulse area but accounts for 2 per cent of the production. Five improved types of this crop are under distribution in Madras and 2 each in Orissa and Andhra. Mixed cropping experiments at Visianagram (Andhra) of horsegram with millets and cotton indicated that it forms a profitable mixture.

Peas form about 4 per cent of the total pulse area and about 6 per cent of the production. As in the case of greengram *visavis* redgram this is an important vegetable pulse crop of northern India as cowpea is in the high rainfall areas of south-west and north-east India. It is produced in Bihar and U.P.

Khesari accounts for 4 per cent of the acreage under pulses and 3 per cent of the production; Bihar is the most important Khesari growing State, M.P. and Bengal coming next.

Lentil is cultivated over 2 per cent of the pulse area and it accounts for 2 per cent of the production. Bengal, Bihar, M.P. and U.P. are the important lentil growing States. Type 577 and 94 in Bengal and two types (3 and 36) in U.P. are evolved, out of which type 36 has been found to be good for late paddy rotations in U.P. Lentil has been found to be very useful also for green manuring paddy crop in Kashmir valley.

Moth is cultivated in 5 per cent of the total pulse acreage and its contribution to the pulse production is 2 per cent. An improved variety of this crop (4301-12) has been distributed in U.P.

The rest of the pulse crop including guar, cowpea, wal and soyabean account for 17 per cent of the total pulse area and 14 per cent of the pulse production.

Guar:—Cluster bean, is cultivated throughout India in varying extent and also for varied purposes. Not less than 0.2 million acres are under this crop and its grain production is estimated at about 2 million maunds annually. Except in North and North-Western India cultivation of guar is mostly as garden crop, particularly for its tender pod for vegetable purposes. On the other hand Punjab, Rajasthan, western U.P. and Bombay are the main areas of organized cultivation. The first region accounts for 60 per cent, U.P. for 12 per cent and Bombay for the rest.

About a third of the total grain produced in the country is exported mainly for industrial purposes. About 0.05 million maunds are used for the same purpose in India for finishing in the textile mills in the Gujerat tract; the rest is utilized as a concentrated feed for livestock. The foliage of the crop makes good forage and is often used for green manuring purposes also. Improved types of this crop suiting to various purposes have been evolved. Long podded types for vegetable purposes have been produced at Coimbatore, Nagpur and Pusa and four grain

types in Bombay; also dual purpose, fodder cum grain types. Types purely meant for fodder purposes are also produced in Bombay (such as D. 101 and D. 128) and in the Punjab (D. FOS. 22).

Soyabean—The acreage under soyabean is not more than 0.2 million in India and production not more than 0.2 million mds. of grain. The crop is of some importance in U.P. and in the Himalayan tract and to a lesser extent in Madhya Pradesh, Bombay and Mysore. Soyabean flour can be blended in varying proportions with wheat flour for making chapatties and bread, cake and other bakery goods; it can be used also in the making of soyabean milk, curd, sauce, etc. Soya milk is almost as good as cow's milk and costs only as. 2 per lb.

Cowpea—Cowpea is an important vegetable and grain pulse particularly in the Kerala and Bengal regions where improved varieties are evolved; also in Madras and the Punjab.

OILSEEDS

Excluding coconut and cotton, the total acreage under major oilseeds in India is over 29 million acres (i.e. about 9 per cent of cropped area) with a production of 6.0 million tons of seeds. Most of them produce edible oil while others (like castor and linseed) yield non-edible oils for industrial and medicinal uses. The cakes barring a few exceptions make good concentrate feed for the livestock or manures for our crops. Elsewhere industrial uses of these cakes have been increasingly exploited. They are grown under a variety of soil and climatic conditions. But, coconut is confined to the coastal areas mainly of South-West India and Linseed to the upper part of the Indian Peninsula.

The most important oilseed crops grown in the country are:—Groundnut (*Arachis hypogaea*), Rape and Mustard (*Brassica sp.*), Sesamum (*Sesamum orientale*), Linseed (*Linum usitatissimum*), Castor (*Ricinus communis*), Niger (*Gutierrezia abyssinica*), Safflower (*Carthamus tinctorius*), Coconut (*Cocos nucifera*).

The total number of oil mills during the year 1954-55 were 7,791.

The quantities of vegetable non essential oilseeds, oils and oilcakes exported from India during 1955-56 were 49,298 tons, 2,83,435 tons and 1,92,702 tons respectively valued at Rs. 34.5, Rs. 345.49 and Rs. 53.1, millions respectively.

The bulk of the exports were in the form of groundnut and its oil. Sesamum and the niger seed were the other two oilseeds which have a high share in the exports.

Among the oils, linseed oil was second and castor oil third in importance.

Groundnuts—India is the largest producer of groundnuts accounting for about 40 per cent of the world's production. Groundnut occupies over 12 million acres representing about 44 per cent of the area under oilseeds in India. Total production is over 4.0 million tons. The average yield per acre is over 9 mds. Bombay, Andhra and Madras are the principal growing areas. Several varieties are under cultivation. These commonly cultivated are broadly divided into "bunch" and "spreading types." The Commercial types "Bold" and "Coromandi" are produced by the spreading type and the "Peanuts" and "Red natal" from the bunch varieties. The latter generally possess higher selling per cent (80 per cent) than spreading varieties (60-75 per cent). This, and the oil content of the kernel as well as the colour and size of the produce are important factors apart from yield, deciding the economic assets of a variety. Four strains (TMV 1 to 4) are produced in Madras and 3 spreading and 2 bunch types in Bombay. The spreading type 25 is popular in U.P. and one spreading (EG. 7) and ten bunch types have been produced in Mysore.

Rape and Mustard cover over 19 per cent of the oilseed crop area. They are cultivated in 6.2 million acres and produce over 1.0 million tons. The average yield per acre is about 4.2 mds. U.P. accounts for nearly 4th of the area,

and Punjab, Rajasthan, Assam and Bihar are other important States where this crop grows. In some regions it is grown as pure crop and in others, mixed with wheat and gram.

Sesamum is the next important oilseed crop covering about 22.0 per cent of the total oilseed area. It is cultivated on about 6 million acres and with an average yield of 2.4 mds. per acre the production is about 0.5 million tons of seed. U.P. is the largest producer, followed by Rajasthan, Madhya Pradesh, Madras and Bombay.

Linseed accounts for about 11 per cent of the total area under oilseeds in India. From about 3.8 million acres with an average yield of 12.3 mds. per acre this crop produces about 0.4 million tons of seed. States like Madhya Pradesh, Uttar Pradesh, Bihar, Andhra, Bombay, Rajasthan, Mysore and Punjab grow the crop to a considerable extent. Improved strains of this crop with high yield and oil content are produced in important growing areas.

Castor forms only 4 per cent of the total oilseed area in India, and about 1.4 million acres are under this crop. Its annual production is over 0.1 million tons and average yield, about 5 mds. seeds per acre. Over 60 per cent of the all India acreage is confined to Andhra; the next important castor growing area is Bombay. It is more often than not, raised as a mixed crop. The leaves of the plant are used for feeding Eri silk worm in Assam, Mysore and elsewhere. High yielding strains with other desirable economic characters have been evolved in castor also in various States.

Niger—India is the chief producer of Niger seed in the world and has an area of about 0.7 million acres under the crop with an annual production of about 0.06 million tons. It is chiefly cultivated in M.P., in the Deccan and North-East Madras. Five improved high yielding varieties of this crop with good oil content have been produced in Bombay; also one (i.e. N. 5) in M.P.

Safflower is the source of an important dye also of oil. It is largely cultivated in Bombay, M.P., Mysore and in the North-East of Madras. Five improved varieties have been brought out in Bombay and one (No. 7) in M.P.

Coconut—India ranks second among the coconut growing countries, accounting for about 18 and 22 per cent of the world's acreage and production respectively. 1.6 million acres were under this crop which produced about 3,900 million nuts in 1954-55. Kerala accounts for more than 75 per cent of the production. The rest are in Mysore, Andhra, Madras, Orissa, Bombay, Bengal, Andaman and Nicobar Islands and in the Laccadive Islands off the Kerala coast in scattered patches. Considering the importance of the crop as the main food and cash crop of the population of the Kerala region the Government of India set up the Indian Central Coconut Committee in 1945, which has concentrated attention on better production, marketing and utilization of coconut products and co-ordinated the various other aspects of the industry. It has set up two Central Research Stations one at Kasargod and the other at Kayamkulam both in the heart of coconut regions to deal with the various fundamental problems facing coconut farming. Regional Stations are also established in important coconut growing States.

Others like Mahua (*Bassia latifolia*), Punna (*Calophyllum inophyllum*), Choolmorga (*Hydnocarpus alpinus*) and Neem (*Azadirachta indica*) are also oil producing trees of local importance. Cotton seed is also an important source for vegetable oil in India.

The annual production is about 1.5 million tons, most of which—about 75 per cent—is desi and the rest American. The desi seeds contain more oil.

SUGARCANE

India with its 35 per cent of the world's sugarcane acreage is the largest sugar producing country in the world. The total area under the cane is over 5 million acres. Sugar industry is

one of the largest industries in India, second only to cotton textiles. The total capital involved in the industry is about 350 million rupees. The total value of the production of sugar industry (both gur and sugar) is about 2,600 million rupees. It finds employment for 3,500 university men and 0.13 million labour in addition to large number of persons employed in the Gur industry, transport, wholesale and retail trade. No less than 20 million farmers are also engaged in the cultivation of cane. The excise and other duties accruing due to sugar industry is more than 6 million rupees annually. These underline the importance of the crop in our national economy.

The Planning Commission has asked for an increased output of sugarcane to the extent of 0.89 million tons in terms of sugar which would enable the industry to work at full capacity and also raise the per capita consumption of sugar from 6.3 lbs. (in 1949-50) to 8.3 lbs. (in 1955-56). The increased output of cane will be large enough to allow simultaneous expansion in the production of white sugar to 1.5 million tons (by 1955-56), and in the per capita consumption of gur and Khandassari from 22.8 lbs. to 24.4 lbs. This target was almost achieved by 1951-52, even though in the later years it has fallen down. Much worse, the production showed a negative relation to expanding consumption. Production in 1951-52 to 1953-54 was 1.48, 1.84 and 1.001 million tons while the consumption was 1.17, 1.66 and 1.82 million tons, with a progressive increase in per capita consumption of 8.14, 9.13 and 11.4 lbs. The gap is bridged with imports again, as it was before the production.

Sugarcane is consumed in India in four different ways: 1.5 per cent of the total product as Khandassari, 30 per cent as white sugar and about 50 per cent as gur and the rest for seed, chewing and such like. A portion of gur is also processed for white sugar. The consumption of factory sugar has gone up by about 60 per cent since 1951-52 when it was 1.17 million tons, while the consumption of gur has fallen from 3.24 million tons to 2.82 million tons in the same period. In the case of Khandassari there had been neither rise nor fall. Consumption has moved both ways around a rough average of about 0.1 tons. These show that the increasing demands of the nation for sugar have been met wholly by factory sugar industry which in addition has also encroached upon the market for gur.

The important sugarcane areas are U.P., Punjab and Bihar which contribute about 55.6, 8.9 and 8.3 per cent respectively of the total sugarcane area in the subtropical belt and Bombay, Madras and Andhra in the tropical areas making up 5.3, 3.3 and 3.1 per cent. Thus about 2 of the cane area is situated in the subtropical belt where the yield is 12-15 tons in contrast to 30-50 tons of the tropical region. Sugarcane being a tropical crop, yields better (i.e. by 25 per cent) and is raised cheaper in that area and a shift of the cultivation to the tropical belt of India itself will solve a major sugar problem.

The All-India second estimate of sugarcane, 1957-58, puts the current year's area and production at 4,784,000 acres and 65,501,000 tons of cane as against 4,475,000 acres and 58,985,000 tons of cane for 1956-57. This estimate covers the period generally upto middle of October 1957 and does not cover the entire area sown to sugarcane crop during 1957-58. In 1954-57 the production of sugar in India exceeded 20 lakh tons.

COTTON

Cotton area was 19.8 million acres (in 1956-57) with an estimated production of 4.7 million bales. The expansion in output consists mainly of better quality cotton of which we are still in short supply. At the same time, about one million bales of superior cotton still continue to be imported annually from Egypt, East Africa and U.S.A. for meeting the requirements of our mills.

Cotton is a subtropical crop grown in varying measures in all parts of India. The rainfall of the cotton tracts ranges from 10-12 inches in Punjab and Rajasthan to over 100 inches in the Hill

tracts of Assam. The crop is sometimes entirely raised or partly or wholly raised by irrigation. Cotton is sown in almost all parts of the year depending upon the region and the variety. Early sowing usually increases its yield. Cotton is rotated with various cereals, oilseed legumes and other crops in different areas. Of the 15 million acres planted with cotton only a million acres are under irrigation. They are largely confined to North and North-Western India and to the South.

The "ara island" is the world's finest cotton grown principally in the West Indies. It has now been found that the "Andrews" variety can be successfully grown in the heavy rainfall areas of the coastal districts of Kerala and Mysore States.

The yield is over 1,600 lbs. of seed cotton and over 500 lbs. of lint per acre with a ginning outturn of 33 per cent and a spinning value of 70 cents. The mean fibre length of the cotton is 1.36".

The average net profit per acre by cultivating this long staple variety is estimated to be over Rs. 600, which is many times more than the usual profit obtained from other crops normally grown in these lands.

Cotton is attacked by various pests and diseases. Among the diseases wilt is prevalent almost throughout. Deal cotton tracts and varieties resistant to it are bred such as "Suryog" and "Vijay" in Bombay, "Virnar", "Jarila" and "H. 420" in Madhya Pradesh and "Jay-want" and "Jayadhar" in Karnatak.

A project for the intensification of regional investigations by integrated basic research on cotton, oilseeds and millets has now been launched. This includes the establishment of 17 composite regional stations, comprising nine main and eight sub-stations for work on cotton, oilseeds and millets.

The cost of the project for Five Years is expected to be over seven million rupees.

JUTE

Jute is a very important fibre crop. India has the world monopoly for its production and trade. About 1.9 million acres are under the crop, almost 85 per cent of which are confined to Bengal Bihar and Assam. It is also grown to some extent in Orissa, U.P. and Tripura. The total production of the fibre amounts to 4.2 million bales (of 400 lbs.). Bengal accounts for about 42 per cent of the total acreage and about 50 per cent of the production. It is an annual crop cultivated for the fibre obtained from its bark. It is mostly grown in the alluvial soils with plenty of moisture. Seeds are generally sown on the prepared land in February to May and harvested in July to September. The crop is retted before fibre extraction. Outturn of dry fibre varies from 8-25 mds. per acre with an average of 11 mds., depending upon soil fertility and other factors.

Two varieties of Jute grown in India are *Corchorus olitorius* (Tossa Jute), and *C. capsularis* (White Jute) and in both of them high yielding strains of good fibre quality have been evolved, such as C.G., 0-620, 0-682 and 0-758 strains in *olitorius* and D.154, C.212 and C.321 in *capsularis*.

Best time of sowing jute is March second half to April and for *capsularis* and April first half to May second half for *olitorius*. Jute responds well to the application of all inorganic nitrogen fertilizers and most of the organic manures. The fungus (*Macrophomina phaseoli*) is the serious disease and various insects like jute semi looper, hairy caterpillar, indigo caterpillar and jute mites. Measures to control them are found and practised.

Retting is the most important factor affecting the quality of jute.

TOBACCO

Though contributing only about 3 per cent of the world's production, India is one of the principal tobacco growing countries of the world and third after U.S.A. and China. The total area

under tobacco is over 0.92 million acres and production about 0.28 million tons. The average yield per acre is 644 lbs. Even though the area under tobacco is less than 0.4 per cent of the total cropped area of the country it is a leading cash crop and the mainstay of some of the regions and also of considerable importance to the national economy. It is the ninth important item of Indian export (of about 123 million lbs.) earning about 123 million rupees annually and in addition contributes about 327 million rupees to the nation's exchequer. It provides employment for millions of workers in farming and in its industry. However, India still imports manufactured tobacco (in the form of cigarette, cigar and pipe tobacco) amounting to about 2.5 million lbs. costing 7.9 million rupees and also unmanufactured tobacco (i.e. virginia cigarette tobacco leaf from U.S.A., for blending in the manufacture of high class cigarette; and cigar wrapper tobacco from U.S.A., Java, Pakistan and Burma; and chewing tobacco from Ceylon) of about 2.5 million lbs. costing 7.9 million rupees. But, the import requirements are steadily and speedily being met by indigenous production.

Andhra, Bombay and Madras account for about 71 per cent of the tobacco area and 72 per cent of the production. U.P., Bengal, Bihar and Mysore are other tobacco growing States of importance.

The Central Tobacco Research Institute has now been established at Rajahmundry (in Andhra) for fundamental research on all tobaccos and applied research on cigarette and Lanka tobaccos grown in that area. Regional experimental stations have also been established for Cigar and Cheroot tobaccos at Vadasandur (Madras), for Hookah and Chewing tobaccos at Pusa (Bihar) and for wrapper tobacco at Dinbata (Bengal). Three sub-stations viz. Cigarette Tobacco Research Sub-Station at Guntur (Andhra), Cigarette Tobacco Research Sub-Station at Nilpani (Bombay) and Hookah Tobacco Research Sub-Station at Erodesore (Punjab) are also investigating their specific types of tobacco from a regional point of view. The Institute of Agriculture, Anand is being subsidised for bidi tobacco investigations and for aspects of the agronomy and pathology of local types of tobaccos.

(a) *Cigarette Tobacco*: Andhra State accounts for almost the entire virginia tobacco in India as it produces about 90 per cent of the cigarette tobacco; rest in Mysore, Bihar, Punjab and Bombay. A new variety called "Cantham" which is superior in quality and yield to the existing "Harrison special" has been recently released at Rajahmundry.

(b) *Cigar and cheroot types* of tobacco are cultivated mostly in Madras and West Bengal and to a lesser extent in Orissa.

(c) *Bidi Tobacco* is mainly confined to Charotar and Nipani areas of Bombay, Muzaffarpur, Dharbhanga tract of Bihar and to Farukhabad, Sitapur and Meerut districts of U.P.; also sparingly in Madras and Mysore States.

(d) *Snuff and Chewing types* are mostly produced in Madras, Bombay, Orissa, Bihar and U.P.

(e) *Hookah Tobacco* is primarily grown in U.P., Bihar and Punjab and to a much lesser extent in Bombay State also.

MARKETING AND INSPECTION

There is a Central marketing organization called the Directorate of Marketing and Inspection, and a number of State marketing organizations, e.g., in Bombay, Bihar, Andhra, Madras, Mysore, Punjab and West Bengal.

The official in charge of the Central Directorate is designated Agricultural Marketing Adviser. The Directorate conducts marketing surveys for a number of commodities and issues reports. About 80 reports have so far been published and among the commodities covered are: rice, wheat, millets, potatoes, gram, other pulses, barley, grapes, bananas, citrus fruit, lime, ground-nuts, cashewnuts, lac, sugar, coconuts, tobacco, milk,

fish, cattle, hides, skins, wool and hair, sheep and goats, eggs, coffee, castor seed, ghee and milk products, arecanuts, rapeseed and mustard, sann hemp, cardamom, meat, poultry and tapoca.

Revised editions of the reports on rice, wheat, potatoes, cattle, tobacco, skin and fish are now available. A brochure on isophgul has also been brought out.

The Agricultural Produce (Grading and Marketing) Act, 1937 aims to provide the consumers with a standardised produce of specified purity and quality under a mark of guarantee. The process of grading and marking is done commercially on a voluntary basis by packers holding a Certificate of Authorization issued by the Agricultural Marketing Adviser. There are now about 550 packers under the various grading schemes.

There are grade specifications for several varieties of rice, fruit, cotton, castor oil, coconut oil, sann hemp, tobacco, ghee, eggs, butter, sugarcane gur, vegetables, coffee, wheat, oilseeds, lac, myrobalans, hides and skins, wool, goat's hair, wood, turpentine, areca nuts, rosin, bristles.

The marketing of certain commodities is also regulated by law in some States. For instance, in Bombay State cotton is regulated in Amroli; in the south, cotton is regulated in Tirupur and Tirunelveli, ground nuts in South Arcot and Coimbatore, tobacco in Guntur, West Godavari and Coimbatore, arecanuts, coconuts, ground nuts, tobacco, turmeric and potatoes elsewhere; in Bombay there are over 50 regulated markets; in the Punjab about 100; in Madhya Pradesh Gwalior district has 36; in Mysore coconut, copra, oilseeds and jaggery are regulated at Tiptur. There is also a regulated market at Davangere. There are also regulated markets in Ajmer.

During 1956 quality grading of various agricultural commodities like ghee, edible oils, eggs, butter, cotton, rice, fruit and potatoes intended for internal consumption was undertaken on a voluntary basis.

The principle of compulsory grading of agricultural produce for export has been recognised by the Planning Commission. Exportable commodities such as tobacco, sann-hemp, wool, and bristles were graded on a compulsory basis.

It is proposed to extend compulsory grading to other exportable commodities such as essential oils (viz., lemon-grass and sandalwood oils), pepper, ginger, cardamom, cashewnut kernels, lac, raw goatkins, East-India tanned leather and vegetable oils and oilseeds.

A Central Control Laboratory was established at Nagpur during the year to facilitate grading and standardisation of agricultural commodities. Subsidiary laboratories are also proposed to be set up in different regions such as Bombay, Calcutta and Cochin.

With a view to assisting and advising the State Governments in the matter of regulation of markets an Advisory Section was set up in the Directorate on 1st July, 1955. The Directorate is also assisting the National Extension Services Blocks and Community Project areas.

During the Second Plan, the number of regulated markets (under the Agricultural Produce-Markets Act) will be increased from 450 to 900.

An All-India Market News Service will also be set up in collaboration with the States, mainly to help the farmers.

RESEARCH

The Indian Council of Agricultural Research was created in 1929. The Council is divided into a Governing Body composed of State Ministers of Agriculture, representatives of Parliament and an Advisory Board consisting of experts. The Governing Body is in charge of general affairs and of the funds, while the Advisory Board examines scientific projects submitted to the Governing Body.

To afford relief to the Governing Body in the discharge of its executive functions there is a Standing Committee. The Governing Body is also assisted by a Board of Research and a Board of Extension. The latter is concerned with pilot schemes.

The Minister for Food and Agriculture of the Government of India is the president of the Council.

In general the Council co-ordinates research work, suggests programmes of research, gives financial assistance for approved schemes, and also undertakes schemes of its own.

The training of extension workers for the National Extension Service blocks hitherto arranged by the Council is now being looked after by the Directorate of Extension & Training set up for this purpose.

The annual grants made to I.C.A.R. fall under two main heads:—(a) An annual Government grant for running the administration. This varies from year to year according to requirements, and is estimated to be Rs. 13,15,000 for 1955-56 and Rs. 15,08,915 for 1956-57. (b) Payment of the net proceeds of the cess on agricultural produce. The income from this source is estimated to be Rs. 49,12,400 during 1955-56 and Rs. 49,27,796 for 1956-57.

Besides these, specific grants are made to I.C.A.R. for undertaking certain schemes from time to time. A sum of Rs. 10,34,000 was provided for this purpose in the 1955-56 budget and Rs. 9,78,000 in 1956-57. The total estimated expenditure (including the special grant) was about Rs. 5.8 min. for 1955-56 and Rs. 5.1 million in 1956-57. Of the 942 schemes to be sponsored by the Council 416 related to agriculture and 246 to animal husbandry in 1956-57.

The cess is a customs duty of one half of one per cent *ad valorem* on the following: bones, bristles, butter, cereals other than rice and wheat, drugs, fibre for brushes, fish, fruit, ghee, hides (raw), manures, oil cakes, pulses, seeds, skins (raw), spices, tobacco (unmanufactured), vegetables, wheat, wheat flour, wool (raw). This applies to the whole of India except Jammu and Kashmir.

A number of Central Committees have been set up to promote the production and marketing of agricultural commodities:

- Indian Central Cotton Committee, Bombay.
- Indian Central Jute Committee, Calcutta.
- Indian Central Tobacco Committee, Madras.
- Indian Central Oil-seeds Committee, New Delhi.
- Indian Central Coconut Committee, Ernakulam (S. India).
- Indian Central Sugarcane Committee, New Delhi.
- Indian Central Arecanut Committee, Kozhikode (S. India).
- Indian Central Lac Cess Committee, Ranchi (Bihar).
- All India Cattle Show Committee, Karnal (Punjab).

These Committees are financed by the proceeds of a cess levied on the particular commodity. For instance, for the Cotton Committee there is a cess of As. 4 per bale of 400 lb. of cotton; for the Coconut Committee there is a cess of As. 4 per cwt. on copra consumed in Indian mills; for the Lac Committee the cess is As. 14 per md. of export of lac and As. 10 for refuse lac exported; for the Oil-seeds Committee the cess is 1 anna per md. of oil extracted in mills, and annas 2 per md. of oil-seeds.

The Ministry of Food and Agriculture maintains a number of research laboratories:

1. Indian Agricultural Research Institute, Pusa, New Delhi.
Sub-stations at Karnal (Punjab) and Pusa (Bihar).
2. Central Potato Research Institute, Patna.
Laboratory at Potato Multiplication Sub-division, Khowli (U.P.).
Laboratory at Potato Breeding Sub-Station, Bana.
3. Central Rice Research Institute, Cuttack.

4. Research Laboratory, Central Palm Gur Training School, Ondolore (Madras State) (See also under "Forests").
5. Forest Research Institute and College, P.O. New Forest, Dehra-Dun (See also under "Forests").
6. Sugar Cane Breeding Institute, Coimbatore, Sub-station at Karnal (Punjab).
7. Indian Veterinary Research Institute, Izatnagar-Mukteswar (U.P.) (See also under "Livestock").
8. Indian Dairy Research Institute, Bangalore (See also under "Livestock").
9. Central Vegetable Breeding Station, Kulu, P.O. Naggar, District Kangra (Punjab) (See also under "Fisheries").
10. Central Marine Fisheries Research Station, Mandapam, P.O., Southern Railway (See also under "Fisheries").
11. Central Inland Fisheries Research Station, Manirampur, Pulta P.O., Barrackpur, 24 Parganas (See also under "Fisheries").
12. Deep Sea Fishing Station, Bombay (See also under "Fisheries").

A number of research institutes, stations and farms are also maintained by the Central Commodity Committees:

The Indian Central Cotton Committee has:

1. Technological Laboratory, Matunga.
2. Institute of Plant Industry, Indore.

The Jute Committee has:

1. Jute Agricultural Research Institute, Barrackpore (West Bengal).
2. Technological Research Laboratories, Tollygunge, Calcutta.
3. Economic Research Section, Indian Central Jute Committee, Calcutta.

The Tobacco Committee has:

1. Central Tobacco Research Institute, Rajahmundry.
2. Cigar and Cheroot Tobacco Research Station, Vedasandur.
3. Hookah and Chewing Tobacco Research Station, Pusa, Bihar.
4. Cigarette Tobacco Research Sub-station, Guntur.
5. Wrapper Tobacco Research Station, Dinhatia (West Bengal).

The Coconut Committee has:

1. Central Coconut Research Station, Kasaragod.
2. Central Coconut Research Station, Kayangulam.

Three regional stations at Thodupuzha, Kumarakam and Noyyattinkara all in Kerala State. And two more at Rajole in Andhra and Rainagiri in Bombay.

The Sugar Committee has:

Sugarcane Sub-Station, Karnal (Punjab).

The Indian Central Oil Seeds Committee has two regional centres for research, one at Tindivanam in Madras for the southern region, and the other at Kanpur for the upper India oil seeds.

Five regional stations for conducting research on fruit and vegetable preservation were opened in different States of India, one each in Punjab, U.P., Madhya Pradesh, Bombay and West Bengal. This arises out of a recommendation made by the I.C.A.R. Fruit and Vegetable Development Committee. It was recommended that two of these regional stations should be opened in 1957-58 and the other three in 1958-59.

Agricultural Colleges

There are 29 agricultural colleges in India; at (1) Banpatia and (2) Hyderabad (in Andhra); (3) Jorhat (in Assam); (4) Tollyganj (in Bengal); (5) Sabour and (6) Ranchi (in Bihar); (7) Anand, (8) Poona, (9) Nagpur and (10) Akola (in Bombay); (11) Vallayani (in Kerala); (12) Coimbatore (in Madras); (13) Gwalior, (14) Jabalpur and (15) Raipur (in Madhya Pradesh); (16) Dharwar and (17) Hebbal (in Mysore); (18) Cuttack (in Orissa); (19) Ludhiana and (20) Amritsar (in Punjab); (21) Jobner and (22) Udaipur (in Rajasthan); (23) Sohore (in Bhopal); (24) Allahabad, (25) Baraut, (26) Banars, (27) Lakhoni, and (28) Kanpur (in Uttar Pradesh); and (29) Delhi. (The Central College of Agriculture) in Delhi Territory.

WAREHOUSING CORPORATION

The Board of Directors of the Central Warehousing Corporation at its first meeting in Delhi decided to issue one lakh shares of Rs. 1,000 each of which, in the first instance, 10 per cent will be called up with share application and 10 per cent on allotment.

Mr. P. N. Thapar, Secretary, Union Ministry of Agriculture, is the Chairman of the Board of Directors.

The Board has also approved a first instalment of a chain of 100 warehouses.

In 1958-59, 30 Central warehouses will be started. The Corporation has contributed Rs. 27 lakhs to the share capital of State Corporations. A sum of Rs. 30.5 lakhs was still available in the 1957-58 budget.

By March 1958, 11 State Corporations were expected to be set up.

LAND POLICY

The land policy of the Government of India has been formulated for the promotion of agricultural production and for the provision of social justice in the rural economy. The agrarian reform undertaken by the various State Governments during the past few years fall generally into four broad classes:—

- (1) The abolition of intermediaries.
- (2) Tenancy reform designed to, (a) Scale down rents to 1/4-1/5 of the produce, (b) to give permanent rights to the tenants (subject to the landlord's rights to resume a minimum holding for his personal cultivation within a limited time) and (c) to enable tenants to acquire ownership of their lands (subject to the landlord's right of resumption for personal cultivation) on payment of moderate compensation to the landlord spread over a period of years.
- (3) Fixation of ceiling on holdings.
- (4) Reorganisation of agriculture including (a) Consolidation of holdings, (b) Prevention of fragmentation and (c) Development of co-operative village management and co-operative farming.

ABOLITION OF INTERMEDIARIES

Semi-feudal conditions prevailed over a considerable part of the country and about half of the agricultural area was owned by intermediaries between the State and the actual tiller of the soil. Such tenures included permanently and temporarily settled estates, jagirs, talukdars and Inam lands as well as non-ryotwari tenures.

There are three main systems of land tenure: the *ryotwari* (peasant proprietary tenure), where the individual owners are responsible for the payment of land revenue (*viz.* Bombay and Madras); the *samindari* (landlord tenure) where one or more persons jointly own a large estate and are responsible for the payment of land revenue (parts of Assam, Bengal, Bihar, Madras, Orissa and U.P.); the *mahsuli* (joint village tenure), where village communities jointly hold an estate and are jointly and severally responsible for the payment of land revenue (M.P., Punjab and parts of U.P.).

The system of intermediaries (*samindars*, *talukdars*, *jagirdars*, *inamdars*, *malguzars*, and similar special tenure holders) has been almost entirely abolished except in a few small pockets (such as temporarily settled estates in Assam, *samindars* in Rajasthan, minor intermediary tenures, such as service *inams* and other minor *inams* in a number of States and intermediary areas (*i.e.* Coorg in Mysore State, Kutch in Bombay, and in Tripura Territory). Progress was, however, comparatively easy in the temporarily settled areas (such as U.P. and Madhya Pradesh), where adequate records and administrative machinery existed. On the other hand, in the permanently settled areas (*i.e.* Bengal, Bihar and Orissa) and in areas under jagirdari settlement (*i.e.* Rajasthan and Saurashtra part of Bombay) land records and revenue administration had to be built up from the beginning.

Compensation

Apart from the annual payment to be made to religious and charitable institutions whose Estates were brought under the State, the compensation payable for the acquisition of intermediary rights was estimated at Rs. 615 crores (including 370, 86 and 160 crores of rupees for compensation, rehabilitation grants, and for interest payments respectively).

Four States (i.e. Bengal, Bihar, Rajasthan and Uttar Pradesh with 59, 240, 86 and 178 crores of rupees respectively and in total Rs. 513 crores) accounted for over 83 per cent of the total amount of compensation.

The assessment of compensation payment was a complex and difficult task (particularly in States like Assam, Bengal, Bihar and Orissa) due to permanent settlement, non-availability of relevant records and also due to the absence of the requisite revenue machinery.

The principles determining the rates of compensation were (i) the total compensation should be financed out of the increase in revenues accruing to State Governments on the abolition of intermediaries; and (ii) intermediaries in the lower income groups (who constitute the vast majority) should get adequate compensation.

Compensation has been fixed generally as a multiple of the net income accruing to an intermediary at the time of acquisition of his interest, which was higher in the case of intermediaries in the lower income groups.

In some States where compensation was fixed as a uniform multiple of net income, a provision was made for payment of rehabilitation grants to intermediaries with small income. Thus, in Uttar Pradesh the compensation amount (including the rehabilitation grant) varied between 8 and 28 times the net income and in Bihar between 3 and 20 times the net income.

A considerable part of the compensation amount is payable to small proprietors. Nearly two-fifths of the compensation amount would be payable to intermediaries entitled to Rs. 5,000 or less of compensation.

Compensation is payable in cash in Andhra, Bombay, Madhya Pradesh, Madras and Orissa in instalments.

But in Bengal, Bihar, Rajasthan and Uttar Pradesh where the liability was large, compensation took the form of bonds transferable and negotiable in Bihar, Rajasthan and Uttar Pradesh and redeemed in equated instalments (of 15 years in Rajasthan and 40 in Bihar and Uttar Pradesh). On the other hand, in Bengal, the bonds were not negotiable, and have to be redeemed in 20 years.

The total compensatory payment made so far amounted to Rs. 67 crores of which Uttar Pradesh accounted for Rs. 44 crores. A provision has been made, however, in almost all States for payment of *ad interim* or advance compensation.

With the abolition of intermediaries, the tenures come under two broad categories, i.e. (i) owners who hold land directly from the State; (ii) and the tenants who hold land from owners. Their rights and obligations are regulated under tenancy laws enacted in the States. Thus the multiplicity of tenancy has been considerably reduced, and in the most parts, tenants who hold land under intermediaries have now become owners of land.

TENANCY REFORM

Scaling down rents—Land revenue assessment: The land revenue is assessed differently in different States. In the following States it is a fixed share of the net produce: Madras 50 per cent; Punjab 25 per cent; Uttar Pradesh 40 per cent. In these States it varies from time to time: Bombay, Mysore, parts of Madhya Pradesh and parts of Andhra.

The rent payable by tenant cultivators to landlords has now been reduced to about 1/3rd over more than half the country.

In the following States, the maximum rent noted against is applicable to tenants of all categories and in all areas: Bombay and Rajasthan 1/3rd; Delhi 1/5th; Himachal Pradesh, former Hyderabad area and Orissa 1/3rd; U.P. twice the hereditary rate.

In the following States the maximum rent is subject to the qualification noted against each: Assam, 1/3rd (in the case of crop-sharers only); Bombay, five times the assessment (in Berar); Madhya Pradesh, twice the assessment (in the former Madhya Bharat area in respect of future tenancy only); Mysore, 1/3rd (Malnad area); Bombay, 1/3rd (in irrigated area in Kutch); in M.P., 1/3rd (unirrigated areas of former Vindhya Pradesh); Kerala, thrice of annual assessment (dry land in Malabar); Jammu and Kashmir, 1/3rd (irrigated land belonging to owners with 12½ acres of land and over).

The enforcement of laws for the reduction of rent has been difficult, as rent regulation cannot be effective unless it is accompanied by security of tenure.

Further, regulation of crop share rent is difficult to enforce. Therefore in some States like Andhra and Bombay the maximum rent is fixed as a multiple of land revenue.

Security of Tenure: The Second Five Year Plan has recommended that ejectment of tenants and sub-tenants should be avoided except in the case of non-payment of rent and misuse of land. A large number of States have already taken steps to protect the tenants by the provision of (i) temporary protection to tenants from eviction till comprehensive Tenancy Act is passed, (ii) fixity of tenure on qualifying basis, and also by (iii) allowing resumption by the landlord on a prescribed basis, and (iv) giving permanent protection or ownership.

Temporary Protection: Pending enactment of adequate legislation, ejectment of tenants and sub-tenants have been stayed for varying periods prescribed by law in Andhra, Kerala, Madras, Madhya Pradesh, Manipur, Mysore, Orissa and Punjab.

Fixity of Tenure: A number of States legislated to provide for fixity of tenure and restricted grounds on which landlord could eject them, either on a qualifying basis (i.e. tenants holding land for a specified period and or by prescribing conditions for the resumption of limited land by the landlord). Security of tenure on the qualifying basis of occupancy or other conditions have been granted in some States: 6 years in Andhra; 12 years in Mysore, and 3-7 years in Madhya Pradesh.

Resumption: Security of tenure was conferred on tenants subject to landlords' right to resume land for personal cultivation in Bombay, Himachal Pradesh, and Rajasthan. Tenants can retain a minimum holding or a portion thereof, such as half the area in Bombay, 1/3rd in Himachal Pradesh, 5 standard acres in Punjab or a minimum holding with a net income of Rs. 1,200 (exclusive of the cost of the labour and the labour of the family) in Rajasthan. Subject to the above conditions the landlord's right to resume land for personal cultivation is limited to 3 economic holdings (i.e. 12-48 acres) in Bombay, 5 acres in Himachal Pradesh, 30 standard acres in Punjab and the area in excess of the minimum holding to be left with the tenants in Rajasthan.

In other States also a limit has been fixed on the area which a land owner may resume for personal cultivation.

Legislation has been put through in most of the States prescribing a basis for the resumption of the land by the landlords, as shown below: Assam: Landlords can resume 1/3rd of the area owned subject to a minimum of 5½ acres and a maximum of 3½ acres; Bengal: Limit on resumption has been placed at 1/3rd of the area owned; Jammu and Kashmir: 2-6 acres; Madras: Owners with 12½ acres of wet land or less can resume for personal cultivation half the area leased, subject to a maximum of 5 acres; and in Orissa: Owner has a right to resume an area upto 7 standard acres of wet land or 14 acres of dry land for personal cultivation. But in Bengal

with regard to *Bargadars* (crop sharers) the landlord may resume only 1/3rd of the area if it is more than 7½ acres, but all, if it is less.

Ownership Right for Tenants: In most States legislation provides for the conferment of ownership right on tenants and in some cases with the option left to the tenants. The right of purchase relates only to areas which a landowner cannot resume even on grounds of personal cultivation.

In Uttar Pradesh and Delhi all tenants and sub-tenants were brought in direct relation with the State. No compensation was payable by tenants as the State undertook the responsibility for paying compensation to landlords out of the rents recovered from the beneficiary tenants. But in Delhi compensation was recovered from tenants who would be required to pay land revenue to the State.

Restrictions and Conditions: In some States tenant's right to purchase was restricted as follows: Andhra (Hyderabad): Only protected tenants were conferred the rights; Madhya Pradesh: Only for occupancy tenants; Punjab: Only such tenants of non-resumable areas (in continuous possession for six years) were permitted to buy. The time limit for purchase was fixed as follows: Where the right to purchase ownership is optional, the tenant can exercise it in time at his discretion. But in Bombay and Madhya Pradesh (former Madhya Bharat area) the right must be exercised within a prescribed period.

Compensation to Landlords: Compensation payable by tenants for the acquisition of ownership varied from State to State except in the Punjab (where it is fixed at 1/3rd of the average market value), compensation is generally a multiple of rent or land revenue. In Andhra (Hyderabad 6-15); Madhya Pradesh (Madhya Bharat: 2-8 of the net income of landlord); Ajmer: 12; former Vindhya Pradesh: 15; former Madhya Pradesh (7-10); Rajasthan (for unirrigated lands): 10 and Uttar Pradesh 10.

The compensation is fixed as a multiple of the assessment in four States:—Bombay: 20-200 times of the assessment; Delhi: 20-40; Himachal Pradesh: 48 and Punjab (PEPSU): 90 times of the assessment. This compensation is generally payable in instalments (except in former Madhya Pradesh) spread over a period of 5-15 years.

The optional right to purchase is seldom exercised. Tenants required persuasion and help. In Bombay (Saurashtra) and Uttar Pradesh the State Governments had to organise administrative drives to persuade tenants to become owners of land. The State Government (in former Saurashtra) provided even credit facilities amounting to about Rs. 20 million through the Land Mortgage Banks to enable the tenants to acquire ownership rights.

Judged by the amount of land purchased by the tenants and by the number of tenants who acquired ownership, the measures adopted have not produced any significant result. It is evident, tenants do not wish to pay to become landlords unless there are substantial advantages to gain or disadvantages to avoid.

The Second Five Year Plan has recommended that tenants of non-resumable areas should be brought into direct relationship with the State, but the total burden, including land revenue and instalment payments towards purchase price, should not exceed the level of rent recommended in the Plan.

FIXATION OF CEILING

(a) **Size of Holding:** One of the problems of Indian agriculture is the small size of the average holding and of fragmentation. The average size of a holding for the whole of India is 5.6 acres, but this varies from State to State: Assam 4.8 acres, Bihar 5.5 acres, Bombay 5.1 acres, M.P. 4.5 to 5.0 acres, Madras 4.4 to 5.8 acres, Orissa 5.1 acres, Punjab 5.6 acres, U.P. 5.0 acres, W. Bengal 4.9 acres, All India 5.6 acres. The majority of the holdings will be less than 5 acres, a great majority indeed less than 2.

(b) **Ceiling on Holding:** There is a general movement towards fixing a maximum and minimum on land holdings, as an aspect of land reform. This relates to (1) the absolute amount of land which any individual may hold and (2) the future acquisition of land.

Ceiling on Existing Holding: Legislation was enacted in the following States for the fixation of ceiling on existing holding:—Andhra (Hyderabad): 4½ family holdings (18-270) acres; Bengal: 25 acres; Himachal Pradesh: 30 acres in Chamba (in other areas land assessment at Rs. 125); and Jammu and Kashmir: 22½ acres.

Implemented and enforced only in Andhra, Bengal and Jammu and Kashmir. The Punjab Government has begun implementation of the law to assume management of lands held by owners under personal cultivation in excess of 30 standard acres (50 standard acres for displaced persons). This does not apply to the efficiently managed estates whose break up may lead to a fall in production.

Ceiling has also been applied to lands held by intermediaries in Assam, Bengal and Madhya Pradesh, and Rajasthan (Ajmer). In Assam 50 acres for proprietors and in Madhya Pradesh and Rajasthan (Ajmer) at 50 standard acres.

Ceiling on Future Holdings:—In various States ceiling has been placed on future acquisitions:—Andhra (Hyderabad): 3 family holdings (12-180 acres); Assam: 50 acres; Bengal: 25 acres; Bombay: 3 economic holdings (12-48 acres); Delhi: 30 standard acres; Jammu and Kashmir: 22½ acres; Madhya Pradesh (Madhya Bharat): 50 acres (and for displaced persons) 40 standard acres; and Uttar Pradesh: 30 acres.

(c) **Regulation of Standards of Agriculture:** With the exception of Andhra (Hyderabad) and Punjab no State has so far made provision for regulating the standards of cultivation and management of land and resumption of land in case of failure to maintain these standards. Some of the agricultural Legislation in Orissa and Himachal, however, have some provision for this, more or less of an obligatory nature.

CONSOLIDATION

(a) **Consolidation of Holdings:** Consolidation of holding is viewed as a rural development programme, particularly as the prerequisite for optimum land use and food production, for the last two decades. But progress up to so far has been meagre in several parts of the country. The movement towards consolidation of holdings is partly voluntary and partly compulsory. Legislation towards this end has been enacted in the States of Bombay, Madhya Pradesh, Punjab, Delhi, U.P., Jammu and Kashmir and Himachal. Special provision for consolidation of holding has also been incorporated in the Tenancy Acts of Orissa, former Hyderabad and Ajmer. Consolidation work has so far been undertaken in Andhra (Hyderabad), Bombay, Delhi, Himachal Pradesh, Jammu and Kashmir, Madhya Pradesh, Orissa, Punjab, Rajasthan and Uttar Pradesh. The total area consolidated upto 1956 is about 13.66 million acres as under:

Hyderabad below a basic holding ranging from 2-24 acres; Rajasthan below a size to be determined by the State Government; Delhi below 8 standard acres; former Madhya Pradesh below 15 acres; former Bhopal below 15 acres; former Vindhya Pradesh below 5 acres of irrigated or 10 acres of dry land.

Co-operative Farming: The policy is to give encouragement and assistance to farmers to group themselves into voluntary co-operative farming societies.

The ultimate solution of the land problem is co-operative village management.

The Central Government has offered to provide financial assistance towards administrative and advisory staff, and the State Governments have also offered some financial assistance for the purpose.

But, co-operative farming has not made much headway. Before 1955-56 there were 1,135 co-operative farming societies and in 1955-56 1,397. West Bengal: 75; Bombay: 342; Punjab: 347; Rajasthan: 76 and Uttar Pradesh: 168.

The Second Five Year Plan has provided financial assistance amounting to Rs. 13.857 million for the development of co-operative farming.

It is expected that over a period of 10 years, a substantial portion of the agricultural land will be cultivated by co-operative farming.

The National Development Council has recommended that 3,000 co-operative farms should be started during the Second Five Year Plan. There are plans for starting 600 in 1958-59.

Besides co-operative farming, collective farming is undertaken in some States, i.e. Andhra (Hyderabad), Bombay (Saurashtra), Madhya Pradesh (Bhopal), Mysore (Coorg) and Tripura.

(d) **Agricultural Labour:** About 30.4 per cent of the rural families were agricultural labourers, half of them possessing no land whatsoever, and the other half owning some land. There is tenancy legislation in many States while minimum wages for agricultural workers are fixed in former Ajmer, Delhi, Himachal Pradesh, former Kutch, Patna District of Bihar, Punjab.

Landless agricultural workers are settled on the Central Mechanised Farm, Bhopal, under a scheme for the settlement of 5,000 families over an area of about 6,800 acres. Financial help has been offered to States like U.P. for initial spade-work in land utilisation such as land reclamation and layout, building tenements, health and social amenities and also administrative staff for the initial stages of 2-3 years. Though the State schemes are not linked up with those on co-operative farming, the purchase, and services in connection with the colonies will be on co-operative basis leaving other aspects to the decision of the colonisers. The Second Five Year Plan provided 15 million rupees for the purpose. But the amount spent was less than Rs. 10 million spent mainly in Uttar Pradesh (in Lakhimpur Kheri and Pilibhit

Area consolidated

(in million acres)

States	Upto 1955-56	In 1955-56	Total
Bombay (Pre-reorganisation)	2.17	0.68	2.85
Delhi	0.20	—	0.20
Madhya Pradesh (Pre-organisation)	2.89	0.11	3.00
Punjab	6.23	1.18	7.41
Uttar Pradesh	0.20	—	0.20
Total	11.69	1.97	13.66

(b) **Prevention of Fragmentation:** Measures to check sub-division and fragmentation of holdings, relate to putting restriction on partition and transfer below specified limits. Legislation disallowing such partitions has either been enacted or in the process of enactment in the following states. U.P. below 6½ acres; former

Districts) and in Madhya Pradesh (Bhopal). Small schemes from Andhra, Madras and Mysore also got the support of the Government.

Bhoadan

(See under 'Late Particulars').

LAND USE

The topographical factors are as follows (the figures which are in lakh acres are inclusive of Jammu and Kashmir):

Total land area, 8,116; mountains, 873; hills, 1,506; plateau, 2,148; plains, 3,498; unusable area, 3,082; topographically usable area, 5,034. Land area per capita—2.25 acres.

The high density sub-regions are as follows:

Sub-regions	Population (lakhs)	Density per sq. mile	Land area (lakh acres)
Lower Gangetic Plains	700	832	538
Upper Gangetic Plains	389	681	366
Malabar-Konkan	238	638	239
South Madras	307	554	355
North Madras and Orissa Coastal	211	461	293
Total 5 sub-regions	1,845	660	1,791

The medium density sub-regions are as follows:

Sub-regions	Population (lakhs)	Density per sq. mile	Land area (lakh acres)
Trans-Gangetic Plains	259	332	490
South Deccan	315	247	817
North Deccan	239	246	621
Gujarat-Kathiawar	161	226	456
Total	974	253	2,393

The low density sub-regions are as follows:

Sub-regions	Population (lakhs)	Density per sq. mile	Land area (lakh acres)
The Desert	46	61	482
Western Himalayas	90	68	852
Eastern Himalayas	124	118	674
North-West Hills	104	163	409
North Central Hills and Plateau	138	164	537
North-East Plateau	290	192	967
Total	792	129	3,921

It has been found by sample study of Districts in different parts of the country (with a population of 12 crores) that the area of cultivated land per capita has fallen from 1891 to 1951 in some such proportion as the following (the area is given in cents):

1891—109; 1901—103; 1911—109; 1921—111; 1931—104; 1941—94; 1951—84.

The same study revealed that double-crop area per capita has also fallen from 1891 to 1951:

1891—12; 1921—13; 1951—10.

So has the irrigated area per capita:

1891—16; 1921—13; 1951—14.

FIRST FIVE-YEAR PLAN

The Plan sought to increase the production of food and raw material and transform the village environment and outlook of the rural population.

The outlay was as follows (Rs. in crores):

Agriculture	199.18
Veterinary, dairying	20.68
Forests	11.17
Co-operation	6.38
Fisheries	4.53
Rural development	11.56
Community Projects	90.09
Local Works	15.00
Programme for scarcity affected areas	15.00
Total	373.74

The following table shows the indices of land used in the high density, medium density and low density sub-regions :

Indices	High	Medium	Low	India
Percentage of net area sown to total land area	50	50	19	35
Percentage of net area sown to topographically usable area	62	70	40	56
Double-crop percentage	23	6	12	13
Irrigation percentage	25	11	10	16
Fallow percentage	18	26	22	22
Percentage of forests	11	11	22	15
Percentage unavailable	17	15	16	16
Percentage unused	12	8	27	17

The targets to be attained were additional production of 7.6 million tons of foodgrains, 1.26 million bales of cotton, 2.09 million bales of jute, 0.7 million tons of sugar, 0.4 million tons of oilseeds.

The major and minor irrigation works were to irrigate 19.7 million acres.

Under the reclamation programme 7.4 million acres were to be brought under the plough by the Central and State Governments at a cost of Rs. 35 crores. About 1.4 million acres would be reclaimed by the Central Tractor Organization, 1.2 million acres by similar organizations in the States. The remaining 4.8 million acres were expected to be developed by the farmer with the assistance of the State.

Improved seeds and fertilizers would be supplied and the use of improved implements encouraged.

Besides schemes drawn up in consultation with the Central Government, there were supplementary schemes proposed by the Commission.

The allotments for the latter were as follows rupees in crores):

Additional provision for minor irrigation works	20
Construction of tube-wells	25
Grow More Food	86
Community Projects and National Extension Service	101
Provision for landless labourers	1.50

Under the Plan finance would be made available to the cultivator through the Reserve Bank, as well as by the States through co-operative credit societies.

It was hoped that by the end of the Plan period Rs. 100 crores, Rs. 25 crores, and Rs. 5 crores would be made available as short term, medium term, and long term loans respectively.

About land policy, the Commission thought that there should be an upper limit to the amount of land held by one person. This would apply to resumption of land for personal cultivation and future acquisition not exceeding three family holdings.

Tenants who hold land should be enabled to acquire ownership on payment of compensation. Where such land is cultivated by the owners themselves the test should be efficiency. Farms which are badly managed should be taken over by the State and cultivated through the co-operatives of landless or displaced workers.

Owners of middle-sized and small farms should be encouraged to develop their production on a co-operative basis. If they do not resume land for personal cultivation within a reasonable period the tenants should be allowed to become the owners.

A tenancy should last at least for five to ten years and should be renewable.

Rents should vary between one-fourth and one-fifth of the produce.

There should be co-operative village management under which land and other resources are pooled and utilized in the interests of the community as a whole.

For the same type of work everyone should receive the same remuneration.

Increased facilities for training and experiments in co-operative farming were to be provided at a cost of Rs. 50 lakhs.

A sum of Rs. 2 crores was provided for settling landless agricultural workers on reclaimed land.

The outlay item-wise is as follows :—

(In million Rs.)			
	Centre	States	Total
Agricultural Production	97.0	719.009	816.009
Minor Irrigation	22.0	631.824	653.824
Land Development	50.0	170.305	220.305
Soil Conservation	40.0	155.838	195.838
Warehousing and Marketing	39.0	156.671	195.671

The targets to be attained are an additional production of 15.4 million tons of foodgrains, 2 million tons of sugar, 3.1 million tons of oilseeds, 2.3 million bales of cotton, and 1.5 million bales of jute, over the estimated production for 1955-56 in the First Five Year Plan.

If the Second Five Year Plan targets are realised agricultural production as a whole would increase by about 28 per cent, the increase in the production of foodgrains being nearly 25 per cent, and that of commercial crops about 34 per cent.

AGRICULTURAL PRODUCTION TARGETS OF THE SECOND FIVE YEAR PLAN (In million tons)

Commodity	Estimated Production of 1955-56	Targets for the Second F.Y.P. 1960-61	Additional production over 1955-56	Per cent increase in index of production
Foodgrains	65.0	80.4	15.4	24.6
Sugar (gur)	5.8	7.8	2.0	38.9
Oilseeds	5.5	7.6	2.1	37.0
Cotton*	4.2	6.5	2.3	55.6
Jute*	4.0	5.5	1.5	38.1
Other crops*	22.4
All commodities	27.8

* In million bales.

This is to be effected through various measures including the following :—

(a) **Land Reclamation & Improvements** :— As against 7.4 million acres to be brought under the plough by the Central and State Governments (1.4 million acres by C.T.O., 1.2 million acres by State Tractor Organization, and 4.8 million acres by the farmers themselves with State assistance) proposed in the First Five Year Plan, during the Second Five Year Plan, 1.5 million acres are to be reclaimed and land improvement measures are to be undertaken on 2 million acres through Central and State Tractor Organization, farmers and other agencies.

(b) **Soil Conservation** :—The Second Five-Year Plan has provided Rs. 200 million for soil conservation alone as against a total of Rs. 130 million for forest and soil conservation combined provided in the First Five Year Plan. During the Second Plan soil conservation work is to be undertaken in a concentrated manner over 3 million acres of land in areas seriously affected by soil erosion. The programme includes soil conservation measures for two million acres of agricultural land. Measures for the control of shifting sand-dunes are to be undertaken over an area of 0.25 million acres. Measures such as afforestation, are carried in forests, waste lands, contour bunding, etc. are to be undertaken in appropriate river valleys over an area

The State should also provide them with house sites, give preference to co-operatives of landless workers in the allotment of reclaimed land, entrust co-operatives of agricultural workers with construction work on behalf of the Public Works and Forest Departments.

SECOND FIVE-YEAR PLAN

In the Second Plan agricultural programmes are intended to provide adequate food to support the increased population and the raw materials needed for a growing industrial economy and also to make available larger exportable surpluses of agricultural commodities.

of about 0.38 million acres, in hilly regions over an area of about 0.17 million acres, in ravine lands over an area of 0.15 acres, and in waste lands over 0.1 million acres.

(c) **Seeds**—Each State will have seed farms for raising nuclear seeds and multiplying them through registered growers, keeping in view the requirements of the entire area to be served by State farms; 13,000 seed farms with a total area of about 95,000 acres are proposed. Co-operative seed stores will be set up at the headquarters of every national extension block and similar stores for each group of 20 villages. Fertilisers and other agricultural accessories will also be made available in these stores.

(d) **Irrigation**—As against 19.7 million acres to be irrigated (by major and minor irrigation projects) in the First Five Year Plan, an additional area of 21 million acres (12 million acres from large and medium projects, and 9 million from minor irrigation projects) is proposed for the Second Five Year Plan.

(e) **Fertilisers and Manures**—The consumption of nitrogenous fertilisers will be increased from 0.61 million tons (in 1955) to over 1.8 million tons during the Second Plan; phosphate fertilisers consumption will also be stepped up. Utilisation of Oilcake (non-edible to livestock) will also be increased. Green manuring practice will receive increased attention in the manurial practices. Larger utilization of town compost and sewage too will be adopted.

Horticulture

(f) **Fruits and Vegetables**—About half a million acres of orchards will be rejuvenated in the different States and about 0.2 million acres of new orchards will be laid during the Second Five Year Plan. Vegetable production will be encouraged, particularly in the neighbourhood of towns by organising nurseries and providing seeds and plants to vegetable growers on credit, and by co-operative marketing organisation of food and vegetable growers. Nucleus potato seed production will be taken up in the different potato growing States. Fruit and vegetable preservation will be encouraged by assistance to the canning industry and by setting up cold storage plants, etc. Export of such products will also be encouraged.

(g) **Marketing**—Compared with only Rs. 7.5 million in the First Five Year Plan, Rs. 60 million have been earmarked by the Centre for marketing, including warehousing. In addition, separate funds are also provided for a National Co-operative Development Board and an All-India Warehousing Corporation in State plans. The marketing programmes formulated on the basis of recommendations of the Rural Credit Survey Committee include 1,800 marketing co-operative societies, 350 warehouses and over 1,000 regulated markets.

(h) **Plant Protection**—Plant protection work will be intensified; existing centres will be strengthened and five new centres will be established.

(i) **Research**—For increasing the tempo of agricultural research in the States and in the Central Institutes and Commodities Research Stations, Rs. 140 million are provided. Agro-economic research will also be intensified, and two more agro-economic centres will be added to the present four.

(j) **Agricultural Education**—For the training of village-level workers, in addition to the existing 54 basic agricultural schools and 44 extension centres, it is proposed to establish 25 new basic agricultural schools, 21 extension centres and 16 basic agricultural wings attached to extension training centres. Additional agricultural colleges will be set up where they are needed, as 6,500 agricultural graduates are needed during the Second Plan. Financial assistance will be provided to State Governments for the establishment of four new agricultural colleges and expansion of training facilities in an equal number of existing agricultural colleges in the country. The financial details are, about 4th of the non-recurring expenditure will be provided by the Centre as grant, and the balance as loan, subject to a maximum of Rs. 2½ million for a new college and Rs. 0.75 million for the expansion of an existing college. The entire recurring expenditure would be the responsibility of the State Governments concerned. They are, however, obliged to reserve a suitable number of seats in their colleges for students from States without agricultural colleges.

LIVESTOCK

It is estimated that there were about 307 million total livestock in 1956. Of these the cattle formed about 159 million, buffaloes about 48 million, sheep 38.6 million, goats about 56.6 million, horses, ponies about 1.5 million, other livestock (mules, donkeys, camels and pigs) about 6.7 million and poultry about 97.4 million. India has thus about 19 per cent of the world's cattle, about half the world's buffaloes and about 18 per cent of the goats.

In spite of the large number of livestock, the net value of the livestock products in 1950-51 amounted only to about 16 per cent of the income from agriculture.

The imports during 1954-55, 1955-56 and 1956-57, were worth Rs. 51 lakhs, Rs. 56 lakhs and Rs. 85 lakhs respectively, and exports (excluding monkeys) were worth Rs. 385 lakhs, Rs. 393 lakhs and Rs. 21 lakhs respectively.

Monkeys have been exported recently on a large scale, namely, 100,830 in 1954-55 valued at Rs. 18 lakhs, 106,296 in 1955-56 valued at Rs. 29 lakhs and 1,144,090 in 1956-57 valued at Rs. 80 lakhs.

CATTLE

For draught purposes cattle are mainly used everywhere though male buffaloes are important as draught animals in the rice tracts and humid parts of the country. For dairy purposes, the buffalo is important, the milk yield being high and the percentage of butter fat considerably above that in cow's milk.

As for the fodder that is required, only two-thirds in the roughage variety and one-third in the concentrate are available.

Generally speaking, cattle thrive well in the dry areas of less than 30" rainfall, but where the rainfall is heavy they are poor producers.

Among the well-defined breeds of cattle (26 in all), three broad divisions are: dairy and draught cattle and those that serve a dual purpose.

Milch.—The Sahiwal, the best milch breed, are responsive to environment, have an yield of 4,000 lbs. a year. The Sindhi are also responsive to environment, the Gir and Saurashtra and Rajasthan have an yield of 3,700 lbs. a year.

Dual.—The Gao in Madhya Pradesh are draught animals but also good milkers, 3,000 lbs. The Kangayam in the south and south-east of the country are powerful draught animals of average milk yield. The Kankrej, are essentially draught but have milk potentialities (3,000 lbs.), they belong to Gujarat. The best known in this group are the Haryana (Punjab, 3,000 lbs.), Tharparkar (Gujarat and Rajasthan, 3,000 lbs.), and Ongole (Andhra).

Draught.—The Amritmahal (Mysore) are poor milkers; then there are the Hallikar (Mysore).

Other breeds are the Kenkatha (U.P.); the Kherigarh, chiefly draught (U.P.); the Malvi, chiefly draught (Malwa, Andhra); the Bachaur, chiefly draught (Bihar); the Kriahna, fairly good milkers (Maharashtra, Andhra); the Mehwal, for heavy ploughing and carting (Rajasthan); the Nagori, essentially draught but good milkers too (Andhra); the Rath, strong and heavy (Rajasthan); the Dangl, active workers with poor milk yield but good for heavy rainfall areas (Maharashtra); the Deoni are good for cultivation and also as milch cattle (Maharashtra).

In the order of the productivity of milk we might arrange the cattle as follows: the Sahiwal, the Kankrej, the Ongole.

The best known breeds of buffaloes (26 in all) are the Murrah, Hill and Bavi buffaloes of the Punjab, the Jubbahdi buffaloes of Kathiawar, Mehsana of Gujarat, Nagpuri of Vidarbha and the Surti and Pandharpuri, a type of Nagpuri buffaloes of Bombay State. All except the Nagpuri are noted dairy breeds. Murrah, is adapted to all climates. They also yield on an average about 3,000 lbs. of milk for over 300 days in a year.

Generally speaking, buffaloes provide the Indian farmer with milk and ghee while the cow is only the mother of the working bullock. The buffalo is therefore better fed and looked after. The average annual milk yield of a buffalo is 1,100 lbs. against 413 lbs. of the Indian cow. Further buffalo milk being one and a half times as rich in fat content as cow milk, is more valued for butter and ghee production. Buffaloes are also better utilisers of coarse fodder and are less expensive to keep.

Experience of Government farms is that by better feeding and management the production of village cows can be increased by 50 per cent, whereas that of the buffaloes can be increased only by 15 per cent. In view of the early maturity of the cow and the greater utility of its males for work, cows have more overall utility, but buffaloes are comparatively economical where there is cheap fodder or free grazing in plenty.

Livestock Development

Livestock Development is stepped up through special schemes such as Key Villages, Gosadan, and Poultry Development Schemes.

Under the Key Village Scheme by the end of 1955-56, 144 artificial insemination centres and 574 key village units had been established. Legislation for livestock improvement and control of contagious disease exists in all States (except Assam, Orissa, Rajasthan and U.P.). A total of about 848 bulls and 304 buffalo bulls of recognised breeds were located at the artificial insemination centres established during the first plan.

In 1955-56, 37,502 male cattle were castrated. During 1954-55 a scheme for subsidizing and rearing selected calves produced in key village areas were also initiated. During 1955-56, 1,873 calves were subsidised in the States of Andhra, Bihar, Bombay, Madras, Kerala (Travancore-Cochin), Madhya Pradesh (Ajmer, Bhopal) and Delhi.

Much progress has not been made in the Key Village programme, nor in the organisation of proper facilities for the profitable marketing of improved livestock and livestock products along co-operative lines. An effort has been made to promote the formation of small cattle breeders' co-operative societies which may form the nucleus for the expanded activities to be taken up later.

Gosadans.—The First Five-Year Plan proposed the establishment of 40 gosadans at a cost of Rs. 1.5 million in which, old infirm and useless cattle are segregated and sent to gosadans located in remote forests and other waste lands where grazing facilities are not fully utilised. All male stock were castrated before admission into the gosadans. The remains of dead animals such as skins, hides and hoofs, etc. were to be utilised by setting up a small 'charmalaya' at each centre.

SHEEP

It has been estimated that the number of sheep in the country is about 40 million and that the total quantity of wool produced is 54 million lb. annually valued at Rs. 10.5 million. The yield of wool per sheep varies greatly in different parts of the country. In Punjab, Uttar Pradesh and Rajasthan, the annual production per sheep is estimated at between 3.1 lb. and 4 lb., while in the rest of the States it does not exceed 1 lb. The average for the whole of the country is in the neighbourhood of 2 lb. per sheep per year.

Sheep also supply meat worth about Rs. 120 million every year in addition to pelts and manure. Sheep manure is very much valued among other manures as it contains twice as much nitrogen and potassium as are present in cattle manure. An individual sheep contributes 0.5 to 0.7 tons of manure annually.

India still requires large quantities of wool. About 16 million pounds of wool, tops and yarns costing about Rs. 120 million are imported. At the same time, we export about 38 million pounds valued at Rs. 81 million annually. This is because the fibre composition of the selected breeds of our major sheep rearing areas (such as Rajasthan, Saurashtra, Kashmir, Himachal Pradesh, Uttar Pradesh and the Deccan) are variable, and also coarse or coloured or otherwise defective. The wool produced from Indian sheep is modulated and not fit for the manufacture of cloth. It is mostly used for making carpets.

A sheep and wool development scheme has now been launched on the lines of the key village scheme for cattle improvement, in 250 centres in different States.

GOATS

Goats form an integral part of Indian agricultural economy. The goat is the principal source of meat supply; it also provides manure, skin, hair (Mohair) and milk. There are about 57 million goats in India, which is a fourth of the world's goat population. About a fifth of this is used for milk production. Annually about 17 million goats are in demand for human consumption. About 21.3 million pieces of goat skins and hides valued at Rs. 75 million are produced in India, of which skins worth about 57.2 million rupees are exported. Goats are of active habit and multiply rapidly. Rajasthan has the largest goat population followed by Bombay, Bihar and U.P.

The important breeds of Indian goats fall under four broad groups:—Himalayan Goats are found in the hills of Kashmir, Punjab and Uttar Pradesh. These are mostly reared for mohair production and also for meat. There is also the Pashmiani goat of Kashmir which produces an undercoat of very fine variety of hair which goes into the manufacture of shawls. The plain goats comprise some of the best mutton and milch animals. Some of the better known breeds are Marwari, Konor and Jamnapuri. The last yield 600 lbs. in a lactation of 250 days. Deccan plateau goats yield small quantities of milk and are mostly reared for mutton.

Another group consists of animals reared by landless labourers and artisan classes purely for milk supply. The local goat (Punjab) yields only $\frac{1}{2}$ to 1 lb. of coarse hair mainly used for rope and belt, whereas the cross bred (with Angora) yields 4 to 6 of mohair a year. Results from the Punjab and U.P. have shown that selected goats yield (6 to 8 lb. milk per day going upto even 12 lb. in U.P.) on an average about 400 lbs. of milk per lactation of 150 days while a few went upto 700 lbs. and even higher.

Exploratory breeding of imported Sannien goat (which is one of the highest milk yielders of the world) at Poona have shown that a suitable milk breed can be evolved for the Hill regions of the Deccan plateau.

POULTRY

Poultry-keeping is an important subsidiary industry of the poorer classes. Indigenous poultry of low grade produce on an average 50 small-sized eggs per year.

Even at a low rate of production, the annual contribution of Indian poultry to the country's economy is not less than Rs. 100 million.

At present, the per capita consumption of eggs in India is only four per annum as compared with 400 in U.K., U.S.A. or Denmark.

An improved strain of poultry has been evolved at Izatnagar by selective breeding for ten generations which give an average annual egg yield of 150 and sometimes of 234 of the larger egg type.

Poultry Development.—To stimulate poultry development as a subsidiary industry in the rural areas, a pilot project was approved early in 1955, under which 50 extension centres were to be established during 1955-56 with the assistance under the Indo-U.S. Technical Co-operation Programme. 33 centres have now been established, and are in different stages of development.

DAIRYING

Like agriculture dairying is one of the major industries in India as milk and milk products contribute not less than Rs. 6,200 million to the national income.

Despite the large vegetarian population and large number of cattle, the dairy industry is still unorganised. Of 200 million cattle and buffaloes, 72 million or 36 per cent are milch animals (females over 3 years). Milk yield is, however, low: Cow 413 lb. per year, buffalo 1,100 lb. Though buffaloes form only 30 per cent of milch animals, due to their comparatively high yield, they account for 55.9 per cent of the total milk produced. Buffalo milk has butter fat content 6.5 to 7 per cent, as against 4 to 5 per cent of cow.

Gross production of milk is 20.65 million tons, of which 13.2 million tons are marketed, the rest being used for home consumption or fed to calves. *Per capita* daily consumption of milk and milk products varies from 10.89 oz. in the Punjab to 20.4 oz. in Orissa; average 5.5 oz.

Intensive steps are being taken by most States to improve the cattle, both from the view-point of draught and milk production; and many important schemes have been put in operation: cattle fairs, milk recording projects, cattle breeding farms. Cross breeding with imported bulls did not yield good results in the long run. Only Indian bulls are now used for this purpose.

Most of the States have appointed Dairy Development Officers to organise dairying both on co-operative lines as well as through private enterprise.

Dairy Development Projects working in the various States are—**Andhra:** Milk supply schemes are introduced at Kurnool and Guntur; **Bombay:** A very large colony has been established at Aarey near Bombay City where about 15,000 animals are housed under the most modern conditions and supply milk to Bombay City. A large dairy of similar nature has been established at Anand with the assistance of UNICEF.

Milk supply schemes are also working at Poona; **Bihar:** Co-operative milk unions have been set up in 3 towns; **Madhya Pradesh:** The number of dairy units has increased from 7 to 11; **Madras:** A number of co-operative milk supply schemes are in operation. These had reached a daily output of over 29,000 maunds in 1955-56. Further, the State Government advances loans to co-operative societies for the purchase of milch cattle. About 2,740 cattle were purchased in this way in 1955-56; **Mysore:** Milk supply schemes are taken up at Dharwar and Hubli; **Orissa:** Eight subsidised dairies have been established so far; **Uttar Pradesh:** There are co-operative milk units in 9 towns with well-equipped dairies where milk collected from rural areas is pasteurised prior to distribution.

Research in dairying is done at the National Dairy Research Institute at Karnal and its southern regional station at Bangalore. This Institute also runs courses in Animal Husbandry and Dairying.

The chief diseases that the Animal Husbandry and Veterinary Departments have to deal with are glanders and surra in equines, foot and mouth disease, haemorrhagic septicaemia, black quarter and anthrax in ruminants while tuberculosis, Johne's disease and contagious abortion are assuming greater importance than in the past. Glanders and surra are both scheduled diseases under the Glanders and Surra Act. Glanders is incurable but surra can now be successfully treated with Naganol or Antypol. This disease (surra) also affects camels, cattle and dogs and in recent years its importance as a bovine disease has been more widely recognised.

A major scourge affecting Indian cattle is Rinderpest which causes a mortality of about 60 per cent resulting in an annual loss of 0.4 million heads of cattle, valued at about 300 million rupees. The first plan had provided Rs. 1.67 million for Rinderpest eradication. Because of the eradication campaign of the past, Kerala and Madras are now free from the disease. But, further north, in Andhra Pradesh, Mysore, and Bombay States the disease is prevalent and a pilot scheme to vaccinate and brand about 12 million cattle and buffaloes has been in operation since October, 1954.

The quantity vaccine produced during the first plan period (October 1954 to March 1956) and the number of animals vaccinated were 7.6 million doses and 6.7 million animals respectively. During 1956-57, 10.573 million doses of

vaccine were produced and 5.46 million animals were vaccinated bringing the total to 18.118 million doses of vaccine produced and 11.16 million animals vaccinated since the beginning of the scheme.

Of the diseases of ruminants mentioned, all, with the exception of foot and mouth disease, can now be controlled either by means of sera or by vaccines.

Indian poultry are also subject to several contagious diseases. The dreaded "Ranikhet" disease is fairly widespread and its ravages have seriously hampered the poultry industry. A chick-passaged vaccine has now been developed at the Indian Veterinary Research Institute. Fowl pox and fowl cholera vaccines are available for the protection of poultry against these diseases.

According to the FFYP, 650 veterinary dispensaries were established. During 1955-56, 192 dispensaries (including 13 mobile units) were set up.

Research and Educational Institutions

The Chief Research Centres under the Central Government are:—Indian Veterinary Research Institute is situated at two places in Uttar Pradesh, Izatnagar, and at Mukteswar near Bareilly. They undertake both research and training.

The Institute supplies the veterinary demands of the whole of India for sera and vaccines and except for two minor institutions (one in Madras and the other in Mysore), it is the only source in India for these products. The present output of these products meet only 70 per cent of the demands. Recently on the advice of a foreign expert in the manufacture of Biological Products through modern methods, steps are being taken to modernise the equipment and processes.

Similarly, Research in Dairying is done at the Indian Dairy Research Institute, Karnal (Punjab) and at its southern regional station at Bangalore (Mysore). The Indian Dairy Research Institute is the principal Educational and Research centre in the country in Dairy Science. The Institute gives courses in Animal Husbandry and Dairying.

ANIMAL DISEASES

There are fourteen Veterinary Colleges in India, one each at Gauhati, Patna, Calcutta, Bombay, Mathura, Hyderabad, Madras, Hissar, Bikaner, Bapatla, Mhow, Cuttack, Trichur and Jabalpur.

LIVESTOCK STATISTICS

The following table shows the estimates of livestock population for 1956:

FOOD

THE areas covered by the Punjab and the former Vindhya Pradesh (now part of Madhya Pradesh) are generally surplus in wheat.

The areas covered by the following States are generally surplus in rice: Orissa, Madhya Pradesh, Andhra, Punjab.

From the point of view of food generally the position is roughly as follows:

Surplus areas: Madhya Pradesh, Punjab, Orissa, Assam, Andhra.

Self-sufficient areas: U.P.

Deficit areas: Bombay, Madras, Mysore, Rajasthan, Himachal Pradesh, Bihar, West Bengal, Kerala.

Population under statutory rationing while it was in force: 1951—46 million, 1952—51.2 million, 1953—22.8 million.

Rationing was abolished in November 1954.

Population covered by other types of rationing (while it was in force) including Fair Price Shops: 1951—68.2 million, 1952 (Dec.)—97.1 million, 1953—60.6 million.

Decontrol of food after the war started in the middle of 1952 and was complete through a series of intermediate steps by the end of the third week of March 1955.

Wheat and coarse grains were completely decontrolled in November 1953, grams in January 1954 and rice in July 1954. Restrictions on the inter-State movements of wheat was withdrawn on March 17, 1955.

The statutorily rationed population on the last day of 1953 was as follows (to the nearest thousand) (old States): Assam: 330,000; Bombay: 6,455,000; Punjab: 1,200,000 (only for rice in 12 towns); West Bengal: 5,878,000; Hyderabad: 1,200,000 (only for rice in two towns); Jammu and Kashmir: 90,000; Travancore-Cochin: 8,568,000; Delhi: 1,488,000; Total (excluding Punjab and Hyderabad): 22,800,000.

PRODUCTION

Total foodgrains production in the country was as follows: (figures in million tons) 1950-51: 50; 1951-52: 51.17; 1952-53: 58.27; 1953-54: 68.72; 1954-55: 66.60; 1955-56: 65.3; 1956-57: 68.7 (estimate).

Taking cropwise the production figures were as follows:

Rice: Rice production during the year 1956-57 touched an all-time high at 28.1 million tons, which showed an increase of 4.8 per cent. in production over the previous year.

Wheat: Production in 1956-57 was 9,068,000 tons, which showed an increase of 5.8 per cent. over the previous year. The increase in production was shared by Punjab and Rajasthan and to a lesser extent by U.P. and Madhya Pradesh.

Gram: Production in the country in 1956-57 was 5,930,000 tons which recorded an increase of 11.2 per cent. in production over 1955-56. This heavy increase was shared by almost all the important gram growing States except Bihar, and was particularly marked in Punjab, Rajasthan, Madhya Pradesh and U.P.

Maize: Production in 1956-57 touched an all-time high at 3,020,000 tons, which showed an increase of 18.2 per cent over the previous year. The production of major millets—jowar and bajra—in the year 1956-57 was put at 10,353,000 tons, which showed an increase of 3.7 per cent. over last year.

The following are the comparative production figures of rice, wheat and barley during the five years 1953 to 1957:

(000 tons)

Year	Rice	Wheat	Barley
1956-57 ..	28,100	9,068	2,744
1955-56 ..	25,475	8,569	2,749
1954-55 ..	24,531	8,778	2,870
1953-54 ..	27,769	7,990	2,905
1952-53 ..	22,537	7,382	2,882

The All-India (Final) Estimate of production of foodgrains for 1956-57 was 68.7 million tons.

State-wise details of production in 1956-57 (in 000 tons) are as under:—

Andhra Pradesh 5,617; Assam 1,744; Bengal (West) 4,711; Bihar 5,244; Bombay 7,765; Jammu and Kashmir 504; Kerala 886; Madhya Pradesh 8,361; Madras 4,728; Mysore 3,673; Orissa 2,500; Punjab 5,856; Rajasthan 4,388; Uttar Pradesh 12,453; Andaman and Nicobar Islands 3; Delhi 31; Himachal Pradesh 255; Laccadive, Minicoy and Amindivi Islands (Not known); Manipur 117; Tripura 150.

The demand and supply of cereals from 1954 to 1956: (000 tons).

(a) Production figures refer to the agricultural year (i.e. July-June) and production under 1956 relates to the agricultural year (1955-56).

(b) Excludes quantities taken over from the State Governments to the Central Reserve.

(c) Shows total supplies out of both the imported cereals and internal surpluses.

(d) Shows separately the supplies out of internal surpluses already included under 'c'.

(e) Figures for 1956 are provisional and subject to revision.

DROUGHT

Famine conditions prevailed in parts of five States: Bihar, eastern U.P., Orissa, M.P. and West Bengal.

The drought area covered about 170,000 sq. miles with a population of about 80 millions.

According to a rough estimate between three and four million tons of foodgrains, mostly rice, had been lost.

The estimates of loss made by the State Governments was as follows in 1957-58:

Paddy crop in Bihar was not likely to yield more than 50 per cent of the normal production, while the extent of damage in Madhya Pradesh was assessed between 25 per cent and 70 per cent in different areas. Orissa's estimate of the loss in paddy crop was 55 to 65 per cent of the normal production and the fall in production in West Bengal was roughly placed at about eight lakh tons of rice. The U.P. Government estimated the damage to the late paddy crop in eastern districts to be ten annas or more in the rupee.

The Sivaraman Committee, appointed by the Planning Commission to study the scarcity conditions in Bihar, eastern Uttar Pradesh, Orissa and Madhya Pradesh, however, reported that earlier estimates of damage to the "kharif" crop were likely to prove exaggerated.

The Orissa crop, on the whole, might not be much below normal and the "rabi" crops would not generally be much affected.

The Committee was of the opinion that the total loss of crop in Bihar would be 35 per cent and not 60 per cent, as earlier feared, while the loss of rice in eastern U.P. and Madhya Pradesh would be about 224,000 tons and 940,000 tons respectively as against the first estimates of 489,000 tons and 1,482,000 tons respectively.

In Bihar, the loss of rice was likely to be 600,000 tons and not 1,960,000 tons as anticipated by the State Government.

1958 OUTLOOK

Authoritative circles viewed the food situation for 1958 with cautious optimism.

This optimism stemmed from the adequate programme of food imports backing the concerted activities within the country, the downward tendency in prices and the expectation that prices would fall further following various steps taken by the Government during 1957.

The Food Ministry estimated that foodgrains costing between Rs. 80 and Rs. 90 crores would have to be imported during the financial year 1957-58.

At the end of 1957 the Governments of India and of the States had built up stocks of a little over a million tons of wheat and rice after meeting its regular commitments for distribution through fair price shops.

Rice: 270,000 tons, wheat: 712,000 tons; others: 48,000 tons.

The drought conditions referred to made any accretion to the reserves impossible.

By the beginning of 1958 Government would have to draw upon its reserves which together with fresh imports under the agreements with the U.S.A. and Burma, about 1.5 million tons, are unlikely to last beyond the middle of 1958.

About rice, a redeeming feature was that 1957 would close with a balance of about 200,000 tons. This would mean that while imports in 1958 would be only five lakh tons against about seven lakh tons in 1957, it would still be possible to maintain distribution of rice on the same scale as in 1957.

So far as food imports were concerned, India had two long-term contracts—one for the import of 3.1 million tons of wheat from the U.S.A. under Public Law 480 and the second for the import of two million tons of rice from Burma for a period of five years from 1956.

By the end of 1957 the entire quantity of wheat due from the U.S.A. had arrived, except for about 4.6 lakh tons, which was expected in the first few months of 1958. From Burma about five lakh tons of rice was the 1957 import figure and a similar quantity was expected in 1958.

The position regarding wheat imports in 1958 was roughly as follows: Balance under P.L. 480 from the U.S.A. (450 to 500 thousand tons), aid under Colombo Plan from Canada (about 110,000 tons) and normal marketing imports as required by P.L. 480 agreement (400,000 tons).

In addition to these, it had been agreed that unused allocations totalling about 42 million dollars under P.L. 480 Agreement in respect of cotton, dairy products and tobacco should be diverted to food grains. This provided an additional import of over six lakh tons of wheat.

Meanwhile, it was understood, discussions were continuing for a new P.L. 480 Agreement with America.

The position in respect of rice, according to these circles, was however not so satisfactory, as it had not been found possible to augment the import of rice due to foreign exchange difficulty and non-availability of rice in the world market except at very high prices.

Amendment of the Essential Commodities Act in the middle of this year was an important step in the fight against high prices, for, it gave the Government the power to require stockists to sell not at prevailing market prices but at the average price of the past three months or at controlled prices.

Among the steps taken by Government to control prices were fixation of maximum prices at which rice and paddy was to be sold in three districts of Andhra Pradesh, application of section 3 (3A) of the Essential Commodities Act to the states of the Punjab, Rajasthan and western districts of U.P. in respect of gram and application, with effect from November 2, of the same section of the Act to U.P. and the Punjab in respect of wheat.

Government's policy was to control trade to end speculation—but without returning to full-scale controls. It decided to licence traders to know how and where the food stocks were and how and at what prices they were being disposed of.

An Extension Wing, with emphasis on increased agricultural production, was to be set up in the Ministry of Food and Agriculture to relate effectively scientific knowledge, resulting from agricultural research and other activities of the Ministry, to the programme of increasing food production in India. The Wing will work in co-operation with the Community Development and National Extension blocks, helping to give priority attention to increased food production.

There was an extra allotment of Rs. one crore for minor irrigation schemes during 1957-58.

Two expert committees were appointed, the first to suggest ways and means of combating special problems of areas like eastern U.P. where it was suspected climate had changed.

The second committee of specialists will examine all major and medium irrigation schemes in the drought-affected areas to inquire why the irrigation potential, provided by spending large sums of "scarce money," has not been fully utilised.

The balance sheet of foodgrains distributed by Governments during 1955 and 1956 was as follows:

	(in thousand tons)	
	1955	1956
Opening Stock with States ..	784	168
Procurement	16	36
Net Supplies to States ..	232	552
Total Availability	1,031	756
Offtake in States	449	642
Transfer of Stocks to Centre	414	35
Stocks with States at the end of the year	168	79
Central Sales during the year	1,161	1,367
Central Reserves at the end of the year	866	738

IMPORTS (1956-57)

In 1957 upto the end of August, 629,875 tons of rice and 1.7 million tons of wheat were imported.

The imports for the years were as follows: (figures in million tons)
1950-2.1; 1951-4.7; 1952-3.9; 1953-2.0; 1954-0.808; 1955-0.7; 1956-1.42.

The cost of import of foodgrains was as follows:

(figures in crores of rupees)
1950-80.6; 1951-216.8; 1952-209.1; 1953-85.96; 1954-47.02; 1955-33.11; 1956-56.34.

The imports of individual grains were as follows:

	1954	1955	1956
Rice*	0.603	0.285	0.325
Wheat (including flour)	0.197	0.435	1.095
Others	0.008	—	—
TOTAL	0.808	0.700	1.420

The cost was as follows:

	(Rs. in lakhs)		
	1954**	1955	1956
Rice*	—	—	—
Wheat	—	—	—
Others	—	—	—
TOTAL	4,702	8,811	6,634

Countries from which imports were obtained from 1954 to 1956 with quantity (in million tons) and C & F value (in lakhs of rupees) were as follows: The figures are provisional:

Country	1954		1955		1956	
	Quantity	Value	Quantity	Value	Quantity	Value
U.S.A.	0.008	—	0.129	—	0.428	—

PRICE LEVEL

The movement in the price of some items is shown by the following table of index numbers of wholesale prices:

(Base 1952-53: 100)

	1955		1956		1957	
	January	December	January	December	January	December
All commodities	93.0	93.0	95.3	107.9	107.2	106.0
Food Articles	83.3	87.5	89.4	104.8	103.2	103.0
Cereals	73.0	77.0	80.0	97.0	95.0	100.0
Pulses	50.0	73.0	76.0	87.0	86.0	84.0
Rice	73.0	76.0	77.0	93.0	91.0	100.0
Wheat	77.0	80.0	85.0	94.0	94.0	93.0
Jowar	65.0	71.0	83.0	127.0	119.0	124.0
Bajra	74.0	99.0	98.0	133.0	132.0	134.0
Gram	71.0	57.0	60.0	97.0	97.0	99.0
Red gram (Dal)	44.0	54.0	57.0	77.0	78.0	74.0
Arhar	51.0	86.0	85.0	82.0	83.0	82.0

The continuing high prices of rice and wheat in spite of the rise in indigenous production and imports is attributed to a change in people's dietary habits and the emergence of the small hoarder.

It is believed that an increasing number of people are switching over from coarse grains to wheat not merely because of greater prosperity, but also due to the narrowing gap between their respective prices.

The poor peasant, who used to sell almost his entire output of wheat in the market for consumption in the urban areas two or three years ago, has begun to hold back a part of his produce in the hope of obtaining better prices later on.

He can afford to do so because he has more money in his hands and the State meets a considerable portion of his needs by way of aid under the community development programmes or cash loans from the rural co-operatives.

It has to be said, however, that the total production of cereals has declined steadily from 58.26 million tons in 1953-54 to 55.73 million tons in 1954-55, 54.4 million tons in 1955-56 and then up to 57.2 in 1956-57.

This is accounted for by the decline in the production of coarse grains due to seasonal factors. But the fall in the output of coarse grains has indirectly encouraged the change in the pattern of consumption.

GROW MORE FOOD

The figures below show the performance in the principal food crops as compared with the targets for 1955-56 (figures are in million tons):

	Target, 1955-56	Achievement	
	1955-56	1955-56	1956-57
Rice	27.2	26.8	28.1
Wheat	8.3	8.6	8.1
Other Cereals	17.0	19.0	20.0
Pulses	9.1	10.8	11.4
TOTAL	61.6	65.2	68.6

For the execution of the various Grow More Food schemes during 1956-57 Rs. 25.62 crores were allotted. Out of this loans amounted to Rs. 22.15 crores and subsidies to Rs. 3.47 crores.

* Excludes the quantity and value of 22,800 tons of Burma rice supplied by the Government of Ceylon on a replacement basis.

** Individual figures are not available.

It was expected that production would increase by 16 lakh tons as a result of the G.M.F. programme.

Reclamation of land by the Central Tractor organisation : 85,189 acres in U.P. and M.P. and 2,000 acres of jungle cleared in Assam.

The cost of reclamation for 1954-55 came down to Rs. 46 per hour and Rs. 50 per acre from the corresponding figures of Rs. 51 and Rs. 59 in the preceding year.

Tubewell construction is undertaken under two different heads (i.e. Indo-American Technical Programme of 1952-53, and G.M.F. assistance). Under the former, out of the 2,650 tubewells originally proposed 2,449 were drilled by the end of 1956 in the States of Bihar, Punjab and Uttar Pradesh. Under the G.M.F. assistance, out of the 700 tubewells proposed 551 were drilled during the same period. Exploratory Project for tubewell drilling is also proposed for most of the States under the Technical Assistance programme. Out of the 360 borers, 30 have already been drilled in the Nabada Valley (near Itarsi) in Madhya Pradesh.

About 4,000,000 maunds of seeds were allocated to the States for the Kharif season and 95,000,000 for the rabi.

During 1955-56 about 2.12 million tons of compost manure was prepared from refuse as against 2.01 million tons in the previous year.

1.79 million tons were distributed during the period as against 1.68 million tons in 1954-55.

There were about 24 schemes in operation during 1955-56 for the utilization of sewage and sullage.

The total supply of ammonium sulphate available for distribution from the pool during 1956 was about 0.64 million tons (made up of 0.057 million tons of carry-over stocks from the previous year, 0.33 million tons obtained from Sindri Fertilizer Factory, 0.052 tons procured from other indigenous sources and 0.2 million tons imported from abroad).

The maximum sale price of ammonium sulphate in 1954 came to Rs. 345 per ton as against prices ranging between Rs. 350 and Rs. 450 per ton during 1953.

This is now made available to farmers throughout the country at the uniform rate of Rs. 345 per ton. Subsidies are given to State Governments for transport to ensure that the consumer gets this at the fixed price.

The consumption rose to about 0.675 million tons during 1956 tons as against 0.552 million tons during 1955, and 0.50, 0.427 and 0.276 million tons during 1954, 1953 and 1952 respectively.

The consumption of superphosphate was 0.051 million tons in 1953, 0.001 in 1954, 0.078 in 1955 and 0.10 in 1956.

The total quantity of fertilizers distributed in 1956-57 was 5,85,000 tons. Apart from this a total quantity of 88,306 tons of other fertilizers (comprising 17,500 tons of urea, 20,750 tons of ammonium sulphate nitrate and 56 tons of calcium ammonium nitrate) were imported under the Indo-U.S. Technical Co-operation programme during 1955. Almost the entire quantity of these was distributed free of cost to the cultivators for demonstration purposes and also to popularise this type of fertilizer.

Grow More Food campaign is now merged in the Community Development and National Extension Projects. These latter are not really new to the country in a sense. Parts of the agricultural departments have always been engaged in the demonstration and propaganda of improved farm practices. This, however, did not prove effective.

The eleven Model Village Projects of the I.C.A.B. which successfully worked on a pilot scale during the forties in various parts of India, (viz., former Madhya Pradesh 4; Uttar Pradesh 4; Bombay 2; and Travancore-Cochin 1) showed what could be done to improve traditional methods. Brayne's work in the Punjab, the Firka Development in Madras, the Etawa Project in Uttar Pradesh and Sarvodaya work in Bombay and elsewhere, were more or less the successors of the I.C.A.B. Pilot Projects, but with varying emphasis on particular aspect of rural development.

REPORT OF THE FOODGRAINS ENQUIRY COMMITTEE

A Committee called the Food Grains Enquiry Committee was appointed on 24th June, 1957 with Mr. Asoka Mehta as Chairman and Thirumala Rao, M.P., Mr. S. F. B. Tyabji, M.P., Mr. V. N. Tiwary, Raja Surendra Singh of Nalagarh and Dr. B. K. Madan as members and Dr. N. R. Sen as Member-Secretary.

The report was submitted to Government early in November 1957 and published on 10th November. It contains 11 chapters and a large number of charts and statistical tables.

The Committee confined itself to the basic problems relating to the production, distribution and prices of foodgrains in the country from an over-all point of view.

It reviews briefly the food situation during the last few years and the policy of the Government regarding distribution, production and prices of foodgrains. Further, an assessment of recent developments and a prognosis of the food situation, as it is likely to develop during the next few years, is made and is followed by the main conclusions and recommendations which are summarized below.

The Report also deals briefly with the problem of scarcity areas.

The Committee has reviewed the food situation and policy of the Government about distribution, production and prices of foodgrains since 1950-51.

It observes that just before the First Five Year Plan was launched, i.e., in 1950-51, the country was in the grip of a serious food shortage and food prices were ruling at high levels. Large releases from Government stocks, better crop prospects, and a tighter monetary policy helped to bring down the prices substantially during the following two years and there was a general feeling that stability had been largely restored.

This stability, however, was short-lived as there was an unprecedented increase in foodgrains production during 1953-54.

This year saw the beginning of a recession which gathered momentum in the following year. One reason for the rise of price movements was that the marketed surplus tended to increase more than proportionately as production rose.

To arrest the decline in prices, Government took a series of measures including limited price support operations and permission to export

pulses and rice in limited quantities. There was a general feeling that the bottom level was perhaps reached and prices could not fall further.

A reversal of this trend ensued due to the reports in October 1955 of a fall in millets crop. This rise in prices was helped to a certain extent by the knowledge that the Government had no stock of millets and that its stock of wheat was low. The rise in prices, which at first looked like a normal correction of the earlier fall, gathered momentum throughout 1956. An apparent paradox of the situation, however, was that in spite of the substantial increase in foodgrains production during 1956-57, prices continued to rise, indicating the strength of the demand factors.

The rise in prices in the case of different commodities, however, differed widely, the rise being greater in the case of those which had suffered heavily in output.

The Committee observes that the instability of food-prices with its consequences in terms of instability in incomes of agricultural producers and costs of living, costs of production, employment and other elements of the economy forms one of the problems for consideration.

PRICE LEVEL

The Government's food policy is reviewed broadly in relation to programmes of food distribution and food production.

Between 1951-57, the policy regarding food distribution has undergone a change successively from complete control to complete decontrol and then back to partial control.

Tracing the history of the Grow More Food Campaign followed by the Integrated Production Programme, the Committee observes that the ideal of relative food self-sufficiency was itself not capable of easy achievement because in practice it turned out to be a 'moving target' in a country where the masses of the population were underfed and even a small increase in production and in income led to a substantial increase in consumption.

The recommendations of the Grow More Food Enquiry Committee, appointed by the Government of India in 1952 were incorporated into the programme of agricultural development drawn up under the First Five Year Plan, and a target of 7.6 million tons of additional foodgrains was fixed to be achieved by the end of 1955-56.

In the early years of the Plan, the policy of concentrating efforts on intensive cultivation in selected areas with assured water supply and suitable soil was continued, but subsequently as the food position appeared to have improved, there was a shift of emphasis to community development projects.

After the relaxation of controls in 1954 and the abandonment of procurement, however, the emphasis in community development projects shifted from increasing agricultural production and marketable surplus in selected areas to increasing the general level of production and well-being of the country as a whole.

The production of foodgrains at the end of the First Five Year Plan exceeded the target fixed for the Plan period.

Under the Second Five Year Plan, a target of 10 million tons of additional production of foodgrains over the year 1955-56 was fixed by the Planning Commission as compared to 7.6 million tons in the First Plan.

This target, however, was revised upwards to 15.5 million tons mainly with a view to meeting the domestic demand, increasing export earnings and providing adequate safeguards against the possibility of inflation arising out of the implementation of the Second Plan.

The Committee states that on the whole the rise in prices may be ascribed to a general increase in demand resulting from the increase in investment expenditure on public and private accounts financed by deficit financing and credit expansion during the last few years.

These general inflationary forces tended to manifest themselves through various factors on the demand side of foodgrains. With a steady increase in the purchasing power of the public, there has been a change both in the volume and pattern of food consumption of many sections of the people. For instance, people who used to live on roots like tapioca and sweet potatoes are transferring their demand to millets, or coarse rice and those who used to take millets formerly are now shifting over to rice and wheat.

Another factor which affected the demand side was the change in the propensity to stock. It is pointed out by the Committee that as a result of the sharp fall in prices, stocks with the traders had fallen to very low levels by the middle of 1955 but with an expectation of a rise in prices in 1956, they increased considerably.

In 1955-56, most of the stock piling was done by the traders but in 1956-57, there was a significant change and a large part of the stock holding was done by big and medium producers also.

Reviewing the supply position of food-grains, the Committee states that the fall in the production of millets to the extent of 3 million tons in 1955-56 initiated the price uprend in 1955, and increased the pressure of demand on both rice and wheat. In spite of an increase in the production of millets, the pressure on rice and wheat continued in 1956-57 also.

The Committee further points out that from the point of view of prices, variations in marketed surplus are more important than variations in production and states that though the gross availability per capita in 1957 may be almost the same as in 1954, it is likely that the net availability per adult for non-farm population will have declined due to increased retention by the agriculturists.

Thus the rise in prices, since the middle of 1955, according to the Committee, is essentially an outcome of monetary and other general factors interacting on certain special factors pertaining to demand and supply of foodgrains. With a situation generally favourable to a rise in prices of foodgrains, it was first the fall in production and later the slowing down in market arrivals which pushed the prices of foodgrains sharply upwards from the low levels reached in 1954-55.

PROSPECTS

After taking into account, the possible increase in the population in rural as well as urban areas separately, the Committee feels that the demand for foodgrains on this account may increase by 10 per cent during the Second Plan period. Additional demand for foodgrains due to increase of income has been estimated between 4 and 4.5 per cent. The Committee, therefore, expects a total increase between 14.4 and 15 per cent in the total consumer demand for foodgrains including that for cattle feed and seed during Second Plan period.

In the absence of the necessary estimates of total demand in the base period, the Committee has used the average gross availability of foodgrains during the last 3 years at 69 million tons as the basis for working out the future demand for foodgrains in quantitative terms and has roughly estimated the total demand for 1960-61 at 79 million tons.

The breakdown of these 79 million tons between rural and urban areas worked out roughly to 66 million tons and 13 million tons respectively and between superior grains namely rice, wheat and pulses, and inferior grains namely millets at 56 million tons and 23 million tons, respectively.

After ascertaining the views of the Government as well as other interested organizations, the Committee has concluded that the actual achievement in foodgrains production by 1961 is likely to be of the order of 77.5 million tons which is comparable to the figure of 79 million tons for likely demand in 1960-61.

Considering the availability of foodgrains from abroad, the Committee feels that the total imports of wheat on present estimate would amount to 2 lakh tons under International Wheat Agreement, 4.5 lakh tons under P.L. 480 and 3.5 lakh tons from commercial sources, a total of ten lakh tons.

Regarding rice, apart from the small quantities which could be obtained from U.S.A., Egypt, Thailand, China and Viet Nam, it is expected that imports from Burma would be 5 lakh tons in 1958 and 3.5 lakh tons in each of the subsequent two years.

CONTROLS

As the instability of food prices was expected to continue during the next few years, the Committee feels that special measures are necessary for keeping price disparities within reasonable bounds.

As complete free trade was undesirable and full control had its administrative and financial difficulties, the Committee has recommended a *via media* between these two as the solution of the food problem.

Full control, according to the Committee, should be resorted to only in cases of emergency like war or famine or extreme inflationary pressures. Controls should be of countervailing or regulatory rather than of restrictive type.

For the present, it should ordinarily be sufficient to undertake open market purchase and sale of foodgrains by the Government as a regular measure, socialise part of the wholesale trade, exercise control over traders operating in the rest of the market through a system of licensing, maintain a sizeable reserve stock of wheat and rice, arrange for the regular import of a certain quantity of wheat and rice and organize propaganda for consumption and production of subsidiary food.

Special measures, however, have to be undertaken in a period of rising or falling prices.

The Committee recognises the importance of appropriate, fiscal, monetary and credit policies in controlling prices, but emphasises that these have to be supplemented by certain specific action directed to controlling foodgrains and also in respect of related commodities if comparative stabilisation of their prices is desired. It feels that to ensure a level of prices which would provide the necessary incentive to the producer with due regard to the interest of the consumer and maintenance of reasonable cost structure in the country, it is essential to set up such an organization and machinery for co-ordinated formulation of measures to be taken from time to time and their implementation.

FOODGRAINS ORGANISATION

The Committee has, therefore, recommended firstly, the setting up of an authority known as the Price Stabilization Board for the formulation of policy for price stabilisation in general and for determining from time to time the programme of enforcing it, and secondly, the establishment of a suitable organisation known as Foodgrains Stabilisation Organisation to execute that part of the policy and programme framed by the Price Stabilization Board as may relate specifically to purchase and sale operations in the field of foodgrains.

The Committee states that it is desirable to set up a body of non-officials called the Central Food Advisory Council to assist the Food Ministry and Price Stabilization Board.

Similarly an organization called Price Intelligence Division for collecting all relevant data should be built up with a senior officer as head who will also act as Secretary to the Price Stabilization Board.

The Price Stabilization Board with the help of the Central Food Advisory Council and Intelligence Division will keep a careful watch over the price situation and recommend necessary action from time to time for maintaining not only the general price level reasonably stable but also for preventing undue disparity between the prices of various commodities.

The Foodgrains Stabilization Organization which may either be a department of the Ministry of Food and Agriculture or a statutory corporation or a limited company, will operate as trader in the foodgrains market with branches or agencies of its own in all important mandies particularly in surplus areas and centres of distributive trade.

The most important work of this Organization will be buffer stock operations i.e., purchasing when the prices tend to fall and selling when prices rise. It will, from time to time, have to fix limits of prices at which it would buy or sell within the range of prices for its operation fixed by Government on the advice of the proposed Price Stabilization Board.

The Committee emphasises the need for socialization of trade to bring about stability of agricultural prices.

It is not necessary that the Foodgrains Stabilization Organization should undertake all these operations itself. It may operate through the agency of licensed wholesale dealers, rice and flour mills or co-operative societies and may make use of the Departments of Civil Supplies and Marketing of the State Governments.

This Organization should generally try to complete its purchasing operation within three months of harvest and should have warehouses in important producing and consuming centres including deficit areas.

The Foodgrains Stabilization Organization is expected to control a large part of the market surplus during normal years, but so long as inflationary trends continue and food shortages persist, open market operations may push up the prices making it necessary to stop its operations.

It will, therefore, be necessary to undertake some form of compulsory procurement for replenishing reserve stocks and maintaining supplies to vulnerable sections of the population at reasonable prices. In order to make the measure a success, licensing of foodgrains dealers will be necessary and an order on the lines of the Foodgrains (Procurement and Licensing) Order 1952 should be issued and strictly enforced.

The building up and maintenance of an adequate reserve stock as distinguished from any buffer stock is one of the most important tasks of the Foodgrains Stabilization Organization. The Committee is aware of the Government's decision to build up a reserve stock of two million tons but it emphasises the need for replenishing these stocks as soon as they tend to fall below that figure.

In this context, the Committee feels that an annual import of 2 to 3 million tons will be required for some time to come. The Committee is of the opinion that the assured supply of foodgrains from U.S.A. and Burma would enable the formulation of a stable and long term food policy.

DISTRIBUTION

Referring to the short term measures relating to control of distribution and trading in foodgrains, the Committee states that food distribution should be primarily through fair price shops or through institutions like co-operative societies or employers' organizations, etc.

In view of relatively easy supply position, wheat may be issued freely upto a full quota of 12 oz. per adult, per day.

The issue of rice, however, which is in short supply may ordinarily be not more than 8 oz. per adult per day in South India, 6 oz. in East India and 4 oz. in other areas. Moreover, this amount should be issued only if the purchaser agrees to take the balance of 12 oz. in the shape of wheat.

The sales from these shops should normally be on 'no profit, no loss' basis.

A provision should be made for subsidised sales to specific categories of persons. Big cities may be cordoned off in case of abnormal fall in production and non-availability of larger imports to insulate the rest of the economy from pressure that these cities with high purchasing power might exert on general supply.

The object of creating zones is to match deficit areas to surplus areas and thus to minimize the demand on Government supplies and also eliminate cross movements of foodgrains. The Committee feels that once a zone is formed it should be mainly on a relatively long term basis so that the trade patterns are not frequently disturbed.

Regarding local relief, the Committee recommends that a section should be set up within the State Government and also at the Centre for the purpose of anticipating difficulties arising out of possible floods and drought, locating scarcity pockets and initiating prompt means to deal with them. The Committee suggests that Village Panchayats and co-operatives should be encouraged through advances wherever necessary to set up grain golas.

The Committee has also recommended that Food Administration at the Centre and in the States should be put on a permanent footing.

The Committee has examined in detail the different schemes for stepping up the foodgrains produce such as major and minor irrigation works, distribution of improved seeds and chemical fertilisers, land reclamation, etc., and has made a number of recommendations, e.g., reallocation of unspent funds allocated for major irrigation works to minor irrigation works, uniformity of rates in homogenous tracts, increase in the seed multiplication farms, high priority for import of fertilisers, etc.

The Committee has observed that uncertainty about land reforms is affecting production efforts and has recommended that the State Governments should proceed expeditiously with enacting the necessary legislation for land reforms and follow it up with effective implementations.

It is expected that the food requirements of the urban areas may increase considerably in the course of next few years and necessary measures should be taken to augment the total marketed supply and to encourage its flow to the assembling markets.

Referring to the problem of scarcity areas which spread over a long belt extending from the northern districts of Bombay to the eastern tip of Assam and touching parts of Rajasthan, Madhya Pradesh, Orissa, Eastern U.P., Bihar and West Bengal, the Committee points out that the purchasing power of the people in almost all these areas is generally low owing to inadequate employment opportunities and unbalanced economy. These areas, therefore, have posed difficult and recurring problems.

The Committee has made a brief study of the local problems of one of these pockets, viz. the

eastern districts of Uttar Pradesh and hopes that detailed and intensive studies would be undertaken in such areas before long.

The solution of the problem of low purchasing power, according to the Committee, lies in correcting the unbalanced character of the economy by increasing and diversifying employment opportunities through promotion of village and small-scale industries besides provision of better irrigation facilities for agriculture and for protecting the economy against flood hazards.

The Committee concludes its report by emphasising the need not only for determined and all out efforts to step up food production but also checking the high rate of the growth of population. The Committee feels that gravity of the food situation demands national efforts transcending regional and party considerations.

FISHERIES

THE fishing industry in India offers employment to about 4.21 lakh persons and contributes annually over Rs. 10 crores towards the national income.

The estimated annual production of fish is about 12 lakh tons, of which 70 per cent comes from sea and estuarine fishing.

About 27,000 tons of fish products, consisting mostly of dry, dry-salted and wet-salted fish, are annually exported to neighbouring countries.

The annual per capita availability of fish in India is estimated to be 3.4 lbs. as against 16 lbs. in Ceylon, 70 lbs. in Burma and 90 lbs. in Japan.

It is estimated that 40-5 lakh tons of fish would be needed to meet this country's minimum requirements.

Surveys conducted recently in the Bay of Bengal and Arabian Sea reveal that if only our rich resources are properly exploited this would more than meet the demand. The greatest handicap in the exploitation of the country's fish resources hitherto has been the traditional methods of fishing. The great part of the 70,000 boats and other craft used for fishing cannot operate beyond a few miles.

Experiments in mechanisation of fishing are being conducted since 1948 with the help of assistance received from Norway, U.S.A. and F.A.O.

Four Japanese, one British and three F.A.O. experts are working in this country, and the Norwegian Government is operating a development scheme in Kerala as part of the Norwegian Aid Programme.

During the past few years, more than six hundred boats in Bombay have been fitted with motors. This has led to a four-fold increase in the production of fish in Bombay.

There is a proposal under consideration to set up three exploratory fishing stations at Cochin, Visakhapatnam and Port Blair.

Adequate landing and servicing facilities, refrigeration plants, quick transport arrangements and efficient marketing are also necessary for the success of commercial fishing in India.

Considering the importance of the industry a provision of Rs. 12 crores has been made in the Second Plan for developing it.

BOMBAY STATE

Bombay State has a sea board of more than 1,200 miles extending from Reddy (District Ratnagiri) in the south to Lakhapat (Kutch) in the north inclusive of Saurashtra coast. The inland Fisheries extend to Bhandara District in the East, a crowflight distance of over 500 miles. The total number of fishing villages along the coast is estimated at over 450. The Bombay State Fisheries enjoy a pre-eminent position on the West Coast of India both from the point of view of total production and progress of developmental activities.

The Fisheries Department of Bombay State has its Head Office in Bombay having regional offices at the following places for administrative convenience, under control of the officers indicated against each region:

Region.	Controlling Officer.
1. Saurashtra ..	Officer on Special Duty (Marine Products), at Rajkot.
2. Kutch ..	Superintendent of Fisheries, Bhuj.
3. Vidarbha ..	Superintendent of Fisheries at Nagpur and Bhandara.
4. Marathwada ..	Superintendent of Fisheries, Aurangabad.
5. Ratnagiri ..	Superintendent of Fisheries (Coast), Ratnagiri.
6. Kolhapur ..	Superintendent of Fisheries, Kolhapur.
7. Baroda ..	Superintendent of Fisheries, Baroda.
8. Surat & Broach ..	Superintendent of Fisheries, Surat.

Bombay State has a total outlay of Rs. 1,10,85,000 for development of fisheries under the Second Five-Year Plan. The schemes have been so drawn up that these will ultimately lead to elevating the present standard of the fishing industry by augmenting available supplies of fish and also by promoting the socio-economic condition of fishermen. The schemes can broadly be classified as Research, Demonstration, Development and Training schemes. The schemes are progressing according to schedule.

Important varieties of sea fish caught along the coastline: Saranga (White Pomfret); Halva (Black Pomfret); Ghol (Jew fish); Dara (Giant Threadfin); Ravas (Indian Salmon); Kuppa (Tuna); Surmal (Seer fish); Bol (Mullet); Bombli (Bombay duck); Bangda (Mackerel); Mushi (Sharks); Wam (Eels).

Estimated production: about 1,70,000 tons.

Price per ton of fish at present: Rs. 300. The total value of fish caught in this State: Rs. 5,10,00,000.

The number and names of the more important fishing villages and of the fishing grounds:

Greater Bombay: Lower Colaba, Worli, Danda, Versova; **Thana District:** Basseln, Arnala, Uttan, Edwan, Usarni, Satpatli, Navapur, Utchell, Nagaon, Dativare; **Surat District:** Umarsadi, Kolak, Bulsar, Kosamba; **Broach District:** Broach, Bhadbut, Kavi; **Amreli District:** Madhwar, Kotda, Velan, Okha; **Kolaba District:** Karanja, Versoli, Alibag, Theronda, Revdanda, Murud, Bharadkhol; **Ratnagiri District:** Burondi, Dabhol, Jaigad, Ratnagiri, Vijaydurg, Jalapur, Malvan, Deobag, Vengurla; **Saurashtra:** Veraval, Mangrol, Porbunder, Navabunder, Jufhrabad, and Dhamlej; **Jamnagar, Salaya and Sikka;** Navlakhi-Mallia; **Kutch:** Saurbarni, Cheval, Kharirohar, Tuna, Rampur, Saughad, Bhadrashwar, Luni, Sekherdia, Barol, Mundra.

The estimated fishing population: 271,000.

The facilities available for curing, storage and refrigeration, co-operative marketing are:

Several ice factories in the city and also at important fishing centres along the coast.

Annually, some addition to the available cold storage space is being made by extension to the existing plants and establishment of new plants.

A seven-ton ice plant and 30-ton cold storage were erected by the State Government at a cost of about Rs. 1,32,000 and handed over to the Satpatli Fishermen's Sarvodaya Co-operative Society for operation. The Society has also been allotted by the Government, refrigeration equipment to increase the seven ton ice making capacity of its existing plant to ten ton and a four ton quick freezing plant and refrigeration equipment for a fish storage, ice storage and quick frozen fish storage received under the T. C. M. Programme of the American Government. It has now attached to it 98 out of the 732 mechanised craft in the State, all of which carry ice aboard their vessels to preserve fish right from the time it is caught.

Construction of ice factories at Veraval, Mangrol, Porbunder and Bredl are nearing completion. Plans and estimates for construction of ice and cold storage plant at Kandla are under preparation.

Marketing facilities. A new building was put up in 1951 by the Bombay Municipality to cater for the City's fish trade. Lifts are being installed for the convenience of shoppers as the retail sale of fish is on the first floor.

The new market adjoining the original congested market was erected at a cost of about Rs. 8 lakhs. In the fish section space is provided for 250 squatters. Sufficient space is now available to traders to display their products. Two new

additional markets one at Grant Road and another at Umakhadi were also constructed during recent years.

Marketing facilities have also been provided at Kankavli and Malvan in the Ratnagiri District. Municipality at Jamnagar was persuaded to build a small fish market at Khoja Naka.

About four times the quantity of fish at present caught in the entire State will be necessary to meet the nutritional requirement of the people.

The quantity available for sale in Greater Bombay to the public was approximately as follows:—

Year	Tons
1950-51	31,674
1951-52	35,849
1952-53	36,388
1953-54	37,812
1954-55	32,034
1955-56	30,072
1956-57	26,000

Taiyo Fishing Co. Ltd., was permitted by the Government of India to conduct trawling off Bombay and Saurashtra waters. The firm employed trawl nets for deep-sea fishing. The total quantity of fish landed by the trawler was about 1,800 tons. The Government of India have since terminated the contract with the firm.

West Coast Fisheries (Travancore) Ltd. commenced deep sea fishing operations in Bombay waters in February 1953. It employed trawl nets for deep sea fishing and landed about 94 tons of fish during four voyages. The trawler is now conducting fishing operations off Travancore waters. New India Fisheries Ltd., a firm registered under the Company's Act, has recently been permitted by the Government of India to undertake trawl fishing. The firm in collaboration with Japanese enterprisers imported four trawlers from Japan and commenced fishing operations in Bombay waters. The firm commenced bull trawling in May 1956 and landed 2,800 tons of fish upto December 1956.

GOVERNMENT HELP

Government effort in up-to-date fishing technique, money spent, trawlers gear used, quantity of fish caught: The State Government built the vessel "Tapase", now renamed the "Mysla" in 1947, at Rs. 65,000 for demonstrating the usefulness of mechanised craft for catching fish.

Two improved types of fishing crafts at a total cost of Rs. 54,000 were also built and allotted to two fishermen's co-operative societies in the State on half subsidy and half loan basis for capture of fish.

During 1955-56 subsidy of Rs. 2,02,240 and loans to the extent of Rs. 3,99,895 were granted for the purpose. Government help to fishermen in Bombay area for mechanisation of fishing craft during 1956-57: Loan Rs. 8,01,128 and subsidy Rs. 4,48,338. Loans granted to individual fishermen during the past ten years for purchase of boats, nets, and other fishing gear: Rs. 30,00,000. Fishermen now possess more boats and nets with which they are able to catch more fish.

Government have received 341 marine engines of different H.P. valued at \$6,74,599.00 under the T.C.M. Programme of the American Government, which have been allotted to groups of fishermen on loan-cum-subsidy basis. Twine and net making plant has arrived under T.C.M. Programme. The same will be allotted to Bambal Rajya Machhimar Sahakari Sanstha.

Number of power-propelled vessels owned by fishermen: 800.

Government efforts in educating fishermen :—

Seven fisheries schools have been established in important fishing centres, imparting special training in net making, boat repairing, fish preserving, etc. Ratnagiri District 4, Thana District 1 and Surat District 2.

Adult education centres and backward class cultural centres are also conducted at important fishing centres in Saurashtra.

Annual expenditure on these schools : Rs. one lakh.

The Department of Fisheries has also a scheme to train fisher-youths in the operation of power vessels as mechanics and navigators. So far 151 apprentices have been trained, 90 under the old scheme and 61 under the modified scheme. Under a modified scheme introduced by the Government, facilities are made available to train 20 candidates in the technique of improved methods of fishing. The centre is situated at Satpatl, Thana District and is financed by the Government of India. The duration of each course is six months, the scheme having been sanctioned for three years. Each candidate is paid a monthly stipend of Rs. 50 and food allowance of Rs. 10. A similar centre has also been established at Veraval (Saurashtra).

Besides, the State Government have started a new three months training course to train fisher-youths in handling and operation of marine engines. The trainees are paid a stipend of Rs. 40 per month each. So far 52 candidates have been trained and 19 are undergoing training at present.

Two graduates of the fishing community were also sent to U.S.A. by the State Government for two years to receive training in canning, refrigeration and other specialised branches of fisheries. The scheme has now been discontinued by the Government.

Several candidates from fishermen's community have also received training aboard the Japanese trawler "Taiyo Maru" at Government expense.

Public aquaria: The State Government maintains the Taraporevala Aquarium along the Marine Drive, Bombay. The exhibits include both fresh water and marine forms, found along the coast of the State. Attached to the Aquarium is the Marine Biological Research Station where facilities are available to research students for M.Sc. and Ph.D. degrees. The institute is affiliated to the University of Bombay. It is now proposed, during the Second Five-Year Plan period, to construct one additional storey over the Aquarium building at an estimated cost of Rs. 90,000. The Marine Biological Research facilities will also be intensified by appointment of technical staff to guide research. The station will also be provided with a research vessel by conversion of the department's vessel 'Mysla'.

FRESH WATER FISHERIES

The State being primarily a maritime province stretching along the western coast, fresh water fisheries have shown comparatively less expansion. Nonetheless, efforts are made to import quick growing varieties of baby fish in the State such as *Carla* (*Carla cala*), Rohu (*Labeo rohita*) and Mrigal (*Cirrhina mrigala*) from West Bengal, for their release in perennial waters in the State in larger numbers every year. Large irrigation reservoirs also are being stocked with these varieties so that they may thrive and breed there in course of time. In 1957-58 about 29,26,000 carp fry imported from West Bengal were released in different sheets of water.

Collection of local baby fish for stocking is attempted at several places around Kolhapur, Baroda, Bhandara, etc., and efforts are made in all directions to boost up these less developed fisheries.

Despite the handicaps, income from fresh water fisheries in the State exceeds Rs. 2,00,000 per annum.

ANCILLARY PRODUCTS

A fisheries technological laboratory has been established at Sassoon Dock, for conducting research on problems relating to ancillary industries like shark liver oil, gelatine, glue, fish meal, etc. To ensure quick and clean extraction of oil a Sharple's super centrifuge, a fish liver boiler and a steam boiler have been installed. The laboratory also tests samples of shark liver oil from the public for vitamin 'A' content and also samples of dry fish and fish manure for their chemical composition. A Beckman's spectrophotometer has been imported from the U.S.A. for this purpose.

In 1956-57, the output of neat shark liver oil was 5,250 gallons with an average vitamin 'A' content of 15,000 I.U./Gm. The oil when processed, was capable of yielding 396,720 lbs. of Oleum-vitaminatum of B.P. standard. Besides this, there is the oil disposed of by the fishermen direct which will be about 2,500 gallons.

The processed products marketed by the department comprise (i) "Sharkovit" with vitamin 'A' and 'D', 1,000 and 100 I.U.s. per gramme respectively, (ii) "Elaemin Liquid", a shark liver oil concentrate with vitamins 'A' and 'D' 20,000 and 2,000 I.U.s/Gm. respectively, (iii) "Elaemin Pearls", Elaemin Liquid is offered in 3 minims capacity gelatin capsules to facilitate its use by those who do not like to take the oil in its plain form. Each capsule contains 6,000 I.U.s of vitamin 'A' and 600 I.U.s. of vitamin 'D' and (iv) Sharkomalt, Shark Liver oil with malt extract. This product contains 12,000 and 2,400 I.U.s. of vitamins A and D respectively, per fluid ounce.

Another important by-product of fisheries is fish meal. The departmental laboratory is also well-equipped for the manufacture of edible gelatin and fish glue both for adhesive as well as photo-processing work.

The following schemes were included in the State Government's first Five-Year Plan: Study of marine biology and establishment of an aquarium in Bombay; Establishment of a marine biological station at Ratnagiri; Establishment of ice and cold storage plants along the coast; Development of inland fisheries at Khopoli; Stocking of inland waters with carp fry; Provision for merged States for inland pisciculture; Higher technical training for fisher-youths abroad; Establishment of fisheries schools along the coast; Provision for merged States for training schemes.

Receipts of the department during the financial year 1956-57, are shown below :—

	Rs.
Fish curing yards	1,49,224
Fisheries Tech. Laboratory .. .	4,61,822
Other receipts	2,46,535
Taraporevala Aquarium .. .	66,651
Receipts from T. C. M. .. .	154
Receipts in Saurashtra Region .. .	2,02,094
Total	11,28,530

The State Government's share under the U.S. operational Agreement No. 5 amounts to Rs. 30 lakhs, to be utilised to procure up-to-date equipment to increase existing supplies of fish and to improve the socio-economic condition of fishermen. The equipment ordered out is as follows: 322 marine diesel engines, one 11-ton ice plant and 30-ton cold storage for fish, one quick-freezing plant and equipment to enlarge the present ice production capacity of the plant at Satpatl. Ice plant and cold storage machinery indented under the T.C.M. Programme have been received and distributed to the fisheries co-operative societies at Satpatl and Verava. One twine and net making plant has also been indented under the T.C.M. Programme, which will be allotted to one of the fisheries co-operative societies in this State. The Plant was expected to be received in 1956-57. All the engines received under the T.C.M. Programme have been allotted to fishermen of the State. The State also received for distribution among fishermen, nylon, fish

hooks and hemp twine. Additional quantity of nylon is being indented under the T.C.M. programme 1956.

FISH CURING YARDS

During 1956-57 the department maintained 36 fish curing yards of which 15 were in North Kanara District* and 21 in Ratnagiri District. As a result of the reorganisation of States in November 1956, the 15 fish curing yards in North Kanara District were transferred to the Mysore State. The department now holds charge of only 21 yards in Ratnagiri District. Improvement comprising erection of cement concrete platforms, cement superstructure thereon, copious supply of fresh water, etc. which lead to improvement in cured product, have been provided at many of the important yards in the two districts at an approximate cost of Rs. 8 lakhs. A few of the yards still need such improvement. Accordingly it is proposed to provide the aforesaid facilities in the 2nd Five-Year Plan at an approximate cost of Rs. 80,000.

The transactions at the yards in Ratnagiri District during 1956-57 were as follows:

Quantity of fish let in for curing—2,60,667 mds.

Quantity of salt issued—71,580 mds.

Quantity of cured fish removed—1,99,651 mds.

The total budget allotment for the department for the year 1956-57 was Rs. 2,56,340.

The designation of the department is: Office of the Director of Fisheries, Bombay.

KERALA STATE

Kerala State, the smallest maritime State in India with just over 300 miles of sea coast, contributes to nearly 25.28 per cent of the total sea fish landed in India. Oil Sardine (*Sardinella longiceps*) and the mackerel (*Rastrelliger canagurta*), the two most important shoaling fishes of the west coast contribute to the major fishery of the coast, the third important constituent being prawns. The main types of indigenous fishing crafts are the dug out canoes, catamarans (in the southern region) and plank built boats.

Besides being engaged in the general administration and conservation of the general fisheries, the Department is also engaged in various developmental activities such as fisheries research, establishment of cold storages, organisation of fishermen co-operative societies and financing them with loans and grants to relieve them of their debts, supply of fishery requisites, mechanisation of small fishing crafts, training of fishermen in the use of mechanised craft and tackle, construction of break-water and providing safe landing facilities, establishment of sanitary curing sheds, intensive seed collection and distribution and popularising fish culture and running departmental fish farms, etc.

The major varieties of fishes in the coast are: *Sardinella longiceps*, *S. timbriata*, *S. gibbosa*, *S. albella*, *Thriposoma* sp., *Anchoviella commersoni*, *Dussumieria hasselti*, *Kowla kowla*, *Chanos chanos* (milk fish), *Galeocerdo tigrinus*, *Carcharias melanopterus*, *C. limbatus*, *Scolecodon* sp., *Sphyræna*, *Chiloscyllum* sp., *Zygaena malleus*, *Pristes*, sp., *Trygon* sp., *Trichiurus savala*, *Pseudorhombus arsius*, *Cynoglossus cynoglossus*, *Arius jella*, *Epinephelus merra*, *E. chlorostigma*, *Serranus malabaricus*, *Therapon jarbua*, *Sillago shilama*, *Megalaspis cordyla*, *Decapterus russelli*, *D. macrostoma*, *Caranx kalla*, *C. ignobilis*, *Coryphaena hippurus*, *Lutjanus* sp., *Chorinemus* spp., *Leiognathus* spp., *Sciæna* spp., *Upeneus vittatus*, *Stromateus* spp., *Mugil* spp., *Polynemus* sp., *Auxis thazard*, *Euthynnus affinis*, *Indocybium guttatum*, *Cyblum commersoni*, *Lactarius lactarius*, *Histiophorus* sp.

The estimated landing of all fish in the State is about 210,000 tons of which 10,000 tons are contributed by freshwater fishes the rest being sea fishes. At about Rs. 250 per ton, the sea fish is valued at Rs. 5,00,00,000 whereas the freshwater fish at Rs. 400 per ton is valued at Rs. 40,00,000. Though the population of the

* Now in Mysore.

State is 1,36,00,000 only about 70 per cent of the people are estimated to be fish eaters. At the most only 50 per cent of the total production is utilised for domestic consumption, whereas the balance is exported out of the State and out of India, either in the fresh condition or as cured fish. This includes nearly 3,000 tons of Prawn Pulp exported to Burma and Singapore and nearly 450 tons of frozen shrimp lobster to U.S.A. Except for a small quantity of foreign tinned product imported to the State, there is absolutely no import of fish into the State.

There are nearly 85,000 active fishermen in the State. Along the coast there are 68 fish curing yards, some of which are provided with fly-proof, sanitary fish curing sheds, and salt is issued at a subsidised rate which is less than the cost price in the salt factories. There are two Fishermen Training Centres one at Ernakulam and the other at Beypore, to train able bodied fishermen in the use of mechanised fishing craft and modern fishing. Soft wood for making boats, Nylon and Fishing hooks, etc. are distributed at concessional rates through the 199 Fishermen Co-operative Societies. Trained fishermen are given capital and equipment to start co-operative fishing with mechanised units.

The Indo-Norwegian Fisheries Project near Quilon is engaged in the mechanisation of small fishing crafts and in the exploitation of the fisheries' resources of the sea off Kerala. They have also established a Health Centre and a Pipe Factory under the scheme of improving the health and sanitation of the area. There are five private companies exporting frozen shrimps, lobster tails and frog legs, and cold storage plants are working at Trivandrum, Neendakara, Cochin and Kozhikode.

There are 4 Fisheries Research Stations in the State engaged in Marine, Estuarine and Fresh Water fisheries and a Fisheries Technological Station conducting researches in fisheries by-product.

MADRAS

Madras State, with a coast line of 600 miles and with about 4 lakhs acres of inland waters, is rich in fisheries resources. The Fisheries Department, established in 1907 has a comprehensive programme based on a policy of survey of fishing areas, initiation and co-ordination of research, conservation, development and exploitation of fisheries, provision of efficient and modern craft and tackle, organisation of the fish trade on proper lines and improvement in the socio-economic condition of fishermen. Considerable progress in all directions has been achieved by the Department during its existence of over five decades.

The Fisheries Department is under the administrative control of the Additional Director of Industries and Commerce, who is assisted in all technical matters by two Deputy Directors in charge of marine and inland fisheries activities respectively. The fisheries in the districts are managed by six Regional Assistant Directors with headquarters at Vellore, Mettur Dam, Tanjavoor, Madurai, Tuticorin and Nagercoil. These Asst. Directors have Inspectors and Assistant Inspectors in the taluks. There are four marine biological stations at Ennore, Krusadal Island, Tuticorin and Cape Comorin; a Technological Station at Tuticorin; and a Freshwater Biological Station at Bhavanisagar, in-charge of qualified research officers. At Madras there is a Fisheries Marketing and Information Officer for promoting fish-trade and for dissemination of information. The Aquarium and Museum maintained by this unit are popular with the public. There is a Craft and Tackle Officer for popularisation of mechanised fishing.

There are 244 coastal fishing villages with a total fishing population of 2,40,000. These fishermen possess about 5,000 boats, 23,000 catamarans, and 3 lakhs of fishing nets. The estimated landings of sea fish in 1956-57 is about 60,000 tons as detailed below, their total value being Rs. 504 lakhs.

Ribbon fish 16,800 tons; Cat-fishes 13,200 tons; Sharks 4,200 tons; Sabre-fish 7,200 tons; Big Jawed jumper 4,800 tons; Sardines 4,800 tons; Flying fish 1,200 tons; White baits 3,000 tons; Perches 3,000 tons; Miscellaneous forms 1,800 tons.

There are about 60,000 inland fisher-folk possessing about 20,000 implements. The estimated landings of inland fish from the various inland waters in 1956-57 is about 38,000 as detailed below, their total value being Rs. 226 lakhs.

Carps 13,510 tons; Cat-fishes 7,720 tons; Murrels 4,632 tons; Eels 772 tons; Gobius 386 tons; Mullet 1,930 tons; Chanos 386 tons; Lates & Polynemus 1,158 tons; Hilsa 386 tons; Prawns 3,088 tons; Other Miscellaneous 4,632 tons.

The average wholesale and retail price of the important varieties of fish are as follows: The first figure indicates the wholesale price for 100 lbs. and the second the retail price per lb.

Freshwater Carps (Rs. 36; 34 Naye Paise); Freshwater Catfish (Rs. 38; 41 nP.); Freshwater Prawns (Rs. 46; 62 nP.); Sea Catfish (Rs. 35; 44 nP.); Sea Prawns (Rs. 46; 75 nP.); Sea Mackerel (Rs. 35; 34 nP.); Sea Pomfret (Rs. 58; 87 nP.); Sea Seer (Rs. 63; 94 nP.); Sea Perches (Rs. 41; 47 nP.); Indian Salmon (Rs. 40; 45 nP.).

17 fish curing yards are maintained by the Government wherein good quality salt is supplied to fisher folk at subsidised rates for curing fish under the technical supervision of fisheries departmental staff. Two Ice Plants of 5 tons daily output and storage facilities for 15 tons are under construction at Tuticorin and Mettur dam.

There are 168 fishermen co-operative societies with about 18,000 members on their rolls with a paid up share capital of Rs. 1,55,000. These societies play an important role in the improvement of the economic conditions of the fisher-folk. They issue small loans to the members during the off season; and also inculcate the spirit of thrift and co-operation among the fisher-folk. Long term loans are issued to these societies by Government for enabling their members to redeem themselves of their prior debts and to undertake fish marketing themselves. Four District federations of fishermen co-operatives have also been formed for organising fish marketing on a larger scale.

Through exploratory fishing operations, the fisheries department has located rich deep sea fishing grounds off Pulicat, Ennore, Madras, Cuddalore, Nagapattinam, Pamban, Tuticorin, and Cape Comorin, and arrangements are being made for their commercial exploitation. 31 small mechanised boats have already been distributed to fishermen co-operatives together with nylon fishing nets.

The pearl and chank fisheries of the Gulf of Mannar are State monopolies, and yield a substantial revenue besides supporting a large population of divers. The pearl fishery conducted off Tuticorin in March-May 1957 fetched 1.2 crores of pearl oysters, and a revenue of Rs. 1.7 lakhs was realised by the Department by sale of its two-thirds share of the oysters. During 1956-57, about 12 lakhs of chanks valued at about 14 lakhs rupees were fished.

Census of Inland Fisherfolk for 1954:

Men engaged in actual fishing	..	12,745
Men engaged in part-time fishing	..	2,099
Number of women and children	..	29,500
Total	..	44,344

Schools have been opened for fisherchildren. Natural Science and Fisheries Science play a large part in their curriculum. The children are taught handicrafts like coir rope making, mat weaving, net making, etc. Books, pencils and stationery articles are given free to these children.

Officers of the department and teachers of Fisheries schools have done a great deal to improve the standard of life of the children.

There are a museum and an aquarium belonging to the department. In the Museum, preserved specimens of all important marine and freshwater fishes, various kinds of sharks, aquatic curios like sepia, loligo, sea horse, etc. are all exhibited. The Aquarium has eight large aquaria in which Tropical Aquarium Fishes like Gold Fish, Black Mollies, Sword Tails, Guppies, Blue Gourami and Food fishes like Catla, Labao, Cirrhina, Gourami, etc. are kept. Most important experimental fish farms are Mettur Fish Farm, Poondi Fish Farm, Thanthipandal Fish Farm, Chetput Fish Farm, Vellore Fort Moat Farm and Chingleput Fort Moat Farm. The ponds in the farms and other ponds belonging to the department are intensively stocked with quick growing fishes every year and the catches are marketed to the public.

In addition to being an important source of food supply rich in proteins and albumenoides, food fishes play an important part in the manufacture of several bye-products in use in the everyday life. They are fish-oil (body oil and liver oil), shagren, isinglass, fish glue, fish meal (guano), fin soup, pearl essence, fish manure, etc.

Under the Second Five Year Plan, 15 schemes with a total outlay of Rs. 84.74 lakhs are being implemented, with the following main objectives in view: (i) To develop inland, estuarine and off-shore and deep sea fishing, to improve fishing techniques and technology and to promote fisheries research; (ii) to provide fishermen with modern craft and tackle at subsidised rates and under the hire-purchase system and to provide other equipment like nylon nets, hooks and other facilities like fishing harbours; (iii) to provide fishermen with long-term credit facilities through Fishermen Co-operative Societies in order to extricate them from the clutches of traders and middlemen, to whom they are indebted; (iv) to provide them and their womenfolk with profitable employment; (v) to improve communications to the fishing hamlets and to provide all facilities for proper preservation and better marketing of their catches; and (vi) to assist them to form themselves into co-operative bodies in order that they may get better credit and trading facilities and thus reap the full benefits of their labours.

The schemes are (i) Intensive seed collection and distribution for stocking inland waters; (ii) Rural Fishery Demonstration; (iii) Development and exploitation of major reservoir fisheries; (iv) Establishment of model estuarine fish farm; (v) Improvement of fishing crafts; (vi) Development of fishing harbours at suitable river mouths; (vii) Supply of Nylon nets and hooks to fishermen; (viii) Co-operative societies for marketing of fish; (ix) Training of personnel; (x) Fish meal and fish manure production; (xi) Quick transport of fish from landing centres to marketing and consuming centres; (xii) Salt Subsidy Scheme; (xiii) Fish preservation: Provision of ice plant and cold storage facilities; (xiv) Fish Marketing and (xv) Administrative staff at Headquarters.

Revenue from Fisheries in 1956-57: Rs. 25.85 lakhs; expenditure in 1956-57: Rs. 33.7 lakhs.

Latest Budget Allotment for the Department for 1956-57: Rs. 30,00,000.

The designation of the department is: Government Fisheries Department, Madras.

MYSORE

The facts given below refer to the post-reorganization Mysore State.

Inland Fisheries: There are about 30,000 minor tanks and 4,000 major tanks in the State. The important rivers are: Thunga, Bhadra, Thunga-bhadra, Cauvery, Hemavathi, Laxmanathirtha, Vedavathi, Varada, Palar, Pennar, Sharavathi, Bheema, Krishna, Manjara, Don, Ghattaprabha, Mallaprabha, Chandragiri, Netravathi, Swarna and Seetha Nadi, comprising a total of over 3,000 miles. There are nearly 20 big reservoirs formed across the above rivers.

Inland Fisheries are developed only in selected areas of the State. There are 10 fishery divisions, 12 fish farms, 3 deep water fishing units and 20 fish seed collecting centres. The revenue from Inland Fisheries is approximately Rs. 50,000.

Marine Fisheries: Mysore State has 200 miles of coast line on the Arabian Sea. All along this sea board, there are many fishing villages, the most important of them being Karwar, Ankola, Kumta, Honnawar, Bhatkal, Majali, Bingi, Chandia, Gangoli, Malpe, Udyawar, Bukkapatnam and Mangalore.

Nearly 40 varieties of sea fishes are landed out of which the most important are Sardine,

No. plying the trade :

	No. of Fishermen.	No. of dependents on fishing industry.	No. of boats.	No. of nets.
North Kanara	7,132	25,000	3,600	—
South Kanara	12,096	57,000	6,700	18,900
Total	19,228	80,000	10,300	18,900*

Average catch per fisherman per annum :—North Kanara : 2.77 tons; South Kanara : 3.00 tons.

Total annual internal consumption :—North Kanara : 7,200 tons; South Kanara : 15,000 tons.

Marketing facilities: North Kanara : Fish is transported to Bombay after icing in carrier launches. Surplus fish is dried and cured in fish curing yards. Steps are being taken to establish ice and cold storage facilities at important coastal centres.

South Kanara : Fish is sold in local markets and also transported to interior markets in lorries and sold there in fresh condition. There is an ice factory-cum-cold storage plant of 60 tons capacity in Mangalore. Steps are being taken to establish ice and cold storage facilities at important coastal centres. Deep freezers for keeping the surplus properly preserved are being installed at the important inland markets. The present fish market at Mangalore is being modernised. Fresh fish trade is being extended to Mercara, Mysore, Mandya, etc.

Capital value of the industry together for North and South Kanara districts is estimated at Rs. 15,00,000.

No. of fish curing yards :—North Kanara : 15; South Kanara : 15.

Process of modernisation (South Kanara): Mechanisation of boats for powered fishing is taken up as also ice plants and refrigerated storage facilities are being provided. It was expected that by the close of 1967-68 there could be about 12 mechanised boats operating in coastal waters in addition to three T.C.M. power-boats.

SUBSIDIARY INDUSTRIES ESTABLISHED AND THE SCOPE FOR DEVELOPMENT:

	Fish-meal plants.	Fish oil factories.
North Kanara	—	3
South Kanara	1	13
Total	1	16

AMENITIES TO FISHERMEN

1 Mysore State : Fishermen Co-operative Societies, 52; Subscribed capital, Rs. 4.00 lakhs; Number of fishery schools, 26.

Mackerel, Seer and Sharks. The total fish production on Mysore coast is 1/10 of the total marine fish landings in India.

Thus, the marine fisheries confined to the districts of North and South Kanara can be regarded as one of the richest in the whole of India.

Quantity of fish in tons and the approximate value :—North Kanara : 20,000; Rs. 44,80,000; South Kanara : 80,000; Rs. 66,00,000.

Value of fish exported :—North Kanara : Rs. 38,20,000; South Kanara : Rs. 45,00,000.

Steps are being taken to explore the prawn fishing grounds north of Mangalore.

In order to cope up with the expanded programme of fishery development of the State, a separate department has been set up with the Director of Fisheries as its head with headquarters at Bangalore.

ORISSA

Kinds of sea-fish caught : Pomfrets, Mackerel, Ribbon fish, Silver bellies, Sardine and White Bait. Kinds of river fish caught : Labio Rohita, Catla Catla, Cirrhina, Mrigala, Labio kalbasu and other Carps and Cat fishes.

Annual production of Shark Liver Oil : 1950-51 (3,000 lb.); 1951-52 (6,730 lb.); 1952-53 (7,658 lb.); 1953-54 (10,718 lb.); 1954-55 (6,587 lb.); 1955-56 (11,681 lb.); 1956-57 (1,449 lb.).

Average price per maund of sea-fish in pre-war years : Between Rs. 5 and Rs. 10. Present price per maund of lower varieties : Between Rs. 10 and Rs. 20. Wholesale price per maund of good fish like Pomfrets : Between Rs. 35 and Rs. 65. Wholesale price per maund of higher varieties of river fish : Between Rs. 65 and Rs. 100. Price of smaller fish : Between Rs. 30 and Rs. 60; Small prawns : Between Rs. 10 and Rs. 20; Large prawns : Between Rs. 45 and Rs. 60.

Important marine fishing villages : Patisonapur, Markandi, Gopalpur, Payagi, Sonapur, Suria, Aryapalli, Kandarapalli, Gajapatinagar, Purnabandha, Damodarpur, Rambha, Channuhani and Arkhakuda.

Important assembly centres in the Chilka lake : Kaluparaghat, Rambha, Balugaon, Gangadharapur, Kihuri, Chhatrapur and Khalikota.

Important assembly centres in Mahanadi estuary : Kujang.

Important assembly centres in Dhamra estuary : Chandripal.

Important inland fishing centres : Ansupa lake, Russelkonda reservoir and Kausalya-ganga.

Number of fish curing yards run by the fishermen's own co-operative stores : 6. Number of ice factories which cater to preservation of fish for transport to Calcutta and elsewhere : 6. Co-operative marketing has developed in the Chilka area. The annual volume of trade ranges between Rs. 25 to Rs. 40 lakhs.

There is considerable demand for fish in the urban markets unlike the interior where it is very much less on account of lack of purchasing power.

The demand is approximately 100 times more than the supply.

There are no deep-sea fishing companies in the State.

The State has not taken up deep-sea fishing. There are no fishermen's schools.

There is a small experimental aquarium attached to the Fisheries Department in Cuttack.

Fresh water biological stations have been established at Kausalyagang, District Puri, Kikani (Cuttack), Humari (Ganjam), Angul, Jeypore, Kathpal (Mayurbhanj).

Major experimental farms in the State : Cuttack fish farm; Puri fish farm; Chowdwar fish farm; Sonepur; Sambalpur; Balasore; Kausalyagang; Angul; Baudh; Jajpur; Belguntha.

Shark liver oil industry has developed recently. Annual production : 1952-53—2,240 lb. crude oil; 1953-54—12,000 lb. crude oil; 1954-55—4,082 lb.; 1956-57—3,700 lb.

Research is going on in the manufacture of agar agar and hydrolysed protein.

Schemes under the revised first Five-Year Plan : Development of Inland Fisheries; Reclamation of swamps to relieve unemployment; Scheme for utilisation of T.C.A. Equipment; Reorganisation of the Fishery Department; Development of Inland Fishery; Biological and Technological Investigation of the Chilka Lake Fisheries; Development of Mahanadi Estuary; Development of Marine Fishery. Such of these schemes as have not been completed would continue during the second Five-Year Plan period. Besides these, the following are the schemes under the second Five-Year Plan : Development of fish seed centres; model fish farms; research in fresh water biology and technology; marine farms; power fishing experiments in the sea, estuaries and inland waters; research in technology.

Second Five-Year Plan provision 1956-61 : Rs. 52.25 lakhs.

Income from Fisheries Department ranges between Rs. 1.5 and 2.2 lakhs per annum which does not include rent for water areas.

Budget allotment : 1957-58 : Rs. 18.12 lakhs.

A separate Directorate of Fisheries was created in 1955.

THE PUNJAB

Kinds of fish caught : Goonch (Bagarina), Boohwa (Chuplosma Garna), Silund (Silomia alondia), Mullae (Wallagonia attu), Nalakhli (Heteroponustas fossilis), Singhari (Mystus aor), Khaga (Rita rita), Kalbons (Laboe calbasu), Rahu (Laboe Rohita), Gid (Laboe displotomus), Bhangon (Laboe microphthalmus), Mori (Cirrhina mirgala), Sunni (Cirrhina rabe), Thalla (Catla Catla), Kharni (Barbus sarana), Mahseer (Barbus pulitora), Ohliwa (Barilius modestus), Pari (Notopterus chitalar), Saul (Ophicephalus Marulius), Daula (Ophicephalus punctatus).

Total quantity of fish caught in former Punjab upto Aug. 1956 was over 916 maunds. This fetched an income to the State of about Rs. 6,000.

In the first ten days of Sept. 1956 all the public waters of the former Punjab were put to public auction. This brought an income of Rs. 1,09,700.

The total income from the former PEPSU during 1956-57 was about Rs. 45,478.

Price level : Prices vary from market to market. In some markets prices are fairly high. On the whole prices ranged for wholesale about as. 12 per seer; Retail at Rs. 1 per seer.

The demand for fish in the local market is very low, the population being mostly vegetarian.

After meeting the local demand the fish is exported to Delhi and U.P. where it finds a ready market.

* Exclusive of North Kanara for which figures are not available.

There are no sea fisheries. There are no companies engaged in exploring and exploiting the fisheries of the State.

The catching and marketing of fish under the supervision of the departmental staff has been abandoned in the old Punjab. The fishing rights in public waters are now regulated by means of public auction on yearly basis preference being given to organised fishermen's co-operative societies.

This system was already in operation in the PEPSU area.

There are no facilities available for canning, storage and refrigeration. The party or the individual holding the contract for fishing rights of public waters in a particular district is bound to set up a fish sale shop at the district headquarters. Permits for export of fish outside the district are however issued by the Warden of Fisheries, Punjab, or by an officer specifically authorised by him in this behalf where the local consumption of fish is very low. No trawlers are used; only primitive methods of fishing by nets are used.

There is no school in this State for educating the fishermen and their children for improved and up-to-date methods of fishing.

Public museums and experimental farms in the State: Government Fish Farm, Batala (District Gurdaspur).

There are no industries for fish products in this State.

There are four organised Fishermen's Co-operative Societies functioning in this State. The fishermen are being persuaded to organise more such societies. In order to improve their socio-economic conditions, a scheme for the grant of interest-free loans to Fishermen's Co-operative Societies has been included in the Second Five-Year Plan so that the fishermen may be able to conduct their catching and marketing on co-operative basis and get the whole profit.

There are four schemes relating to Fisheries which have been included in the Second Five-Year Plan of the Integrated State of Punjab. Their details are as under:

Name of the Scheme.	Expenditure during the plan period (Rs. in thousands).
1. Scheme for the expansion of the development of fish by stocking with fish seed a large number of impounded waters.	261
2. Scheme for the provision of cold storage arrangements at three important fish consuming centres in the Punjab.	197
3. Scheme for the grant of interest-free loans to Fishermen's Co-operative Societies for co-operative marketing of fish.	60
4. Fisheries Development Scheme. (This is according to the plan of the erstwhile PEPSU State).	600

Revenue from Fisheries during 1956-57: Rs. 1,62,361-9.

Budget allotment for the department (1957-58) as a whole: Rs. 66 lakhs approximately including Rs. 3,54,470 for fisheries section.

Fisheries Department in the Punjab is attached to the Animal Husbandry Department under the control of the Head of the Department who is designated as Director, Animal Husbandry and Warden of Fisheries, Punjab.

UTTAR PRADESH

Kinds of freshwater fish caught:

In plains: (i) Major carps like Labao Rohita, Labao Calbasu, Cirrhina Mirgala, Catla Catla, Labao Gonius, (ii) Small carps, (iii) Minnows, (iv) Cat fishes, (v) Mulletts, (vi) Spiny eels, (vii) Feather backs, (viii) Glass fishes.

In hills: (i) Kumaon Mahaseer, (ii) Hill Trout, (iii) Asela, (iv) Khurant, (v) Discognathus, (vi) Oreinus.

The State also imported an exotic variety of fish viz. Mirror Carp for culture in Uttar Pradesh hills.

Total quantity of freshwater fish caught (1944): 241,304 mds.

Total value of freshwater fish caught in 1956-57: The Department is concerned only with waters placed under its management. The value realised from such waters during 1956-57 was Rs. 2,71,444.

Price level of the fish during April 1956 to March 1957:

Varities	Average wholesale price per maund	Average retail price per seer
	Rs.	Rs. a.
Rohu	38	1 8
Nain	37	1 6
Bhakur	34	1 7
Calbose	35	1 5
Parhin	24	1 0
Tengan	29	1 1

Approximate strength of the fishing population: Latest figures available are for 1944: about 10,695 families.

Facilities available for curing, storage and refrigeration, co-operative marketing: Generally fresh fish arrive in the markets and curing is rarely resorted to. Gorakhpur, Basti, Kanpur, Lucknow and Dehra Dun are some of the fish markets where there are some arrivals of dried and salted fish.

During the second Five-Year Plan stress is laid on inducing fishermen of the State to take up pisciculture as a cottage industry by organising them in co-operative societies. In order to release them from the clutches of the middlemen, provision has been made to assist 114 such parties during the plan period to give them grant-in-aid to the tune of Rs. 10,000 per party for purchase of modern fishing paraphernalia and improvement of their fishing areas, nursery ponds, stocking tanks, etc. The Department will also arrange to supply fish seed to these parties for stocking their tanks at a subsidised rate of Rs. 4 per 1,000. Besides, cold storage facilities at low rentals to preserve their produce will also be provided to fishermen by installing plants in the fish markets one each at Kanpur, Lucknow, Allahabad and Banaras. The plant at Allahabad is nearing completion.

Potential demand for fish in the local markets is such that a major portion of the fish production in the State is exported by the fish traders to

more lucrative markets outside the State such as Calcutta, Delhi, etc. To satisfy the demand, the Tank Stocking and Development Scheme as part of Government of India's 'Grow More Food Campaign' was launched in the State in 1944-45.

It has been decided by the Government to restrict the departmental activities to large sheets of waters and to set aside the small village ponds easy to manage for private enterprise.

Nearly 4,274 acres were stocked during 1956-57. Besides, the stocking of reservoirs, large sheets of water, viz. Pabuj (1,372 acres), Barwar (2,485 acres) in Jhansi, Kitham (640 acres) in Agra, Kondar Tal (375 acres) in Gonda, Nankucha Tal (480 acres) and Bhim Tal (480 acres) in Nant, Alwara Jheel (60 acres) in Allahabad, Kampur Narwi Jheel (100 acres) in Kanpur, Darigun Jheel (220 acres) in Etah, Bata Dabri (50 acres) in Shahjahanpur, Chaunki Jheel (50 acres), Chandapur Jheel (50 acres) and Ramya Bihar (200 acres) in Kheri was also undertaken.

Government effort in up-to-date fishing technique, money spent, trawlers, gears used, quantity of fish caught: A provision of Rs. 15,000 has been made in the budget allotment of 1957-58 to further equip each of the five circles in the State with adequate fishing paraphernalia. A fishing vessel at a value of \$2,879 has also been imported for use in fishing of the canal reservoirs at Jhansi. Besides, two more motor boats at a total cost of Rs. 20,000, were expected to be purchased during 1957-58. Eradication of aquatic vegetation both emergent and submerged, is receiving active attention of the department and the results so far achieved are satisfactory.

Government effort in educating fishermen: Training is imparted in the State at Banaras.

Public museums, aquaria, experimental farms in the State: A small museum exists in the Central Fisheries Research Laboratory, Badshahbagh, Lucknow where all possible fish species available in the State have been displayed. An aquarium room in the Laboratory is also being fitted up. An aquarium is under construction at the Prince of Wales Zoological Garden, Lucknow.

There are two Government experimental farms in the State—one at Bhowali, District Naini Tal, where an exotic fish, viz. Mirror Carp is kept for breeding and the other is at Mirzapur where problems which confront the growth of fishes in land-locked waters are studied.

Schemes under first Plan: (i) Research Fish Farm, Mirzapur; (ii) Revival or permanent posts of Fish Marketing Officer and Fisheries Inspectors of Lucknow Circle; (iii) Replacement of vehicles for Fisheries Section; (iv) Rentals for fry and fingerlings collection; (v) Construction of special transportation tanks for road and air transport of fry and fingerlings to reduce mortality; (vi) Development of Fisheries in Canal Reservoirs.

Schemes under the second Five Year Plan: (i) Establishment of Fisheries Co-ordination and Supervision Section at the Headquarters of Director of Animal Husbandry, U.P., (ii) Intensification of piscicultural activities with a view to augmenting fish production, (iii) Establishment of five demonstration farms with requisite nurseries, (iv) Rentals of nurseries for rearing fry and fingerlings, (v) Improvement of fish nurseries and renovation of two trout hatcheries in U.P. hills, (vi) Improvement and maintenance of tanks, (vii) Help to fishermen co-operatives and private pisciculturists, (viii) Extension and development of fisheries in Tarai State Farm, (ix) Provision of cold storage facilities in the fish markets at Kanpur, Lucknow, Allahabad and Banaras.

Revenue from Fisheries during 1956-57: Rs. 2,71,444.

Latest budget allotment for the Department (1957-58):

	Rs.
(a) Direction	35,400
(b) Research	98,000
(c) Tank Stocking and Development Scheme	4,20,300
(d) Works	1,000
(e) Provision for 9 planned schemes	12,20,000
Total	17,74,000

The designation of the Fisheries Department: Department of Animal Husbandry and Fisheries, Uttar Pradesh, Lucknow.

WEST BENGAL

Kinds of sea fish caught: Pomfret, Bhetki, Mackerel, Prawn, Topoi, Hilsa, Chanda, Bhola, Bombay Duck, Ribbon, Shark, Reyn, Skate, Eel, Cat fish, Phasa, etc.

Total quantity of sea fish caught in 1956-57: 12,357 mds.

Total value of the sea fish caught in 1956-57: Rs. 1,56,446.

Price per maund of different kinds of fish in March 1957:

Varieties	Maximum	Minimum	Average
	Rs.	Rs.	Rs. s. p.
Carpa ..	110	45	76 6 3
Hilsa ..	70	40	51 10 0
Bhetki ..	110	60	84 13 0
Mullet ..	100	55	76 15 0
Butter ..	95	20	54 5 6
Lobster ..	115	60	87 5 9
Shrimp ..	85	10	48 11 0

Approximate strength of the fishing population: 96,400 (1951).

Potential demand for fish in the local market: In West Bengal (27,647 mds.); In Calcutta (5,561 mds.).

Extent to which production meets this demand: Seven per cent.

Money spent by Government in connection with fishing in 1956-57: Rs. 1,21,000.

Gears used: Haddock trawl, Prawn trawl, Herring trawl, etc., all made of cotton twines.

There is one experimental fish farm in sewage fed water maintained by the State Government. There are demonstration fish farms in private parties' tanks in each Thana of the State.

Ancillary industries like liver oil, gelatin, glue, fish-meal, and their production: One Scheme for production of shark liver oil, fish-meal, processed fish and utilisation of other fish by-products is operated at Contal coast.

Production during 1956-1957:

Shark liver oil—4,976 lb.; Fish-meal—16,221 lb.; Dry fish—747 lb.; Fresh fish—15,050 lb.

Approximate Revenue from fisheries during 1956-57: Rs. 7,75,295.

Budget allotment for the Department for 1957-58: Rs. 32,01,000.

The designation of the Fisheries Department: Directorate of Fisheries, West Bengal under the administrative control of Fisheries Department and Development Department, the latter controlling the sea fishing scheme only.

IRRIGATION

THE net area under irrigation in India during 1954-55 was 54.4 million acres and the gross area 60.7 million acres. This is the second largest irrigated area in any country of the world, the largest being in China.

The total capacity of India's canals is over 220,000 cusecs, and the canals are over 67,500 miles in length.

The total amount of annual flow of water in the Indian Union is 1,355 million acre feet. Of this only 76 million acre feet or 5.6 per cent are at present being used for irrigation purposes.

The following are some of the more important projects under construction: Bhakra-Nangal Project (Punjab), Damodar Valley Project (Bihar and West Bengal), Hirakud Dam Project (Orissa), Tungabhadra Project (Andhra, Mysore), Gangapur Storage Project (Bombay), Kakrapar Project (Bombay), Godavary Project, Stage I (Andhra), Ghatprabha Valley Project, Stage I, Left Bank Canal (Mysore), Kosi Project (Bihar), Koyana Hydro-electric Project (Bombay), Rihand Dam (U.P.), Nagarjuna Sagar Project (Andhra),

Chambal Project, Stage I (Madhya Pradesh and Rajasthan).

The following are the different measures, which are envisaged and the extent to which, on the first estimates which have been framed, additional production may be secured from each of them.

	Additional Production (million tons)
Major irrigation	2.4
Minor irrigation	1.8
Fertilisers and manures	2.5
Improved seeds	1.0
Land reclamation and land development	0.8
General improvements in agricultural practices	1.5
Total	10.0

The statement below shows the distribution in terms of total cost and outlay, during the First Plan, of irrigation and power projects (excluding flood-control schemes).

Cost	Number of Projects	Total estimated cost (Rs. crores)	Total outlay (Rs. crores)
1. Rs. 30 crores and above	9	623	233
2. Between Rs. 10 crores and Rs. 30 crores	10	172	77
3. Between Rs. 5 crores and Rs. 10 crores	9	64	26
4. Between Rs. 1 crore and Rs. 5 crores	103	256	154
5. Less than Rs. 1 crore	337	135	79
Total	468	1,250	569

Classing a year in which the deficiency is 25 per cent. as a dry year and one in which it is 40 per cent. as a year of severe drought the examination of past statistics shows that, over the precarious area, one year in five may be expected to be a dry year and one in ten a year of severe drought. It is largely in order to remove the menace of these years that the great irrigation systems in parts of the country have been constructed.

In the arid tracts where the annual rainfall is less than 15 inches, no cultivation is normally possible without irrigation.

In India today we have a vast network of canals in Uttar Pradesh, the Punjab, the deltaic area of Madras and some parts of Bihar. There are about 120 high dams distributed mainly in Bombay, Uttar Pradesh, Madhya Pradesh and southern India. The number of tanks is about 23,000 in Madras and over 25,000 in Mysore State.

PLAN PROJECTS

Two hundred and twenty-nine major and medium schemes costing Rs. 720 crores were included in the First Five-Year Plan. Good progress has been made on these schemes and a good number of them have been completed, the total expenditure incurred to the end of the First Five-Year Plan being about Rs. 420 crores. These projects brought under irrigation an area of approximately 4 million acres by March 1956, and are expected to irrigate 22.28 million acres on full development.

In the Second Five-Year Plan, about 210 schemes costing about Rs. 452 crores will be taken up. These are expected to irrigate about 16.60 million acres of land on full development.

A provision of Rs. 486 crores has been made in the Second Plan for irrigation and flood control.

The projects are mostly being executed by the State Governments.

The most important of these under actual construction include:—

Bhadra Project (Mysore):—This is one of the biggest irrigation and multi-purpose projects undertaken by the State. The scheme includes the construction of a reservoir on the river Bhadra at Lakkavalli (Shimoga District) with a storage capacity of 61,250 c.ft. to irrigate 2,34,200 acres of land in the dry taluks of Shimoga, Chitaldurg and Bellary districts and to generate electric power to the extent of 41,040 KW at the dam site. Two channels take off from the reservoir on each bank and the right bank channel has to be taken in a tunnel, three miles in length, across the Urbani Range of hills before it enters Sulekere valley which commands vast fertile lands in the taluks of Harihar and Davangere. When completed, this will perhaps be the longest irrigation tunnel in India.

The cost of the project is estimated at about Rs. 25 crores and the work is expected to be completed by 1961. According to the schedule, water has already been made available to an extent of nearly 20,000 acres of land. The project was actually started on a small scale in 1947 and so far about Rs. 9 crores have been spent.

Bhakra-Nangal Project (Punjab): The Bhakra-Nangal project in the Punjab comprises two big dams—The Bhakra Dam and the Nangal Dam, about 70 miles north of Chandigarh—a vast network of canals, four power houses and 7,072 miles of electric transmission lines and 3,541 distribution sub-stations.

It is the largest multi-purpose river valley scheme under construction in India.

The project is expected to irrigate over nine million acres and build up an ultimate power

potential of 10,44,000 kW. The States that will benefit are the Punjab, Rajasthan, Himachal Pradesh and Delhi. According to estimates made in 1955 the project is estimated to cost Rs. 174 crores, and will be completed by March 1960. According to the estimates made in 1946 it was to cost Rs. 75 crores.

The project will irrigate 4.8 mln. acres in the Punjab, and nine lakh acres in Rajasthan. It will also improve irrigation in another 8.5 mln. acres.

The Nangal Dam, the Canal Regulator, the Nangal Hydel Channel, two power houses Ganguwal and Kotla, and the Bhakra canals have already been completed.

The Ganguwal Power House with a capacity of 48,000 kW. was opened on 2nd Jan. 1955. The Kotla Power House also with a capacity of 48,000 kW. was commissioned on 9th June 1956.

The increase in foodgrains as a result of the extra irrigation facilities is expected to be 1.13 million tons a year. Other additional yields that will accrue from the project are: fodders 60,28,161 tons, sugarcane 1,48,201 tons, cotton 4,67,082 tons, rice 31,337 tons, groundnuts 5,021 tons, foodgrains 5,09,408 tons, oilseeds 31,086 tons.

The Bhakra-Nangal is the biggest of the multi-purpose projects in India.

Some details are given below:

The principal feature of the project is the construction of a dam about 760 feet high on the river Sutlej near the village of Bhakra about 50 miles upstream of Rupar Town in the Ambala District. The total storage capacity of the reservoir is estimated to be 7.40 million acre feet, of which 5.73 million acre feet will be available for use. The reservoir will extend to about 55 miles above the dam spread over an area of 64 sq. miles.

The dam will be the highest straight gravity type in concrete in the world.

Bhakra Dam: Height 760 feet; Length at bottom 325 feet; Width at top 30 feet; Length at top 1,700 feet; Width of dam at bottom including apron 670 feet; Width at bottom including apron and heel claystone 1,320 feet. Bhakra Reservoir: Total storage capacity 7.4 million acre feet; Live storage capacity 5.73 million acre feet; Length of reservoir 65 miles; Area submerged 42,500 acres; Population to be displaced 80,000; No. of villages to be submerged or partly submerged 866; Total quantity of excavation 14,77,00,000 cubic feet; total quantity of concrete for dam and appurtenant works 14,31,00,000 cubic feet; cost of Dam Rs. 65,91,00,000.

During the construction of the dam, the waters of the Sutlej are being diverted through two 50-foot diameter tunnels, one on each side. The length of the two tunnels is about one mile. Cofferdams upstream and downstream of the working area have been completed and the river has been diverted through the tunnels.

About eight miles downstream of Bhakra Dam site, Nangal Dam on the river Sutlej has been completed.

Nangal Dam: Height 95 feet; No. of bays 26 of 30 feet span each; Distance between abutments 955 feet; Nangal-Bhakra Canal System: Length of Main Line and Branches 660 miles Length of Distributaries 2,100 miles.

This dam will serve firstly to divert the requisite supplies from the river for the Nangal Hydel Canal, secondly to provide storage to smoothen the fluctuations in supplies due to load variations in Bhakra Power Plant. The Nangal Canal takes off from the left bank of the river Sutlej at Nangal Headworks. It is a lined canal about 40 miles long with a maximum capacity of about 14,500 cusecs, for the first 9,700 feet of its length and 12,000 cusecs thereafter.

The Bhakra Canal system, which was inaugurated by the Prime Minister on July 8, 1954, consists of 690 miles of Main Canals and Branches and 2,100 miles distributaries. The Nangal Hydel Canal, passes through a sub-mountainous terrain full of deep ravines and hill torrents. The work on it involved construction of 58 cross drainages and 84 bridges. It is lined with concrete and tiles throughout its length of 40 miles and has cost Rs. 11 crores.

The Bhakra electricity transmission system would consist of 2,267 miles of high tension lines ranging from 33 K.Vs. to 220 K.Vs. Apart from this, there will be 800 miles of 11 K.V. lines. Greater stress would be laid on rural electrification as it would step up agricultural production by energising tube-wells. About 5,000 villages will be electrified by the end of the Second Five-Year Plan.

Full benefits of the Project will be available on its completion in 1960. However, schedules have been so arranged as to bring some measure of these benefits as each step of construction is completed. Kharif irrigation was provided to over 3 lakh acres in the Punjab with effect from July 1954; 24,000 kW. of additional electricity became available with the commissioning of the Gangwal Power House in January 1955.

Upto 1955 March Rs. 8,829 lakhs were spent on the Bhakra-Nangal project.

Damodar Valley Project (Bihar and West Bengal).—The Damodar Valley Project which is one of the most important multi-purpose schemes and is to benefit the States of Bihar and West Bengal, has as its main features the construction of (a) Multi-purpose storage dams with hydro-electric plants, (b) an irrigation project with a net work of irrigation canals and distribution measuring 1,465 miles, (c) an 85 miles long irrigation-navigation canal, (d) a power transmission grid and (e) thermal power stations to supplement the hydro power.

The ultimate benefits that will accrue from this scheme include (a) effective flood control of the Damodar River, (b) perennial irrigation of 10,26,762 acres including 185,000 acres now irrigated in the kharif season and 300,000 acres in the rabi season resulting in an additional yield of rice and rabi crop valued at Rs. 23 crores a year, (c) the generating of 559,000 kW. of electric power, which will promote the growth of industry, lead to the electrification of railways, etc., (d) cheap transport facilities through the navigation canal (e) annual traffic through the canal of coal, paddy, etc. to the extent of nearly 2 million tons and (f) efficient drainage of about 700 sq. miles of water-logged area in the lower valley in W. Bengal.

Of the electric power generated 375,000 kW will be thermal and 184,000 kW will be hydro-electric.

The first phase of the D.V. Project comprises (1) a thermal power station of 160,000 kW capacity at Bokaro, 7 miles by road from the Bermo railway station, in the district of Hazaribagh, Bihar, (2) Tilaiya dam with a power station of 4,000 kW in the same district, 14 miles south of Kodarma railway station on the Grand Chord line of the Eastern Railway, (3) the Konar dam, 24 miles from Hazaribagh, (4) the Maithon dam with a power station of 60,000 kW in the district of Manbhum (Bihar), 3 miles from Kumardhul railway station on the Grand Chord line, (5) the Panchet Hill Dam with a power station of 80,000 kW. (ultimate), of which one unit (40,000 kW.) has been taken in hand, in the district of Manbhum (Bihar), about 13 miles south of Maithon, (6) the Durgapur Barrage and Canals in the district of Burdwan (West Bengal) and (7) the transmission line system.

The construction of the first dam was started in 1948.

The Bokaro Thermal Power Station was commissioned in 1953 with an installed capacity of 160,000 kW and will ultimately have a capacity of 228,000 kW.

The Tilaiya Hydro Station was put into commercial operation in February 1953, with two 2,000 kW sets. Work on the transmission system is actively in progress and 635 miles of 132 kV (out of a total of 720 route-miles) and 91 miles of 33 kV lines with most of their associated sub-stations have been completed.

The Konar Dam in the district of Hazaribagh was completed in 1954 and was formally opened by the Prime Minister of India on October 15, 1955.

The Maithon Dam, 182 feet high above the river bed, has been built on the Barakar River above its confluence with the Damodar. It consists of a main earth dam, 1,031 feet wide across the bed of the river, with a concrete spillway 618 feet in length, and a long stretch of earthen dykes on both the banks—6,228 feet long on the right and 5,726 feet long on the left.

It has an underground power station on the left bank, the installed capacity of which is 60,000 kW and which will produce annually 164,000,000 kW of hydro-electric power. The normal storage level of the reservoir will be 6,64,000 acre feet, the maximum at flood stage will be 12,00,000 acre feet and the low water release will be 4,96,000 acre feet.

The dam has been designed to provide water for the irrigation of some 27,000 acres in the Lower Valley.

This Dam is one of the two key dams on which flood control and irrigation in the lower Damodar Valley will largely depend. This dam now complete, was opened by the Prime Minister on September 27, 1957. The construction of attached power station is now in progress.

Work on the Panchet Hill Dam has been completed to the extent of about 80 per cent of the earthen dam and about 60 per cent of the concrete dam.

The Durgapur Barrage has been completed and was opened by the Vice-President of India on August 9, 1955. Through some reaches of the completed canals, irrigation water was made available for an area of one lakh acres during 1955-56 and 1-6 lakh acres during 1956-57. The work on the remaining canals is in progress and is expected to be completed in 1958-59.

As the next stage of development, work has been started on (1) expansion of the Bokaro Thermal Power Station by the addition of a 75,000 kW generating set, thus raising the ultimate capacity of generation to 225,000 kW, (2) the construction of a second Thermal Station at Oyarla near Durgapur in the district of Burdwan (West Bengal), with a capacity of 150,000 kW and (3) the necessary strengthening of the transmission system.

These extension works are programmed to be completed in time to meet the additional demands for power and new industrial development, such as, the expansion of the steel industry, undertaken by the Government as a part of the Second Five-Year Plan; electrification of the part of the Eastern Railway.

First plan outlay : Rs. 77-15 crores.

The estimated cost of the project excluding the new schemes to be taken up during the period of the Second Five Year Plan is about Rs. 102 crores. The aggregate expenditure on the various projects upto the end of July 1957 works out to about Rs. 85 crores.

Budget

Revised estimates (1956-57) .. Rs. 16,47,98,000
Budget estimates (1957-58) .. Rs. 17,07,75,000

It may be mentioned here that the Damodar Valley Corporation Act was passed in March 1948, and the Corporation itself came into existence on July 7, 1948.

The whole project was originally divided into two phases. A description of the first phase is already given.

Four other dams at Balpahari, Bokaro, Aiyar and Bermo with hydro-electric stations, forming part of the original programme, have been

deferred to a later date till the needs of flood control, power generation and water supply justify these additional works.

Extensive land reclamation, soil conservation, rehabilitation of displaced persons, malaria control, promotion of small-scale industries and development of fisheries are some of the miscellaneous activities of the DVC.

The manner in which the costs are shared among the participating Governments is as follows :

The total amount of capital allocated to irrigation is shared between the State Governments of West Bengal and Bihar in the following way :

- (i) The Government concerned is responsible for the capital cost of the works constructed exclusively for irrigation in its province;
- (ii) the balance of the capital cost under irrigation for both the States of West Bengal and Bihar is shared by the State Governments in proportion to their guaranteed annual off-takes of water for agricultural purposes.

The expenditure allocated to power is shared equally by the three participating Governments, (The Central Government, West Bengal, Bihar).

The share of expenditure allocable to flood control is equally divided between the Centre and West Bengal up to Rs. 14 crores, and any amount in excess thereof is the liability of the Government of West Bengal.

It may be added here that the reorganisation of the States of Bihar and West Bengal does not involve any change in the irrigable areas in these States. In regard to power also, no appreciable change is involved as the benefit from the DVC power system will be shared almost equally by the States of Bihar and West Bengal.

The annual gross revenue from power is now more than Rs. 3-5 crores and in 1957 it was expected to be Rs. 3-67 crores.

Additional supplies to be made over the next three years will amount to 200,000 kW and the demand will fully consume the capacity of the power-stations under construction at Maithon, Panchet, Durgapur and Bokaro.

Power is consumed mostly by major industrial concerns, but the D.V.C. also helped considerably in urban and rural electrification.

The Bihar Government, within the last eight years, electrified 70 towns, 503 villages, 153 collieries, 77 mica mines, 697 surface wells and 961 tube-wells.

The West Bengal State Electricity Board has started distributing D.V.C. power among 12 coal-mines, five towns and 11 villages.

It was expected that with the completion of the Panchet Dam by July 1958, the four dams of the Corporation would provide as much practical flood protection as could be expected and be able to reduce pressure from the maximum of 650,000 cusecs so far experienced to 250,000 cusecs, around Burdwan. The D.V.C. barrage and irrigation project in West Bengal were nearing completion. Since the execution of the Durgapur Project 11,300 acres were brought under irrigation in 1956.

Considering that about 80 per cent of the work on the D. V. Project is complete a Bill to amend the D.V.C. Act was introduced in Parliament on 11th Dec. 1957. The idea was to have full time or part time members of the Board and a senior officer as Secretary with large powers to act as chief executive officer.

Gangapur Storage Project (Bambay).—The project consists of constructing a 12,500 feet earthen dam at Gangapur on the river Godavari to impound a storage of 5,500 Mft., constructing a new canal, viz. Nasik L.B.C. 24 miles to take off directly from the dam, and remodelling for increased capacity the existing Godavari canals. The project will bring under

irrigation an area of 25,000 acres including perennial crops on the Nasik L. B. Canal, and an additional area of 20,000 acres including perennial crops on the Godavari canals.

The project is to benefit the eastern part of Nasik Taluka, the southern part of Niphad Taluka and a small portion of Sinnar Taluka of the Nasik District and the Kopergaon Taluka of the Ahmednagar District. The area under the command of the project includes some areas which are very liable to famine.

The project which is estimated to cost Rs. 395 lakhs, was started before the First Five-Year Plan, and a good part of the project had been executed in the First Plan period. The dam is completed and the work on the canals also is at an advanced stage of construction. Pending the construction, completion of the new canal and remodelling of the existing canals, the water stored in the lake has been utilised on the existing canal. A portion of the new canal, which is complete is also being opened for irrigation. Provision has been made in the 2nd Five Year Plan for the completion of the project, which was expected to be done quickly.

It is proposed to increase the storage of the Gangapur Dam from 5,600 Mcft. to 7,200 Mcft by installation of waste weir gates. By this increased storage, an additional area of 19,000 acres including perennials will be irrigated in the eastern part of Nasik and the southern part of Niphad Taluka by the construction of a new canal to take off directly from the dam named Nasik Right Bank canal and extending the Nasik left Bank canal from mile No. 25 to 30. This is known as the 2nd stage of the Gangapur Project, and is estimated to cost Rs. 87.4 lakhs. The work on the 2nd stage which is included in the 2nd Five-Year Plan, has already been started.

Ghataprabha River Valley Project (Mysore).—This is mainly an irrigation project in Belgaum District to be completed in three stages. It contemplates construction of two reservoirs across the Ghataprabha river, a tributary of the Krishna river and its tributary with channels on both the banks from the anicut. The project is estimated to cost about Rs. 35 crores and will irrigate six lakh acres in the dry districts of Belgaum and Bijapur. The first stage of the project, which is practically completed at a cost of Rs. 5.45 crores, consists of constructing the first section of the Ghataprabha Left Bank Canal taking off from the existing pick-up weir at Dhupdal in Belgaum District, near Gokak Falls. The length of this section is 44 miles and it commands an area of 2.5 lakh acres of land.

The second stage consists of the construction of a storage dam at Hadaiga and construction of the second section of the Ghataprabha Left Bank Canal from the 45th mile to the 73rd mile. This scheme has been included in the Second Five-Year Plan, and a provision of Rs. 8 crores has been made for this scheme. With the completion of the second stage, a total area of about 4.5 lakh acres can be brought under irrigation.

The third and final stage consists of construction of a storage dam at Ajra and also of the Ghataprabha Right Bank Canal. The Hadaiga dam site (second stage) lies in Kolhapur District of Bombay State and the Government of Bombay has been approached to accord the necessary permission to proceed with this work.

Godavari Project, Stage I (Andhra).—The project is situated in Nirmal Taluka in Adilabad District. The first phase of the Godavari Project involves the construction of the Kaddam dam, 5,495 feet long across the river Kaddam a tributary of the Godavari, and 48 miles of canal from the dam. This Project will irrigate 67,000 acres in the Adilabad District. The Project is estimated to cost Rs. 441.0 lakhs. The scheme is nearing completion. An area of 7,000 acres has already been brought under irrigation.

Harike Project.—Work on the Harike Barrage and the Ferozepur Feeder has been completed. Work on the Bakhu Canal is nearing

completion. The expenditure in the first four years of the Plan was estimated to be Rs. 4.92 crores.

The Project will be completed in 1959 and its estimated cost is Rs. 7 crores. Area to be irrigated is 10 lakh acres in Ferozepur and Bhatinda districts, besides providing irrigation to vast tracts in Rajasthan through the 207-miles all-metallic canal—the world's longest channel—to be constructed by 1962. This canal will also take off from Harike. This will add about 5 million tons of foodgrains, fodders and oilseeds.

The work on the Harike Project is nearing completion although the barrage itself, which was damaged in 1955 floods, will have to be extended. The work on the 89-mile long lined channel of the Sirhind Feeder which started in 1955 is expected to be completed by June 1959 and an expenditure of Rs. 2 crores was expected to be incurred during the year 1957-58. This project will take over the existing unirrigated areas of Sirhind Canal and Bhakra Nangal Canal System lying to its west. The surplus supplies so saved would be utilized elsewhere for the improvement of irrigation in dry tracts of the State.

Hirakud Dam Project (Orissa).—The Hirakud project was formally opened by the Prime Minister on 13th Jan. 1957. Water from the dam now completed flowed into the Baragarh Canal, the central arterial canal, in July 1956 and water was available for irrigation in September 1956.

By April 1957 it was expected that the project will irrigate 672,000 acres of land in Sambalpur and Bolangir Districts, and 1,867,000 acres in Cuttack and Puri Districts.

Power has been made available since December 1956 with the commissioning of Unit No. III of 24,000 kW, Unit No. IV of 24,000 kW and Unit No. II of 37,000 kW have also been put into operation and have been running satisfactorily. The only set left the Unit No. I of 37,500 kW was expected to go into operation before the end of 1957-58.

Upto March 1956 Rs. 65 crores had been spent on the project. The revised estimates for Stage I are Rs. 70.78 crores.

The project was started in 1948. The full project envisages the construction of three dams and two power houses, the first at the dam sight (already in operation) and the second at Chilplima, sixteen miles below the Hirakud Dam.

The full project is designed to irrigate 2.5 min. acres of land including 1.8 min. acres under the Delta Scheme and provide ultimately 232,500 kW of electric power. The second stage of the project is expected to be completed by 1960.

The power will be utilized in the northern part of the State in the following Districts: Sambalpur, Sundargarh, Keonjhar, Mayurbhanj, Dhenkanal, Cuttack, Puri, Bolangir and Kalahandi.

More details are given below.

The Hirakud Dam which is now complete is three miles in length and is located at Hirakud near Sambalpur across the main channel of the River Mahanadi. There are also 13 miles of low dykes on the two sides.

The dam is a concrete-cum-masonry-cum-earth dam. The maximum height of the concrete dam is about 200 ft. of the earth dam 195 ft.

The reservoir created by the dam and dykes will have a capacity of 6.6 million acre ft. of water covering an area of 288 sq. miles. Three flow canals (one from the right dyke and two from the left) will irrigate 6.72 lakh acres in the districts of Sambalpur and Bolangir-Patna. The length of the main canals and branches will be 91.5 miles with 460 miles of distributaries and minors, and 2,000 miles of water courses.

The power from the project will be utilised for giving power not only to the various towns but also to rural areas for which purpose a

large system of 33 and 11 K.V. lines are being constructed; power will also be given for small industries and for domestic lighting.

The total estimated cost of the Hirakud Power Utilisation Scheme is Rs. 155.85 lakhs. This does not include the cost of Hydro-Electric works and machinery at Hirakud Dam and also the transmission of energy at 132 K.V. and 66 K.V.

As already mentioned, the whole project has three stages. The first stage consists of the main dam (so-called Hirakud Dam) with its power house for 123,000 kW installed capacity and canal systems at either flank. This stage is complete. The second stage consists of the Chilplima power scheme to develop 72,000 kW, sixteen miles below the main dam and a 37,000 kW unit at the main power house. This is expected to be completed in 1960. The third stage aims at the construction of a weir across the Mahanadi above Naraj with canal systems in Puri and Cuttack districts.

The immediate benefit from the completion of the first stage will be an additional quantity of 5.6 lakh tons of foodgrains and 2.4 lakh tons of other commodities.

Ultimately the whole of the protected area in the Mahanadi delta will be immune to flooding, the new embankments will provide means of communication for many villages and improve navigation on the existing canals.

Kakrapar Weir and Canals Project (Bombay).—This Project is a part of the Lower Tapi Valley scheme. It was taken up for execution by the C.W. & P.C. (then known as C.W.I.N.C.) on behalf of the Government of Bombay and was inaugurated on November 1, 1949, it was handed over to the Bombay Government for further execution in June 1954.

The project proposed to be developed in two stages consists of a weir at Kakrapar on the Tapi River whence the Right and the left Bank canals are taken off to irrigate an area of 5,62,000 acres of seasonal crops in Surat District on the run off of the river. The head works comprising the weir about 2038 feet long and 45 feet high above the deepest river bed, the head regulators for the canals and the afflux bunds were completed in the middle of 1953. The Left and Right Bank canal systems comprising the main canals, branches, and distributaries have a total length of 850 miles. These canals are intended to increase food production by 1.6 lakh tons and cotton by 16,000 tons. The work on the main canals is at an advanced stage of construction and that on the branches, minors and minors, etc. is in full swing. Irrigation has already commenced on a part of the area on the left bank canal.

The project which was estimated to cost Rs. 626 lakhs is under revision and is expected to cost about Rs. 11 crores. The project has been included in the 2nd Five-Year Plan for completion.

It is also proposed to construct a storage reservoir on the Tapi river, upstream of the Kakrapar Weir, in Songad Taluka of Surat District to hold a storage of 3.25 lakh Mcft. This will be used for assuring supply to 5.62 lakh acres of seasonal irrigation planned on the Kakrapar Weir and Canal project, and will in addition bring new areas to the extent of 4.3 lakh acres including perennials under irrigation on Ukai right and left bank canals in Surat and Broach districts. It will also be possible to increase irrigation by 3.18 lakh acres of crops including perennials in the command of the Kakrapar canals. Thus after completion of the Ukai Project irrigation facilities will be provided for new areas of 7.48 lakh acres besides assuring supply to the seasonal crops of 5.62 lakhs acres under the Kakrapar system.

The Ukai Dam has great potentialities of development of cheap and economical H.E. power. It will be possible to generate, due to the storage 110 kW of firm power at 60 per cent load factor. Incidentally, the project will also afford partial flood relief to the flood affected

areas of the Tapi river below Ukai. The cost of the full project i.e. for irrigation as well as power on the present estimation will be Rs. 58 crores. A provision has been made for the irrigation part of the project in the Second Plan.

Lower Bhavani Project (Madras).—This involved the construction of a dam, 203 feet high and 1,520 feet long with earthen flanks across the river Bhavani, a tributary of the Cauvery. The site is at Sathyamangalam, about 20 miles from the Mettupalayam railway station. A canal on the right side, 124 miles long, irrigates about 207,000 acres of cotton, cholam and rice crops in Coimbatore District.

The cost of the scheme was Rs. 9.4 crores. A start on the construction was made in 1949 and it is now completed. Water has been allowed in the canal to irrigate 105,000 acres from September 1957.

About 10,000 kW of seasonal power is also planned.

Mayurakshi Reservoir Project (West Bengal).—This project involved the construction of a low masonry dam at Massanjore in the Santal Parganas District of Bihar, 123 feet above river bed to store 0.5 million acre feet of water, a weir at Tilpara in Birbhum District, West Bengal and a canal system extending over 1,340 square miles on both sides of the river Mayurakshi.

The scheme brings under irrigation an area of 600,000 acres for kharif and 120,000 for rabi crops. In addition 4,000 kW hydro-electric power during monsoon is generated. The total cost of the scheme was Rs. 16.11 crores. The project is now completed. The Massanjore Dam which is named Canada Dam was opened on November 1, 1955.

Though the dam is in Bihar, the weir is in West Bengal and it is West Bengal which mostly benefits.

Tungabhadra Project (Andhra, Mysore).—This Project was originally sanctioned by the Governments of Madras and Hyderabad which had territorial jurisdiction over this area at that time, primarily as a famine relief measure. Work on the Project was commenced in 1945 by the Governments of these two States.

It is now being executed by the Governments of Andhra Pradesh and Mysore States which have become successors to the Governments of Madras and Hyderabad in respect of this area on account of the re-organisation of States in India.

The Government of Mysore is solely in charge of the execution of the Project on the northern side of the Tungabhadra River.

On the southern side the Tungabhadra Board constituted under the directive of the President of the Indian Union, is in charge of all common works relating to Mysore State and Andhra Pradesh, and the respective States are in charge of other works in which only the concerned States are interested.

The Tungabhadra Reservoir is 146 square miles in extent and has a capacity of nearly 3.1 million acre feet at the full Reservoir level of plus 1633.

The Tungabhadra Dam across the river Tungabhadra at Mallapuram in Bellary District (Mysore) is 7,942 feet long and 160 feet high at the deepest foundation. There is only one canal on the northern side. This is expected to irrigate about 5,80,000 acres in Mysore State.

There are two canals on the southern side of the river—the Low Level Canal and the High Level Canal.

The former has already been executed and preliminary works in respect of the latter are in hand.

The area irrigated on the southern side is as follows: From the Low Level Canal, Andhra 1,57,000 acres and Mysore 92,000 acres. From the High Level Canal (it is anticipated) Andhra 2,53,500 acres, Mysore 1,36,500 acres.

The areas irrigated from the Low Level Canal in Mysore are in Bellary, and in Andhra in

Kurnool. The areas irrigated from the High Level Canal in Mysore are in Bellary, and in Andhra in Kurnool, Anantapur and Cuddapah.

Only areas in Mysore are irrigated by the Northern Canal and these are in Raichur Dt.

When completed, the Hydro Electric Scheme on the southern side will consist of 2 Powerhouses with 4 generators, each of 9,000 kW capacity making an aggregate of 72,000 kW. The first station is near the Dam and the second about 13 miles along Canal.

The first and the second generators at the Dam Powerhouse were commissioned in January 1957 and May 1957 respectively, and the first and second generators at the Canal Powerhouse were expected to be commissioned in October and December 1957.

The balance of four generators in the two Powerhouses will be installed later.

On the northern side of the Project, it is initially proposed to have one Powerhouse near the Dam with 4 generators of 9,000 kW capacity each. It is also proposed to develop later Powerhouses along the Canal.

The expenditure on the northern side of the river will be borne solely by the Government of Mysore.

The expenditure on the southern side for the works executed by the Tungabhadra Board, will be shared between the Governments of Andhra Pradesh and Mysore State in the following ratio tentatively.

	ANDHRA PRADESH	MYSTRE STATE
Headworks and Low Level Canal.	5	4
High Level Canal	65	85
Hydro Electric Scheme	80	20

The expenditure on the works which are being executed by the Board is as indicated below:

Headworks and Low Level Canal: Rs. 21.5 Crores. Hydro Electric Scheme: Rs. 7.5 Crores. High Level Canal: Rs. 14 Crores (Approx.).

The Tungabhadra Dam proper was completed early in 1953 except for the installation of spillway gates in the spillway section. This work has also been almost completed by now and only minor items of work like the construction of utility tower remains to be completed.

The water for irrigation on the northern side Canal, and on the Low Level Canal on the southern side has been supplied from 1st July, 1953.

Work on the northern side Canal in its length of 125 miles is in progress, about 50% of the work having been completed; the balance is expected to be completed by 1959.

Work on the Low Level Canal with entire length of 223 miles, is as already mentioned fully completed.

Work on the Powerhouses on the southern side of the project the Dam Powerhouse, has been completed and work on the Canal Powerhouse was expected to be completed by end of 1957. The transmission system on the northern side is completed, while work has commenced on the construction of the Powerhouse at dam-site.

The preliminary work on the High Level Canal Scheme has been taken up. The actual execution of works was expected to be taken up only on receipt of specific sanction from the Government of India.

The Dam will help in raising food production by 140,000 tons.

Kosi Project (Bihar).—The Kosi project envisages the construction of a dam of the unprecedented height of 785 feet above rock foundations on the Kosi River, a mile upstream of Barakhshetra temple in Nepal, where the Kosi leaves the hills, for flood control, power, irrigation, navigation, soil conservation, silt control, fish culture and recreation, etc. The total scheme was to cost Rs. 177 crores.

The present scheme estimated to cost Rs. 45.91 crores was prepared by the Central Water & Power Commission in November 1953.

The Project consists of four different units as follows:—

(a) Unit I—Hanumannagar Barrage and Head Works: This is estimated to cost Rs. 17.02 crores. The barrage is to be constructed about 30 miles below Chatra in Nepal where the river debouches into the plains from the gorge. It consists of a main spillway 4,163 ft. long, a diversion spillway 474 feet long, with earth dams about 12,000 feet each on both the flanks connected to two Afflux Bunds 8 miles each on either banks of the river. The functions of the barrage are (i) to arrest coarse silt and flatten the gradient of the river above (ii) to act as a safety valve during abnormal floods when 60,000 cusecs will be let down into old Kosi Dhars (iii) to provide for irrigation of 14 lakh acres and (iv) to develop power that is possible with the available head. (The earthquake safety factor adopted in the design of the Barrage is .15 g horizontal and .10 g vertical.)

(b) Unit II—Flood Banks and Protective Measures: The estimated cost for this is Rs. 13.57 crores involving construction of 75 miles of embankment on the western side below barrage and 63 miles on the eastern side. Besides, a flood bank of 12 miles above the East Afflux Bund in continuation is also provided. The purpose is to restrict the flood waters between the embankments, thus preventing the usual spill, and also to stop further westward translation of the river Kosi.

(c) Unit III—Eastern Kosi Canal System: The canal system at an estimated cost of Rs. 14.00 crores is proposed to have an annual irrigation of about 14 lakh acres in the districts of Purnea and Saharsa.

(d) Unit IV—Hydro Electricity: A provision of Rs. 1.32 crores has been made for this. It is expected about 20,000 kW can be generated, but the exact scheme is yet to be finalised.

The work on the project is to be implemented by the Government of Bihar. The Central Government will render necessary technical assistance.

The flood banks were taken up for construction first and work near Nirmali on the western embankment was inaugurated by the Chief Minister of Bihar on 14th January 1955. The work on the eastern embankment near Supaul was commenced on 3rd February 1955.

The work on the embankment which was done by the local villagers and the Bharat Sewak Samaj was completed upto about 85 per cent towards the end of March 1957. The remaining 15 per cent had to be done during the season commencing from October 1957.

Koyna Hydro-electric Project (Bombay).—The Koyna Project contemplates the construction of a dam across the Koyna River at Jalkwadi near Helwak in North Satara Dt. The scheme is ultimately capable of generating 580,000 kW of firm power at about 75 per cent load factor. The scheme is estimated to cost Rs. 92 crores.

In the first stage four units of 60,000 kW will be erected at a cost of Rs. 33.32 crores.

The dam will be 208 ft. to start with. Later it will be raised to 238 ft. The powerhouse will be built under-ground on the western slope of the ghats.

The project was part of the First Five-Year Plan, and generation of power is expected to start in October, 1960.

Preliminary work on stage I has been completed. The powerhouse has started supplying power to the works site and colonies.

Rihand (Pipri) Dam and Power Station Project (Uttar Pradesh).—This Project is proposed to impound 8.6 million acre feet of water by a 236 feet high dam across the river Rihand, a tributary of the Son, near the village of Pipri in Mirzapur Dt. The powerhouse will

have five generating sets of 50,000 kW. each and a total installed capacity of 250,000 kW. It will also bring under irrigation about 14 lakh acres of land in U.P. and about 5 lakh acres in Bihar by means of about 4,000 tube-wells.

The estimated cost of the scheme including transmission and transformation, is about Rs. 45.27 crores.

The project is under construction and is expected to be completed in 1961.

Nagarjuna Sagar Project (Andhra).—The project in its first stage comprises the construction of a masonry dam 302 feet high above the foundation level, across the Krishna river near Nandikonda village in Nalgonda District, about 90 miles below Siddeswararam, and two canals taking off from the reservoir, known as the left and the right bank canals. The dam is situated about ten miles from Machera railway station. Large areas extending between the Krishna and the Godavari in the north and the Krishna and the Pennar in the south can be commanded by the reservoir.

The right bank canal which will be 135 miles long will carry a discharge of 11,000 cusecs in the first stage. The left Bank Canal will be 108 miles long and will lead up to the river Muneru in the first stage.

Work was started in Dec. 1956, and the project will take nine years to complete.

The cost of the first Stage of the project, namely, construction of the dam and the two canals is estimated to be about Rs. 86.57. crores. The total area to be benefited by the project will be 20.6 lakh acres of land spread over the districts of Guntur, Kurnool, Nellore, Warangal and Nalgonda.

The second Stage of the project which will be taken up later will provide for the generation of electric power of 75,000 kW capacity.

Chambal Project, Stage I (Madhya Pradesh and Rajasthan).

The full development consists of:—

- Three dams across the Chambal River with a power-station at each dam site.
- High tension transmission lines for power transmission to various substations in Madhya Pradesh and Rajasthan.
- A barrage across the river near Kota city to divert the water from the storage and power dams into irrigation canals.
- A net-work of irrigation channels on either bank of river fed from the Kota barrage.

The original estimated cost of the whole scheme was Rs. 77.15 crores and the scheme was expected to generate 2,20,000 kW of hydro-electric power, and irrigate 14 lakh acres of land annually in Madhya Pradesh and Rajasthan.

The scheme was proposed to be taken up in three stages, keeping in view the immediate demand for irrigation and a gradual development of power demand. The details of the stages namely the achievements upto September 1957 are as under:—

STAGE I.

The first stage envisages the construction of Gandhi Sagar Dam with power station, Kota Barrage and Canal system. The stage is estimated to cost Rs. 49.49 crores and the details in brief on each of these items are as under:—

The Gandhi Sagar Dam which is situated at a distance of 4.5 miles down stream of the Chaurasigarh Fort is being constructed at the boundary of Rajasthan and Madhya Pradesh States to create a reservoir having a gross capacity of 5.73 million acres feet at the cost of Rs. 8.90 crores. Nearly 91 per cent of excavation for foundation and 45 per cent of Masonry and concrete work on this irrigation-cum-power dam have been completed at an expenditure of Rs. 5.78 crores. The Gandhi Sagar Power station which is estimated to cost Rs. 6.00

crores is another work which will generate nearly 92,000 kW of hydro electric power on completion.

The excavation work on this power station has already been completed and nearly 40 per cent work of masonry and concrete is still to be completed. The total expenditure incurred so far is Rs. 0.62 crores.

Kota Barrage which is situated about 52 miles down stream of Gandhi Sagar Dam and about half a mile above the Kota city, is being constructed by the Rajasthan Government to store the released water from the dams and to divert this water into Irrigation Canals. The construction work on this Barrage, which will be 1,970 ft. long and 120 ft. high, is in progress and nearly 85%, 77% and 15% of rock cutting, stone masonry and concreting work respectively have been completed at an expenditure of Rs. 1.44 crores. The total estimated cost for this work is Rs. 3.07 crores.

The two canals namely Right Main Canal and Left Canal which have the gross commanded area of 24.03 lakh acres and 4.81 lakh acres to provide the annual irrigation of nearly 11.4 lakh acres and 2.6 lakh acres respectively, take off from Kota Barrage. The construction work on these Canals is in progress and 94 per cent, 68 per cent and 68 per cent of rock cutting, masonry and concrete and earth work have been completed in case of left canal and in case of right main canal 64 per cent, 35 per cent and 48 per cent work of the same type has been done so far in Rajasthan portion. In Madhya Pradesh

37 per cent of Rock Cutting, 6 per cent of Masonry and Concrete and 16 per cent of Earth work have been completed on right main canal. The total expenditure of Rs. 5.33 crores (Rs. 2.44 crores for Rajasthan and Rs. 2.89 for Madhya Pradesh) has been incurred so far as against the total estimated cost of Rs. 22.52 crores.

The works are already in progress and are expected to be completed by 1962-63.

STAGE II.

- Construction of the Rana Pratap Sagar Dam and the Bhopal Power-Station below it to generate 90,000 kW of power at 60 per cent load factor, and suitable extension of transmission lines and substations at an estimated cost of Rs. 17.66 crores. These works were expected to be started in 1957-58 and completed in 1963-64. This will enable irrigation of a further 3 lakh acres in addition to the generation of extra power.

STAGE III.

This caters for a further development of hydro-electric power by building the Kota Dam about 10 miles up-stream of the Kota Barrage with a power station to generate 45,000 kW of power at 60% load factor, and a further extension of transmission lines, etc., at an estimated cost of about Rs. 10 crores. The work on these items has not been taken up so far.

Progress of Multi-Purpose Projects

	Outlay		Irrigation Projects
Bhakra-Nangal ..	Rs. 85.7 crores during plan.	Rs. 25.5 crores before plan.	1.18 million acres (additional) irrigated. Total capacity 3.6 million acres. Available for 1 lakh acres (additional). Total capacity 1,026,000 acres.
D.V.C. ..	Rs. 71 crores during plan.	Rs. 15.5 crores before plan.	261,000 acres (additional). Total capacity 672,000 acres.
Hirakud. ..	Rs. 44.6 crores during plan.	Rs. 7.8 crores before plan.	
New Projects ..	18.12 crores.		

MINOR IRRIGATION

As a result of the schemes executed during the First Five-Year Plan, about 9.4 million acres have been or are being brought under irrigation against the five-year programme of 11.2 million acres.

The target of area proposed to be brought under irrigation by minor irrigation works completed during 1955-56 was fixed at 2.9 million acres. It was expected that most of the minor irrigation works executed or undertaken during the second half of the year 1955-56 would benefit the crops during 1956-57. Only a

small proportion of works constructed before 1st Oct. 1955 would provide irrigation facilities for the rabi crops of 1955-56. It was estimated that about 0.6 million acres might be benefited during 1955-56.

About 0.8 million acres were expected to be benefited under special tubewells programme up to the end of 1955-56.

Minor irrigation projects like dams, channels, etc. brought under irrigation 4.00 million acres of new land during the five years of the Plan. About 0.90 million acres were benefited by the well schemes during this period.

1956-57

The target for 1956-57 and the achievement in the period July to March 1956-57:

	Targets*		Achievements*	
	Number	Acreage	Number	Acreage
Construction and repair of wells ..	30,000	232,000	11,148	55,740
Construction and repair of tanks ..	778		710	35,500
Pumping installation including Persian wheel, etc. ..	9,000	82,000	5,448	13,620
Tubewells (G.M.F.) ..	153		154	61,000
Miscellaneous minor irrigation projects (viz. Dams, Channels and Distributaries, etc.) ..	—	977,000	—	125,193
Total programme : ..		1,000,000		291,634

*Subject to revision.

SECOND FIVE-YEAR PLAN

The total cost of the new irrigation projects in the Second Plan is Rs. 452 crores of which about Rs. 167 crores are expected to be spent during the Plan period.

The total provision for major and medium works is Rs. 381 crores (Rs. 167 crores for new schemes, Rs. 214 crores for continuing the schemes of the First Plan).

The Plan provides for 195 new medium irrigation projects.

During the Second Five-Year Plan 21 million acres of land are expected to receive irrigation, 12 million acres from large and medium irrigation schemes and 9 million acres from minor irrigation works.

The provision for minor irrigation is made in part in the agricultural programmes of States and in almost equal part in the national extension and community development programmes.

The former includes also provision for about a million acres of land to be irrigated from State tube-well schemes.

Prior to the First Plan, 2,500 tube-wells irrigated about one million acres in the country.

The First Plan provided for the construction of an additional 5,830 tube-wells to irrigate about 2 million acres.

The Second Plan provides for the construction of another 3,581 tube-wells to irrigate 910,000 acres.

Each tube-well will irrigate 300 acres of land and give an additional production of 60 tons of food grains.

SOURCES OF REVENUE AND EXPENDITURE

The principal sources of Central revenue are : customs duties, excise duties levied by the Central Government, corporation tax, income tax (excluding taxes on agricultural income), estate and succession duty, the earnings from the mints, terminal taxes on goods or passengers carried by railway, sea or air, taxes on railway fares and freights, taxes (other than stamp duty) on transactions in stock exchange and future markets, stamp duty on bills of exchange, cheques, bills of lading, letters of credit, insurance policies, transfer of shares, etc., taxes on sale and purchase of newspapers and on advertisements in newspapers.

The railways and the posts and telegraphs contribute to the Central revenues. There are also the profits on the Government industrial undertakings.

About as much as 90 per cent of the revenue is derived from the customs, excise duties, corporation and income taxes.

The principal sources of revenue for the individual States are : State taxes (on agricultural income, lands and buildings, minerals rights, consumption or sale of electricity, sale or purchase of goods other than newspapers, advertisements other than in newspapers, goods and passengers carried by road or on inland water-ways, vehicles, animals, boats, tolls, professions, trades, luxuries, amusements), capitulation taxes, stamp duties, excise duties on alcoholic liquors, opium and other narcotics.

A point about the Sales Tax is worth mentioning here. The Union has the power of declaring any commodity as essential for the life of the community and thereby vetoing any sales tax levied on it by a State Government. This power comes from the Essential Goods Act of 1952.

Then there are the subventions from the Central Government. Part of the proceeds of the income-tax are distributed among the States. The jute growing States get part of the proceeds from the export duty on jute. There are also special grants which are made to certain States.

Collection and appropriation of taxes are not always vested in the same authority. Some taxes are levied by the Central Government but collected and appropriated by the States (stamp duties, excise duties, duties on medicines and toilet preparations). Some are levied and collected by the Union but assigned to the States (succession and estate duties on property other than agricultural, terminal taxes on passengers, railway fares, freights, stock exchange, future markets, newspapers or advertisements). Corporation tax is collected and retained by the Union, but taxes on other incomes are levied and collected by the Union and distributed between the Union and States.

The two biggest items of expenditure of the Central Government are outlay on development programmes (capital account) and defence.

Three important heads of expenditure of the States under the revenue account are : irrigation, security and social services.

Then there is public debt, now almost wholly internal—the rupee debt. This may be divided into three classes, long term loans and money market liabilities, the unfunded debt which includes provident funds, postal deposits, saving certificates, and last the deposits.

CAPITAL TRANSACTIONS

Receipts are as follows (in lakhs of rupees):

	Revised 1957-58	Budget 1958-59
New Loans	2,14,24	4,29,76
Net Receipts from:		
Treasury Bills	3,80,00	2,05,00
Treasury Savings Deposit Certificates	5,20	17,20
Post Office Savings Bank	18,00	25,20
12-Year National Plan Saving Certificates	62,00	86,00
Cumulative Time Deposits	—	2,50
Post Office Cash Certificates	— 95	— 90
National Savings Certificates	— 22,10	— 26,57
Defence Savings Certificates	— 5	— 3
National Plan Certificates	— 2,50	— 4,50
Other Unfunded Debt	18,90	19,53

Acquisition of Land for Atomic Energy Establishment	10.00				
Atomic Reactor	93.00				
Buildings for the Atomic Energy Establishment	102.00				

DEBT POSITION

At end of 1957-58: Rs. 83.50 crores.

At end of 1958-59: Rs. 89.55 crores.

A broad analysis is given below (figures in rupees crores):

	As on March 31, 1958	As on March 31, 1959
Rupees Loans:		
Current Loans	17,01.25	18,26.79
Treasury Bills and Ways and Means Advances	12,15.70	14,20.70
Special Floating Loan	2,07.80	2,04.37
Expired Loans	13.98	14.94
Total	31,38.73	34,66.80

	As on March 31, 1958	As on March 31, 1959
Sterling Loans:		
Current Loans	0.55	0.15
War Contribution	20.82	20.82
Capital portion of Railway Annuities	0.48	—
U.K. Syndicate of Banks	0.67	0.67
Expired Loans	0.03	0.03
Total	22.35	21.47
Dollar Loans	1,59.85	3,61.68
Loan from U.S.S.R.	15.30	45.98
Loans from W. Germany	14.00	44.00
Loans from other Foreign Sources	—	15.13
Grand Total	33,50.23	39,55.06

INTEREST-BEARING OBLIGATIONS AND INTEREST-YIELDING ASSETS

The obligations are as follows (figures in rupees crores):

	Revised 1957-58	Budget 1958-59
IN INDIA :		
Public Debt.—		
Loans	17,01.25	18,26.79
Treasury Bills and Ways and Means Advances	12,15.70	14,20.70
Total public debt (India)	29,16.95	32,47.49
Unfunded Debt.—		
Service Funds	0.27	0.25
P.O. Savings Bank Deposits	340.28	365.28
P.O. Cash and Defence Savings Certificates	1.66	0.66
National Savings Certificates	216.52	190.02
National Plan Certificates	22.88	18.38
State Provident Funds	195.26	213.97
Ten-Year Treasury Savings Deposit Certificates	49.61	66.61
Cumulative Time Deposits	—	2.50
12-Year National Plan Savings Certificates	62.00	148.00
Other items	15.49	16.33
Total Unfunded Debt (India)	9,03.97	10,22.00
Deposits.—		
Depreciation, Development and Reserve Funds	1,66.68	1,38.04
Other deposits	17.06	23.86
Total deposits (India)	1,83.74	1,61.90
Total obligations in India	40,04.66	44,31.39

	Revised 1957-58	Budget 1958-59
IN ENGLAND :		
Public Debt.—		
Loans	0.55	0.15
War contribution	20.62	20.62
U.K. Syndicate of Banks	0.67	0.67
Capital portion of railway annuities in purchase of railways	0.48	—
Total public debt (England)	22.32	21.44
DOLLAR LOANS		
LOAN FROM U.S.S.R.	1,59.85	3,61.68
LOAN FROM W. GERMANY	15.30	45.98
LOAN FROM OTHER FOREIGN SOURCES	14.00	44.00
Total interest-bearing obligations	42,16.18	49,19.62

Assets

The interest-yielding assets are as follows (figures in crores of rupees):

Capital advanced to Railways	12,15.70	13,54.54
Capital advanced to other commercial departments	1,64.88	1,86.08
Investments in commercial concerns	2,74.39	4,67.28
Capital advanced to States	11,85.11	14,02.21
Other interest-bearing loans	1,99.40	2,42.53
Deposits with U.K. for redemption of Railway annuities	0.48	—
Purchase of annuities for sterling pensions	55.91	33.97
Debt due from Pakistan	3,00.00	3,00.00
Total interest-yielding assets	33,95.87	39,86.61
Cash and securities held on Treasury account	50.75	50.75
Balance of total interest-bearing obligations not covered by above assets	7,69.51	8,82.26

CENTRAL HELP TO STATES

The following allotments to States are provided for in the 1958-59 budget (figures in lakhs of rupees):

Share of taxes and duties: 157.47
 Grants and subventions from revenue: 128.63
 Grants and subventions from capital: 17.46
 Loans: 284.51
 Grand total of allotments to States: 588.07

Lump sum grants to States are as follows (figures in lakhs of rupees):

Grow More Food 2.60; Community Projects 3.31; National Extension Services 8.50; Basic and Social Education 6.93; Welfare of Backward Classes 5.02; Key Village 53; Improvement of land records and agricultural statistics 7; Soil Conservation 93; Higher agricultural education 4.82; National malaria control 5.44; Industrial Housing 2.73; Local works 4.00;

Central Road Fund 5.66; Total lump sum grants and subventions 1,46.09.

Lump sum loans as follows:

Irrigation 70.12; Miscellaneous Development 32.63; Grow More Food 36.06; Rehabilitation 8.34; Industrial Housing 12.60; Community Development Projects 9.22; Natural Calamities 1.00; Handloom and Small-scale Industries 6.19; Other loans 108.36; Total loans 284.51.

ALLOTMENTS BY CENTRE STATE-WISE (1957-58)

The following table shows State-wise distribution of income-tax, etc. (figures in lakhs of rupees):

	Income-tax	Union Excise duties	Additional Excise duties	Stake Duty	Tax on Railway Passenger Fare
Andhra Pradesh	6.25	2.77	2.34	18	81
Assam	1.88	1.02	1.02	4	25
Bihar	7.65	3.12	1.87	19	86

Jammu & Kashmir	87	52	50	2	—

TAX CHANGES

The following are the new tax proposals :

DIRECT TAXATION

Tax on Gifts : The first proposal is to introduce a tax on gifts which will fill a gap in the scheme of direct taxation and would not only make evasion or avoidance difficult but also spread the tax burden more equitably.

The transfer of properties through gifts to one's near relations or associates is one of the commonest forms of avoidance of not only the estate duty but also of Income Tax, Wealth Tax and even the Expenditure Tax. The only way of effectively checking this practice is to levy a tax on gifts. Such a tax is already being levied in other countries, for example U.S.A., Canada, Japan and Australia. The Taxation Enquiry Commission also had accepted the Gift Tax as theoretically an attractive proposition.

A tax is levied on gifts by whomsoever made, the only exceptions being charitable institutions, Government companies, corporations established by Central or State Acts and public companies, whose affairs are controlled by six persons or more. The tax is levied on the donor on the value of all gifts made by him during a year but for the purpose of determining the rate of duty, the gifts made during the four years preceding the year will be aggregated. Such aggregation will, of course, be made only in respect of gifts made after the date this tax comes into force.

Gifts up to a total value of Rs. 10,000 in any one year is exempted and if the value of gifts made during any year exceeds this sum, only the excess is subjected to tax.

This basic exemption of Rs. 10,000 has been reduced to Rs. 5,000 if gifts to any one individual donee during a year exceeds Rs. 3,000. In addition to this basic exemption, there are other exemptions, important among which are :—

(A) Gifts to Central and State Governments, local authorities and charitable institutions;

(B) Gifts to female dependents on the occasion of marriage up to Rs. 10,000 in each case;

(C) Gifts to one's wife up to a total limit of Rs. one lakh;

(D) Gifts to dependents of policies of insurance up to Rs. 10,000 for each.

The rates of tax are the same as for the Estate Duty, the only difference being that the first slab of Rs. 50,000 is not exempted from the tax. The rates of tax range from four per cent on the first slab to 40 per cent on gifts over Rs. 50 lakhs. The administrative set up and the procedure for assessment, appeal and collection of tax are the same as for Income Tax, Wealth Tax and Expenditure Tax.

The main object of this tax is to plug a loophole in the other tax statutes. Its importance cannot, therefore, be adequately measured in terms of the amount of revenue it brings directly. There are no reliable data for making an estimate of the yield, and on a rough guess the yield from the Gifts Tax has been placed at Rs. three crores.

Estate Duty : The second proposal is to make certain amendments in the Estate Duty Act. The actual collections of Estate Duty have fallen short of even the modest expectation we had at the time of passing that measure. This is partly due to the practice of making large gifts "inter vivos" which will hereafter be checked by the levy of the Gift Tax.

It is also partly due to the numerous concessions provided in the Act itself, and it is proposed to reduce some of them. The important changes are :

(a) The exemption limit has been reduced from Rs. 1,00,000 to Rs. 50,000.

(b) Only one-half of the probate duty or court fees paid on succession certificates is allowed as a deduction from Estate Duty instead of the full amount as at present.

(c) Gifts to other than those for charitable purposes made within a period of two years prior to death are now subjected to Estate Duty. This period has been increased to five years, as recommended by the Taxation Enquiry Commission. Gifts on which Gift Tax has been paid are not taken into account.

(d) The value of coparcenary interest in Hindu undivided families is taxed at the rate applicable to the value of the estate of the branch of the family concerned.

The effect of these changes will be to increase the revenue by Rs. 50 lakhs which will accrue wholly to the States.

The appellate procedure has been brought in line with the provisions in the Income Tax, Wealth Tax and Expenditure Tax Acts.

Income Tax : So far as Income Tax is concerned, no major change in the rate structure has been made. For the financial year 1958-59, the basic rates of tax, together with the special surcharges in operation for the current financial year, will continue. The only change is in regard to the excess dividend super-tax payable by Section 23A companies. At present, the excess dividend tax rates for all companies are 10 per cent, 20 per cent and 30 per cent on the slabs of dividends over 6 per cent, 10 per cent and 18 per cent, respectively, of capital for the financial year 1958-59. The excess dividend tax rates for Section 23A companies has been fixed only in two slabs, 10 per cent on the slab of dividends over 6 per cent of capital and 20 per cent on the slab over 10 per cent of capital. This change is desirable as under the Act these companies are required to distribute the whole or a large proportion of their profits to the shareholders. It is not possible to estimate the loss of revenue in this proposal, but it is likely to be very small.

A change has been made in the substantive Income-Tax Law in regard to "development rebate."

Hitherto, this rebate was allowed uniformly at 25 per cent of the cost of the new machinery or plant and was available for ships as well. While this rate of 25 per cent was adequate for new plant and machinery in general, some further concession was necessary for the shipping industry. The rate of development rebate for ships is raised to 40 per cent. Simultaneously, the conditions for the grant of development rebate has been tightened as some instances of abuse of this concession have come to notice.

In addition to these, the Finance Bill contains some amendments relating to Income-Tax Law, some of which are intended to check evasion while some others are only of a clarificatory nature. To mention the more important of them : The definition of "technician" is made stricter to ensure that the exemption is not secured to a person who is not legitimately entitled to it. Power has been conferred on the Central Board of Revenue to make rules laying down the basis for valuing perquisites in kind, like rent-free quarters, free use of conveyance, etc., so that some uniformity is secured in the basis of assessment.

Wealth Tax : There is a change in regard to the exemption from tax of payments made to employees for leave passages. Such exemption is now granted only if the payments are made under certain rules framed by the Government. This leads to a large volume of administrative work not commensurate with the results and these rules are proposed to be withdrawn.

In regard to the Wealth Tax, the only change proposed is to exempt a foreign citizen from payment of the tax on his foreign wealth, even though he may be resident or ordinarily resident in India.

This was the intention of the Select Committee when the provisions of the Bill were discussed by them but the intention has not been secured by the language of the provision as it now stands.

INDIRECT TAXATION

Union Excise Duties : In regard to Union excise duties the only major change is the increase in the rate of duty on cement from Rs. 20 per ton to Rs. 24 per ton. This increase will not, however, raise the issue price of cement as it is proposed simultaneously to withdraw the surcharge at present levied by the State Trading Corporation. The additional revenue of Rs. 2-24 crores will be utilised for road development.

Certain minor amendments, mainly of a clarificatory nature, are also being made. Two changes made immediately by notification are : Firstly, for powerlooms producing cotton textiles the concession of paying duty at compounded rates will no longer be available to establishments having more than 100 looms. Simultaneously, the compounded rates applicable to units having 25 to 100 powerlooms are being suitably enhanced in two stages. This would bring in an additional revenue of Rs. 83 lakhs. Secondly, the rate of duty on vegetable products is lowered for the first 3,000 tons cleared by each factory. This would give substantial relief to the smaller producers and will cost the Exchequer Rs. 24 lakhs per annum.

Customs Duties : Coming to customs duties, only a few minor adjustments and verbal changes are made in the tariff schedule to remove some anomalies or doubts. The only change of any significance is the introduction of the alternative *ad valorem* rate of duty in respect of expensive varieties of artificial silk yarn, like nylon, perlon, etc. So far as the other yarns, such as viscose, are concerned, the rate of duty is left unchanged. The financial effect of these changes will be negligible.

NET EFFECT

The net effect of the taxation proposals may now be summarised. The tax on gifts will bring in Rs. 3 crores, the changes in the Estate Duty Rs. 50 lakhs, the increased duty on cement Rs. 2-24 crores and the adjustments in the Excise Duty on cloth Rs. 83 lakhs, a total sum of Rs. 6-57 crores, of which Rs. 50 lakhs will accrue to the States.

The reduction in the Excise Duty on vegetable products will involve a loss of Rs. 24 lakhs leaving the net additional revenue at Rs. 5-83 crores.

LAND REVENUE

The principle underlying the land revenue system in the country has been from time immemorial on the basis that government is the supreme landlord and the revenue derived from land is by way of rent. The official term for the method of collection is "Settlement". These were of three types. The permanent *Zamindari* System was mainly found in the Bengal area, Bihar, the

U.P. and parts of Madras and covered roughly an area of 120 million acres equivalent to 19 per cent. of the total agricultural area of the sub-continent. In the second group were the temporarily settled Zamindars such as *Malguzari*, *Maharwari*, *Rhoti*, *Naradari*, *Bhagdari*, *Inami* and *Talagdari*. These were found mostly in Madhya Pradesh, the Punjab, parts of U.P., the Bengal area and Bombay covering about 30 per cent. of the area of the country. The remaining 51 per cent. or approximately 285 million acres were under the *Ryotwari* system covering parts of Bombay and most parts of Madras, Berar, Assam and the Punjab area.

Most Governments have abolished the *Zamindari* system. To Madras goes the credit of being the first State to put a measure of this kind on the statute book. The Madras Bill received the assent of the Governor-General early in April, 1949. The validity of the *Zamindari* Abolition Acts was contested in the various State High Courts and the Supreme Court so much so that the Constitution Act itself was amended to make such bills valid.

Land revenue was the mainstay of provincial finance till 1938-39 and still continues to be an important source of revenue.

Following the Planning Commission's recommendations, several State Governments introduced better charges in 1951 on land for which new facilities by way of irrigation were made available.

EXCISE

The excise revenue in the country can be classified into two divisions—one derived from the Central Excise Duties and belonging to the Central Government's finance and the other derived from the manufacture and sale of intoxicating liquors, hemp drugs, toddy and opium. The latter is a provincial revenue. The budget for 1956-57 estimated the revenue at Rs. 170.45 crores. These duties are at present levied on motor spirit, kerosene, sugar, matches, steel ingots, tyres, tobacco, vegetable product, betel-nut, coffee, tea, cotton cloth, cement, art silk fabrics, footwear, soap, coal cess, etc. In accordance with the recommendations of the Finance Commission, the States are given a share in the excise duty on matches, tobacco and vanaspathi.

The Budget of the Government of India for 1944-45 brought in force important changes in the field of Central Excises. It raised the rates of duty on unmanufactured tobacco and on cigars and cheroots and included in the Central Excise Tariff betel-nuts, coffee and tea.

A further change in respect of tobacco was proposed in the following year. Accordingly, the highest class of flue-cured tobacco in the excise tariff was subdivided into three and subjected to a duty of Rs. 7-8, Rs. 5 or Rs. 3-8 per lb., according as it was intended for use in manufacturing cigarettes containing more than 60 per cent., more than 40 but not more than 60 per cent. or more than 20 but not more than 40 per cent. by weight of imported tobacco. In order to avoid double incidence, some of the provincial Governments reached an agreement with the Centre by which they withdrew the provincial excise duty on tobacco in lieu of a share in the proceeds from the Centre's tobacco excise. Tobacco excise has been responsible for nearly half the receipts under Central Excise Duties.

The provincial excise revenue in the country is derived from the manufacture and sale of intoxicating liquors, hemp drugs, toddy and opium. The excise revenue has been pushed into the background by the prohibition policy of the State Governments.

The following are the details of revenue from Union excise duties in lakhs of rupees:—

(In Lakhs of Rupees)

Basic Excise Duties.	1956-57 Accounts	1957-58 Budget	1957-58 Revised	1958-59 Budget
Motor Spirit	25.23	32.50	29.60	32.00
Kerosene	3.29	3.00	3.30	3.45
Sugar	20.88	37.70	37.62	42.00
Matches	10.05	15.41	14.30	15.33
Steel Ingots	64	5.65	5.93	6.66
Tyres and Tubes	6.15	5.70	6.30	6.30
Tobacco	38.43	40.98	42.48	42.64
Vegetable Products	4.35	3.50	4.00	4.20
Coffee	1.20	1.20	1.25	1.30
Tea	3.19	4.00	4.40	4.40
Cotton Cloth	51.86	72.00	61.49	58.56
Artificial Silk	1.03	80	80	80
Cement	2.55	8.50	9.06	11.36
Footwear	99	90	98	98
Soap	1.85	1.60	1.85	1.85
Woolen Fabrics	61	60	60	60
Electric Fans	32	28	40	45
Electric Bulbs	28	30	30	30
Electric Batteries	80	84	81	81
Paper	3.27	5.15	5.00	5.20
Paints and Varnishes	1.17	1.10	1.10	1.10

Cess on Copra		8	7	7
Cess on Oils and Oil-seeds	15	20	20	15
Miscellaneous	1.21	55	51	51
Total Gross Revenue	1,92.75	2,61.82	2,55.80	2,64.45
Deduct—Refunds and Drawbacks	— 2.32	— 2.25	— 3.35	— 4.00
Total-Net Revenue	1,90.43	2,59.57	2,52.45	2,60.45
Additional Excise Duties				
Sugar			3.55	12.18
Textiles			6.39	21.90
Tobacco			2.16	7.40
Total			12.10	41.48
Grand Total—Union Excise Duties	1,90.43	2,59.57	2,64.55	3,01.93

CUSTOMS

The import tariff is cast in the form of a commodity schedule with broad distinctions indicating the treatment to be accorded to various classes of articles. The general rate of import duty is now about 35 per cent. On certain non-essential items where it is felt that the consumer can well pay a higher rate or where there is sufficient indigenous production to meet the country's needs, higher rates of duty are imposed. Certain items subject to protective duties and certain other items are declared duty-free or are subjected to a low rate of duty, in the interest of the indigenous industry or the economy of the country. Some items which are subjected to the heaviest rates of duty ranging from 75 to 200 per cent are tobacco manufactures, wines and spirits, artificial silk goods, gold-plated articles, fabrics containing gold or silver thread, socks and stocking of silk or art-silk, boots and shoes, parasols and sunshades, gold and silver thread manufactures, silver thread and wires, motor cars, clocks and watches, etc. In the case of protected items of which the more important are some chemicals, certain coal tar dyes, matches, silk and art silk fabrics, aluminium, cycles and certain items of machinery and parts, ball bearings, titanium dioxide, power and distribution transformers, the rates of duty are fixed at such amounts and for such periods as are found necessary having regard to the recommendations of the Tariff Commission. Grains and pulses and a number of raw materials for industry are on the free list, while specially

low but varying rates of tax cover a large number of essential items like fuel oils, batching oils, lubricants, raw flims, machinery, etc. Since 1954 the Government has been progressively following a policy of liberalising import controls and simultaneously raising the import duties.

Export duties cover a number of items of which tea is the most important. Duty on tea is levied on a slab system depending upon the price notified by the Government from time to time in the light of the market trends. The Government continue to keep under constant review the effect of such duties on the country's export trade and recently, in certain cases, duties have either been altered to improve the competitive position of the commodities concerned in world markets. At present export duties cover cotton, cotton waste, tea, manganese ore, some oils and oilseeds, deoiled groundnut meal and certain oilcakes.

Steps have been taken to meet the difficult balance of payments position. Drastic cuts have been made in the imports of consumer goods, and strict vigilance is being exercised in respect of the licensing of imports including imports of capital goods. Efforts are being made simultaneously to secure external assistance and deferred payment terms for projects in both the public and private sectors having high priority and likely to save foreign exchange.

As regards customs duties, only a few minor adjustments and verbal changes have been made

in the Tariff Schedule to remove some anomalies or doubts. The only change of any significance is the introduction of the alternative *ad valorem* rate of duty in respect of expensive varieties of artificial silk yarn, like nylon, perlon, etc.; so far as the other yarns such as viscose are concerned, the rate of duty is being left unchanged. The financial effect of these changes will be negligible.

The trend of revenue from customs is given below:—

Year	(Rs. in lakhs)
1950-51	157.15
1951-52	231.69
1952-53	173.75
1953-54	158.71
1954-55	184.87
1955-56	166.70
1956-57	173.23
1957-58 (Revised)	183.00
1958-59 (Budget)	170.00

INCOME-TAX

Income-tax is levied now not only on income as ordinarily understood but also on certain capital receipts which have been included in a special definition of "income." Tax at the rate fixed for the year of assessment is charged on the income of the "previous year." Both income-tax and super-tax are levied according to the slab system.

The more recent trend of collections is given below:—

1949-50 (Accounts) ..	Rs. 161.11 crores
1950-51 (Accounts) ..	173.22 ..
1951-52 (Accounts) ..	187.60 ..
1952-53 (Accounts) ..	185.23 ..
1953-54 (Accounts) ..	164.38 ..
1954-55 (Accounts) ..	159.59 ..
1955-56 (Accounts) ..	168.40 ..
1956-57 (Accounts) ..	202.92 ..
1957-58 (Revised) ..	206.40 ..
1958-59 (Budget) ..	217.00 ..

While the Corporation tax accrues in its entirety to the Centre, the net proceeds of income-tax, except the tax attributable to Central emoluments and Union territories and any Central surcharge, are divisible between the Centre and the States. Sixty per cent of the net proceeds of such income-tax is paid to the States.

States' share for the first seven months* and the last five months† of 1956-57 was distributable as follows:

Andhra 5.49, Assam 2.25, Bihar 9.75, Bombay 17.50, Hyderabad 4.50, Madhya Bharat 1.75, Madhya Pradesh 5.25, Madras 9.56, Mysore 2.45, Orissa 3.50, PEPSU 0.75, Punjab 8.25, Rajasthan 3.50, Saurashtra 1.00, Travancore-Cochin 2.50, Uttar Pradesh 15.75 and West Bengal 11.25.

For the last five months:

Andhra Pradesh 8.09; Assam 2.25; Bihar 9.40; Bombay 19.10; Madhya Pradesh 5.14; Madras 8.03; Mysore 5.99; Orissa 3.50; Punjab 4.00; Rajasthan 3.51; Kerala 3.84; Uttar Pradesh 15.75; West Bengal 11.60.

From 1957-58 onwards, the States' share of income-tax would be such as is prescribed by the President by Order in accordance with the recommendations of the Finance Commission. (See next article entitled 'Report of the Finance Commission, 1957').

The Income-Tax Investigation Commission submitted its report on the existing law of income-tax towards the end of 1948 and the same was published towards the end of 1949. A summary of the principal recommendations were given in a previous edition.

Substantial reductions in the levels of personal taxes, both earned and unearned, were proposed by the Finance Minister in the Finance Bill, introduced in the Lok Sabha on May 15, 1957.

The Bill specifies a basic schedule of taxes applicable to earned incomes in general. This is slab-for-slab lower than the existing schedule, both in respect of income-tax and super-tax.

If an individual has an unearned income, income-tax and super-tax will first be calculated in accordance with the basic schedule, and to this amount a separate unearned income surcharge will be added. This unearned income surcharge will be calculated at 20 per cent. of the tax on the unearned portion of the income, it being assumed for the calculation that this portion occupies the top brackets of the assessee's income.

No surcharge will be levied if the taxable income is below Rs. 7,500 in the case of an individual and Rs. 15,000 in the case of a Hindu undivided family.

GUIDE TO TAXES ON INCOME (1958-59)

The following table gives the rates of tax (income-tax, super-tax and surcharge included) in 1956-57 and the rates applicable to 1958-59 in percentages:

Slabs of income	1956-57	Earned	Unearned
0 - 1,000	nil	nil	nil
1,001-2,000			
(A) Married individuals and Hindu undivided families	nil	nil	nil
(B) Others	4.91	3.15	3.6
2,001-3,000			
(A) Married individuals and Hindu undivided families:	4.91	nil	nil
(B) Others	4.91	3.15	3.60
3,001-5,000	4.91	3.15	3.60
5,001-7,500	11.48	6.3	7.20
7,501-10,000	14.76	9.45	10.80
10,001-12,500	21.33	11.55	12.20
12,501-15,000	21.33	14.70	16.80
15,001-20,000	20.25	18.90	21.60
20,001-25,000	32.81	31.50	36.00
25,001-30,000	45.94	42.00	48.00
30,001-40,000	45.94	47.25	54.00
40,001-50,000	59.06	57.75	66.00
50,001-60,000	65.60	63.00	72.00
60,001-70,000	72.19	68.25	78.00
70,001-80,000	75.47	73.50	84.00
80,001-90,000	78.75	73.50	84.00
90,001-100,000	82.03	78.50	84.00
100,001-120,000	85.31	77.00	84.00
120,001-150,000	88.61	77.00	84.00
Over Rs. 1,50,000	91.87	77.00	84.00

COMPANY TAX

Classes of Companies	1956-57		Applicable to 1958-59	
	Income tax and Surcharge	Corporation tax	Income tax and Surcharge	Corporation tax
1. Companies which have made prescribed arrangements for the declaration and payment in India of dividends, and for the deduction of super tax from dividends paid to non-resident shareholders:				
(A) Companies in which the public are substantially interested with total income not exceeding Rs. 25,000/-				
(i) On dividend income derived from a subsidiary Indian company	26.25	11	31.5	10
(ii) On the balance of income	26.25	11	31.5	15
(B) Other Companies:—				
(i) On dividend income derived from a subsidiary Indian company	26.25	17	31.5	10
(ii) On the balance of income	26.25	17	31.5	20
2. Companies which have not made the prescribed arrangements referred to in (i) i.e. foreign companies:				
(i) On dividend income derived from a subsidiary Indian company	26.25	20	31.5	10
(ii) On the balance of income	26.25	36	31.5	30

* Pre-reorganization.

† Post-reorganization.

CORPORATION TAX

Rates of corporation tax for Indian companies on bonus shares or excessive dividend distributions.

	1956-57 rates	Applicable to 1958-59
On bonus shares	12½	30
On dividends distributed not in excess of 6 per cent of the paid-up capital ..	nil	nil
On dividends distributed between 6 and 10 per cent of paid-up capital	12½	10
On dividends distributed over 10 per cent of paid-up capital	25	20

ESTATE DUTY

The question of levying an estate duty had been before the Government of India since 1946 when a bill was first introduced. This as well as the one introduced in 1948 lapsed. In August 1952, a third bill was introduced with the object of imposing an estate duty on property passing or deemed to pass on the death of a person. The underlying idea is to rectify to a large extent unequal distribution of wealth and to assist the States towards financing their development schemes. The Bill was passed in Parliament in September 1953. The Act came into effect from October 15, 1953 and is applicable to the whole of India, except the State of Jammu and Kashmir.

The main features of the Act are that the levy of duty depends on the domicile of the deceased, the power to assess duty is vested in the Controller of Estate Duty, and the scale of duties is stipulated in the law itself. The Estate Duty proceeds go almost entirely to the States and do not affect the Central Budget. Pending the recommendations of the Finance Commission, a provisional distribution is being made on the basis of the States' share of Income-tax. The Commission in their Interim Report have also recommended the distribution of Estate Duty for 1957-58 on the same basis, pending re-adjustment in the light of their final recommendations. Like the Income-tax law, this legislation also provides for exemption limits and defines what items are eligible for exemption and to what extent.

The minimum exemption limit provided in the Act is Rs. 50,000 in respect of property which consists of an interest in the joint family property of a Hindu family governed by the Mitakshara, Marumakkattayam or Aliyasantana Law as well as in respect of all other property. The rates of duty are given below :—

Principal Value of Estate.	Rate of Duty.
<i>In the case of Joint Hindu Family property governed by Mitakshara, etc., law :</i>	
On the first Rs. 50,000	Nil
On the next Rs. 50,000	5%
On the next Rs. 50,000	7½%
On the next Rs. 50,000	10%
On the next Rs. 1 lakh	12½%
On the next Rs. 2 lakhs	15%
On the next Rs. 5 lakhs	20%
On the next Rs. 10 lakhs	25%
On the next Rs. 10 lakhs	30%
On the next Rs. 20 lakhs	35%
On the balance	40%

Principal Value of Estate.

Rate of Duty.

In the case of property of any other kind :

On the first Rs. 50,000	Nil
On the next Rs. 50,000	7½%
On the next Rs. 50,000	10%
On the next Rs. 1 lakh	12½%
On the next Rs. 2 lakhs	15%
On the next Rs. 5 lakhs	20%
On the next Rs. 10 lakhs	25%
On the next Rs. 10 lakhs	30%
On the next Rs. 20 lakhs	35%
On the balance	40%

In the case of shares held by a deceased member in any such company referred to in sub-section (1) of Section 84. If the principal value of the shares does not exceed Rs. 5,000 **Nil**
If the principal value of the shares exceeds Rs. 5,000 **7½%**

GIFT TAX

The value of gifts made during a previous year (which is the same as for income-tax assessments) is the subject of charge; gifts are valued normally at the market value of the property as on the date of the gift. The taxable gifts made during five previous years immediately preceding the assessment year (excluding gifts made before the 1st day of April 1957) are aggregated and the rate applicable to the aggregated value is the rate at which tax is charged on the value of the gifts made during the previous year. The rates of tax are :

On the first Rs. 50,000—4 per cent, on the next Rs. 50,000—6 per cent on the next Rs. 50,000—8 per cent, on the next Rs. 50,000—10 per cent on the next Rs. 1,00,000—12 per cent on the next Rs. 2,00,000—15 per cent, on the next Rs. 5,00,000—20 per cent, on the next Rs. 10,00,000—25 per cent, on the next Rs. 10,00,000—30 per cent, on the next Rs. 20,00,000—35 per cent and on the balance—40 per cent.

SALES TAX

Sales tax is an alternative source of revenue consequent on the introduction of prohibition in the States. It is an important feature of the provincial revenues throughout the country. In West Bengal and Bihar the single-point sales tax has been favoured. Bombay switched over to the multi-point sales tax in 1953-54 but this has since been changed into a two-point sales tax.

REPORT OF THE FINANCE COMMISSION, 1957

THE report of the Finance Commission was submitted in September, 1957 and placed on the table of the Lok Sabha on 14th November, 1957.

Its recommendations had been accepted by the Government and were to take effect as from 1st April, 1957.

The Chairman of the Finance Commission was Mr. K. Santhanam and the members were: Mr. Ujjal Singh, Mr. L. S. Misra, Mr. M. V. Rangachari, and Dr. B. N. Ganguli.

It was set up in June, 1956.

Below we give a summary of the report.

The Finance Commission which was set up in terms of Article 280 of the Constitution was the second such Commission to be appointed.

The Commission had to consider (1) the distribution between the Union and the States of the net proceeds of taxes which are to be or may be divided, and the allocation of States' net share among the States; (2) the principles that should govern the grants-in-aid of the revenues of the States by the Centre, and the amounts of grants under Article 273 and the substantive portion of Article 275 (1) and (3) the modification, if any, necessary in the rates of interest and the terms of repayment of the loans made to the various States by the Government of India.

The taxes, regarding the allocation of which they had to make recommendations, were income tax, Union excise duties, estate duty, tax on railway fares and, additional excise duties proposed to be levied on a few commodities in lieu of sales tax by the States.

The recommendations of the Commission provide for a devolution of about Rs. 140 crores (not including the proceeds of the tax on railway fares amounting to Rs. 15 crores in a full year) a year as against an average sum of Rs. 95 crores received by the States under the first Finance Commission's recommendations in the five years ending March 31, 1957.

An integrated scheme of devolution is proposed, taking into account the needs of the States with due regard to the ability of the Union with its responsibilities for defence and national development, to transfer resources to the States.

In the recommended scheme a balance is maintained between devolution by transfer of shares of taxes and distribution by fixed grants-in-aid.

The Table below summarises what each State may expect to receive under the recommendations taken together in each of the five years beginning on April 1, 1957. The figures shown against shares of taxes are only estimates and indicate the order of the sums to be received; the actuals will vary from year to year.

(Rs. in crores)

State	Shares of Taxes	Grant under Article 273*	Grant under substantive portion of Article 275(1)	Total	Tax on Railway fares
Andhra Pradesh ..	8.50		4.00	12.50	1.31
Assam	2.75	0.45	4.05	7.25	0.40
Bihar	10.00	0.43	3.80	14.23	1.39
Bombay	14.75			14.75	2.41
Kerala	3.75		1.75	5.50	0.27
Madhya Pradesh ..	7.00		3.00	10.00	1.23
Madras	8.25			8.25	0.96

Punjab	4.25		2.25	6.50	1.20
Rajasthan	4.25		2.50	6.75	1.00
Uttar Pradesh .. .	16.25			16.25	2.78
West Bengal .. .	9.50	0.91	3.85	14.26	0.94
Jammu and Kashmir ..	1.25		3.00	4.25	
TOTAL	100.00	1.88*	37.55	139.43	14.81

* This is an average for five years of payments which will actually be made to the States in the three years ending March 31, 1960.

Grants-in-aid under Article 273 cease on the expiry of ten years from the commencement of the Constitution.

Note 1.—Assam will receive, in addition, a grant-in-aid of Rs. 40 lakhs under clause (a) of the second proviso to Article 275(1).

Note 2.—Under Section 74 of the States Reorganisation Act, the States of Bombay, Kerala, Madras and Mysore are entitled to receive during the three years ending 31-3-1960 the sums by which a prescribed percentage of their share of divisible Central Taxes may fall short of the average of the revenue gap grants guaranteed to the former Part B States of Saurashtra, Travancore-Cochin and Mysore now merged in them.

On the estimate of divisible Central Taxes adopted by the Commission, the sums due to Kerala and Madras will be marginal while Bombay and Mysore may receive sums of the order of Rs. 3½ crores and Rs. 1 crore respectively for all the three years.

It may be mentioned here that the Commission had submitted an interim Report in November 1956 to facilitate the transfer of resources from Centre to the States pending the final Report of the Commission.

The interim recommendations sought to maintain the existing position with the minimum of readjustments necessitated by the reorganisation of States and the financial integration of Jammu and Kashmir with India.

The Commission have stated that the decisions taken by the Government on the final Report

were to be put into effect from the fiscal year 1957-58 while all payments made on the basis of their interim Report were to be readjusted against the final payments.

INCOME-TAX

The details of the recommendations are as follows:

Under Article 270 of the Constitution, the Commission were required to make recommendations in regard to (a) the percentage of net

proceeds of income tax to be assigned to the States; (b) the distribution among them of the States' share; and (c) the percentage of the net proceeds which shall represent the proceed attributable to Union Territories.

As regards the percentage of net proceeds in any financial year of taxes on income other than agricultural income to be assigned to the States, the Commission felt that an increase from 65 per cent to 60 per cent was justified, in view of the unanimous desire of the States.

The net proceeds attributable to Union territories were fixed at one per cent of the net proceeds of the income tax.

The Commission held the view that the actual distribution of the share assigned to the States should be on the basis of population, thus altogether eliminating the factor of collection. However, they felt that such elimination of the factor of collection has to be by stages and hence they have proposed that the distribution of States' share should be 10 per cent on the basis of collection and 90 per cent on the basis of population as compared to 20 per cent and 80 per cent recommended by the first Finance Commission.

Fixed percentage shares based on the 1951 census figures of population were prescribed as below:

Percentage Recommended

State	Interim	Final
Andhra Pradesh ..	8.01	8.12
Assam	2.23	2.44
Bihar	0.31	0.94
Bombay	18.91	15.97
Kerala	3.60	3.44
Madhya Pradesh ..	5.09	6.72
Madras	7.95	8.40
Mysore	5.93	5.14
Orissa	3.46	3.73
Punjab	3.96	4.24
Rajasthan	3.47	4.09
Uttar Pradesh .. .	15.69	16.36
West Bengal .. .	11.48	10.08
Jammu and Kashmir ..	1.01	1.13

UNION EXCISE DUTIES

Prior to April 1, 1952, no duty of excise was shared between the Union and the States. However, the first Finance Commission recommended that with effect from 1952-53, 40 per cent of the net proceeds of Union excise duties on tobacco (including manufactured tobacco), matches and vegetable products be distributed among the States on the basis of population.

The second Finance Commission have recommended that to these three duties which are at present shared, should be added the duties on sugar, tea, coffee, paper and vegetable non-essential oils and the share of the States should be reduced to 25 per cent. The reduction in the share now allocated to the States out of the duties on tobacco, vegetable products and matches will be more than made good by the widening of the range of divisible duties and each State will receive a larger sum from this source than at present.

The Commission have recommended that 90 per cent of the States' share of Union excise duties should be distributed on the basis of population, the balance being used for adjustments.

Percentage Recommended

State	Interim	Final
Andhra Pradesh ..	8.02	9.38
Assam	2.58	3.46
Bihar	11.04	10.57
Bombay	13.59	12.17

Madhya Pradesh ..	6.17	7.46
Madras	8.54	7.56
Mysore	5.45	6.52
Orissa	4.17	4.46
Punjab	4.60	4.59
Rajasthan	4.34	4.71
Uttar Pradesh ..	18.00	15.94
West Bengal	7.49	7.50
Jammu and Kashmir	1.25	1.75

ADDITIONAL DUTIES

The Government of India, in consultation with the State Governments have decided that an additional duty of excise should be levied on mill made textiles, sugar and tobacco (including manufactured tobacco), in replacement of the

sales taxes now levied by State Governments, the net proceeds being distributed among the States, subject to the present income derived by each of the States being assured to it.

The Finance Commission was requested to suggest principles of distribution of this proposed tax among the States and the amount to be assured to each State.

The Commission have suggested that one per cent of the net proceeds from these be assigned to Union territories and 1½ per cent to Jammu and Kashmir.

The Commission have arrived at the share of individual States largely on the basis of consumption figures, using population as a correctional factor, as the data on consumption were found defective.

After deducting the shares of Union territories and Jammu and Kashmir from the proceeds of the duties, from the balance, according to the Commission, the following amounts are to be paid to the States to represent their "present income." Since the Commission were not sure whether to take all the commodities together or give separate figures for each they have made recommendations for the three commodities separately and for all of them together.

Amount Guaranteed to States

(Rupees in lakhs)

State	Mill made textiles	Sugar	Tobacco	The three combined
Andhra Pradesh ..	120	40	75	235
Assam	40	15	30	85
Bihar	80	30	20	130

Madras	7.26	7.43	9.53	7.74
Mysore	4.98	5.13	5.58	5.13
Orissa	3.32	2.87	3.21	3.20
Punjab	5.56	7.21	4.36	5.71
Rajasthan	4.36	4.81	3.59	4.32
Uttar Pradesh ..	18.19	15.63	16.13	17.18
West Bengal	8.51	8.65	7.31	8.31

ESTATE DUTY

Under Article 269 of the Constitution, estate duty on property other than agricultural land is to be levied and collected by the Union, but the proceeds, excepting those attributable to the Union territories, are to be assigned to the States. Estate duty was first levied in India in 1953. Pending Parliamentary legislation, the net proceeds were being provisionally distributed so far in the same ratio as the States' share of the divisible pool of income-tax.

The Commission have suggested one per cent as the share attributable to Union territories; the balance is to be apportioned between immovable property and other property in the ratio of the gross value of all such properties brought into assessment in that year. The sum thus apportioned to immovable property is to be distributed among the States in proportion to the gross value of the immovable property located in each State; the remainder is to be allocated among the States according to population.

The sum apportioned to property other than immovable property is to be distributed among States as follows :

Percentage Recommended

State	Percentage
Andhra Pradesh ..	8.76
Assam	2.53
Bihar	10.86
Bombay	13.52
Kerala	3.79
Madhya Pradesh ..	7.30
Madras	8.40
Mysore	5.43
Orissa	4.10
Punjab	4.52
Rajasthan	4.47
Uttar Pradesh ..	17.71
West Bengal	7.37
Jammu and Kashmir	1.24

RAILWAY FARES

As regards the tax on railway fares, the Commission were of the opinion that the share of a State from the proceeds of Railway fare tax should be as nearly as possible on the basis of the net proceeds of actual passenger travel on railways within its limits. Since correct data of State-wise passenger travel were not available, the Commission have estimated these figures on certain assumptions and apportion the tax on this basis as follows :—

Percentage Recommended

State	Percentage
Andhra Pradesh ..	8.86
Assam	2.71
Bihar	9.39
Bombay	16.23
Kerala	1.51
Madhya Pradesh ..	8.31
Madras	6.46
Mysore	4.45
Orissa	1.78
Punjab	8.11
Rajasthan	7.77
Uttar Pradesh ..	13.76
West Bengal	6.31

The net proceeds of the tax to be thus distributed shall be after deducting ½ per cent for proceeds attributable to Union territories.

GRANTS-IN-AID

The Commission have not made any change in the grants to the four jute growing States, viz., West Bengal, Bihar, Assam and Orissa in lieu of a share of the export duty on jute under Article 273, excepting for an adjustment of the grants to Bihar and West Bengal to take account of the transfer of certain areas from Bihar to West Bengal.

The sums prescribed were :

(Rs. in lakhs)

State	Amount
Assam	75.00
Bihar	72.31
Orissa	15.00
West Bengal	152.49

These grants will automatically cease at the end of the financial year 1959-60. To prevent dislocation of the finances of these States when the grants cease, the Commission have made suitable provision in their scheme of devolution but they specify that this should not be

constructed as giving support to the claim of these States for special compensation.

The Commission have tried to meet the requirements of the States by giving them shares of taxes but for most of them this devolution falls short of their total needs and the deficiency has been made good by grants-in-aid. Such grants recommended are much larger than in the past since the requirements of the States for

development were not fully taken into account previously.

On the assumption that in the five years ending March 31, 1962, revenue expenditure on development of the States would be on the same scale as in the Second Plan and considering the special circumstances of each State, the Commission have recommended grants without any condition for them as follows:

(Rupees in crores)

State	1957-58	1958-59	1959-60	1960-61	1961-62	Total
Andhra Pradesh ..	4.00	4.00	4.00	4.00	4.00	20.00
Assam	3.75	3.75	3.75	4.50	4.50	20.25
Bihar	3.50	3.50	3.50	4.25	4.25	19.00
Kerala	1.75	1.75	1.75	1.75	1.75	8.75
Madhya Pradesh ..	3.00	3.00	3.00	3.00	3.00	15.00
Mysore	6.00	6.00	6.00	6.00	6.00	30.00
Orissa	3.25	3.25	3.25	3.50	3.50	16.75
Punjab	2.25	2.25	2.25	2.25	2.25	11.25
Rajasthan	2.50	2.50	2.50	2.50	2.50	12.50
West Bengal	3.25	3.25	3.25	4.75	4.75	19.25
Jammu and Kashmir ..	3.00	3.00	3.00	3.00	3.00	15.00
TOTAL	36.25	36.25	36.25	39.50	39.50	187.75

For Bombay, Madras and Uttar Pradesh the shares of revenue accruing to them under the scheme of devolution proposed would enable them to meet their current as well as Plan expenditure and hence, no grants-in-aid were considered necessary for these States.

Principles recommended for determining grants to States were:—

- (i) The eligibility of a State to grants-in-aid and the amount of such aid should depend upon its fiscal need in a comprehensive sense. In a Union, in which the Centre and the States co-operate for planned development, grants-in-aid should subserve this end. Priorities and provisions in the plan itself should determine the fiscal needs for development for the period of the plan.
- (ii) The gap between the ordinary revenue of a State and its normal inescapable expenditure should, as far as possible, be met by sharing of taxes. Grants-in-aid should be largely a residuary form of assistance given in the form of general and unconditional grants.
- (iii) Grants for broad purposes may also be given. While they last, they should be grants-in-aid of revenues, but the States would be under an obligation to spend the whole amount in furtherance of the broad purposes indicated. Where these purposes are provided for in a comprehensive plan, there will be no scope for such grants.

UNION LOANS

In recent years there has been a phenomenal growth in the number and amount of loans given by the Government of India to the States; the outstanding amount of such loans increased from Rs. 43.97 crores on August 15, 1947 to Rs. 195.41 crores on March 31, 1957 and to about Rs. 900 crores on March 31, 1956.

The terms of repayment and the rates of interest vary widely among the loans. The rates

of interest have varied from 1 to 5 per cent, some being free of interest, and have been generally determined with reference to the redemption yield of Central loans of corresponding maturity period except when special concessional rates have been given. The large number of loans given and the wide variations in the rates of interest and the terms of repayment have introduced an avoidable complication in the financial relations between the Centre and the States.

In respect of loans which are given interest-free, the Commission have recommended that no modifications need be made. But they feel that the policy of giving loans interest-free or at concessional rates of interest is open to objection since such a concession conveys a wrong impression regarding the interest burden which has to be met and also because such concessions are not subject to Parliamentary control as no funds are voted to cover them.

In the case of loans given for rehabilitation of displaced persons, they have recommended that with effect from April 1, 1957, the State Governments should be required to pay to the Centre only the sums realised by them from the displaced persons on account of principal and interest, including arrears outstanding on that date.

Regarding the remaining loans they are of the opinion that the reasonable rate to be charged to the States by the Union should be 3 per cent and this rate should apply to all loans, irrespective of the period of maturity. They have recommended that the outstanding balances of loans carrying interest at 3 per cent and above should be consolidated for each State at 3 per cent.

For purposes of repayment, they should be split up into two categories: (a) the loans due to be repaid within a period of twenty years from April 1, 1957 should be consolidated into one single loan repayable at the end of fifteen years, (b) the rest, i.e., those repayable after twenty years from that date, should be consolidated into another single loan repayable at the end of thirty years. They have suggested

a similar consolidation of loans carrying interest at less than 3 per cent into two loans but carrying an average rate of interest of $2\frac{1}{2}$ per cent.

It is expected that the suggested scheme of consolidation will result in a reduction in interest charges of about Rs. 5 crores per annum for all the States together.

The Commission have also suggested that though the above recommendations apply only to the loans given between August 15, 1947 and March 31, 1956, they may be adopted for future years also.

This will mean that each State will get only two loans a year (one medium-term and one long-term), at a rate of interest approximating to the net cost of all Union borrowings in that period. In that case, it is suggested, that during the course of a financial year no regular loans but only ways and means advances be given which may be converted into two regular loans as indicated above at the end of the year.

IMPLEMENTATION

The recommendations of the Commission have been accepted by the Government excepting those relating to debts due from the States to the Centre which are still under consideration (December, 1957).

The Commission's recommendations fall into three categories, namely (i) those to be implemented by an order of the President, (ii) those to be implemented by law of Parliament and (iii) those to be implemented by executive orders.

The recommendations under Articles 270, 273 and 275 (1) of the Constitution fall in the first category and the necessary orders will be submitted to the President for approval.

The recommendations relating to the distribution of certain Union duties of excise between the Union and the States, the distribution among the States under Article 269 (2) of the Constitution of Estate Duty on property other than agricultural land and the tax on railway fares and the levy and distribution of additional duties of excise in replacement of sales taxes on certain commodities fall in the second category.

The Union Duties of Excise (Distribution) Bill, 1957 and the Estate Duty and Tax on Railway Passenger Fares (Distribution) Bill, 1957, giving effect to the recommendations of the Finance Commission relating to the distribution of certain duties of excise between Union and the States and the distribution among the States of the Estate Duty on Property other than agricultural land and the tax on Railway Passenger Fares were introduced in the Lok Sabha on December 12, 1957 and have since been passed by both Houses of Parliament.

The Additional Duties of Excise (Goods of special importance) Bill 1957 to provide for the levy and collection of additional duties of excise on certain goods and for the distribution of a part of the net proceeds thereof among the States and to declare those goods to be of special importance in inter-State trade or commerce has also since been passed by both Houses of Parliament.

The recommendations regarding loans have to be implemented by executive order. As mentioned earlier, this subject is still under consideration of Government.

THE CURRENCY SYSTEM

THE rising trend in currency circulation, which has been a characteristic feature since 1953-54 was somewhat halted during 1956-57. Over the year, money supply with the public, excluding State Governments' deposits with the Reserve Bank, increased by Rs. 129 crores to Rs. 2,313 crores as against a rise of Rs. 264 crores in 1956-57.

The two tables give the details of the course of money supply with the public and the factors contributing to it.

(Rs. in crores)

	Year ended March 31		
	1954-55	1955-56	1956-57
Currency with the Public (a).			
1. Note Circulation (b)	1,236.44	1,424.23	1,483.20
2. Circulation of rupee coin (c)	115.01	123.45	118.30
3. Notes and coin with Treasuries (d)	2.83	1.14	5.31
4. Cash on hand of scheduled, non-scheduled (e) and co-operative (f) banks	36.85	41.45	39.75

6. Variation in currency with the public (g)	+ 82.34	+ 193.82	+ 51.41
Deposit Money.			
7. Demand liabilities (excluding inter-bank demand deposit) of scheduled, non-scheduled (e) and co-operative (f) banks.	599.16	667.21	744.74
8. Other Deposits with the Reserve Bank (h) excluding balance held on I.M.F. Account No. 1	9.71	12.01	11.65
9. Deposit money with the public (7+8)	608.87	679.22	756.39
10. Variation in Deposit money	- 44.31	+ 70.37	+ 77.16
11. Money supply with the public (excluding small coin) (5+9)	1,920.63	2,184.31	2,312.89
12. Variation in money supply with the public (g) (6+10)	+ 126.65	+ 263.68	+ 128.57

NOTE: Figures have been revised to take into account the circulation of *Hali Sica* currency. (a) Money supply with the public does not take account of the inward or outward movement of currency and excludes small coin. (b) Figures are net of the return of about Rs. 43 crores from Pakistan awaiting adjustment. (c) Figures relate to the Indian Union. (d) Figures on the last day of the year. (e) From April 1952 figures of non-scheduled banks incorporated in and confined to Part B States included. (f) Cover reporting co-operative banks only. (g) Figures from October 1951 are net of adjustments of India notes returned from Aden. (h) Deposits of other Governments with the Reserve Bank have been excluded from Money Supply with the public; in earlier editions these have been enclosed.

SEASONAL VARIATION IN MONEY SUPPLY WITH THE PUBLIC

(Rs. in crores)

	Currency with the public	Demand liabilities of all banks	Other Deposits with Reserve Bank	Money supply with the public
October 25, 1952 to May 8, 1953	+ 103.1	- 18.2	- 0.2	+ 84.7
May 9, 1953 to September 25, 1953	- 124.6	- 2.6	- 0.4	- 127.6
September 26, 1953 to May 7, 1954	+ 155.0	+ 10.7	+ 5.8	+ 171.5
May 8, 1954 to September 24, 1954	- 96.8	+ 26.0	- 6.6	- 77.4
September 25, 1954 to May 6, 1955	+ 190.0	+ 31.8	+ 0.3	+ 222.1
May 7, 1955 to Oct. 28, 1955	- 32.1	+ 28.0	+ 0.9	- 3.2
Oct. 29, 1955 to May 11, 1956	+ 237.2	+ 26.5	- 0.1	+ 263.6
May 1956 to October 1956 Slack Season	- 95.7	- 7.8	- 1.7	- 105.1
November 1956 to April 1957 Busy Season	+ 149.5	+ 93.1	+ 1.7	+ 244.3

NOTE: Figures have been revised to take into account the circulation of *Hali Sica* currency.

CIRCULATION OF NOTES: The rising trend in currency circulation noticed since 1953-54 became more marked in 1955-56. But whereas in the previous two years notes alone accounted for the currency expansion, in the year under review, rupee coins and small coin accounted for 5 per cent. of the expansion. Active notes rose during the year by Rs. 190 crores, as against Rs. 91 crores in 1954-55 and Rs. 53 crores in 1953-54. Total Notes in circulation at the end of 1955-56 amounted to Rs. 1,424 crores and at the end of 1956-57 Rs. 1,483 crores.

* See also separate article, which follows.

Reintroduction of High Denomination Notes: The Reserve Bank of India commenced issuing new notes of the denominations of Rs. 1,000, Rs. 5,000 and Rs. 10,000 with effect from April 1954. The new notes are completely different in design, water-mark and colour scheme from the old high denomination notes.

Changes in the Form of Notes: Reserve Bank of India notes of the denomination of Rs. 100, with the numbers printed in red (instead of in black) were first issued from the Bank's offices at Calcutta and Madras in August 1953. The Government of India one rupee notes printed in purple, instead of the earlier grey colour, were first issued from the Bank's Bombay office in November 1953.

Hyderabad State Currency: According to the Hyderabad Coinage and Paper Currency (Miscellaneous Provisions) Act, 1953, the Hyderabad currency (*Hali Sica* currency) ceased to be legal tender with effect from April 1, 1955. But to enable the public exchange their holdings of Hyderabad currency for Indian currency, the Union Government had provided conversion facilities, first till March 31, 1956, and then extended them by a notification dated March 24, 1956, up to September 30, 1956 and thereafter up to the end of December 1956, after which the facilities were withdrawn. At the end of March 1956, the circulation of *Hali Sica* currency amounted to about *Hali Sica* Rs. 4.07 crores (or India Rs. 3.49 crores), as against *Hali Sica* Rs. 4.48 crores (or India Rs. 4.1 crores) on January 26, 1950.

Replacement of French Indian currency by Indian currency: As from November 1, 1954, the provisions of the Indian Coinage Act, 1906, the Reserve Bank of India Act, 1934 and the Currency Ordinance of 1940 were extended to the French establishments in India, consequent on the merger of these establishments with the Indian Union. Although the French currency ceased to be legal tender on April 30, 1955, the facilities for its exchange into Indian currency were available up to October 15, 1955. The total value of Indian currency issued in exchange for French currency amounted to Rs. 37 lakhs.

Decimalisation of Coinage: With a view to adopting the decimal system of coinage, a Bill to amend the Indian Coinage Act, 1906 was introduced in the Lok Sabha on May 7, 1955 and was passed on July 27, 1955. It came into force from April 1, 1957. As from that date, the rupee coin was divided into 100 equal units and the unit coin was designated as *Naya Paisa*. Thus 100 *naya paisa* will make one rupee. The old coins will continue to be legal tender for about three years after the introduction of the new coins.

The details regarding the denominations, dimensions, designs and metal composition of the new series of coins were given by the Government of India in a notification issued on May 14, 1956. The new series will have the following units: 1 *naya paisa*; 2 *naya paisa*; 5 *naya paisa*; 10 *naya paisa*; 25 *naya paisa*; 50 *naya paisa*; and 100 *naya paisa*.

CURRENCY CIRCULATION

During 1956-57, the total circulation of all forms of legal tender currency (notes, rupee coin and small coin) recorded an increase of about Rs. 54 crores against a rise of Rs. 201 crores in the preceding year.

The following table shows the circulation of currency :-

(Rs. in lakhs)

	At the end of		
	1954-55	1955-56	1956-57
Circulation—			
Notes	1,233.92	1,424.23	1,483.20
Rupee Coin	112.98	123.45	118.30
Total	1,346.90	1,547.68	1,601.50

NOTE: Figures are exclusive of *Hali Sica* currency.

Rupee Coin.—Since June 7, 1947, when all standard silver rupee coin had ceased to be legal tender, the 'rupee coin' in circulation in India has comprised (1) the Government of India one rupee notes issued from July 1940, (2) the quaternary silver rupees (of one-half fineness) issued between December 1940 and June 1946, and (3) the nickel rupees issued from June 1947.

During 1956-57 rupee coin in circulation receded by Rs. 4.3 crores to Rs. 117.83 crores and was the net result of a fall of Rs. 11.5 crores

in June-November and an increase of Rs. 7.3 crores in the remaining months. On April 4, 1956, the Reserve Bank received from the Government of India one rupee notes of the value of Rs. 5 crores, in terms of Section 36(2) of the Reserve Bank of India Act, against payment of legal tender value.

Small Coin.—The circulation of small coin recorded an increase of Rs. 45 lakhs in 1956-57 as compared with a rise of Rs. 1.5 crores in 1955-56. The following are the details:

**MOVEMENTS IN CIRCULATION OF SMALL COIN DENOMINATION-WISE
ABSORPTION (+) OR RETURN (—)**

	(Rupees in 000)

Total	— 3,16,62	— 1,14,02	+ 1,46,54	+ 45,08

* Since the inauguration of the Reserve Bank in 1935, silver half rupees have been included in statistics relating to small coin, including pure nickel half rupees introduced in May 1946. ** Including pure nickel four anna pieces introduced in May 1946. † Including nickel two anna pieces introduced in 1917-18. †† Nickel half anna pieces introduced in January 1942. § Including single pie pieces with a circular hole issued from February 1943.

EXCHANGE CONTROL

During 1956-56, the policy of gradual liberalisation of exchange restrictions, initiated in 1953-54, was continued: (1) On June 7, 1956, general permission was given for the transfer of Indian securities to persons resident in Nepal, though the export of such securities to Nepal was made subject to a licence from the Reserve Bank of India. (2) From June 15, 1955, authorised dealers were permitted to deal in foreign exchange other than U.S. dollars, Canadian dollars, pound sterling and Pakistan rupees. (3) Owing to the changes in the U.K. Control, the transferable account area was further extended to include Turkey. (4) From August 22, 1955, the Italian lira was included in the list of specified currencies and became a permissible medium for payments between India and the Italian Monetary Area. (5) All operations on the non-resident accounts of persons and firms, including

banks, resident in Portuguese territories in India, were made subject, with effect from October 25, 1955, to the prior approval of the Reserve Bank of India; and on November 10, 1955, a ban was imposed on the taking of Indian currency notes by travellers to Portuguese territories in India. (6) From November 25, 1955, travellers to Pakistan were permitted to take with them Pakistan currency notes up to Pakistan Rs. 100 per person per day. (7) In regard to invisible payments, the setting-in allowance was raised to Rs. 75,000 per family in the case of emigration to the dollar area and to Rs. 1.25 lakhs per family to any other non-sterling area country. The limit of jewellery which travellers could take was stepped up to Rs. 25,000 per person.

In the field of exchange control, during 1956-57, multilateral arbitrage facilities in certain European currencies were extended to Indian banks,

while there was a tightening of restrictions. The more significant changes were:

From June 21, 1956, authorised dealers in foreign exchange were permitted to enter into multilateral foreign exchange arbitrage arrangements with authorised dealers in Belgium, Denmark, Western Germany, France, Italy, Netherlands, Norway, Sweden and Switzerland.

From August 24, 1956 the full (100 per cent.) proceeds of import bills in respect of goods shipped from Egypt to India were required to be credited to the 'B' Account, so that the entire proceeds of Egyptian exports to India could be utilised in future for financing Egyptian purchase in India, or for making other local payments.

Permission was granted in the previous year to authorised dealers to deal in foreign exchange other than U.S. dollars, Canadian dollars, pound sterling and Pakistan rupee, at rates to be decided by market conditions. As from September 3, 1956, this freedom was extended to the U.S. and Canadian dollars. As in the case of other currencies all spot transactions between the banks and their customers and between authorised dealers were to be effected at or between the banks and their customers, and between authorised dealers were to be effected at or between the official buying and selling rates of the Bank of England. Authorised dealers were also permitted to deal in forward contracts at market rates.

As part of the measures to halt the drain on foreign exchange reserves, it was decided to withdraw as from January 1, 1957 the basic allowance of foreign exchange for purpose of travel abroad for pleasure or personal convenience.

From January 2, 1957, Austrian shilling was included in the list of specified currencies and became a permissible medium of payment between the 'scheduled territories' and Austria.

The ban imposed in 1956 on the taking out of Indian currency notes by travellers to Portuguese territories in India was lifted on March 19, 1957. Travellers proceeding to Portuguese territories were permitted to take with them Indian currency notes/coins not exceeding Rs. 10/- per adult per visit and Rs. 5/- per child per visit.

Since the end of the financial year, further restrictions have been imposed on invisible payment, particularly those pertaining to travel in respect of business, education and health. Government also cancelled with effect from June 27, 1957 the facility of remittance to foreign countries through money order.

BALANCE OF PAYMENTS—CURRENT ACCOUNT

1953-54 ..	Nil
1954-55 ..	Nil

* See also separate article on decimal coinage and also under article on currency.

DECIMAL COINAGE

DECIMAL coins were introduced in India with effect from 1st April 1957.

Current coins will continue to be legal tender for about three years after the introduction of the new coins.

During this period they will be gradually withdrawn from circulation.

The rupee coin is divided into 100 equal units and the unit designated Naya Paisa. Thus 100 naye paise make one rupee.

The new series have the following units: one naya paisa, two naye paise, five naye paise and ten naye paise.

Later twenty-five naye paise, fifty naye paise and the new rupee coins will be issued.

The new coins are issued to the public through the Reserve Bank, the State Bank offices, treasuries and sub-treasuries.

GOVERNMENT ACCOUNTS

Government accounting with effect from 1st April, 1957 has been in terms of rupees and naye paise.

The State Bank and joint stock and co-operative banks also switched over to decimal accounting from 1st April 1957.

All chalans in support of money tendered in payment of Government dues are, therefore, being expressed in new coinage. Similarly, all bills for withdrawals are expressed in terms of rupees and naye paise.

The forms of bills, chalans and other books of account used by Government Departments are revised to provide only two columns to show rupees and naye paise separately. Until, however, the new forms and bills are printed, the existing ones will be suitably adapted for use.

A sum of Rupees 25 and five naye paise is written as Rs. 25.05 (and not Rs. 25.5): Rupees 25 and 50 naye paise as Rs. 25.50 (not Rs. 25.5); and Rupees 55 and 83 naye paise is written as Rs. 55.83.

For entering an amount of Rupees 25 and five naye paise, in forms providing for separate columns for rupees and naye paise, 25 are entered in the Rs. column and 05 in the naye paise column.

Amounts expressed in annas and pies are converted into whole numbers of naye paise according to the conversion table before they are entered in the books. The abbreviated form to be used for naye paise/paisa is nP.

Rounding off is made only at the stage when payment or tender of money takes place. In agreements, enactments, etc., where rates are specified, the rounding off should be made only in respect of the total amount payable, or receivable in a single transaction, and the amounts specified in rupees, annas and pies in financial sanctions, rules, orders, notifications, contracts, deeds or other enactments are automatically construed as expressed in terms of equivalent value under the decimal system without any rounding off.

While payment of Government dues is accepted in whatever currency it is made, every endeavour is made to make payment of Government dues only in new coins.

In order to enable the public to understand rightly the relationship of each new coin to the rupee the number of such coins required to make one rupee is indicated on the coins themselves. Thus the coin representing one naya paisa has a legend, "rupae ka sauwan bhag" (hundredth part of a rupee), embodied on it.

Similarly, 2, 5, 10, 25 and 50 naye paise units indicate that they represent 1/50th, 1/20th, 1/10th, 1/4th and one-half parts respectively of the rupee.

The design and composition of the new currency units are as follows:

The obverse sides of all the new coins have the design of the lion capital of the Asoka pillar with the terms "Bharat" in Hindi and "India" in English inscribed on them.

The reverse sides of all the new coins indicate the year in which the coins are produced and their value in naye paise specified in international numerals.

The 100 naye paise, 50 naye paise and 25 naye paise are of pure nickel while 10, 5 and 2 naye paise coins are of cupro-nickel alloy (75 per cent copper and 25 per cent nickel). The one naya paisa coin is of bronze.

After the people have got accustomed to the use of the new coinage and sufficient quantities of new coins have been put into circulation, the existing coins which continue to be legal tender after April 1, 1957, will be withdrawn.

The process of withdrawal is expected to extend over a period of about three years and there is no need for anyone to get panicky about the status of the existing coins when the new coins are put into circulation.

Coins of the denominations of two annas and under are being withdrawn first, as decimal coins of ten naye paise and below are put in

circulation in sufficient quantities at the initial stages.

According to the rate of exchange prescribed in the Indian Coinage (Amendment) Act 1955, there is no exact equivalent in naye paise in respect of coins of two annas and below and their change individually, or in combination with other coins, results in a small profit or loss in the aggregate to either of the parties exchanging the coins.

This element of profit or loss occurs so long as the existing coins continue to circulate, but it will diminish progressively as increasing quantities of new coins enter into circulation.

The public can, however, keep down to the minimum the element of profit or loss in exchange of coins by having their holdings of existing coins exchanged for new ones by tendering amounts in terms of four annas and multiples thereof, for which exact equivalents in terms of new coinage exist.

The treasuries have instructions to give new coins in exchange for existing coins only on this basis.

CONVERSION TABLE

The conversion table gives the exchange value in Naye Paise (rounded off in the manner prescribed in section 14 (2) of the Indian Coinage Act, 1955 as recently amended) for amount tendered in annas/pies coins. The exact Naya Paisa equivalent of the total amount to be converted is rounded off by ignoring fractions of $\frac{1}{2}$ Naya Paisa and below, and treating more than $\frac{1}{2}$ Naya Paisa as 1 Naya Paisa.

OLD COINS			NEW COINS		
Annas	Pies		Annas	Pies	Naye Paise
0	3	2	8	3	52
0	6	3	8	6	53
0	9	5	8	9	55
1 Anna		6	9 Annas		56
1	3	8	9	3	58
1	6	9	9	6	59
1	9	11	9	9	61
2 Annas		12	10 Annas		62
2	3	14	10	3	64
2	6	16	10	6	66
2	9	17	10	9	67
3 Annas		19	11 Annas		69
3	3	20	11	3	70
3	6	22	11	6	72
3	9	23	11	9	73
4 Annas		25	12 Annas		75
4	3	27	12	3	77
4	6	28	12	6	78
4	9	30	12	9	80
5 Annas		31	13 Annas		81
5	3	33	13	3	83
5	6	34	13	6	84
5	9	36	13	9	86
6 Annas		37	14 Annas		87
6		39	14	3	89
6		41	14	6	91
6	9	42	14	9	92
7 Annas		44	15 Annas		94
7	3	45	15	3	95
7	6	47	15	6	97
7	9	48	15	9	98
8 Annas		50	16 Annas		100

Rounding off as has been done in the conversion table is necessary only at the end of a transaction when any amount due in annas and pies is to be converted into Naye Paise.

You can make payment either in new coins or in old coins or by a combination of both according to the coins available with you.

The conversion table is, therefore, to be used only at the end of a transaction when payment has to be made or change has to be given.

BANKING

MODERN banking in India owes its origin to the British agency houses operating in Bombay and Calcutta in the eighteenth century. Then followed the Presidency banks in the latter half of the nineteenth century; as a result of their amalgamation, the Imperial Bank of India was brought into being in 1921 by a special Act. The next stage was marked by the establishment of the Reserve Bank of India on April 1, 1935. Fourteen years later on January 1, 1949, the Reserve Bank was nationalised. Its functions are now being broadened gradually: from the role of a "lender in the last resort" it has assumed the responsibility of being "the purveyor of credit" and is charged with the responsibility of developing the banking system on sound lines. On July 1, 1956, the State Bank of India came into being and the undertaking of the Imperial Bank of India was transferred to the new institution with the exception of the assets and liabilities of its foreign branches.

At the base of the banking system is the Reserve Bank with the State Bank as its agent. The edifice is made up of Indian joint stock banks other than the State Bank, foreign banks and co-operative banks.

The Banking Companies Act was enacted in 1949 with the object of improving the efficiency and the tone of the banking system. The main provisions relate to licensing of branches, requirements of minimum capital and reserves and maintenance of cash reserves. During 1952 the Banking Companies Rules were extended to more States and now apply to the entire country.

The policy of systematic inspections of banking companies irrespective of their size and standing, has been an aspect important of the Reserve Bank's supervisory activities. In pursuance of this, 211 banks were inspected during 1956, of which 27 were scheduled banks. Since March 1950, when inspections were commenced, 1,123 inspections have been carried out for various purposes.

The Reserve Bank of India (Amendment and Miscellaneous Provisions) Act, 1952, has enlarged

the scope of financial accommodation by the Reserve Bank for productive purposes and enabled the Bank to reintroduce high denomination notes.

In pursuance of a press note issued on December 20, 1954, the Government of India nationalised the Imperial Bank as a first step towards the establishment of a State Bank of India by amalgamating the Imperial Bank of India with a number of other banks already associated with some State Governments. The branches would be spread over the whole country thus improving remittance and rural credit supplies. The State Bank came into being on July 1, 1955. Another development was the establishment of a Bankers Training College in Bombay.

TRENDS

In 1956, the deposits of scheduled banks increased by Rs. 86.31 crores to Rs. 1,081.11 Crores. Out of this deposit expansion, Indian scheduled banks accounted for Rs. 67.89 crores. In the context of the sustained rise in deposits, the velocity of deposit money was 45.7, which was more than the levels for 1954 and 1951 of 42.6 and 45.2, respectively.

The 'own' funds of the scheduled banks in the shape of capital and reserves increased by Rs. 57 lakhs. Though this was five times the increase that took place in 1954, it still represented a less than proportionate rise compared to deposits. There was also a higher level of bank credit over the year as a whole. It showed an expansion of Rs. 155 crores.

During the year 1956, banking business as represented by advances and deposits was at a higher level than in 1955. Bank advances rose to a record level, assisted largely by the accretion to deposits and borrowings from the Reserve Bank of India and to a limited extent by the switch from other earning assets. As a result, the banks' investment portfolio as well as cash showed some fall over the year. Since the rate at which advances increased outstripped the rate of growth of deposits, the liquidity position of banks remained taut throughout the year without being much influenced by seasonal factors. This meant a

larger recourse on their part to borrowings from the Reserve Bank than in the preceding year. The scarcity of funds in the face of the accelerating demand for credit entailed greater competition amongst the banks to attract deposits which raised the cost of funds in the money market.

The prescription of higher margins and efforts at regulation of the aggregate level of advances against the specific commodities constituted the distinguishing features of the technique of selective credit control in 1956. The objective of the control was to restrain expansion of credit to certain sectors of the economy during certain periods without simultaneously affecting an increasing demand for productive credit. The indications were that this selective control policy was reasonably successful.

The scheduled banks had to rely heavily on the Reserve Bank to fill the gap between their resources and the main earning assets, i.e., advances. Even though the banks had drawn upon their cash assets and unloaded investments to meet the credit demand, these steps proved inadequate. The total of outstanding borrowings under Section 17(4)(a) and 17(4)(c) by scheduled banks in India increased by Rs. 56.3 crores over the year 1956 in contrast to only Rs. 20.4 crores in 1955 and in no week of the year did they fall below Rs. 27.5 crores. The gross borrowings at Rs. 904 crores were more than twice as much as in 1955 at Rs. 425 crores.

An interesting feature as regards the Bank's lending lately has been that, while hitherto the Indian banks had been the main borrowers under the Bill Market Scheme, in 1955, exchange banks exhibited considerable interest in the scheme. It is a reflection of the belief that the Indian money market is acquiring a greater degree of autonomy. Here, it will be of interest to note that some changes were made in the Scheme. With effect from March 1, 1956, the rate chargeable on advances under the Scheme was raised from 3 per cent to 3½ per cent and the concession so far granted to banks whereby the Reserve Bank shared the cost of the stamp duty involved in converting demand bills into usance bills was also withdrawn.

Number of offices outside India	105	106	107	106	100

RESERVE BANK

In pursuance of federal financial integration, the Reserve Bank entered in 1952 into agreements with three former 'B' States, Madhya Bharat, Travancore-Cochin and Mysore, whereby it became their sole banker.

In 1953, it concluded agreements with two more (all former States before reorganization)

Part 'B' States, namely, Hyderabad and Saurashtra whereby it became ultimately the sole banker to these States as it already was to all the Part 'A' and Part 'C' States.

The Bank advanced to scheduled banks a gross amount of Rs. 904 crores in 1956 against Rs. 425 crores in 1955 and Rs. 386 crores in

1954. A total amount of Rs. 467 crores was advanced in 1956 by the Reserve Bank for general banking purposes at the Bank rate against Government securities as compared with Rs. 200 crores in 1955. Loans under the Bill market scheme at $\frac{1}{2}$ per cent below the Bank rate aggregated Rs. 437 crores in 1956 against Rs. 325 crores in 1955.

The following table gives the position of the Reserve Bank over a period of years :—

EXCHANGE BANKS

The banks carrying on exchange business in India are merely branch agencies of banks having their head offices in London, on the Continent, in the Far East or the U. S. A. Originally their business was confined almost exclusively to the financing of the external trade of India; but now, most of them,

while continuing to play their main role, have also taken an active part in the financing of internal trade. Following the increase in the British bank rate to four per cent in March 1952, exchange banks found it more profitable to tap Indian deposits than to get funds from London. Over the year 1956 the deposits with

these Banks amounted to Rs. 189.66 crores as against Rs. 196.50 crores in 1955.

The earlier progress of Exchange Banks was tabulated in the previous editions. The more recent trends are summed up below :—

Liabilities and Assets of Foreign Banks in India

MONEY RATES IN INDIA

	1955	1956
Bank Rate*	3½	3½
State Bank (former Imperial Bank) Rates :		
Hundi Rate**	4½	4½-5
Advances Rate	4	4
Call Loan Rate—		
Rs. 5 lakhs and over	3½	3½
Below Rs. 5 lakhs ..	3½	3½
Bazaar Bill Rates † :		
Calcutta	10-12	10-12
Bombay	9½	9-10½
Call Money Rates :		
Calcutta	3½-2½	4½-3½
Bombay—		
Larger Banks	3-1½	3½-2½
Smaller Banks	3½-1½	3½-2½

* Bank rate was raised to 4 per cent on 18th May 1957. This is the standard rate at which the Reserve Bank is prepared to buy or rediscount bills of exchange or other commercial paper eligible for purchase under the Reserve Bank of India Act.

** The rate at which the State Bank discounts first class three months' commercial bills.

† Rates at which bills of small traders are discounted by shroffs. The quotations are unofficial.

Clearing Houses.—The Principal Clearing Houses in India are those of Calcutta, Bombay and Madras and of these the first two are by far the most important. In 1951-52 Clearing Houses were opened at Bareilly and Jaipur and are being managed by the State Bank of India. This brought the total number of Clearing Houses under the management of the State Bank to 35. In Bombay, a Metropolitan Clearing

Association was formed and registered in October 1946 to arrange for clearing for non-scheduled banks as the Bombay Bankers' Clearing House decided to restrict its membership and sub-membership only to scheduled banks.

The total number of cheques cleared has progressively risen since 1950, the amount which has shown a declining trend in 1952 and 1953, has been higher in 1954, 1955 and 1956.

The figures from 1951 onwards are shown in the table given below :

CLEARING HOUSE STATISTICS

ORGANISATION

During 1956-57, the number of scheduled banks remained unchanged at 89 and the number of offices increased from 2,898 in the previous year to 3,011.

It was stated that a landmark in Indian banking was the inauguration of the State Bank of India. An important statutory function assigned to the State Bank is the promotion of banking development through the establishment of an effective machinery of branches spread over the whole country, the number of branches to be opened within a period of five years or such extended period as the Central Government might fix, being 400.

The State Bank opened 58 branches in 1956-57 and 68 branches during 1957-58 up to December 1957.

The Reserve Bank Act was amended in Oct. 1957 to reduce the statutory minimum currency reserve to Rs. 200 crores*, of which not less than Rs. 115 crores should be held in gold coin and bullion and the balance in foreign securities.

Till then the Act prescribed a currency reserve of Rs. 115 crores of gold coin and bullion and Rs. 400 crores of foreign securities with a proviso permitting a temporary reduction of the latter to Rs. 300 crores.

To stimulate banking development, remittance facilities for co-operative and other banks were extended, according to the General Report of the Committee of Director of the All-India Rural Credit Survey. Until October 31, 1955, a scheduled or a State Co-operative bank could remit only once a week, an amount of Rs. 5,000 or a multiple thereof, from any place at which there was an agency of the Reserve Bank to any account which it maintained with the Bank, free of charge. But it was liberalised from November 1 onwards by permitting the remittance twice a week.

Under the Reserve Bank of India (Amendment) Act, 1955, the Bank set up, on February 3, 1956, the National Agricultural Credit (Long-

Term Operations) Fund with an initial sum of Rs. 10 crores. An annual contribution of not less than Rs. 5 crores for the five years commencing from June 30, 1956, is to be made towards this Fund. This Fund will make loans and advances to State Governments for subscribing to the share capital of co-operative credit institutions and to central land mortgage banks. The first loans of Rs. 8 lakhs was made by the Fund to the Government of Madras.

Another development during 1955 was the Bank Award and the Industrial Disputes (Banking Companies) Decision Act, 1955. It was in July 1955, the Bank Award Commission submitted its recommendations. The main recommendations were that (1) the Labour Appellate Tribunal's Award be restored with certain modifications in the case of all 'A' Class banks (Indian and foreign), all 'B' class banks, except the Bank of Bikaner and the United Bank of India, and certain 'C' class banks; and (2) the total exemption from the application of the Award to places with 30,000 or less population in the former Part B and Part C States (other than Delhi, Ajmer and Coorg) allowed in the Government's modified decision be altered and the exemption limited to such places in former Travancore-Cochin only and that too in respect of banks registered in that State, except the Travancore Bank for a period of two years from the date of announcement of Government's final decision on the Commission's Report. The Government accepted the recommendations and accordingly the Industrial Disputes (Banking Companies) Decision Act, 1955, was passed in September, enforcing the Award for a period of five years from April 1, 1954.

The year 1956 was significant not so much for the progress achieved by the banking system on the organisational side as for the heavy impact of the rising tempo of development on the operations of banks and the experience of a severe monetary stringency, which was in a

sense the culmination of trends in the economy first discerned in 1953 when the pace of economic development began to gather momentum.

It has been proposed to set up a Refinance Corporation, the main object of which is to help augment the resources available with the banking system for the use of medium-sized industrial units (i.e., units having resources upto Rs. 2½ crores) in the private sector. The Corporation's share capital is tentatively proposed to be made up of contributions from the Reserve Bank (Rs. 5 crores), the State Bank of India (Rs. 2½ crores), the Life Insurance Corporation of India (Rs. 2½ crores) and 14 other selected scheduled banks in India (Rs. 2½ crores). The allocation of share capital as between the 14 banks is in broad relation to the size of their deposits in India. The Government of India would be placing with the Corporation Rs. 20 crores from the counterpart funds arising out of the sale proceeds of the agricultural commodities supplied to this country in terms of the recently concluded Indo-U.S. Agreement. The Corporation will be allocating quotas to banks grouped into 4 categories with reference to the size of their deposits, from its total funds of Rs. 38.5 crores within which the banks may offer certain types of loans to the Corporation for obtaining refinance. Loans to be eligible for this purpose should have been made for periods between 3 and 7 years and to a medium-sized industry and for a medium-sized amount. Lending banks would assume the full credit risk on loans submitted to the Corporation and it is expected that the Corporation will adopt eligibility criteria which will be liberal. It is envisaged that the interest rate spread between the cost of discount with the Corporation and the prime lending rate of the banks might not be less than 1½ per cent. The scheme will thus provide an opportunity to selected banks for extending formal term lending facilities to industries and providing liquidity to the eligible paper offered by banks upto the extent of quotas which would be allotted to them.

STOCK EXCHANGE

THE earliest reference to stock broking in India dates back to the end of the 18th century when transactions in Government securities and the shares of the East India Company used to take place in Calcutta under a *neem tree*. Similar references are also available about business in shares in Bombay before 1840. The boom following the American Civil war gave a great impetus to this business.

The Native Share and Stock Brokers' Association of Bombay was formally constituted by an indenture dated December 3, 1887 and was recognised by the Government of Bombay for forward trading in shares under the Bombay Securities Contracts Control Act, 1925. Since then several attempts were made to start rival stock markets in Bombay, the latest one being the Indian Stock Exchange started in 1938.

The Government of India has so far (up to 17th December 1957) recognised five stock exchanges, namely, The Stock Exchange, Bombay, The Ahmedabad Share and Stock Brokers' Association, Ahmedabad, The Calcutta Stock Exchange Association Ltd., Calcutta, The Madras Stock Exchange Ltd., Madras and The Delhi Stock Exchange Association Ltd., New Delhi. The general principles regarding grant of recognition to a stock exchange as laid down in Section 4(1) of the Securities Contracts (Regulation) Act, 1956, has been followed. The Act does not envisage amalgamation, as such, of stock exchanges either before or after recognition is granted under section 4 thereof. Nevertheless, to avoid undue hardship to members of the exchanges which have not been recognised, the Government has prescribed certain terms and conditions on which active members of the unrecognised exchanges can seek admission to the recognised exchange.

The Government of India has given recognition to only one stock exchange in Bombay, that is, the Native Share and Stock Brokers' Association (now known as Stock Exchange, Bombay) under the Securities Contracts (Regulation) Act. The recognition has taken effect from 31st August 1957. Recognition was not given to the Indian Stock Exchange Ltd.

The members of the Indian Stock Exchange Ltd., were, however, entitled to apply for membership of the recognised Bombay Stock Exchange provided they fulfilled or complied with the specified terms and conditions. They were required to apply for membership before 15th October 1957; it was open to the Board of the recognised Stock Exchange to extend this period *in bona fide* cases and to consider the applications received after that date. Government further decided that section 13 of the Securities Contracts (Regulation) Act, 1956,

should apply to the Greater Bombay area in the State of Bombay with effect from 15th October 1957. The effect of the application of section 13 to the Greater Bombay area is that every contract in this area which is entered into after 15th October 1957, otherwise than between members of the recognised Stock Exchange or through or with such member, will be illegal.

Calcutta Association.—The Calcutta Stock Exchange Association was founded at No. 2, New China Bazar Road (now known as 2, Royal Exchange Place), Calcutta, with 150 founder members in 1908. Fifteen years later, it was registered as a limited liability concern. The Association is controlled and managed by a Committee and has a membership of 232 brokers.

The only registered institution in south India of brokers dealing in shares and securities is the Madras Stock Exchange Association, Ltd., registered in 1937.

During the boom period several stock markets were started at other industrial centres. These include Delhi and Kanpur.

The Ahmedabad Stock Exchange is also a registered body and recognised by the Government of Bombay under the Bombay Securities Contract Control Act.

There are also organised stock markets in Hyderabad and Indore.

SECURITIES ACT

The Securities Contracts (Regulation) Act, 1956, is the first All-India legislation seeking to control transactions on securities and to regulate stock exchange practices. Prior to this Act, there was no legislation for the purpose except in the old State of Bombay.

The Bombay Securities Contracts Control Act, 1925, was not, however, particularly effective because of two main shortcomings: (1) The Act made transactions outside a recognised stock exchange merely void but not illegal. (2) While the Act purported to control only forward business, it did not make a clear distinction between ready and forward transactions. To remedy these and other defects, the former Bombay Government enacted in 1947, the Bombay Forward Contracts Control Act; but this Act was not applied to securities presumably because Central legislation of this subject has been in contemplation.

But the outbreak of World War II came in the way of immediate legislation and it was only after the end of hostilities effective steps were taken in this direction, which resulted in the Securities Contracts (Regulation) Bill, intro-

duced in the Lok Sabha on December 24, 1954. It was largely based on the recommendations of the Gorwa's Committee appointed in June 1951. The Bill was referred to a Joint Committee of the Houses of Parliament towards the end of 1955. It submitted its report to Parliament on February 29, 1956. The Bill, as revised by the Joint Committee, was passed by the Lok Sabha, with some amendments, on July 16 and by the Rajya Sabha on August 6. It received the assent of the President on September 4, 1956.

Main Provisions

Broadly speaking, the Act applies to transactions other than spot delivery contracts. But power has been taken in the Act to regulate spot delivery contracts also, if the Government regards it as desirable in the interest of trade or in the public interest.

As regards contracts other than those for spot delivery, the regulation takes the form of either controlling the activities of stock exchanges in those areas or States where stock exchanges operate, or through a system of licensing of persons who deal in stocks and shares. In those areas where the stock exchanges operate and to which Section 13 of the Act will be applied, every contract which is entered into otherwise than between members of a recognised stock exchange in such State or area or through or with such members is illegal.

The Act permits only those stock exchanges to function which are recognised by the Central Government. For this purpose, each stock exchange is required to make an application in the prescribed manner to the Central Government, who will grant recognition if the Government is satisfied in regard to certain conditions. Every recognised stock exchange is required to furnish to the Central Government such periodical returns relating to its affairs as may be prescribed.

Subject to the previous approval of the Central Government, any recognised stock exchange may make bye-laws for the regulation and control of contracts. But the Government has the power to make or amend these bye-laws.

Important provisions relating to the listing of securities on a stock exchange are also contained in the Act. In regard to the licensing of dealers and brokers in securities, there are no detailed provisions.

So also no direct provisions are contained in the Act to restrict the prevalence of black transfer, but there is a provision to discourage black transfers indirectly.

MARKET TRENDS

Throughout the war period, the stock market was fed on a veritable boom caused by cheap money and inflation. The Index of Government securities moved up from 107.6 in August 1939 to 120.4 in 1946-47 and that of fixed yield industrial securities from 137.7 to 197.8 on the basis of 1927-28 quotations equal to 100. In the same period, the index of variable yield indus-

trial securities advanced from 98.5 to 268.6. In the following four years the economic uncertainty, post-partition riots and the general thinning of investment demand had an adverse effect on the stock markets and the capital values registered a marked depreciation. Thereafter a feeble recovery was noticeable but the volume of business continued to be at a low ebb

and even the Korean War in mid-1951 did not stimulate speculative excesses in industrial shares.

The table below based on the data collected by the Reserve Bank broadly indicates the trend in regard to paid-up capital of variable yield industrial shares quoted on the stock exchanges of Bombay, Calcutta and Madras and their market value in the post-war years 1948-51:—

(Rupees in lakhs)

	October 1948	31-3-1949	31-3-1950	31-3-1951
No. of Companies	779	833	829	827
Paid-up Capital	20,596	22,714	23,015	23,808
Market Value	40,563	37,933	35,400	43,367

(See also table on next page).

During 1951-52 the Stock Exchange turned downward following the evaporation of inflationary pressures and the debacle reached its nadir in March 1952 when the crash on the market, preceded by a heavy slump in commodities, resulted in the temporary closing down of the market.

The behaviour of the stock market during the financial year 1952-53 fitted the customary pattern of disinflation. With the general rise in interest rates, ideas of equity yields were revised in an upward direction and buyers turned more exacting in their demands for safety and liquidity of capital.

The equities market ruled buoyant during most of the years 1953-54 and 1954-55 in contrast to the weakness evinced during the previous year. The annual average index of variable dividend securities rose by about 20 per cent between 1953-54 and 1954-55. The Reserve Bank index for Industrials rose from 102.6 in March 1954 to 120.9 in September, and after declining to 113.7 in December, moved up to 115.4 in March 1955. On November 29, it touched the highest of the year at 131.9, but declined to 113.6 on January 1, 1956.

For the share market, however, 1955-56 was a memorable year. Buoyancy on a wide scale prevailed all through the year, and the index for Industrials touched the highest at 131.9 on November 26. But the boom ended with 1955, for January 1956 witnessed a heavy landslide in prices, in fact wiping out all the gains which the market made in 1955. The downward trend continued till the end of May. The slump was mainly due to the fact that the technical position was vulnerable. This was precipitated by the controversy over the States reorganisation and the violence that accompanied it, by the Ordinance nationalising life insurance, by the fears of further heavy taxation in the next budget including a ceiling on income and by the stock exchange legislation

before Lok Sabha. It was also reflected, in part, the markets' reaction to the enactment in April 1955 of the Constitution (Fourth Amendment) Bill, which made the issue of compensation for nationalisation non-justiciable.

The upswing in prices, which followed the short-lived reaction of January-February 1956, was carried somewhat further upto the end of August, the Reserve Bank's all-India index for variable dividend securities recording a modest rise from 124.6 at the end of March 1956 to 128.6 by 1st September—a level which was only slightly lower than the peak of 131.9 attained at the end of November 1955. The market's reaction to the Government's revised industrial policy, announced early in April 1956, was apparently not unfavourable. Sentiment was also favourably influenced by the expanded size of the Second Plan as compared with the First Plan. The firmness was also sustained by the prevailing optimism regarding the trend of company earnings and dividends and prospects of bonus issues and the new import policy for the half year ended December 1956, announced at the end of June, which provided for a further liberalisation of import of machinery and industrial raw materials. Textiles and steel shares were in the forefront of the advance; while the former group was aided, among other things, by rising domestic consumption, the latter group was favourably influenced by the prospect (since materialised) of an early grant of a \$75 million loan to the Tata Iron and Steel Company by the World Bank.

For the year as a whole, the market recorded a fall of 9.2 per cent, with the Reserve Bank's all-India index of variable dividend industrial securities (base: 1949-50 = 100) falling from 122.4 for March 1956 to 111.1 for March 1957. This decline contrasted with the successive net increases of 6.1 per cent, 12.5 per cent and 9.4 per cent recorded in the preceding three years. Region-wise, the Calcutta share market recorded

the largest decline of 4.8 per cent. The Madras market, however, recorded a small net rise of 0.4 per cent. These regional divergences arose mainly from the differences in the industrial groups traded at these centres.

In the gilt-edged market, the firm tendency which generally prevailed during 1955-56 was carried further upto about mid-June, mainly on sustained investment demand from non-bank institutional investors. On the other hand, scheduled banks, which were under severe pressure for funds, reduced their gilt-edged portfolio between March and June to the tune of Rs. 12 crores. The Reserve Bank's average index for Government of India securities (base: 1949-50 = 100) moved up from 90.7 in March to 91.1 in June.

For the year as a whole (1956-57), barring a few short dated loans which showed increases of 6 nP to 18 nP, most of the remaining issues recorded declines which were particularly marked in the long and undated issues. The 3 per cent Conversion Loan of 1946, which had declined by Rs. 3.81 in 1955-56, declined further by Rs. 2.50 to Rs. 2.56, and in the dated section the 3 per cent 1970-75 loan registered the maximum decline, of Rs. 1.88 which wiped out particularly the rise of Rs. 2.31 recorded in the previous year. In the case of State loans, the declines over the year ranged upto Rs. 1.63 in the case of the M.P. Loan 1967. Over the year, yields on Central Government securities hardened by about $\frac{1}{2}$ per cent. For instance, the 3 per cent 1970-75 Loan fetched an yield (to later redemption date) of 3.98 per cent at the year end, as against 3.75 per cent a year before. The yield (flat) of the 3 per cent Conversion Loan of 1946 also rose from 3.91 to 4.04 per cent. In the case of State loans also the rise in yields was about $\frac{1}{2}$ per cent. Thus the Andhra Loan 1968 fetched 4.24 per cent at the end of March 1957, as against 4.05 per cent at the time of its issue in September 1956.

From December 1946, the Reserve Bank of India started constructing indices of security prices. These indices (all-India) reveal the following trend:—

Average of Weeks	Government & Semi-Government Securities	Industrial Securities		Banks	Insurance	Investment Trusts	Electricity Tramways	Shipping and other Transport	Railways	Plantations	Cotton, Woollen and Silk Mills	Jute Mills	Coal	Mining and Oil	Iron and Steel	General Engineering	Sugar	Breweries	Chemicals	Paper	Cement
		Fixed Dividend	Variable Dividend

CAPITAL MARKET

Until the beginning of the Second World War the capital market had made a slow but steady progress; but its pace quickly accelerated during

the War period when the monetary inflation and the rising trend of industrial profits served as a first class stimulant to its growth which was spectacular. The post-war period has, however, served mainly towards consolidating the early gains. A broad idea of the expansion of the

market can be had from the fact that between 1938-39 and 1946-47, the interest-bearing obligations of the Government of India increased by Rs. 1,176 crores, while consent for the issue of capital was granted to the tune of Rs. 640½ crores from May 17, 1943 to March 31, 1947.

CAPITAL ISSUES

The previous year's brisk activity in the new issue market continued during 1955. The total amount of issues sanctioned by the Controller of Capital Issues increased from Rs. 111 crores in 1954 to Rs. 125 crores in 1955, the highest since 1948. There was also a larger rise in the total amount asked for in respect of applications decided, from Rs. 117 crores to Rs. 151 crores. Of this, industrial issues sanctioned were Rs. 98 crores while non-industrial issues obtained only Rs. 28 crores. Industry-wise, the largest amounts were sanctioned in respect of water transport (Rs. 19 crores), rayon manufacture (Rs. 13 crores) and petroleum refineries (Rs. 12 crores), followed by electricity (Rs. 9 crores) and cotton spinning and weaving mills and cement (Rs. 8 crores each). State-wise, Bombay* accounted for Rs. 57 crores and West Bengal Rs. 31 crores.

Of the amounts sanctioned, those for initial issues declined from Rs. 58 crores in 1954 to 47 crores in 1955; but those for further issues rose from Rs. 53 crores to Rs. 78 crores. On the other hand, the amount sanctioned for debentures declined from Rs. 20 crores to Rs. 17 crores, and that for bonus issues from Rs. 10 crores to Rs. 6 crores. One noteworthy feature of 1955 was the shift from ordinary shares and debentures to preference shares and miscellaneous issues. Ordinary shares declined from Rs. 77 crores in 1954 to Rs. 57 crores in 1955 and debentures from Rs. 20 crores to Rs. 17 crores,

while preference shares rose from Rs. 8 crores to Rs. 24 crores and miscellaneous issues from Rs. 6 crores to Rs. 27 crores.

Foreign participation was in evidence in respect of 123 companies for Rs. 22.5 crores as against 108 companies for Rs. 29 crores. Out of this, 20 initial issues accounted for Rs. 7 crores, 43 further new issues for Rs. 14.4 crores and 60 bonus issues for Rs. 1 crore. The share of residents in the U.K. was Rs. 7 crores and in the U.S. Rs. 5 crores.

The new issues market had yet another active year in 1955-57, with a not insignificant rise in volume. There also appears to have been a shift from debentures to preference and ordinary shares, judging from big issues. The important new issues made during 1955 included the ordinary shares of the Tata Iron and Steel Co. for Rs. 9.84 crores (issued at a premium of Rs. 3.86 crores) and of Associated Cement Companies for Rs. 6.36 crores (offered at a premium of Rs. 1.27 crores) and the 6 per cent (tax-free) cumulative preference shares, redeemable after 30th June 1963 and convertible into ordinary shares after 5 but before 10 years, issued by Hindustan Motors for Rs. 5 crores. The other large issues of Rs. 1 crore and above were the 5 per cent (taxable) debentures, 1960-65 issued by the Tata Locomotive and Engineering Co. for Rs. 1.50 crore, the ordinary shares for Rs. 1 crore and the 6 per cent (tax-free) cumulative preference shares, 1960-71 for Rs. 50 lakhs

issued by Saurashtra Cement and Chemical Industries, the ordinary shares of Voltas for Rs. 1.05 crore and the 6 per cent (tax-free) cumulative second preference shares, 1967 issued by Kesoram Cotton Mills for Rs. 1 crore.

Data regarding actual capital raised from year to year are not available. However, figures of capital subscribed and paid-up against the consents granted during the seven years 1950 to 1956 are available in respect of companies which have reported to the Controller of Capital Issues. The data of subscribed and paid-up capital give an encouraging picture. During the seven-year period 1950-56, new issues amounting to Rs. 632 crores were sanctioned, of which Rs. 481 crores were in respect of ordinary and preference shares issued for cash, Rs. 67 crores for bonus issues and Rs. 85 crores for debentures. Of these, data regarding capital raised are available only in respect of companies which were sanctioned Rs. 306 crores. As against Rs. 253 crores sanctioned for share capital against cash subscriptions, the amount subscribed and paid-up in respect of these companies was Rs. 206 crores and Rs. 170 crores, respectively, as at the end of 1956. As regards debentures, Rs. 49 crores were subscribed and paid-up, as against Rs. 56 crores sanctioned.

A significant development during 1955-56 was the enactment in February 1956 of a bill to extend indefinitely the Capital Issues (Continuance of Control) Act, 1947.

COMPANY LAW

In 1951 the Government of India appointed an expert committee, with Mr. C. H. Bhabha as Chairman, to suggest an overhaul of the Company Law. But trafficking in managing rights and cornering of shares in the open market with a view to acquiring control over the management of well-established and reputable companies for anti-social purposes had reached such proportions that Government decided to promulgate an Ordinance on July 21, 1951. On September 14, the Indian Companies Act was amended.

The Companies Bill, based largely on the recommendations of the Company Law Committee was introduced in Parliament on September 2, 1953 and was approved by Parliament on November 22, 1956. The Act came into operation on April 1, 1956.

The main features of the Act are:

(1) Equity shares with differential rights regarding voting, dividend, participation in capital on dissolution, are prohibited.

(2) It puts restrictions on inter-company loans and investments.

(3) There is a ceiling on overall managerial remuneration.

(4) Most decisions of the management and even of the Shareholders of a Company require the approval of the Government before they are put into effect.

(5) The appointment of a managing agent or an associate as a selling or buying agent outside India requires approval by a special resolution.

INDUSTRIAL FINANCE CORPORATION†

Under the Industrial Finance Corporation Act, a Corporation was established on July 1, 1948 to provide medium and long-term finance to public limited companies and co-operative societies registered in India, including the acceding States, and engaged in the manufacture or processing of goods or in mining or in the generation or distribution of electricity or any other form of power. Individuals, partnership firms or private limited companies are thus excluded from the purview of the Corporation's operations. With the setting

up of a number of State Financial Corporations, it was agreed that applicants for loans upto Rs. 10 lakhs or 10 per cent of the paid-up capital of the State Financial Corporation of the State in which they are situated, if that was lower than Rs. 10 lakhs, should be advised to apply not to the Industrial Finance Corporation but to the State Financial Corporation concerned. The authorised share capital is Rs. 10 crores, divided into 20,000 shares of Rs. 5,000 each, the paid-up capital being Rs. 5 crores in respect of 10,000 shares issued. To this issue, the Central Government and the Reserve Bank of India subscribed Rupees one crore each, the scheduled banks and financial institutions like insurance companies and investment trusts, Rs. 1½ crores each, and co-operative banks Rs. ½ crore. The paid-up value of the share capital and dividends on it at the minimum rate of 2½ per cent. per annum are guaranteed by the Government. The Board of Directors consists of thirteen members, of whom four are nominated by the Central Government and two by the Reserve Bank of India, and seven are representatives of scheduled banks, insurance companies, investment trusts and other financial institutions.

* Pre-organization.

† For possible later particulars see under Corporations under 'Late Particulars.'

The Corporation is authorised to borrow up to ten times the amount of its paid-up capital and reserve fund. When the Reserve Fund equals the authorised capital of Rs. 10 crores, the borrowing capacity of the Corporation will be Rs. 200 crores. The Corporation may also accept deposits for periods of not less than five years, but the total deposits accepted may not exceed Rs. 10 crores. It is empowered to provide financial assistance in the following ways:

(i) grant loans or subscribe to debentures of industrial concerns repayable within a period of 25 years secured by sufficient pledge, hypothecation or mortgage of tangible assets; (ii) underwrite the issue of stocks, shares and debentures; (iii) guarantee loans floated in the market repayable within a period not exceeding 25 years; (iv) lend to units engaged in "processing of goods"; (v) provide credit particularly to new industrial concerns which are not in a position to offer adequate securities but deserve encouragement from the point of view of national economy; and (vi) guarantee deferred payments by industrial concerns for equipment imported from abroad.

The Corporation is prohibited from subscribing directly to the shares or stocks of companies and is primarily a lender and not a partner in industry. Its policy is to finance the acquisition of fixed assets and thereby supplement rather than compete with the activities of commercial banks.

The Industrial Finance Corporation Act, 1948 and the State Financial Corporations Act, 1951 were amended by the Industrial and State Financial Corporations (Amendment) Act, 1955, which came into force on September 18, 1955. The amending Act provided, among other things, for a 'Central Committee' instead of an Executive Committee of the Board of Directors, and the appointment of a stipendiary Chairman to be assisted by a General Manager in place of the honorary Chairman and a paid whole-time Managing Director; for the grant of right to the Corporation to borrow from the Central Government, and to lease any property pledged or mortgaged to the Corporation; and for the removal, with the permission of the Central Government, of the seven-year limit in respect of the period up to which the Corporation may hold any stocks, shares, bonds or debentures in fulfilment of its underwriting liabilities. It also enabled industrial concerns, formed with the object of engaging in the manufacture or processing of goods, to become eligible for financial assistance even before they start production.

In September 1948 the Corporation started functioning with Mr. Shri Ram as Chairman and Mr. Ram Nath as Managing Director. In August 1949 the Corporation decided to augment its resources by issuing 3½ per cent. bonds repayable in 1964. The Act was amended with effect from December 29, 1952 in order to enable the Central Government to guarantee

loans in foreign currencies and in certain other respects, e.g., shipping companies are now eligible for loan from the Corporation.

Up to the end of June 1957 the Corporation sanctioned over Rs. 55.11 crores by way of loans. Amount sanctioned in 1956-57 alone aggregated Rs. 11.91 crores.

The break-up of the loans sanctioned by the Corporation from June 30, 1949 to June 30, 1957 is as follows (Rs. in lakhs):

Food Manufacturing (except Beverage) 1,631.00; Textiles 844.25; Artificial Fibres 110.00; Wood and Cork (except Furniture) 30.00; Paper and Paper Products 421.50; Rubber Products 15.50; Basic Industrial Chemicals including Fertilizers 751.00; Vegetables and Animal Oil and Fats 11.00; Miscellaneous Chemical Products 77.25; Glass and Glass Products 127.50; Pottery, China and Earthenware 64.25; Cement 377.00; Basic Metal Industries—Iron and Steel 23.00; Non-Ferrous Metals 117.00; Metal Products except Machinery and Transport Equipment 193.50; Machinery (except Electrical Machinery) 142.50; Electrical Machinery, Apparatus, Appliances & Supplies 170.70; Rail-Road Equipment 50.00; Motor Vehicles and Ancillaries 148.00; Bicycles 80.50; Manufacturing Industries 43.30; Electric Light and Power 82.75.

During the year the rate of interest charged by the Corporation on its loans and advances remained unchanged at 6½ per cent., as also the rebate at ½ per cent. on prompt payments. With effect from 23rd April 1957, the lending rate was raised to 7 per cent.

Net profit for year ending June 30, 1957: Rs. 12.25,000.

The Central Committee of the Board of Directors of the Corporation consists of the Chairman of the Board (who shall be the Chairman of the Committee), two Directors elected by the nominated Directors and two Directors elected by the elected Directors. The present composition of the Central Committee is: K. R. K. Menon (Chairman); S. C. Roy and *vacant* (elected by the elected Directors), S. P. Virmani and L. K. Jha (elected by the nominated Directors).

The present Board of Directors consists of: K. R. K. Menon (Chairman), V. P. Varde, S. V. Ramamurti, G. D. Ambekar, S. P. Virmani, L. S. Valdyanathan, S. C. Roy, M. Ct. Muthiah, S. K. Banu, R. M. Deshmukh, B. Venkatappaiah, M. R. Bhilde and L. K. Jha.

General Manager, H. V. Venkatasubbiah, Secretary, Dalip Singh.

STATE FINANCIAL CORPORATIONS

An Act to provide for the establishment of State Financial Corporations was passed in October 1951. The Act enables the State Governments to establish a Financial Corporation

for the State under a name to be specified by notification; and the State Government concerned, the Reserve Bank, scheduled banks, insurance companies, investment trusts, co-operative banks and other financial institutions will be entitled to subscribe to the share capital. Parties other than these can also be shareholders; but their aggregate holding will not exceed one fourth of the total capital. The shares allocated will not be transferable except to the State Government, the Reserve Bank or any other recognised financial institution.

The shares of the Corporation will be a trustee security under the Indian Trusts Act and an approved security under the Insurance and Banking Acts. The shares shall be guaranteed by the State Government in regard to the repayment of principal and the payment of annual dividend at such minimum rate as the State Government may, with the approval of the Central Government, fix by notification. The Corporation may issue bonds and debentures for increasing its working capital and accept deposits of not less than five years' maturity.

The management of the Corporation will vest in a Board of Directors composed of three nominated by the State Government, one by the Central Board of the Reserve Bank, one by the Industrial Finance Corporation of India, one each by scheduled banks, co-operative banks and other financial institutions and one to represent other shareholders. The Managing Director will be an ex-officio member of the Board. The first Board will be constituted by nominating the representatives of the various interests by the State Government.

The Corporation may transact the following business:—(a) the guaranteeing of loans raised by industrial concerns in the public market for not more than 20 years; (b) the underwriting of the issue of stocks, shares, bonds or debentures by industrial concerns; (c) the granting of loans or subscribing to debentures of industrial concerns repayable within 20 years; and (d) other business arising or ancillary to the above. The limit of accommodation to any industrial concern will be up to a maximum of one-tenth of the Corporation's share capital subject to a maximum of Rs. 10 lakhs.

Up to the end of March 1957, 11 States had established State Financial Corporations—Punjab, Bombay, West Bengal, Kerala, U.P., Rajasthan, Assam, Bihar, Madhya Pradesh, Andhra and Orissa. Each Corporation has an authorised capital of Rs. 2 crores and issued capital of Rs. one crore, excepting U.P. which has an authorised capital of Rs. 3 crores and issued capital of Rs. 50 lakhs and Bihar an issued capital of Rs. 50 lakhs but the distribution of the Capital as between the State Government, Reserve Bank, financial institutions and others varies from one State to the other.

For State Financial Corporations see under each State.

JOINT STOCK COMPANIES

ACCORDING to the data published by the Controller of Capital Issues, the total amount asked for in respect of applications decided during 1956 rose sharply from Rs. 151 crores in 1955 to Rs. 254 crores.

There was a larger rise in the total amount of issues sanctioned, from Rs. 125 crores to Rs. 230 crores, the highest since 1948. Consequently, the percentage of the amount sanctioned to the amount asked for increased from 83 to 90.

Government companies accounted for Rs. 59

crores, or 26 per cent of the total amount sanctioned in 1956.

As in previous years, industrial issues, which were sanctioned Rs. 193 crores during 1956, continued to predominate over non-industrial issues, which were sanctioned Rs. 38 crores during the year.

The amount sanctioned for initial issues (i.e. issues of new companies) rose from Rs. 47 crores in 1955 to Rs. 80 crores in 1956 and that for further issues (i.e. issues of existing companies) from Rs. 78 crores to Rs. 150 crores.

As regards foreign participation the amount sanctioned for issue to non-residents rose from Rs. 23 crores in 1955 to Rs. 49 crores in 1956.

The share of residents in the U.S.A. rose from Rs. 5.2 crores to Rs. 35.9 crores, and that of residents in the U.K. from Rs. 6.9 crores to Rs. 7.2 crores.

Out of the total amount sanctioned, initial issues accounted for Rs. 3.7 crores, further new issues (including loans) for Rs. 43.4 crores and bonus issues for Rs. 1.9 crores.

Some facts and figures relating to joint stock companies are given in the following tables :—

Consents for Issue of Capital

BULLION

PRECIOUS metals have always held a great place in the Indian economy. Even though gold and silver standard currencies are no more in the world, both the metals determine Government's policies. The price policies in respect of these two metals are

governed by American attitude because the U.S.A. is the most important consumer. The U. S. official price of gold at \$ 35 per five ounces has been accepted as the official price by all member countries of the International Monetary Fund.

SILVER

The following table gives details about the trend of silver production from 1953 to 1956:—
(In millions of ounces)

Countries	1953	1954	1955	1956
United States of America	37.7	35.6	36.5	37.5
Mexico	49.9	39.9	48.0	44.0
Canada	28.3	31.1	27.9	27.5
Peru	19.7	20.4	23.0	23.0
Bolivia	6.1	5.0	5.9	7.0
Other South and Central American Countries	9.4	7.7	6.1	6.0

Outside the Western Hemisphere ..	72.1	73.3	74.1	85.0
World Production	221.2	213.0	221.5	230.0
India	0.015	0.161	0.132	0.105

Following the expiry of the Green Act on December 31, 1946, a Silver Bill was enacted on July 31, 1946 authorizing the Treasury to sell or lease for manufacturing use any silver, not pledged as monetary backing for silver certificates, at not less than 90¢ cents per fine ounce and also to purchase all domestic silver mined after that day, if offered within

one year after being mined, at a net price of 90¢ cents. In December 1953, it was officially announced that the U.K. Government stocks of silver would not, in future, be held available to supply the essential needs of industry and that permission would be granted for purchases of silver to be made in the cheapest market, including the dollar area, to satisfy essential trade needs.

The recent trend of silver consumption (partial data) is given in the following table:—
(In millions of ounces)

ARTS AND INDUSTRIES	1953	1954	1955	1956
United States	105.0	85.0	100.0	100.0
Germany	17.5	24.2	31.5	40.8

China	—	—	—	—
Other Countries	20.0	23.7	—	—
Total Coinage	90.8	78.1	43.8	56.1
Total Consumption	259.1	235.5	222.4	260.4

Note: The consumption estimates are by Handy and Harman in their review of the Silver Market of 1956.

In 1956, stability again characterised the silver market. Silver laws in the United States governing the purchase and sale of silver by the Treasury Department provided the main reason for the narrow range of price fluctuations. The Treasury buying price of 90¢ C for domestic production kept the market from going very much below this level and its selling price to United States consumers limited price increases during periods of peak demand.

Price changes in the New York market for the most part were small and resulted from relatively minor variations in the balance between demand and supplies. The Treasury buying price for domestic silver of 90¢ C provided the point of balance. At any price below this level, supplies were reduced by the full amount of United States production; on the other hand when domestic production was needed, consumers had to pay more to bring such silver into the New York market, the exact price being determined by the shipping costs from the most distant delivery point drawn upon. Since the Treasury buying price of 90¢ C applies equally whether the silver is delivered to the Phila-

delphia, Denver or San Francisco Mints, consumers in the East are obliged to pay full shipping costs in order to divert the production of middle-western and far western refineries to the New York market. Prices in the London market during 1956, as in previous years, tended to follow the New York quotation. However, fluctuations were more frequent and somewhat wider than in New York. The low for the year of 78½d per troy ounce, equivalent to about 80½ C, was established on February 1st, and the high for the year of 81½d, equivalent to about 94½ C, was recorded on November 20th.

Consumption of silver in India in 1956 increased very sharply to about 17,000,000 ounces from the 3,000,000 to 4,000,000 ounce rate of the last few years. Most of the silver came from the importation of about 16,500,000 ounces in the form of Tibetan coins, which the Indian Government permitted in order to facilitate Indo-Tibetan trade. The ready demand for this unusual amount of silver may be attributed to the current agricultural prosperity in India, and also in part to the increased purchasing power of the industrial workers.

The following table gives the average silver quotations in New York and London from 1949 to 1956:

	New York Average	London Spot
	Cents	Pence
1949	71.93	49.24
1950	74.17	54.77
1951	89.37	77.86
1952	84.94	74.36
1953	85.19	73.94
1954	85.25	73.48
1955	89.10	77.61
1956	90.83	79.13

GOLD

Gold has played a key role in shaping the life and history of the world. Between 1493 and 1800, world's production of gold was placed at 24.2 million ounces. It steadily rose to 38 million ounces during the 50 years ended 1850. Since then, however, the production has risen rather spectacularly. The annual average output mounted from 3.5 million ounces in 1850 to 19.6 million ounces in 1929 and then to 35.2 million ounces in 1936, reaching the peak figure of 41 million ounces in 1940. The greatest part of this enormous increase came since the U. S. Administration raised its price of gold from \$ 20.67 per ounce to \$ 35 an ounce which made the U. S. A. a sort of magnet strongly attracting the world's entire gold production.

While the international demand for hoarding was reduced in 1954 supplies were augmented by larger South African output and by sizable Russian gold sales. In consequence the free market prices of gold moved close to the world parity of \$35 per fine ounce. The re-opening of the London market in November 1954 had also a stabilizing influence on prices.

But in 1956, free market prices fell to levels lower than the official parity of \$35 per ounce. It is true that there was marked rise in private hoarding demand, at over nine million oz., mainly due to the resurgence of inflation. But it was counterbalanced by a sizable increase in supplies and large Russian sales of gold. During the year, the world production was estimated at 27.3 million oz. as against 25.9 million oz. in 1954. Moreover, there was a shortage of dollars in the case of countries whose central banks had hitherto been regular buyers of gold. Price variations, however, were narrow in 1955.

During the year 1956, the price movements in gold were narrow despite the Suez Canal crisis. The range of price fluctuations for gold (delivery London as quoted against U.S. dollars in Europe) at about 23 cents was larger as compared with 11 cents per ounce in 1955. This may be compared to the range of \$12 in 1949 and \$6 in 1951. The increasing use made by Central Banks of the international gold market as a medium for arbitrage operations and the Bank of England's national gold market as a medium for arbitrage operations and the Bank of England's preparedness to sell newly-mined South African gold together exerted a general stabilizing influence on world gold markets. World gold production (excluding the U.S.S.R.) recorded a further rise during 1956 of about 3½ per cent from 27.1 million to 28.1 million fine ounces, while sales of gold by U.S.S.R. (about 4.3 million ounces) were the largest in any year since the war. These increases in world gold supplies, however, had no perceptible effect on market prices. The turnover in gold in world markets is estimated to be at least 25 per cent higher during 1956 than in the previous year, a part of the increase being attributed to the increased hoarding demand stimulated by the Middle East crisis. The year also witnessed the establishment of free gold markets in Belgium, Canada, West Germany and Greece.

World Gold Consumption

(In millions of fine ounces).

	1951	1952	1953
Estimated net consumption in Industrial Arts*	12.8	9.6	6.4

Production, Imports and Exports

The output of gold in India which had suffered a setback during 1953, owing mainly to the closure of the Oorgaum gold mine in Mysore rose slightly from 228,376 ounces valued at Rs. 5.07 crores in 1953 to 239,168 ounces valued at Rs. 5.62 crores, but was still below the 1952 level of 253,264 ounces. But the output in 1954 was the lowest with 209,000 oz. valued at about Rs. 4 crores. The decline has been ascribed to the closure of operations owing to labour troubles and to the low grade of the ore crushed.

Imports and exports of gold continued to be negligible in view of the continuance of the restrictions under the Foreign Exchange Regulation Act, 1947, and Imports and Exports (Control) Act, 1947. The inflow of contraband gold into India was on a smaller scale after 1947 as compared with the previous years. Among the factors which contributed to this result

were the vigilant action taken by the Union Government to check smuggling and the political developments, towards the close of the year, in the French and Portuguese possessions in India, which were the main centres of the contraband trade in bullion.

A major step taken to check smuggling still further was the Sea Customs (Amendment) Bill of September 1954. In November 1954 the French possessions were transferred to India with the result that the ban on the import and export of gold was extended to that area too.

In 1955-56, the anti-smuggling drive of the authorities seems to have been more effective. The political developments in Goa also discouraged smuggling activity. On April 18, the Lok Sabha passed the Sea Customs Amendment Act, which provided, *inter alia*, for the shifting of the burden of proof that the goods are not smuggled, to the persons from whom the goods are seized.

Some relevant statistical data are given below:—

Assaying and Refining of Gold and Silver

(Thousands of tolas)

Year	Melting and Assaying		Refining	
	Gold	Silver	Gold	Silver
1951-52	60	64.19	27.43	44.46
1952-53	28	62.55	24.11	28.92

INDIAN MARKET

Virtually isolated from world markets with the continuing ban on imports and exports of gold and silver, bullion prices in India during 1955-56 were mainly influenced by domestic factors. Futures trading in bullion under the auspices of the Bombay Bullion Association,

the only recognised association for forward trading in gold and silver in Bombay State under the Bombay Forward Contracts Control Act, 1947, was much less smooth in 1955-56 than in the preceding three years. It may be noted here that the forward market was closed

during the period July 12 to 21 and early August to October 23, 1955.

Consequently, certain changes were made in the by-laws of the Association, with the permission of the State Government. The

emergency by-laws were amended reducing the number of votes required for declaration of "a state of emergency." Besides, three new by-laws were added: (1) 30A provides that, under no circumstances, a non-member shall enjoy, directly or indirectly, any rights, privileges or facilities more than those available to a member; (2) 72A and (3) 88A provide that, during the last seven days of a contract period, no fresh business will be permitted in the current contract except transactions of only squaring-up nature. By-law 141 was also amended providing that the prices realised in an auction should not exceed the highest closing level touched during the currency of the contract, and, if the available metal falls short of the outstanding transactions, the Board shall suspend the auctions for 48 hours and make a full report to the Government regarding the conditions in the market and Government may extend the period of auction for such period or periods as it deems necessary.

During the year, the Forward Markets Commission took the first step towards bringing under their purview the futures trading in bullion. On February 16, 1956, the Commission issued a press note stating that they were examining the utility of forward trading in bullion. It also invited, at the same time, applications from Bullion Associations for the purpose of recognition under Sections 5 and 6 of the Forward Contracts (Regulation) Act, 1952.

The Government of India announced on April 22, 1957 its decision to return to the U.S.A. India's share amounting to approximately 172 million ounces, of the 226 million ounces of silver obtained by the Government of undivided India during the war years 1943-45.

The domestic gold output declined further during 1956 (figures are provisional) to 209,251 ounces (valued at Rs. 5.67 crores), as against 210,884 ounces (valued at Rs. 5.30 crores) in 1955. A major development during the year was the nationalisation, by the Mysore Government, of all the gold mining undertakings (Acquisition) Act, 1956. Indian silver production, which is relatively quite insignificant, also recorded a decline during the year; the output during 1956 amounted to 104,646 ozs. (valued at Rs. 3.76 lakhs), as against 131,713 ozs. (valued at Rs. 5.68 lakhs) during 1955. While the domestic output of both gold and silver declined, supplies of bullion to the market were augmented by continued arrivals of contraband gold, although, for sometime during the year, smuggling activity appeared to be at a low ebb, in view of the Suez Canal crisis. In silver, the supply position was helped considerably by arrivals of Tibetan silver coins practically throughout the year under review. These developments, particularly the influx of Tibetan coins, had the effect of moderating the earlier bull pressure on the market.

The range of fluctuations in bullion prices was smaller than last year; in gold it was about

(Rs. 11 and in silver about Rs. 19, as compared with Rs. 18 and Rs. 29, respectively, in the preceding year. The year's trading also revealed small net changes in prices for the year as a whole, though there were the usual seasonal movements; while gold showed only a fractional decline from the previous year's closing level of Rs. 105.87, silver showed a net fall of Rs. 1.44 at Rs. 179.87; these contrasted sharply with the large net increases of Rs. 13.44 in gold and Rs. 15.62 in silver recorded during 1955-56.

During the year, automatic margins based on price variations were payable in two settlements in gold, one of which was on account of an increase in price. In silver, margins under this bye-law were imposed in three settlements, two of which were because of price declines. Margins, which become payable when carryover charges exceed specified limits, came into operation twice in the case of gold and only once in the case of silver. Special clearings, designed to ensure prompt payment of differences when fluctuations become excessive came into force in three settlements during the year, all in silver.

The volume of futures business during the year aggregated 52.9 million tolas in gold and 2.3 million bars in silver. These figures compare with a turnover of 48 million tolas in gold and 1.4 million bars in silver for the nine months of 1955-56 during which period forward trading was permitted on the exchange.

The following statement gives the highest and lowest spot prices of gold and silver in Bombay with import duties from 1949-50 to 1956-57:—

Gold (per fine tola).

NATIONAL INCOME

THE National income of India at 1948-49 prices was Rs. 10,420 crores in 1955-56 and Rs. 10,280 crores in 1954-55 as compared to Rs. 10,030 crores in 1953-54 according to the fourth issue of the annual paper on national income released by the Central Statistical Organisation. The per capita income at 1948-49 prices, according to the report, correspondingly rose from Rs. 288.7 in 1953-54 to Rs. 271.9 in 1954-55 and Rs. 272.1 in 1955-56. The estimates for 1954-55 included in this paper are based on the detailed method of estimation followed for the earlier years and show an upward revision over the preliminary estimates published in 1956. The estimates for 1955-56 are based on partial material and are subject to revision.

The table below indicates the trend of national income (or net national output) at 1948-49 prices since 1948-49:

Year	Net National Output at 1948-49 prices (Rs. crores)	Per capita net output at 1948-49 prices (Rs.)
1948-49	8,650	246.9
1949-50	8,820	248.6
1950-51	8,850	246.3
1951-52	9,100	250.1
1952-53	9,460	256.0
1953-54	10,030	268.7
1954-55	10,280	271.9
1955-56	10,420	272.1
(Preliminary)		

According to the paper, during the First Five-Year Plan period (1951-52 to 1955-56) the national income in real terms increased by 17.7 per cent as against the original plan target of 11 per cent. The corresponding rise in the per capita income was 10.5 per cent.

The absence of any pronounced rise in 1955-56 over 1954-55, was mainly due to the fall in agricultural production revealed by the latest available crop figures. The total contribution to national income at the 1948-49 prices by 'agriculture' showed a decline of Rs. 50 crores in 1955-56 over 1954-55, as compared to a rise of similar magnitude in 1954-55 over 1953-54. There was no appreciable change in the yearly increase in the over-all contribution by other sectors.

Expressed at current prices, the national income, says the paper, stood at Rs. 9,650 crores in 1955-56, and Rs. 9,620 crores in 1954-55, or Rs. 830 crores and Rs. 860 crores lower than the 1953-54 level. The per capita income at current prices correspondingly declined from Rs. 280.7 in 1953-54 to Rs. 254.4 in 1954-55, and Rs. 252.0 in 1955-56. The fall in the national income at current prices in 1955-56 and 1954-55 was entirely due to price changes, the national income in real terms having shown a rise in both the years. The level of agricultural prices, in particular, was considerably lower in 1955-56 and 1954-55, compared to 1953-54 and this also accounted for the sharp decline in the income at current prices originating in the agricultural sector.

As the estimates are presented in the paper in terms of rupees abja (100 crores) corrected upto one decimal place, changes smaller than rupees five crores are ignored. Though there was some

progress during 1955-56 in small sectors like 'mining', 'organised banking and insurance', etc., it was not large enough to be disclosed by the figures presented in this paper.

The rise of Rs. 140 crores to Rs. 10,420 crores in the aggregate national income (at 1948-49 prices) of India during 1955-56 was accounted for by all the sectors, except agriculture, animal husbandry and ancillary activities, as is shown below.

(In crores of Rs.)		
	1954-55	1955-56
Agriculture, animal husbandry and ancillary activities	5,030	4,980
Mining, manufacturing and small enterprises	1,700	1,750
Commerce, transport and communications	1,010	1,970
Other Services	1,640	1,720

According to the report of the National Income Committee, February 1954, agriculture, animal husbandry, and ancillary activities contributed 51.3 per cent of the national income in 1950-51. Commerce, transport and communications accounted for 17.7 per cent. Commodity production taken roughly as the total value contributed by agriculture, mining, manufacturing and hand-trades amounted to Rs. 64.2 abja (abja = Rs. 100 crores) or 67.4 per cent of the total national income.

The following tables give a broad picture of the distribution of national income:

NATIONAL INCOME BY INDUSTRIAL ORIGIN AT CURRENT PRICES

PRICE MOVEMENTS

THE continuance of the rising trend of commodity prices, which has been in evidence since early June 1955, was one of the less satisfactory features of Indian economic scene in 1956-57, according to the Reserve Bank of India Report on *Currency and Finance* for the year 1956-57. Over the year, the general index of wholesale prices (base: year ended August 1939 = 100) rose by nearly 8 per cent, on top of the rise of about 12 per cent in 1955-56. The annual average of weekly indices for the year at 414 was 15 per cent higher than that for 1955-56, in contrast to the fall of about 5 per cent in the preceding year.

The current advance in the general level of wholesale prices is the third phase of the rise since 1950, but the recent uptrend has lasted much longer than the preceding upward movements. Further, unlike the Korean boom phase of 1950-51 when the food index had shown comparatively little change, during the current phase, this group has shown a sharp rise. On the other hand, whereas the manufactures group also had recorded a significant increase during

1950-51, in the current uptrend, it has shown a comparatively small rise.

Broadly, whereas the 1950-51 rise was 'imported', the 1955-57 rise appears to be primarily of domestic origin, reflecting mainly the excess of demand over supply, arising from high levels of investment activity in the public and private sectors. The general index at the end of March 1957 was still about 9 per cent below the Korean peak level. Since the close of the year, there has been some further rise; the index for the week ended June 1, 1957 (439.6) was, however, still below the Korean peak level (462 on April 14, 1951).

As in the previous year, the rise occurred mainly in three groups, namely, 'food articles', 'industrial raw materials' and 'semi-manufactures', the extent of the rise being, however, only about half of that in the preceding year. During 1956-57, the 'manufactures' and 'miscellaneous' groups also recorded rises of 2.7 per cent and 14.7 per cent, respectively, which was in contrast to the declines of 0.5 per cent and 9.5 per cent in 1955-56. The direction of move-

ment of the prices of sub-groups as well as of individual commodities was generally uniform, but the magnitude of variations varied considerably, as in the past, due to the operation of special factors.

The stimulus for the price rise came, by and large, from the steadily accelerating tempo of the investment programme from year to year, superimposed upon some decline in agricultural output from the record levels for food production and total agricultural output reached in 1953-54 and 1954-55, respectively. The volume of voluntary savings has been insufficient in relation to demand with the result that deficit financing in the public sector and reliance on bank credit in the private sector have been rising. In the result, there has been a growing pressure of demand on the economy which has been reflected in a rise in prices. The pressure of demand was, however, softened through a substantial increase in imports. The pressure of demand was particularly high in the case of foodgrains and industrial raw materials, which groups, as already mentioned, recorded substantial increase in prices.

The following table gives the price trend from 1948-49 to 1956-57:

Average of Weeks	Food Articles	Industrial Raw Materials	Semi-manufactured Articles	Manufactured Articles	Miscellaneous Articles	General Index
1948-49	382.9	444.8	327.3	346.1	525.2	376.2
1949-50	391.3	471.7	331.6	347.2	570.7	385.4
1950-51	416.4	523.1	348.9	354.2	707.4	409.7

REVIEW OF PRICES 1939-51

The outbreak of the Second World War in September 1939 introduced a new chapter in the history of Indian commodity prices. After an initial rise, the prices received a sharp setback following the loss of export markets; but the entry of Japan into the war made heavy calls on India's resources from the Allies and the resultant rise in note circulation aggravated inflationary pressures and the pace of the rise. The index number of wholesale prices, with the week ended August 19, 1939 equal to 100, rose to 125.6 in 1939-40, but receded in the following year by 10.8 to 114.8. Then it advanced by 19 per cent to 137.0 in 1941-42, again by 25 per cent to 171.0 in 1942-43 and recorded the highest rise of 38 per cent in any one year during 1943-44 when it touched 236.4.

During 1944-45 the price index advanced by only 7.8 to 244.2 and reached 244.9 in the following year.

It was during 1946-47 that the policy of decontrol sent up the general price index by about 11 per cent to 275.4 and further to 307.0 in 1947-48.

Price trends during 1948-49 fell into two distinct phases—a continued rise from April to July and a comparative stability during the rest of the year, with signs of a downward trend in the last quarter of the year.

The latter phase was associated with the reimposition of controls, and a net contraction of Rs. 18 crores in money supply during the last eight months of the year. The general index number, with the year ended August 1939 as the base, shot up from 347.9 to 389.6 by July and then tapered off to 370.2, the average for the year being 376.2 revealing a rise of 22 percent over the year.

With the opening of the financial year of 1949, the prices began to advance upward till the Economic Adviser's general index, which stood at 370.2 in March 1949, touched 389.8 in September 1949 which exceeded the post-decontrol peak level reached in July 1948 and climbed to 393.3 in October 1949. The jump resulted in part from a sharp rise in the prices of certain export goods, in particular, tea, black pepper, oils and oil-seeds.

Following the devaluation of the rupee, the Government of India adopted an eight-point anti-inflationary programme including a voluntary cut in the prices of manufactured goods and brought down the price index from 393.3 in October to 381.3 in December 1949. These efforts, however, proved temporary and practically the whole of the improvement of the preceding two months was lost by the close of March 1950, the general index moving up to 392.4 in March. The average for the year worked out at 385.4 as against 376.2 in 1948-49.

The uptrend in the general price level noticed during the closing quarter of 1949-50 gathered further momentum in the following year, particularly in the latter half.

The continuation of the gradual rise in prices since devaluation was accelerated with the outbreak of the Korean war and prices reached a peak at 438.6 in March 1951 recording a rise of 11.3 per cent over the year as against a rise of 6.0 per cent in 1948-50. The rise was, however, less marked than that in the U.K. and the U.S. where the increase was as much as 27.4 per cent and 20.3 per cent respectively.

To meet the situation, the Finance Minister enunciated in August 1950 an eight-point programme outlining the major objectives of Government's economic and financial policy, which envisaged measures to hold the price line and to ensure, through increased production, economies and larger supplies, that the inflationary pressures did not get out of hand. Steps were taken to relax import controls and prevent hoarding of foodgrains through an amendment of the Essential Supplies (Temporary Powers) Act, 1946. The Centre also assumed powers to legislate for one year from August 15, 1950 in respect of trade and commerce and production, supply and distribution of goods and these were extended later by another year.

This was followed by the promulgation of the Supply and Price of Goods Ordinance. As an anti-inflation measure and in view of the wide disparity between the internal and external prices, fresh export duties on certain commodities were levied or the rates of existing duties were raised as in the case of hessian, racking, raw cotton, cotton waste and raw wool.

These measures had in part a steady effect on the general trend of prices, the months of October and November registering a decline.

Thereafter the prices resumed an upward trend which became pronounced following the Chinese intervention in the Korean war and touched a high level at 438.6 in March 1951. The prolongation of the Korean war, rising import prices, heavy export commitments and higher prices granted by Government in a number of controlled commodities like sugar, sugarcane, gur, foodgrains, cotton textiles and rubber, contributed to the uptrend in prices; it also embodied the result of the decontrol of prices of raw jute and jute manufactures on March 9, 1951.

In December 1950 Government increased the prices of sugarcane and sugar from Rs. 1-10 and Rs. 23-8 per maund respectively fixed earlier in October at the preceding season's level to Rs. 1-12 and Rs. 29-12. Gur prices were raised further and the pool price of imported food was raised in January because of a rise in overseas prices and freight charges.

The rise in import prices of raw cotton and the grant of an increase of Rs. 150 per candy for indigenous cotton for the 1950-51 cotton season was announced on June 10, 1950 but its effect by way of higher prices for cotton manufactures was noted only in the closing stages of the year under review.

During the first quarter of 1951, the prices of coarse, medium, fine and superfine cloth were raised by anything between 6 per cent in the case of superfine and 17½ per cent in the case of coarse varieties. The voluntary cut of four per cent in yarn prices was restored on March 5. An interim increase in the price of raw rubber from Rs. 90-8 to Rs. 122-8 per 100 lb. was granted with effect from March 7, 1951.

1951-56

The fight against inflation in the financial year 1951-52 was greatly assisted by three factors. The first was the budget which aimed at a substantial revenue surplus and sought to finance the railway development by raising passenger fares. Later, the surplus estimated at Rs. 26.1 crores in the budget was revised upward to Rs. 92.61 crores. This substantial transfer of purchasing power from the hands of the public to the exchequer helped to hold inflation in check. Secondly, the sale proceeds of the wheat obtained from the American loan also had the same effect of reducing the money supply in the hands of the public.

Another important step was taken in the middle of November 1951 by the raising of the Bank Rate from three per cent at which it stood from November 1935 to 3½ per cent. The third factor was of an international character. Following the economic difficulties caused by the burden of the re-armament drive, country after country led by the United Kingdom imposed import restrictions, while the United States had to prune defence expenditure because of the danger of inflation.

As a result of the above factors, the general price index steadily sagged from 457.5, the all time peak level touched in April 1951, to 433.1 in the last month of 1951. Though overseas food prices ruled remarkably firm, the Indian food prices dropped by 2½ per cent and those of industrial raw materials dropped by more than 12 per cent. By the time the new year opened, exports proved difficult owing to buyers' resistance, while the monetary squeeze had rendered hoarding difficult despite credit expansion. Conditions deteriorated in February when the crop movement was in full swing and the general price index fell further to 415.9 thereby wiping out the advance of the past 13 months.

In July 1954, the Union Government decided to support prices of foodgrains if they fell below certain levels, and were uneconomic for growers. In pursuance of this policy, Uttar Pradesh, Punjab, and Rajasthan decided to purchase wheat in case prices fell below Rs. 10 per maund.

In December 1954, the Union Government decided to purchase from cultivators jowar and maize at Rs. 5-8 per maund and bajra at Rs. 6 per maund.

In Madras, the Government constituted an *ad hoc* committee to watch the prices of rice, bajra and other commodities and to take prompt measures to stabilize them when necessary.

Export incentives were also given by the grant of additional export quotas for a number of agricultural and industrial products, and export duties in commodities such as cotton, oils, oilseeds, pepper and rice were either reduced or abolished.

Within the overall declining trend during 1954-55, price movements showed three broad phases. In the first phase from mid-April to the end of June, prices fell by 6 per cent to 378.4. The second phase from July to September was one of relative steadiness; the index moved narrowly and rose by 1.6 per cent to 384.3. In the last phase, covering the second part of the year, the downward trend was resumed, and the index fell sharply by 9.1 per cent to 349.3.

The progressive policy of decontrol was carried a stage further. In July 1954 controls in respect of rice were lifted and in March 1955, restrictions on zonal movement of wheat were removed. The control over movement of cotton was removed in July 1954 while on distribution was lifted in February 1955. Although price control was retained, the "floor" for 1954-55 was reduced by Rs. 55 to Rs. 465 per candy. Issue prices of imported wheat and rice were reduced but in the case of raw rubber, the minimum price was raised by Rs. 12 to Rs. 150 per 100 lbs.

As regards sugar, the Government announced in November 1954 that there would not be any statutory control on the price or distribution of sugar, but that 25 per cent of the sugar output would continue to be at the disposal of Government. The minimum price of sugar-cane was left unchanged at Rs. 1-7 per maund, but a formula for linking the price of sugarcane to the price of sugar was applied to the 1953-54 crop.

In view of the marked change in the price trend in 1955-56, Government's price policy was switched on towards a policy of arresting the upward trend. In January-February 1956, Government imposed a ban on exports of food grains, namely, jawar, maize, pulses, including grass and gram flour, rice and wheat products. Further, stocks of wheat and rice with the Government were released for sale in the open market and fair price shops for food grains were opened in various centres. In April 1956 it was decided to import during 1956 one million tons each of wheat and rice. Accordingly negotiations were conducted with the Government of Burma for the import of 2 million tons of rice over a period of five years commencing from June 1, 1956. It was also decided that the Government would participate in the new International Wheat Agreement tenable for three years from August 1, 1956.

Credit policy has also been geared towards the same objective. In April 1956, the Reserve Bank asked for more detailed and frequent data from banks regarding their advances, with a view to taking suitable action if credit was being extended for speculative purposes. Again on May 17, 1956, the Bank issued a directive to banks asking them to refrain from excessive lending against commodities and in particular against paddy and rice; the margin maintained by banks in respect of advances against rice and paddy was to be uniformly raised. Banks were also asked to endeavour to achieve a reduction in their aggregate advances against paddy and rice to a level which would not be more than 25 per cent. above that of the corresponding week of the previous year.

In regard to oils and oilseeds, the Government's chief measure was the stepping up of export duties. In April 1956, the export duty on castor oil was raised from Rs. 125 to Rs. 175 per ton and fresh export duties were imposed on linseed oil at Rs. 250 per ton and on kardiseed oil and nigereed oil at Rs. 200 per ton.

In order to check the sharp rise in cotton prices, Government had to intervene in the Bombay futures market. Forward trading was suspended for two weeks from December 24, 1955, to January 7, 1956 and again from January 25, after squaring up compulsorily all transactions at Rs. 700 per candy for February contract and Rs. 686-8 for May contract.

1956-57

During the year 1956-57, the Government's efforts were directed towards both increasing supplies of goods and restraining excess demand. Increase in supplies, especially of foodgrains, was effected, in the short run, mainly through arranging for larger imports of foodgrains and distributing these through a network of fair price shops all over the country. An agreement was entered into with the United States Government for the purchase of surplus commodities, namely, wheat, rice and cotton; arrangements were also made with the Government of Burma for rice imports. The quantity of foodgrains imported in 1956 was nearly 14 lakh tons, as compared to 7 lakh tons in 1955. The Government also imposed a ban since early 1956 on exports of foodgrains. For the distribution of foodgrains, about 20,000 fair price shops have been opened in many parts of the country.

The policy of dividing the country into zones for the purpose of regulating movements in wheat has also been put into operation. The Government announced, on June 13, 1957, the creation of three wheat zones, namely, (1) the Punjab, Himachal Pradesh and Delhi, (2) U.P. and (3) Rajasthan, M.P. and Bombay (excluding the City of Bombay). The effect of this zonal arrangement is free and unrestricted movement of wheat and wheat products within a zone, but exports from and import into the zone are not permissible, except under a permit issued by the State Government concerned. A separate zone has been created for the rice-consuming areas of South India—Andhra Pradesh, Madras, Mysore and Kerala.

In some cases, cotton and oilseeds, for example, the excessive price rise was sought to be checked by the intervention of the Forward Markets Commission. With effect from February 11, 1957, the East India Cotton Association, in exercise of powers taken by them with the approval of the Forward Markets Commission, imposed more stringent margins on futures contracts. The margins were made applicable at lower levels, namely, Rs. 700 per candy (of 784 lbs.) for Jarilla, instead of Rs. 770 as before, and at Rs. 850 for Vijay, in place of Rs. 920, the rate of deposits at these levels being Rs. 25 per bale of 392 lbs. On April 17, 1957, due to the steep rise in cotton price, the Forward Markets Commission intervened and suspended trading. Though trading was resumed on the next day, the then existing rates of margins were doubled and new ceilings for Jarilla May and Vijay June

were fixed at Rs. 754 and Rs. 878 per candy respectively. On April 24, 1957, the Forward Markets Commission raised further the rates of margin deposits in respect of Jarilla May to a flat rate of Rs. 200 per bale, as compared to a maximum of Rs. 100 per bale. On May 20, 1957, the margin deposit on Vijay June was also enhanced to Rs. 200 per bale with effect from June 1, 1957, if the price of that contract ruled above Rs. 824 per candy. In the case of groundnut and castor-seeds, in January 1957, a stiffer margin of Rs. 15 per candy on the net outstanding position of forward purchases was levied if the ruling price was above Rs. 165 per candy. Till then the margin had varied from Rs. 1 to Rs. 4 for different slabs, the first 7,500 candies being exempted. In some cases, in order to improve the domestic supply situation exports have been restricted and imports liber-

alised, e.g. lowering of raw cotton export quota and raising of export duty on Bengal deshi cotton.

At the same time, considerable attention has been devoted to securing an abatement of the pressure of excess demand in the economy, through fiscal and monetary policies. During the last one year various tax measures have been undertaken and these will help the containment of demand, both consumption and investment. Action was also taken on the monetary front through selective credit controls as well as raising of the interest rate structure.

The uptrend in cost of living (working class) which was noticed from June 1955 continued further during the greater part of 1957, following the rise in commodity prices. The all-India consumer price index number of working classes

(Base : 1949 = 100), which had risen from 92 in May 1955 to 100 in March 1956, moved up further to 110 in November 1956. By January, it declined to 107 at which level it remained during the remaining two months of the year. Over the year, it recorded a net rise of 7 per cent which was somewhat higher than that during the preceding year. The annual average of 107 for the year was 11 per cent higher than the average for 1955-56. The rise was principally due to the rise in the prices of foodgrains. The consumer price indices recorded increases at all important centres, but the magnitude of rise varied considerably. Thus, while the rise was marked at Sholapur, Ahmedabad, Bangalore, Kanpur and Delhi (over 10 per cent), in Calcutta and Madras (city), the rise was relatively moderate (7-8 per cent), and it was rather small in Bombay City (about 2 per cent).

INDUSTRIAL STRUCTURE AND POLICY

INDUSTRIAL production in India has been maintaining an upward trend in many directions since independence in August 1947.

The index of industrial production, with 1951 as the base, advanced from 103.6 in 1952 to 105.6 in 1953, 105.6 in 1954, 112.9 in 1955 and 132.7 in 1956.

An elaborate census of Indian manufactures covering 29 groups of industries has been in progress since 1949; of these the producer gas industry no longer exists. There was no factory

in this industry in 1952. The industries covered by the census are wheat flour, rice milling, biscuit making, fruit and vegetable processing, sugar and gur, distilleries and breweries, starch, oil-seed crushing and extraction and processing of vegetable oils and manufacture of edible hydrogenated oils; paints and varnishes, soap, tanning, cement, glassware, ceramics, plywood, paper and paperboard, matches, cotton textiles, woollen textiles, jute textiles, chemicals, drugs and pharmaceuticals, non-ferrous metals, iron and steel, bicycles, sewing machines, producer gas plants, electric pumps, electric fans and general and electrical engineering.

The latest available report covers these industries for 1953. The following picture has emerged:—

	1952	1953
No. of Factories ..	7,155	7,104
Fixed Capital (Rs. crores) ..	300.94	324.92
No. of employees (million) ..	1.618	1.628
Wages and Salaries (Rs. crores) ..	200.75	205.21
Materials Consumed (Rs. crores) ..	868.94	788.52
Value of Products (Rs. crores) ..	1,188.97	1,122.78
Value added by manufacture (Rs. crores) ..	315.08	334.25

INDUSTRIAL POLICY RESOLUTION

The Government of India's industrial policy resolution was presented to the Lok Sabha on 30th April, 1956.

The following is a summary of the text:

Eight years have passed since the first declaration on industrial policy.* These eight years have witnessed many important changes and developments in India. The Constitution of India has been enacted, guaranteeing certain fundamental rights and enunciating directive principles of State policy. Planning has proceeded on an organised basis, and the first Five-Year Plan has recently been completed. Parliament has accepted the socialist pattern of society as the objective of social and economic policy.

These important developments necessitate a fresh statement of industrial policy, more particularly as the Second Five-Year Plan will soon be placed before the country. This policy must be governed by the principles laid down in the Constitution, the objective of socialism, and the experience gained during these years.

THREE CATEGORIES

These basic and general principles were given a more precise direction when Parliament accepted in December, 1954, the socialist pattern of society as the objective of social and economic policy. Industrial policy, as other policies, must, therefore, be governed by these principles and directions.

In order to realise this objective, it is essential to accelerate the rate of economic growth and to speed up industrialisation and, in particular, to develop heavy industries and machine making industries, to expand the public sector, and to build up a large and growing co-operative sector.

Equally, it is urgent, to reduce disparities in income and wealth which exist today, to prevent private monopolies and the concentration of economic power in different fields in the hands of small numbers of individuals. Accordingly, the State will progressively assume a predominant and direct responsibility for setting up new industrial undertakings and for developing transport facilities.

It will also undertake State trading on an increasing scale. At the same time, as an agency for planned national development, in the context of the country's expanding economy, the private sector will have the opportunity to develop and expand. The principle of co-operation should be applied wherever possible and a steadily increasing proportion of the activities of the private sector developed along co-operative lines.

The adoption of the socialist pattern of society as the national objective, as well as the need for planned and rapid development, require that all industries of basic and strategic importance, or in the nature of public utility services, should be in the public sector. Other industries which are essential and require investment on a scale which only the State, in the present circumstances, could provide, have also to be in the public

sector. The State has, therefore, to assume direct responsibility for the future development of industries over a wider area.

After considering all aspects of the problem, in consultation with the Planning Commission, the Government of India have decided to classify industries into three categories having regard to the part which the State should play in each of them. It should also be remembered that it is always open to the State to undertake any type of industrial production.

In the first category will be industries, the future development of which will be the exclusive responsibility of the State. The second category will consist of industries, which will be progressively State-owned and in which the State will, therefore, generally take the initiative in establishing new undertakings, but in which private enterprise will also be expected to supplement the efforts of the State. The third category will include all the remaining industries, and their future development will, in general, be left to the initiative and enterprise of the private sector.

Industries in the first category have been listed in Schedule A of this resolution. All new units in these industries, save where their establishment in the private sector has already been approved, will be set up only by the State. This does not preclude the expansion of the existing privately owned units, or the possibility of the State securing the co-operation of private enterprise in the establishment of new units when the national interests so require.

Railways and air transport, arms and ammunition and atomic energy will, however, be developed as Central Government monopolies. Whenever co-operation with private enterprise is necessary, the State will ensure, either through majority participation in the capital, or otherwise, that it has the requisite powers to guide the policy and control the operations of the undertakings.

Industries in the second category will be those listed in Schedule B. With a view to accelerating their future development, the State will increasingly establish new undertakings in these industries. At the same time private enterprise will also have the opportunity to develop in this field, either on its own or with State participation.

All the remaining industries will fall in the third category and it is expected that their development will be undertaken ordinarily through the initiative and enterprise of the private sector, though it will be open to the State to start any industry even in this category. It will be the policy of the State to facilitate and encourage the development of these industries in the private sector, in accordance with the programme formulated in successive Five-Year Plans, by ensuring the development of transport, power and other services, and by appropriate fiscal and other measures.

The State will continue to foster institutions to provide financial aid to these industries, and special assistance will be given to enterprises organised on co-operative lines for industrial and agricultural purposes. In suitable cases, the State may also grant financial assistance to the private sector. Such assistance, especially when the amount involved is substantial, will preferably be in the form of participation in equity capital, though it may also be in part in the form of debenture capital.

Industrial undertakings in the private sector have necessarily to fit into a framework of the social and economic policy of the State and will be subject to control and regulation in terms of the Industries (Development and Regulation) Act and other relevant legislation. The Government of India, however, recognise that it would, in general, be desirable to allow such undertakings to develop with as much freedom as possible, consistent with the targets and objectives of the national plan. When there exist in the same industry both privately and publicly owned units, it would continue to be the policy of the State to give fair and non-discriminatory treatment to both of them.

In appropriate cases, privately owned units may be permitted to produce an item falling within Schedule A for meeting their own requirements or as by-products. There will be ordinarily no bar to small privately owned units undertaking production, such as the making of launchers and other light-craft, generation of power for local needs and small scale mining. Further, heavy industries in the public sector may obtain some of their requirements of lighter components from the private sector, while the private sector in turn would rely for many of its needs on the public sector. The same principle would apply with even greater force to the relationship between large-scale and small-scale industries.

COTTAGE INDUSTRIES

In relation to some of the problems that need urgent solutions, these offer some distinct advantages. They provide immediately large-scale employment; they offer a method of ensuring a more equitable distribution of the national income and they facilitate an effective mobilisation of resources of capital and skill which might otherwise remain unutilised. Some of the problems that unplanned urbanisation tends to create will be avoided by the establishment of small centres of industrial production all over the country.

The State has been following a policy of supporting cottage and village and small scale industries by restricting the volume of production in the large-scale sector, by differential taxation, or by direct subsidies. While such measures will continue to be taken, whenever necessary, the aim of State policy will be to ensure that the decentralised sector acquires sufficient vitality to be self-supporting and its development is integrated with that of large-scale industry.

* See next page for the declaration.

The State will, therefore, concentrate on measures designed to improve the competitive strength of the small-scale producer. For this it is essential that the technique of production should be constantly improved and modernised, the pace of transformation being regulated so as to avoid, as far as possible, technological unemployment.

Lack of technical and financial assistance, of suitable working accommodation and inadequacy of facilities for repair and maintenance are among the serious handicaps of small-scale producers. A start has been made with the establishment of industrial estates and rural community workshops to make good these deficiencies. The extension of rural electrification and the availability of power at prices which the workers can afford will also be of considerable help.

Many of the activities relating to small-scale production will be greatly helped by the organisation of industrial co-operatives. Such co-operatives should be encouraged in every way and the State should give constant attention to the development of cottage and village and small-scale industries.

REGIONAL DEVELOPMENT

In order that industrialisation may benefit the economy of the country as a whole, it is important that disparities in levels of development between different regions should be progressively reduced. The lack of industries in different parts of the country is very often determined by factors such as availability of the necessary mineral and other natural resources. A concentration of industries in certain areas has been due to the ready availability of power, water supply and transport facilities which have been developed there. It is one of the aims of national planning to ensure that these facilities are steadily made available to areas which are at present lagging behind industrially or where there is greater need for providing opportunities for employment, provided the location, is otherwise suitable.

This programme of industrial development will make large demands on the country's resources of technical and managerial personnel. To meet these rapidly growing needs for the expansion of the public sector and for the development of village and small-scale industries, proper managerial and technical cadres in the public services are being established.

Steps are also being taken to meet shortages at supervisory levels, to organise apprenticeship schemes of training on a large-scale both in public and in private enterprises, and to extend training facilities in business management in universities and other institutions.

The living and working conditions of workers should be improved and their standard of efficiency raised. The maintenance of industrial peace is one of the prime requisites of industrial progress. In a socialist democracy labour is a partner in the common task of development and should participate in it with enthusiasm.

Some laws governing industrial relations have been enacted and a broad common approach has developed. With the growing recognition of the obligations of both management and labour there should be joint consultation and workers and technicians should, wherever possible, be associated progressively in management. Enterprises in the public sector have to set an example in this respect.

With the growing participation of the State in industry and trade, the manner in which these activities should be conducted and managed assumes considerable importance. Speedy decisions and a willingness to assume responsibility are essential if these enterprises are to succeed. For this, wherever possible, there should be decentralisation of authority and their management should be along business lines. It is to be expected that public enterprises will augment the revenues of the State and provide resources for further development in fresh fields. But such enterprises may sometimes incur losses. Public

enterprises have to be judged by their total results and in their working they should have the largest possible measure of freedom.

The industrial policy resolution of 1948 dealt with a number of other subjects which have since been covered by suitable legislation or by authoritative statements of policy. The division of responsibility between the Central Government and the State Governments in regard to industries has been set out in the Industries (Development and Regulation) Act. The Prime Minister, in his statement in Parliament on April 8, 1949, has enunciated the policy of the State in regard to foreign capital. It is, therefore, not necessary to deal with these subjects in this resolution.

SCHEDULE A

The future development of the following industries will be the exclusive responsibility of the State:

1. Arms and ammunition and allied items of defence equipment.
2. Atomic energy.
3. Iron and steel.
4. Heavy castings and forgings of iron and steel.
5. Heavy plant and machinery required for iron and steel production, for mining, for machine tool manufacture and for such other basic industries as may be specified by the Central Government.
6. Heavy electrical plant including large hydraulic and steam turbines.
7. Coal and lignite.
8. Mineral oils.
9. Mining of iron ore, manganese ore, chrome ore, gypsum, sulphur, gold and diamond.
10. Mining and processing of copper, lead, zinc, tin, molybdenum and wolfram.
11. Minerals specified in the schedule to the Atomic Energy (Control of Production and Use) Order, 1953.
12. Aircraft.
13. Air transport.
14. Railway transport.
15. Shipbuilding.
16. Telephones and telephone cables, telegraph and wireless apparatus (excluding radio receiving sets).
17. Generation and distribution of electricity.

SCHEDULE B

The following industries will be progressively State-owned. The State will generally take the initiative in establishing new undertakings but private enterprise will not be excluded.

1. All other minerals except "minor minerals" as defined in section 3 of the Minerals Concession Rules, 1949.
2. Aluminium and other non-ferrous metals not included in Schedule "A".
3. Machine tools.
4. Ferro alloys and tool steels.
5. Basic and intermediate products required by chemical industries such as the manufacture of drugs, dyestuffs and plastics.
6. Antibiotics and other essential drugs.
7. Fertilizers.
8. Synthetic rubber.
9. Carbonisation of coal.
10. Chemical pulp.
11. Road transport.
12. Sea transport.

ORIGINAL RESOLUTION

The original declaration of industrial policy was made on April 8, 1948 by the Government of India and is given below for purposes of record. This has been superseded by the one given at the top of this article.

- (1) The manufacture of arms and ammunition, the production and control of atomic

energy, and the ownership and management of railway transport should be the exclusive monopoly of the Central Government.

(2) The State will be responsible for the establishment of new undertakings in the field of coal, iron and steel, aircraft manufacture, shipbuilding, manufacture of telephone, telegraph and wireless apparatus excluding radio receiving sets and mineral oils. Existing undertakings will be allowed to develop for a period of ten years and Government will give all assistance for such development. At the end of the period their position will be reviewed.

(3) Control by the State over the generation and distribution of electric power will continue.

(4) Rest of the industries will normally be open to private enterprise with varying degrees of control over location.

(5) The Central Government would investigate the extent to, and the manner in which cottage and small scale industries could be co-ordinated and integrated with large scale industries.

This policy was re-affirmed in the course of a debate in December 1954, though Government had set a new goal for the country—the establishment of a socialistic pattern of society.

INDUSTRIES DEVELOPMENT & REGULATION ACT

Towards the end of 1951 Parliament passed the Industries (Development and Regulation) Bill. The Act applies to 37 industries listed in the First Schedule to the Act.

The most important provision is the establishment of Development Councils which will deal with the problem of productivity and service to the community.

At the top will be the Central Advisory Council for Industries which will advise Government on rules, directions to industrial undertakings and taking over the management of industrial concerns.

The Act provides for the registration of existing industrial undertakings and licensing of new ones.

It also empowers Government to investigate into the causes of any possible fall in the production of any concern or any deterioration in the quality of the product, and to take action.

The Act contains provisions for direct control by the Central Government in certain cases.

In the middle of 1952 a Central Advisory Council of Industries was established, consisting of 27 representatives of industry, labour, consumers and primary producers pertaining to the scheduled industries.

Up to November 1, 1952, which was the last date prescribed for registration under the Act, 3,562 undertakings had applied for registration. Of these 2,209 were found to be eligible for registration.

A Licensing Committee has also been set up consisting of representatives of the Ministries of Commerce and Industry, Finance, Railways, Production and of the Planning Commission to examine application for licences. Between October 1953 and November 1954, 502 applications for licences were received. Licences were granted in 422 cases, refused in 54, and 26 cases were referred back to the parties.

During 1955, the Licensing Committee examined 756 applications for licences and granted licences in 563 cases, rejecting 119 cases. Of the remaining applications, a few were withdrawn and the rest were deferred for consideration at a later date. Out of the schemes approved, 164 were for the establishment of new undertakings; 319 for effecting substantial expansion and for manufacture of new articles; five for change of location of factories and 75 for carrying on the business of existing undertakings.

There was only one case up to 1953 August in which Government ordered an investigation into the circumstances of an undertaking.

The scope of the Act was enlarged in 1953.

The Government, by a notification issued in the Gazette of India Extraordinary, dated March 1, 1957, brought the Industries (Development and Regulation) Amendment Act, 1956, into force with immediate effect.

The following are among the new industries listed in this Act: Ferro-alloys and special steels, lignite, television sets, teleprinters, amplifying and public address equipment, electrical furnaces, X-ray equipment, abrasives and grinding wheels, commercial, office and household equipment, refrigerators, medical and surgical appliances, plastics moulding industries, industrial instruments, fine chemicals including photographic chemicals, synthetic resins and plastics, paints, varnishes and enamels, man-made fibres including regenerated cellulose rayon, nylon and the like, explosives including gunpowder and safety fuses, insecticides, fungicides, weedicides, textile accessories and auxiliaries, textile processing, photographic raw films and printing paper, pulp-wood pulp, mechanical, technical including dissolving pulp, fermentation industries, food processing industries, organic fertilisers, hard-board and chipboard, asbestos cement, insulating boards, gypsum boards, wall boards, matches, cigarettes, fire fighting equipment and appliances including fire engines, and sizing materials including starch.

All undertakings pertaining to these industries, employing 50 or more workers with the aid of power, or 100 or more workers without the aid of power, would now fall within the purview of the Industries (Development and Regulation) Act, 1951, as amended.

DEVELOPMENT COUNCILS

In addition to the Development Councils for Heavy Chemicals (Acids and Fertilizers), Internal Combustion Engines and Power-driven Pumps and Sugar, which were set up earlier, Development Councils for Light Electrical and Heavy Electrical Industries, Pharmaceuticals and Drugs, Heavy Chemicals (Alkalies), Woolen Textiles and Art Silk Textiles were set up during 1955. In 1956, two more Development Councils were formed, one for Machine Tools and one for Bicycles. Altogether there were 12 Councils at the end of 1956.

Besides, a number of Panels or Expert Committees for inquiring into and studying the development of a number of important industries were set up. The following is the list of the Panels and Committees thus set up: Agricultural Tractors; Aluminium; Earth Moving and Allied Equipment; Electronics and Wireless Equipment; Paper and Pulp; X-Ray Equipment; Surgical Appliances; Power Alcohol; and Sago.

STATE AID TO INDUSTRIES

For the development of more important industries for which sufficient capital is not likely to be forthcoming from private resources, Government has been giving financial assistance to the promoters of the schemes by granting loans on special terms or by participating in equity capital. The industries to which such assistance is being rendered include the manufacture of explosives for civilian purposes, intermediates for certain types of dyestuffs and textile machinery, besides steel production.

With regard to foreign assistance, each case is considered on its merits subject to the provisions in the Industrial Policy Statement. Generally permission is not granted for investment of foreign capital in purely commercial or trading concerns unless technical know-how is an essential aspect of the trading activities. During 1956, efforts were made to secure technical help for the development of our industries under the International Technical Assistance Schemes such as Point Four Programme, Colombo Plan, etc.

In order to assist exports, Export Promotion Councils for various industries are also being set up. Two such Councils were formed in 1954—

Cotton Textiles Export Promotion Council; and Silk and Rayon Textiles Export Promotion Council; three in 1955—the Plastics, Engineering and Cashew and Pepper Promotion Councils; and three in 1956—Mica, Tobacco and Leather Export Promotion Councils.

REGULATED INDUSTRIES

The Industries (Development and Regulation) Bill which received the assent of the President on Oct. 31, 1951 came into force on May 8, 1952. The Act was amended in 1956 with a view to covering a larger number of industries. The amended Act covers any industry engaged in the manufacture or production of any of the articles mentioned under each of the following headings or sub-headings, namely:—

1. METALLURGICAL INDUSTRIES: *Ferrous*: Iron and steel (metal); Ferro-alloys; Iron and Steel castings and forgings; Iron and Steel structural: Iron and Steel pipes; Special steels; Other products of iron and steel. *Non-ferrous*: Non-ferrous metals and alloys; Semi-manufactures and manufactures.

2. FUELS: Coal, lignite, coke and their derivatives; Mineral oil (crude oil), motor and aviation spirit, diesel oil, kerosene oil, fuel oil, diverse hydrocarbon oils and their blends including synthetic fuels, lubricating oils and the like; Fuel gases—(coal gas, natural gas and the like).

3. BOILERS AND STEAM GENERATING PLANTS.

4. PRIME MOVERS (OTHER THAN ELECTRICAL GENERATORS): Steam engines and turbines; Internal combustion engines.

5. ELECTRICAL EQUIPMENT: Equipment for generation, transmission and distribution of electricity including transformers; Electrical motors; Electrical fans; Electrical lamps; Electrical furnaces; Electrical cables and wires; X-ray equipment; Electronic equipment; Household appliances such as electric irons, heaters and the like; Storage batteries; Dry cells.

6. TELECOMMUNICATIONS: Telephones; Telegraph equipment; Wireless communication apparatus; Radio receivers, including amplifying and public address equipment; Television sets; Teleprinters.

7. TRANSPORTATION: Aircraft; Ships and other vessels drawn by power; Railway locomotives; Railway rolling stock; Automobiles (motor cars, buses, trucks, motor cycles, scooters and the like); Bicycles; Others, such as fork lift trucks and the like.

8. INDUSTRIAL MACHINERY: *Major items of specialised equipment used in specific industries*: Textile machinery (such as spinning frames, carding machines, powerlooms and the like) including textile accessories; Jute machinery; Rayon machinery; Sugar machinery; Tea machinery; Mining machinery; Metallurgical machinery; Cement machinery; Chemical machinery; Pharmaceuticals machinery; Paper machinery.

General items of machinery used in several industries, such as the equipment required for various 'unit processes': Size reduction equipment—crushers, ball mills and the like; Conveying equipment—bucket elevators, skip hoists, cranes, derricks and the like; Size separation units—screens, classifiers and the like; Mixers and reactors—kneading mills, turbo mixers and the like; Filtration equipment—filter presses, rotary filters and the like; Centrifugal machines; Evaporators; Distillation equipment; Crystallisers; Driers; Power driven pumps—reciprocating, centrifugal and the like; Air and gas compressors and vacuum pipes (excluding electrical furnaces); Refrigeration plants for industrial use; Fire fighting equipment and appliances including fire engines.

Other items of Industrial Machinery: Ball, roller and tapered bearings; Speed reduction units; Grinding wheels and abrasives.

9. MACHINE TOOLS.

10. AGRICULTURAL MACHINERY: Tractors, harvesters and the like; Agricultural implements.

11. EARTH-MOVING MACHINERY: Bulldozers, dumpers, scrapers, loaders, shovels, drag lines, bucket wheel excavators, road rollers and the like.

12. MISCELLANEOUS MECHANICAL AND ENGINEERING INDUSTRIES: Plastic moulded goods; Hand tools, small tools and the like; Razor blades.

13. COMMERCIAL, OFFICE AND HOUSEHOLD EQUIPMENT: Typewriters; Calculating machines; Air conditioners and refrigerators; Vacuum cleaners; Sewing and knitting machines; Hurricane lanterns.

14. MEDICAL AND SURGICAL APPLIANCES: Surgical instruments—sterilisers, incubators and the like.

15. INDUSTRIAL INSTRUMENTS: Water meters, steam meters, electricity meters and the like; Indicating, recording and regulating devices for pressure, temperature, rate of flow, weights, levels and the like; Weighing machines.

16. SCIENTIFIC INSTRUMENTS.

17. MATHEMATICAL, SURVEYING AND DRAWING INSTRUMENTS.

18. FERTILISERS: Inorganic, Organic and Mixed.

19. CHEMICALS (OTHER THAN FERTILISERS): Inorganic heavy chemicals; Organic heavy chemicals; Fine chemicals including photographic chemicals; Synthetic resins and plastics; Paints, varnishes and enamels; Synthetic rubbers; Man-made fibres including regenerated cellulose-rayon, nylon and the like; Coke oven by-products; Coal tar distillation products like naphthalene, anthracene and the like; Explosives including gun powder and safety fuses; Insecticides, fungicides, weedicides and the like; Textile auxiliaries; Sizing materials including starch; Miscellaneous chemicals.

20. PHOTOGRAPHIC RAW FILM AND PAPER: Cinema film; Photographic amateur film; Photographic printing paper.

21. DYK-STUFFS.

22. DRUGS AND PHARMACEUTICALS.

23. TEXTILES (INCLUDING THOSE DYED, PRINTED OR OTHERWISE PROCESSED): made wholly or in part of cotton, including cotton yarn, hosiery and rope; made wholly or in part of jute, including jute, twine and rope; made wholly or in part of wool, including wool tops, woollen yarn, hosiery, carpets and druggets; made wholly or in part of silk including silk yarn and hosiery; made wholly or in part of synthetic, artificial (man-made) fibres, including yarn and hosiery of such fibres.

24. PAPER AND PULP INCLUDING PAPER PRODUCTS: Paper—writing, printing and wrapping; Newsprint; Paper board and straw board; Paper for packaging (corrugated paper, kraft paper, paper bags, paper containers and the like); Pulp—wood pulp, mechanical, chemical, including dissolving pulp.

25. SUGAR.

26. FERMENTATION INDUSTRIES: Alcohol; Other products of fermentation industries.

27. FOOD PROCESSING INDUSTRIES: Canned fruits and fruit products; Milk foods; Malted foods; Flour; Other processed foods.

28. VEGETABLE OILS AND VANASPATHI: Vegetable oils, including solvent extracted oils; Vanaspathi.

29. SOAPS, COSMETICS AND TOILET PREPARATIONS: Soaps; Glycerine; Cosmetics; Perfumery; Toilet preparations.

30. RUBBER GOODS: Tyres and tubes; Surgical and medicinal products including prophylactics; Footwear; Other rubber goods.

31. LEATHER, LEATHER GOODS AND PICKERS.

32. GLUE AND GELATIN.

33. GLASS: Hollow ware; Sheet and plate glass; Optical glass; Glass wool; Laboratory ware; Miscellaneous ware.

* For the full detailed list see below.

34. **CERAMICS:** Fire bricks; Refractories; Furnace lining bricks—acidic, basic and neutral; China ware and pottery; Sanitary ware; Insulators; Tiles.

35. **CEMENT AND GYPSUM PRODUCTS:** Portland cement; Asbestos cement; Insulating boards; Gypsum boards, wall boards and the like.

36. **TIMBER PRODUCTS:** Plywood; Hard-board, including fibre-board, chip-board and the like; Matchos; Miscellaneous (furniture components, bobbins, shuttles and the like).

37. **DEFENCE INDUSTRIES:** Arms and ammunition.

38. **MISCELLANEOUS INDUSTRIES:** Cigarettes.
Explanation 1.—The articles specified under each of the headings Nos. 3, 4, 5, 6, 7, 8, 10, 11 and 18 shall include their component parts and accessories.

Explanation 2.—The articles specified under each of the headings Nos. 18, 19, 21 and 22 shall include the intermediates required for their manufacture.

FIVE-YEAR PLANS

The First Five-Year Plan provided for completion of the various industrial projects already under implementation by the Central Government or by the State Governments.

In addition, the Central Government has had a special responsibility for establishing certain defence industries.

The progress of industry during the First Five-Year Plan appears satisfactory, as much spadework has been done with regard to many projects, though the targets have not been achieved by the end of the Plan. As against Rs. 101 crores proposed to be spent in the public sector on industrial projects, the actual outlay was only Rs. 57 crores, while the total gross

investment in fixed capital in the private sector during the Plan period was about Rs. 340 crores as against Rs. 468 envisaged. But the first plan was regarded essentially as a period of preparation for large-scale industrial development in the country.

In the context of industrialisation, there are two important problems—the industrial policy and industrial priorities. With regard to the first, the Government made a fresh statement of policy on April 30, 1956.[†] Within the framework of this policy, the following priorities are listed: (a) increased production of iron and steel and of heavy chemicals, including nitrogenous fertilizers and development of the heavy engineering and machine building industries; (b) expansion of capacity in respect of other developmental commodities and producer goods; (c) modernisation and re-equipment of important national industries which have already come into existence; (d) fuller utilisation of existing installed capacity; and (e) expansion of capacity for consumer goods.

In conformity with this order of priorities, the Second Five-Year Plan envisages the construction of three steel plants of one million tons ingot capacity each in the public sector and the provision of facilities in one of these for the production of 350,000 tons of foundry grade pig iron. Provision has also been made for the expansion of steel production by the Mysore Iron and Steel Works to 100,000 tons by 1960-61.

Other schemes include manufacture of electrical equipment; expansion of Hindustan Machine Tools; manufacture of industrial machinery and machine tools; expansion of the Government Electric Factory, Bangalore; development of the South Arcot Lignite Project at Neyveli; establishment of two more fertilizer factories in the Punjab and at Bourkela; expansion of Hindustan Shipyard and the Chittaranjan

Locomotive Factory; expansion of the existing D.D.T. and antibiotic factories and establishment in Kerala of a second D. D. T. plant; establishment of a security paper mill.

Industrial projects of State Governments include (1) expansion of Mysore Iron and Steel Works, Government Porcelain Factory, Mysore Implements Factory, Govt. Electric Factory, Govt. Soap Factory, and Central Industrial Workshop in Mysore State; (2) Expansion of U.P. Govt. Cement Factory and Precision Instrument Factory; (3) Bihar Superphosphate Factory, expansion of Spun Silk Mill and Porcelain Factory; (4) Expansion of Praga Tools Factory and Govt. Tannery in Hyderabad; (5) Expansion of Travancore Rubber Works, China Clay Scheme, Travancore Minerals and Hard Sand Bricks Factory; (6) Expansion of Sri Venkateswara Board Mills, Andhra Paper Mills and Andhra Ceramic Factory; (7) Cotton Spinning Mill, Distillery, Solvent Extraction Plant, Gwalior Leather and Tannery Factory, and expansion of Gwalior Potteries by the Madhya Pradesh Government; (8) the Textile Mill, Spun Silk Mill and Sugar Mill of Assam; (9) Silk Spinning Plant and expansion of Govt. Woollen Factory, Drug Factory and Silk Weaving Plant in Kashmir; (10) Sandalwood Oil Factory, timber seasoning kiln and creosoting plant in Coorg; (11) a Sugar Mill and a Spinning Mill in Pondicherry.

New investment on the industrial projects of the Central Government (excluding the provision for the National Industrial Development Corporation of Rs. 55 crores) is expected to be about Rs. 502 crores during the Second Plan period and of the States about Rs. 32 crores. The programme of overall development under the private sector and the NIDC will cost about Rs. 720 crores, comprising Rs. 570 crores of new investments and Rs. 150 crores on replacements and modernisation.

[†] Given at the beginning of the article.

NEW METRIC SYSTEM OF WEIGHTS AND MEASURES

THE Government of India have now decided to adopt the metric system as the sole system of weights and measures in India, thus bringing about uniformity throughout the country. It is to come into usage by stages within ten years of the passing of the Act at the end of 1956—the Standards of Weights and Measures Act.

But the present (Jan. 1958) official view seems to be that this time-table could not be regarded as rigid and that in fact for another twenty, thirty, forty years the present weights and measures might continue to be used.

The change-over might not start on April 1, 1956 as planned.*

The Coinage Act of 1906 was amended to provide for the introduction of a decimal system of subsidiary coinage.

The new system of coinage came into use with the financial year 1957-58.

Further information about coinage is given in the section on Decimal Coinage.

The decision to adopt the metric system was not made in a hurry. It was preceded by nearly a century of study and discussion.

Even in the 19th Century the question of standardizing weights and measures in India received much attention from successive Governments, Central and Provincial. The work of a Committee appointed by the Government of India in 1867-68 is worthy of special mention. Though it recommended the adoption of the British system of weights and measures there was a strong note of dissent by Col. Richard Strachey, himself an engineer and administrator, which led the Government to decide in favour of the metric system. The Indian Weights and Measures Act of 1870 was passed which defined the kilogram as the standard of weight and equated the seer with kilogram and the seer capacity measure with litre. This Act however did not receive the sanction of the Secretary of State who raised some objections. A modified Act which met the Secretary of State's objections—Act XXXI of 1871—also remained a dead letter. Thereafter, the metric system went out of favour. The Measures of Length Act was passed in 1889 fixing the Imperial Yard and its subdivisions as the primary units of length. This Act is still current.

In 1914, another Committee, after an extensive survey of the diversity of weights and measures in the country, recommended that a uniform system should be adopted throughout India. As regards the system itself, two members recommended a combination of the British and Indian systems, while the third member presented a strong note of dissent, advocating the adoption of the metric system. No legislative action was taken following this report, and it was only in 1939 that the Indian Standards of Weights Act (Act IX) of 1939 was passed repealing the Act of 1871. This Act prescribed the weights in terms of the tola-seer-maund series and the grain-pound-ton series. The enforcement of the Act was in the discretion of the States; some of them therefore passed the necessary Acts incorporating the provisions of the Central Act. These States included Assam, Bihar, Bombay, Madras, Orissa, Punjab and Uttar Pradesh from the former Part A States, Hyderabad, Madhya Bharat, Mysore, Rajasthan and Travancore-Cochin from the former Part B States, and Bhopal and Coorg from the former Part C States. Actual enforcement does not appear to have been particularly effective except in Bombay State. For, the local weights and measures still continue to be used in most of the States, with variations from village to village and market to market, causing a lot of confusion in the day to day trade of the country.

Since 1939, opinion in favour of the metric system has been steadily growing. The Manufacturing Subcommittee of the National Planning Committee of 1940 and the Indian Science Congress of 1946, the latter under the president-

ship of Mr. Nehru favoured the adoption of the metric system.

In 1946 a Decimal Coinage Bill was introduced by Government in the Central Legislature but the political conditions then prevailing made it impossible to proceed with it.

To investigate the question of weights and measures thoroughly and to make specific recommendations to the Government, the Indian Standards Institution (ISI) appointed a Special Committee in May 1948 with the concurrence of the Government of India. This Special Committee consulted all the various industrial, commercial and trade interests as well as Government departments and others affected by the problem, and finally recommended that the best solution was the metric system of weights and measures the introduction of which could be spread over a period of 11 to 15 years, preceded by the adoption of decimal coinage.

It recommended that the reform should be carried out in three stages, a preparatory stage of three to five years in which no extensive changes would be made but large-scale propaganda would be undertaken; a change-over stage of about five years in which the change-over would be effected in the agencies under the control of Central and State administrations and in public life; and a final stage of three to five years when the whole country would come under the metric system entirely, and after which no other system would be regarded as legal.

The report gave rise to much public discussion, and the pros and the cons were thoroughly argued. Those in favour of the metric system have urged that now that India is embarking upon a heavy programme of industrial development, the country has to choose between the two major international systems of weights and measures. The metric system is more widely prevalent and used in scientific and technical research all over the world. It is simpler and has therefore advantages in mass education. The decimal system was invented in India.

In order to make a proper assessment of the whole problem the Planning Commission decided on the 30th August, 1954 that Mr. Pitambar Pant (Private Secretary to Chairman, Planning Commission) should prepare a memorandum.

Further investigations were, therefore, undertaken by Mr. Pant in consultation with the Indian Standards Institution, the Ministry of Commerce and Industry and other Ministries of the Government of India to ascertain opinion in business and industry and the extra cost that the adoption of the metric system might entail in the public and private sectors. The Ministry of Commerce and Industry also sent round circulars to a large number of industrial units to obtain the views of organized industry. The general conclusion reached on the basis of the replies was that the metric system could be adopted without much difficulty provided the transition was spread over a period of 10 to 16 years. As regards the cost of conversion, it was estimated that this would be of the order of one crore of rupees per year over a transition period of 10 years.

After considering Mr. Pant's Report, the Planning Commission came to the conclusion that the metric system should be accepted in principle and necessary steps taken to introduce it throughout the country. For this purpose, it recommended the setting up of a Central Metric Committee to consider: the form in which legislation should be introduced, the phasing of the actual change-over, and education and propaganda.

After the Planning Commission's decision was endorsed by the Cabinet, it was put before Parliament for discussion on an unofficial resolution about the subject. The decision of the Government of India was widely supported and the resolution was accepted.

A Standing Metric Committee, recommended by the Planning Commission, was soon appointed

by the Government of India under the Chairmanship of the Union Minister for Commerce, Mr. N. Kanungo. This Committee was entrusted with the task of looking into Central legislation, working out a phased programme of changeover, determining the form of States' organizations and other connected matters.

The first phase of the work of this Committee, namely, enactment of Central legislation having been completed, the Committee is now engaged on the task of preparing a co-ordinated plan of changeover for the Central and State Governments Departments, the public and private sectors of industry, etc.

The Standards of Weights and Measures Act 1956 was passed in December 1956 by the Union Parliament and the metric system was to be introduced in selected sectors of industry and trade with effect from 1st April 1958.

The Act defines the metre and kilogram as the primary standards of length and mass on the basis of international proto-type.

It also standardises the unit of time as 'second' and capacity as 'litre'.

It recognizes centigrade scale of temperature as standard and a number of other primary and secondary units of practical importance.

The Act incorporates the latest definitions of standard units as internationally accepted and reflects the trend which all legislations of this type follow.

The major task confronting the Standing Metric Committee now is that of getting uniform legislation adopted by the fourteen States and to see to the establishment in each of these States of a strong Inspectorate of Weights and Measures. With this end in view, a Conference of State representatives was held in July 1957. This Conference agreed upon a uniform model bill, among other things, to be enacted in each State. The Conference also discussed items like Standards of Weights and Measures Rules, 1957, Notification of Secondary Units under Section 12 of the Weights and Measures Act, 1956, a general programme for the first stage of transition, organization for enforcement of weights and measures in States, training of personnel, manufacture and supply of metric weights and measures, etc. An Inter-State Committee of heads of Weights and Measures Departments was formed to ensure uniformity of approach with regard to the introduction of the metric system in all the States.

The Central Government Departments which have direct contact with the public, such as the Railways and Posts and Telegraphs, were to be the first to change-over to metric system, and already detailed plans have been worked out in this connection. Revision of various laws, notifications, conversion of maps, land records, etc. in the light of the new system offer many problems and are now being tackled by the Central Ministries and the State Governments. Aspects of education at all levels are also receiving attention simultaneously.

To carry along the private and public sectors of industry, conferences of individual groups of industries, beginning with engineering and textiles, are being organized under the auspices of the Standing Metric Committee from time to time.

A new journal *Metric Measures* has also come into being for purposes of education.

The total costs of the change-over would run into tens of crores. About 7,000 tons of pig iron would be needed for the new weights alone.

In this changeover the Indian Standards Institution has an important role to play. It has to furnish all basic standards required for various phases of changeover in every branch of industry and trade. The ISI has, therefore, worked out a 10-year plan of conversion during which all available Indian Standards will be converted into metric units. It has already published Conversion Factors and Conversion Tables covering all kinds of quantities that are

* In fact it did not. The Madras Government decided to introduce it in four districts—Madras, Chingleput, South and North Arcot—in October 1955.

of importance to the commercial and economic life of India. The Indian Standard on Commercial Metric Weights has been published, while standards on commercial metric capacity measures, commercial length measures, etc. are to be issued shortly. An Indian Standard Guide for Inter-Conversion of Values from One System of Units to Another has also been issued. Another special guide has been prepared to deal with inch-millimeter dimensions in engineering practices.

A more detailed and comprehensive task of preparing new standards and codes of practices including certain design codes and handbooks

on the basis of the new system of weights and measures is also in hand (Oct. 1957).

A model Bill to give effect to the new system in the States has been approved.

Standards of Weight

The following table reproduced from the First Schedule of the Standards of Weights and Measures Act, 1956 gives the recognised rate of conversion for some of the units of weights and measures in the existing system into the metric system.

1 grain	= 0.00064799 kilogram.
1 ounce	= 0.0283495 "

1 pound	= 0.4535924 kilogram.
1 cwt.	= 50.802 "
1 ton	= 1016.05 "
1 tola	= 0.0116638 "
1 seer	= 0.93310 "
1 maund	= 37.2242 "

Standards of Length and Capacity

1 inch	= 0.0254 metre (exact).
1 foot	= 0.3048 " { " }
1 yard	= 0.9144 " { " }
1 mile	= 1,609.344 " { " }
1 imperial gallon	= 4.54596 litres.

IMPORT AND EXPORT TRADE

	Rs. lakhs		
	1956 April-Dec.	1957 Jan.-March	1957 Jan.-June
Total (sea and air) foreign trade	1,032.82		
Imports*	597.55	235.61	497.71
Exports	430.18	163.74	311.61
Re-exports	5.09	1.08	2.11
Total Exports	435.27		
Excess of exports over imports	-162.28		
Imports across Land frontier	14,61.5		
Exports across land frontier	4.49.2		
Re-exports across land frontier	0.64		

* Excludes certain stores on Government account.

FOREIGN TRADE BY CALENDAR YEAR

Below we give the composition of the country's foreign trade by calendar year :

(Rs. Crores)

	1956	1955	January to June	
			1957	1956
Exports	588.04	602.21	311.61	282.14
Re-exports	7.56	5.46	2.11	5.31
Total exports	595.60	607.67	313.72	287.45
Imports	813.27	673.06	497.71	393.77
Overall balance of trade .. (Minus)	217.67	65.39	183.99	106.32
Exports—				
Tea	142.84	113.62	49.36	55.30
Jute yarns and manufactures	113.48	123.57	29.00	51.75
Cotton yarns and manufactures	62.30	63.81	37.71	31.08
Metallic ores and scrap iron or steel for re-manufacture	30.09	23.72	26.59	9.47
Cotton, raw and waste	25.09	34.69	14.46	17.56
Oils—vegetable, mineral and animal	24.50	42.14	9.86	17.78
Fruits and vegetables	18.06	14.09	8.58	9.25
Tobacco	13.31	13.35	9.01	5.15
Mica	8.75	8.06	4.53	4.37
Wool, raw and waste	10.64	8.10	6.45	5.51
Gums, resins and lac	11.19	13.85	4.73	5.30
Spices	9.23	10.59	5.11	5.35
Hides and skins, raw	6.07	6.73	3.88	3.48
Woolen yarns and manufactures	4.35	4.32	2.38	2.14
Imports—				
Machinery of all kinds	150.11	110.03	80.58	72.08
Metals, iron and steel and manufactures thereof	122.42	52.18	79.52	56.56

Trade from 1952-57

The following table shows the values in Rs. lakhs of the total import and export trade of India from 1952-53 to 1956-57. The total, includes trade across the land frontiers too :

	Imports	Exports	Balance
1952-53	664.04	577.66	-86.38
1953-54	580.67	530.62	-50.05
1954-55	633.05	588.24	-44.81†
1955-56	649.64	591.23	-58.41
1956-57	842.53	601.36	-241.17

† Excludes adverse balance of Rs. 8 lakhs on trade in gold and silver.

The following table shows the values in Rs. lakhs of the import and export trade of India across the land frontiers only from 1952-53 to 1956 :

	Imports	Exports	Balance
1952-53	25.16	18.84	- 6.32
1953-54	22.93	7.46	-15.47
1954-55	23.39	5.73	-17.66
1955-56	29.35	6.14	-23.21
1956 (Apr. to Dec.)	14.62	4.49	-10.13

General Indices of Exports and Imports (1952-53 = 100)

	1953-54	1954-55	1955-56
Quantity Index :			
Exports	99	102	115
Imports	95	105	114
Price Index :			
Exports	94	100	93
Imports	93	91	94

India is essentially an agricultural country with farming regarded by the people as a tradition rather than as business. During the past 30 years the tendency has been, towards rapid industrialisation. This change has been noticeable in the matter of foreign trade especially in the post-partition period. In 1920-21 finished goods represented 84 per cent of imports, while exports of raw materials accounted for 45 per cent of the total shipments. In the quinquennium ended 1929-30 imports of raw materials hardly represented 9.3 per cent of the total, while exports of raw materials were as high as 49.5 per cent of the shipments. By 1950-51 the share of raw materials under imports rose to 35.1 per cent while that under exports dropped to 20.8 per cent. The emphasis on higher industrial production during the intervening period was responsible for reducing the import of manufactured goods from 72.6 per cent of the total imports in the five years ended 1929-30 to 45.7 per cent in 1950-51, while the share of finished goods in the export trade rose from 26.6 per cent to 55 per cent.

IMPORT AND EXPORT CONTROL

(see also under 'Finance')

Import trade control was first instituted in May 1940 for conserving the limited tonnage and the hard currency. In the post-war period, currency difficulties, the prospects of release of sterling balances and the Government's view on inflation were the guiding principles. In July 1950 following the recommendations of the Import Control Inquiry Committee, the Government decided that from the beginning of 1951 (i) commercial imports should be annually around Rs. 400 crores, (ii) the O.G.L. should cover basic raw materials in short supply and exclude commodities sufficiently available in the country at a reasonable price, (iii) the actual licensing should be decentralised and the period should be half-year, and that (iv) the order of priorities for imports should be (a) raw materials and spares for industries essential for the life of the community, (b) other raw materials and capital goods, (c) other essential goods and (d) non-essential goods.

In the second half of 1953 the policy underwent slight changes. The salient features were : (1) liberalisation of imports of machinery not indigenously manufactured, industrial raw materials such as art silk yarn and cotton yarn above 80s, and consumer goods like spices, fruits, breakfast foods, etc. and (2) simplification of the licensing procedure. Other measures included the introduction of free licensing for cotton stapling 1/16" and above from the soft currency countries and the extension to 1953-end of the validity of import licences already issued for U.S. cotton.

The emphasis of the policy shifted from reduced quotas to higher tariff values with a view to regulating imports to meet the more important needs. In pursuance of this objective, import duties were reduced on sugar from Rs. 14-14 to

Rs. 7 per cwt., on copra from non-preferred sources from 25 per cent to 15 per cent *ad valorem* and from other sources from 15 per cent to 5 per cent *ad valorem*.

In pre-war years the Government's policy was to encourage exports. Immediately after the war, export control was relaxed, but the aggravation of inflationary pressures rendered its tightening in 1949. Following the devaluation of the rupee, export duties were put up on commodities for which India was at an advantage. Simultaneously, quality control was gradually introduced and a network of Trade Commissioners' offices was set up. Following the end of the Korean war boom and the fall in demand, the Government was obliged to reduce the export duties gradually. The process started early in 1952 and continued till the end of 1954.

The export policy for 1955 and 1956 was also liberal as there was a desire to safeguard the balance of payments position by encouraging exports, adopting a number of constructive measures. The Government continued to broaden the scope of bilateral trade pacts with a number of European countries. With Pakistan also, the trade pact was ratified.

Another constructive measure was the continued encouragement provided by Government for the establishment of Export Promotion Councils for providing stimulus to a number of individual commodities. Export Promotion Councils were set up for cotton textiles, silk and rayon textiles, and plastics in 1954 and for engineering products, pepper, cashew nuts, tobacco and shellac in 1955-56.

Trade delegations to promote India's exports, were sent to China, Africa and Middle East countries. The Government also lent its support to the Indian Industries Fair at New Delhi.

Important changes in 1955-56 : (1) Export duty was reduced or abolished for a number of items like raw cotton, sesamum oil, jute manufactures, black pepper and coffee. (2) A number of commodities such as cotton textiles, groundnut oil cakes, cotton seed oil and chrome ore were placed on the free licensing list. (3) Additional quotas were granted for raw wool, certain varieties of short staple cotton, groundnut oil, groundnuts and tea.

IMPORT POLICY

The liberal import policy introduced from 1953 was continued in 1955 also. The important features of the policy for January-June 1955 were liberalisation in respect of several items, greater accommodation for small importers and wider scope for newcomers. Traders' demand to extend the basic period was met to a large extent. Monopoly imports in respect of raw silk, caustic soda, soda ash, etc., were, however, continued. The Government was anxious to maintain the policy of progressive and controlled liberalisation.

The policy during 1955-56 continued to be one of progressive but controlled liberalisation. Thus, in July-December 1955 import quotas of a few commodities like antimony ingots, drills and reamers, house service metres, textile preservatives, etc. were increased. At the same time, discrimination against dollar imports was relaxed in the case of 55 items and permission was granted to utilise a portion of the soft currency licences for imports from the dollar area. With a view to conserving foreign exchange resources, import quotas were reduced for items such as hack-saw blades, certain varieties of iron and steel chains, torch bulbs, certain chemicals, polishes and polishing compositions, etc. Eighteen new items were thrown open to actual

users, which included white metal, fabricated iron and steel road rollers, etc. The basic period was extended to include 1953-54 for 92 items. In January-June 1956, quotas were enhanced in the case of small tools like milling and gear-cutters, reamers, twist drills and carbide tipped drills while quotas for items such as buttons, pruning knives, textile preservatives, etc. reduced. The basic period for 135 items was extended to include 1954-55. Dollar imports were permitted in respect of milk foods, electrodes, diesel engines above 30 H.P., etc.

During the second half of 1956, import of ball-bearings, small tools and garage tools was further liberalised while increased quotas were provided for certain raw materials. The basic period was extended to 1954-55 for 108 items and to 1955-56 for another 68 items and provision in respect of certain items was made for newcomers to become established importers. Quotas were reduced for 73 items and 31 items were removed from the Liberal Licensing List.

A rapid depletion of foreign exchange reserves, brought about largely by heavy imports of machinery and iron and steel, made it necessary to adopt a more restrictive import policy for the

first half of 1957. Quotas were cut down for 509 items which included a number of consumer goods, machinery and raw materials. The system of liberal licensing was withdrawn, so also the facilities provided to importers under the Export Promotion Scheme such as grant of special licences to exporters to replace the import content of their products, and concessions granted to holders of soft currency licence for utilisation, upto specified limits, of their licences for imports from hard currency countries were liberalised considerably.

A policy for the import of capital goods under deferred payment arrangements was also formulated in March 1957.

Export Promotion Councils were set up for two more industries, viz., mica and leather and leather goods. Other measures to encourage exports included (1) extension of free licensing to all varieties of cotton piece-goods up to June 30, 1957, (2) abolition of export duty on coarse cloth and linseed oil, (3) modification, with effect from February 1, 1957, of the procedure for obtaining refund of excise duty on exports and (4) announcement of an export quota of one lakh tons for sugar. However, export of commodities in short supply or commodities considered to be

essential for indigenous industries continued to be restricted.

An important development during the year was the establishment of the State Trading Corporation, a fully State-owned enterprise. Broadly speaking, this Corporation is intended to supplement and not to supplant existing commercial channels. The Corporation's business transactions, including contracts entered into with foreign countries, since its inception amounted to over Rs. 38 crores.

Another important step was the decision to set up a State-owned Export Risks Insurance Corporation to cover certain risks including those beyond the control of the exporter or the buyer abroad.

Towards the end of the year, the Government also set up an Export Promotion Committee to examine the problems relating to exports and suggest measures for licensing the export earnings of the country.

During the year, eleven existing trade agreements were renewed while seven new agreements were signed with Poland, Bulgaria, Pakistan, Burma, Viet Nam, Eastern Germany and Chile (See Trade Agreements in this article).

TRADE AGREEMENTS

India has trade agreements or trade arrangements with 25 countries in Asia, Africa, Europe and other parts of the world.

The countries are Afghanistan, Austria, Bulgaria, Burma, Ceylon, Chile, China, Czechoslovakia, Egypt, Finland, East and West Germany, Hungary, Indonesia, Iraq, Italy, Norway, Pakistan, Poland, Rumania, Sweden, the Soviet Union, North Vietnam and Yugoslavia and Japan.

Below we give the latest available position about the trade agreements which India has entered into with some countries. The information given within brackets relates to the dates on which the agreements were signed and the duration of the agreements respectively.

Austria.—(9th December 1952); (1st July 1953 to 30th June 1958). *Imports*: Woollen piecegoods, cotton threads, newsprint, rubber threads (permissible types), chemicals chiefly bichromates and chromic acid, admissible types of textile, agricultural and wood-working machinery and electrical apparatus, etc. *Exports*: Castor oil, colir, colir yarn, fibres for brushes and brooms, handicraft, manufactures of ivory, brass, horn and brocade, iron and manganese ores, linseed oil, mica, myrobalsans, shellac, spices, kapok, cashewnuts, walnuts, raw wool, pig bristles, cotton seed oil for industrial purposes, etc. and tanned leather, etc.

Bulgaria.—18th April 1956 (up to the end of 1959): *Imports*: Fruits and vegetables, chemicals, drugs and medicines, electrical instruments, machinery and equipment, diesel engines of 0-3 H.P. or above 30 H.P., films exposed, etc. *Exports*: Tea, spices, lac, essential oils, castor oil, raw wool, raw cotton, drugs and medicines, electric ware and cables, electric lamps, light, engineering goods including sewing machines and plastic goods.

Burma.—(5th September 1951); 4th Sept. 1961—(extension under consideration). *Imports*: Rice, dyeing and tanning substances, stick lac, gram and pulses, lead, teakwood, hardware and cutlery, hides and skins—raw, tobacco, machineries, tea, vehicles, wood and timber, metals and ores, handicrafts, cottage industry products, precious stones. *Exports*: Groundnut oil, fish, coal, cotton piecegoods, colir manufactures, cotton yarns, drugs and medicines,

surgical instruments, books printed and printed matter, coffee, tea, spices, light engineering goods, cotton manufactures, jute manufactures.

On July 14, 1956 another agreement was signed. India would export to Burma cotton textiles worth about Rs. 185 lakhs, against payment by Burma in U.S. surplus cotton.

Ceylon.—(15th July 1953); (1st September 1953 to August 31, 1957). *Imports*: Import of 2,500 candles Jaffna tobacco per annum would be permitted through Alleppey, at special rate of duty. *Exports*: Bidis and handloom towels.

Chile.—(16th October 1956); (up to 31st December 1959). *Imports*: Pulses, barley, fish and dried fruits, sulphur, Chilean nitrate, copper, lead, iron and steel, etc. *Exports*: Tea, cashew kernels, jams, spices, vegetable oils, drugs and medicines, mica, shellac, hides and skins tanned, cotton, woollen, silk and art silk, textiles, jute goods, films exposed, etc.

China.—(14th October 1954); (14th October 1954 to 31st Dec. 1958). *Imports*: Gypsum, graphite, orpiment, silk and silk piecegoods, hides and skins, wool raw, wool yarn and manufactures, paper and stationery, chemicals, oils, drugs and medicines, rice, soya beans, honey. *Exports*: Spices (including chillies and pepper), tobacco unmanufactured, manganese ore, vegetable oils, essential oils, cotton raw, wool raw, sandalwood, hides and skins, mica, shellac, jute manufactures, cotton textiles, machinery and machine tools, mathematical and surgical instruments, light engineering goods, films exposed.

Czechoslovakia.—(30th Sept. 1957 to 31st Dec. 1960). *Imports*: Various types of machinery (such as complete industrial plants, welding machines and transformers, cigarette producing and textile machinery, industrial leather and rubber belting, industrial sewing machines, refrigerators, equipment for thermal and hydroelectric power stations and mining, machine tools, iron & steel wire netting, diesel locomotives, agricultural tractors and parts, newsprint, etc. *Exports*: Tea, spices, tobacco, cashewnut, vegetable oil, cotton raw and cotton waste, shellac, mica, manganese ore, crushed bones, raw wool, Indian handicrafts, cotton, rayon and woollen textile, cotton and rayon

knitted goods, plastic goods, sports goods, carpets, colir products, hides and skins tanned etc.

Egypt.—(8th July 1953); (Effective from the date of signature and will remain in force till it is modified or terminated by either party on giving 3 months' notice). *Imports*: Raw cotton, cotton yarn, gypsum, rock phosphates, flax, dry dates, goat skins raw, essential oils, perfumes and essence of geranium, etc. *Exports*: Unmanufactured tobacco, jute goods, coal, oils and oilseeds, cotton and woollen piecegoods, iron and steel manufactures, certain types of machinery, Indian handicrafts, Indian films, etc.

Finland.—(12th January 1951); (1st January 1951 to 31st December 1957). *Imports*: Sawm and planed timber of coniferous, spices, newsprint, paper and paper products wallboards of wood fibre (soft and hard), tea chests, etc. *Exports*: Cashewnut, tobacco, spices, jute goods, tea, shellac, cotton waste, linseed oil, colir yarn and manufactures, mica, cotton, silk, rayon, textiles.

Germany, East.—(8th October 1956); (8th October 1956 to 7th October 1959). *Imports*: Electric, diesel and steam locomotives, machinery of various kinds (e.g. mining machinery, earth drillers, bakery and confectionery machinery, machinery for cigarette, oil, textile, chemical and pharmaceutical industries), electric furnaces and electric motors, wall tiles, fertilisers, raw film etc. *Exports*: Tea, coffee, tobacco, and tobacco manufactures, pepper, spices, fruit dried, essential oils, mica, hides and skins, cotton piece goods, jute yarn and manufactures.

Germany, West.—(31st March 1955); (1st April 1955 till terminated by either party giving three months' notice). According to this agreement, the two governments would facilitate trade between the two countries in all commodities permitted by the regulations in force from time to time. In regard to certain commodities, however, the imports of which into the Federal Republic of Germany are subject to quantitative restrictions, quotas have been provided for under the agreement as revised from time to time.

The commodities for which such quotas (some effective until September 30, 1957 and some until March 31, 1958) include: twine, ropes, cordage

* A new agreement was signed on Jan. 13, 1957. This would be valid till Aug. 31, 1961.

and cables of jute and false jute, finished cotton fabrics and furnishings and towellings, silk, art silk and woollen fabrics, cotton blankets, knitted carpets of textiles other than silk and wool, fine animal hair, carpets of jute and similar fabrics other than knitted, tanned and finished leather from hides and calf skins, finished leather from sheep and goat skins, pineapple juice, tropical fruits, roasted and salted groundnuts, cashew nuts, almonds and mixtures.

Hungary.—(17th June 1954); (17th June 1954 to 31st December 1959*). *Imports:* Hydro-turbines, electric motors, complete factory plants for canning industry, machinery for cable, metals, leather, textile and printing industries, transformers, electrometers, electric welding apparatus, machine tools, chemicals, pharmaceuticals, laboratory equipment, instruments for rubber goods, vegetable seeds, etc. *Exports:* Tea, coffee, jute goods, tobacco, spices, cashew-kernel, shellac, linseed oil, essential oils, iron ore, manganese ore, raw goat and sheep skins, coal and coal manufactures, cotton waste, silk rayon and woollen textiles, leather goods, toilet and washing soaps, sports goods and plastic manufactures, light engineering goods, handicrafts, mica, paints, lacquers, taploca, etc.

Indonesia.—(30th January 1953); (30th Jan. 1953 to 30th June 1958). *Imports:* Copra, coconut oil, palm oils, essential oils, spices and betel-nuts, timber, tin, rubber, raw hides and skins, canes and rattans, gums and resins, sisal fibre, tobacco wrappers, palm kernels, fresh and dried fruits, tanning material, etc. *Exports:* Jute goods, tobacco, woollen piecegoods, cotton piecegoods, handloom goods, cotton yarn, vegetable oils, coal, cement, soap, paints & varnishes, pharmaceutical products, chemicals & chemical preparations, lac (including shellac), rubber tyre and tubes, machinery, motor bicycle, batteries and dry cells, machine tools, gums and resins, sisal fibre, tobacco wrappers, electrical equipment, sports goods, household utensils, sewing machines, fans, hardware, tea-cheests, shellac, porcelain ware, paper and paper board, sugar cane crushers.

Iraq.—(6th May 1953); (6th May 1953 to 31st December 1957). *Imports:* Horses, mules, dates, barley, millets, pulses, rice, wheat and other foodgrains including beans, etc., galinuts, hides and skins (light weight). *Exports:* Fruits fresh including mangoes and bananas, fruits preserved and tinned, and fruit juice, spices, tea, wood and timber, plywood, coal and coal manufactures, cotton manufactures, cotton piecegoods, raw cotton, jute manufactures, leather manufactures, tiles, cottage industry products, handloom products, chemicals, drugs, medicines, electrical goods.

Italy.—(29th July 1954); (29th July 1954 to 31st December 1958). *Imports:* Dairy products, dried fruits, cotton yarn, cotton fabrics, wool raw, hand knitting wool, raw silk, artificial silk, vehicles and parts thereof, stationery, drugs and medicines, certain types of machinery, railway rolling stock, railway and tramway axles, wheels, etc., dyeing, bleaching and mercer-

ising machinery and parts, bakeries, confectioneries, etc., book binding, air-conditioning, textile machinery, films exposed, etc. *Exports:* Tea, tobacco, spices, jute goods, cigarette and cigars, coal, lac and shellac, hides and skins, essential oils, oilseeds, cotton raw, wool raw, coal yarn and coal manufactures, certain types of wood and timber, etc.

Norway.—(24th June 1955); (1st January 1955 to 31st December 1956). *Imports:* Mechanical and chemical pulp, fatty alcohols, newspaper, galvanised and black steel pipes, hydraulic brake fluids, testing machines, welding equipment, marine type diesel engines, machine tools, medicinal and industrial cod liver oil, fishing vessels (permissible types), vitamin concentrates, wood-working machinery. *Exports:* Tobacco, jute goods, tea, shellac, coal products, hydrogenated oils, mica, iron and manganese ore, woollen carpets, tanned hides and skins, cotton textiles, light engineering goods and plastic manufactures, coffee, linseed and castor oils.

Pakistan.—(22nd January, 1957); (1st February, 1957 to 31st January 1960). *Imports:* Raw jute, hides and skins, fish, poultry and egg, betel-nut, spices, honey, cinema films, machine tools, bicycles and spare parts, surgical instruments and sports goods. *Exports:* Chemicals, drugs and medicines, mill board and straw-board, machinery and mill work, workshop equipment, electrical instruments, sugar, tea for blending, coffee, betel leaves, bids and hooks tobacco and bidi leaves.

Poland.—(3rd April 1956); (1st April 1956 to 31st Dec. 1959). *Imports:* Textiles, mining and drilling machinery, iron and steel structures including bridges and towers, complete plant and equipment for sugar factories, alcohol distilleries, etc., railway locomotives, wagons and carriages, industrial materials (like carbon black active, bone glue and lactic casein), cement, etc. *Exports:* Iron ore, manganese ore, mica, shellac, myrobalan, tea, coffee, spices, hides and skins, cotton textiles, raw cotton, raw wool, wool waste, jute goods, plastic goods, hardware, boots and shoes, soap and toilet products, jams, chutnies, pickles, fruit squashes and sauces, cashew shell oil, handicrafts, cottage industry products.

Roumania.—(23rd March 1954); (23rd March 1954 to 30th June 1958). *Imports:* Food grains (wheat and rye), petroleum products, chemicals, timber, wooden products, cement, machine tools for metal, textile machinery, mustard, certain types of electric goods, handicrafts and cottage industry products, wood-working machinery, railway products. *Exports:* Iron ore, tea, coffee raw, spices, including pepper, vegetable oils (linseed, castor, etc.), essential oils, shellac, mica, hides and skins, raw cotton, wool waste, wool raw, jute yarn and jute manufactures, chemicals, fish oils, myrobalans and extracts, etc.

Sweden.—(31st May 1955); (1st January 1955 to 31st December 1957). *Imports:* Condensed milk, cement, wood, tar, hides and skins raw,

waste paper, rayon silk, glassware, newsprint, iron and steel, hinges, bolts and nuts, cutlery, diesel engines and spare parts, printing presses, certain types of machinery, motor cycles, staple fibre, ferro alloys, stainless steel, etc. *Exports:* Cotton textiles, silk fabrics, rayon fabrics, jute goods, shawls, sarees, coal and coal products, cotton waste, certain types of oils, hydrogenated oil, spices including pepper, chillies, ginger, turmeric, cardamoms, pickles, chutneys, condiments, tea, coffee, tobacco, shellac, manganese ore and magnesite, cashew kernels, raw cotton, etc.

U.S.S.R.—(2nd December 1953); (2nd December 1958). *Imports:* Foodgrains (wheat and barley), dyestuffs, chemicals, iron, and steel manufactures, paper of different kinds including newspaper, printed matters including books and periodicals, agricultural tractors, crude petroleum, machine tools, aluminium, rough emeralds, woollen fabrics, machinery (boring and mining, road building equipment, heavy electrical plant and equipment), zinc, ammonium sulphate. *Exports:* Raw wool, tobacco unmanufactured, spices, black pepper, cardamoms and others, shellac, goat skins tanned, hides and skins tanned, Indian handicrafts and cottage industry products, cinematographic films (exposed), jute manufactures, mica, fruit and vegetables, vegetable oils, cashew nuts, hydrogenated oil, foot-wear, raw coffee, tea, coal products, dyeing and tanning substances, woollen carpets, woollen hosiery fabrics.

Viet-Nam.—(22nd September 1956); (up to 31st Dec. 1959). *Imports:* Rice, maize, timber, wood, oil, saffron, cement, limestone, handicrafts, etc. *Exports:* Engineering goods (e.g. diesel engines, pumps, sewing machines), kerosene stoves, confectionery, tea, coffee, spices, hydrogenated oil, cotton and jute textiles, electrical fittings, scientific instruments of all types, etc.

Yugoslavia.—(March 31, 1956); (1st April 1956 to 31st December 1959). *Imports:* Dyeing and tanning substances, iron and steel products, rolling stock, wagons, rails, metal products, steam boilers, diesel and steam locomotives, tractors, electrical apparatus, etc. *Exports:* Iron ore, manganese ore, mica, shellac, tea, coffee, tobacco, spices, cotton textiles, raw cotton, raw wool, jute goods, handicrafts and cottage industry products, etc.

Afghanistan. According to the exchange of letters on June 14, 1957 between the Governments of India and Afghanistan, imports of dry and fresh fruits and saffordia from Afghanistan into India would be facilitated within a prescribed ceiling. The list of commodities for export from India include green and black tea, spices, sugar, bidi and tobacco manufactures, cotton textiles, jute goods, woollen and art silk manufactures, leather and leather goods including foot-wear, films, machinery, building materials, chemicals, rubber goods, bicycles, motor cycles, paper and stationery, aluminium goods, iron and steel products, etc.

EXPORT PROMOTION MEASURES

There is an Export Risks Insurance Corporation as well as the Export Promotion Directorate to help exporters in their task.

The Export Risks Insurance Corporation has made a good start and during the brief period of its existence has received 86 proposals covering an export of almost Rs. 23 crores.

In June 1957 a Directorate of Export Promotion was created in the Ministry of Commerce and Industry simultaneously with the constitution of the Foreign Trade Board. The Direc-

torate co-ordinates export promotion activities and maintains close liaison with the various Export Promotion Councils. Specific targets of commodity-wise exports have been drawn up by this Directorate and steps are being taken to help the trade to reach the planned targets.

Various incentives have been provided for exporters in the form of draw-back of import duties, rebates of excise duty, replenishment quota of raw materials used in articles meant for export etc., with a view to bringing down the cost of production of these items and enabling

the exporter to offer them at competitive prices in the markets abroad. Quality control schemes, both on compulsory and voluntary basis, have also been instituted.

With the assistance of the Railway Board and the Ministry of Transport, arrangements have been made to move goods meant for export on a priority basis both by land and in a few cases by sea. A system of registration of exporters has been instituted by which registered exporters are eligible for certain special benefit and issue of licences on a priority basis.

*The original agreement which ended in Dec. 1957 was extended by another two years. It was arranged that payment would be made in rupees.

Note: A trade agreement was signed with Japan on Feb. 4, 1958. This would be valid for two years, and will continue in force thereafter subject to three months notice.

EXPORTS AND IMPORTS

JANUARY 1 TO JUNE 30, 1957

Below we give the value of exports and imports of specific articles for the half year January 1 to June 30, 1957.

Only such articles have been chosen as have a value of more than Rs. 5,00,000. The quantity was not available at the time this article was prepared.

We have had to give the particulars for April 1 to December 31, 1956 and for January 1 to June 31, 1957 separately because, the whole basis of classification of items has changed from 1st January 1957.*

EXPORTS

Article	Value	Article	Value
	Rs.		Rs.
Sheep and lambs	5,66,121	Mica uncut or unmanufactured in sheets or blocks, films and splittings, scrap mica unground or ground	4,53,33,172
Meat extracts and preparations of meat NES including natural sausage casings	22,80,820	Minerals crude including ice NES	95,45,965
Eggs	11,48,527	Iron ore and concentrates except pyrites not roasted	6,08,98,421
Fish, salted, dried or smoked, but not further prepared	1,27,20,237	Iron and steel scrap	1,84,47,316
Crustacea and molluscs fresh, chilled, frozen, salted, dried or simply cooked	1,05,19,309	Zinc ore and concentrates	20,42,182
Melons, pineapples, figs, berries, olives	12,82,197	Manganese ore and concentrates	16,60,78,151
Edible nuts including fresh coconuts other than nuts chiefly used for the extracting of oil	7,00,66,500	Chromium ore and concentrates	19,31,583
Dried fruits including artificially dehydrated	12,42,478	Base metal ores and concentrates NES	1,52,06,172
Beans, peas, lentils and other legumes, pulses dry including split dry pulses used as animal food	18,18,772	Non-ferrous metal scrap	11,39,844
Vegetables chiefly for human food NES including sweet potatoes and vegetables frozen or in temporary preservative	84,07,680	Bones, Ivory horns, hooves, claws and similar products	17,91,18,608
Vegetables preserved or prepared except dehydrated in airtight containers including soups and vegetable juices	13,32,247	Materials of animal origin NES intestine, stomach, bristles, hair, bird skins, feathers, sponges, fish-eggs, not for food; dead animals, etc.	79,18,930
Flour and flakes of potatoes, fruits and vegetables including sago, tapioca and all other starches prepared for use as food	7,15,561	Plants and parts of plants for use in dyeing and tanning, whether ground or not	84,73,280
Best sugar and cane sugar refined	6,90,18,970	Natural gums, resins, balsam and lacs	4,72,63,623
Molasses inedible	7,15,940	Vegetable materials for plaiting, e.g. for baskets and plaited rugs including bamboo	9,83,195
Other sugars and syrups NES, e.g. lactose, maltose, glucose, maple sugar and maple syrup, invert sugars, levulose, artificial honey caramel	34,93,255	Plants, seeds, flowers and parts of plants NES mainly for use in medicine or perfumery	95,51,893
Coffee not roasted	4,51,87,117	Vegetable saps, juices and extracts NES except dyeing and tanning extracts and vegetable materials including pectin and kapok	1,13,35,615
Tea	49,35,87,014	Coal anthracite bituminous sub-bituminous lignite Coke of coal and of lignite	2,45,87,752
Pepper and pimento whether unground, ground or otherwise prepared	2,40,06,169	Motor spirit, gasoline and other light oils for similar uses including gasoline blending agents	1,11,20,212
Spices except pepper and pimento whether unground, ground or otherwise prepared	2,70,61,323	Gas oil, diesel oil and other fuel oils	21,98,255
Oilseed-cake and meal and other vegetable oil residues	55,97,980	Mineral jelly and waxes including petrolatum	1,01,83,300
Tobacco unmanufactured including tobacco and tobacco stems	8,35,97,908	Linseed oil, crude, refined or purified	1,12,64,461
Tobacco manufactured for human consumption, smoking, chewing and snuff	60,50,795	Cottonseed oil, crude, refined or purified	85,21,718
Sheepskins and lambskins except astrakhan caracul	7,59,710	Castor oil, crude, refined or purified	4,45,63,287
Perian lamb broadtail undressed	3,03,64,950	Oils from seeds, nuts and kernels NES	45,42,208
Goatskins and kidskins undressed	9,50,986	Oils oxidised, blown or boiled	18,08,158
Hides and skins undressed NES	5,91,206	Hydrogenated oils and fats	56,73,416
Oilseeds, oilnuts and oil kernel NES	85,40,628	Waxes of animal or vegetable origin	8,88,162
Sawlogs and veneer logs nonconifer hardwood	12,00,284	Glycerine	18,48,169
Unreelable cocoons and cocoon wastes, frisons silk thread waste and silk noils	6,25,38,881	Tanning extracts except synthetic tanning materials	10,92,362
Sheep's and lambs' wool greasy or back washed	9,23,723	Medicinal and pharmaceutical products NES	34,44,298
Sheep's and lambs' wool scoured whether or not bleached or dyed	61,86,211	Essential vegetable oils	1,13,90,061
Horse hair and other coarse hair	9,40,918	Perfumery cosmetics dentifrices and other toilet preparations except soaps	10,24,151
Wool or fine hair carded or combed including tops	11,56,17,184	Starches, starchy substances, dextrins, gluten and gluten flour inedibles	10,28,943
Raw cotton other than linters	2,89,14,460	Leather	11,24,96,682
Cotton mill waste, devilled cotton waste and cotton shoddy not further manufactured	9,07,091	Plywood including wood faced with veneer sheets	12,42,936
Jute including jute cuttings and waste	1,20,49,071	Cigarette paper	33,92,825
Hemp and hemp tow and waste and channabils sativa and crotalaria juncea	57,79,222	Cotton yarn and thread grey unbleached	74,56,863
Vegetable textile fibres NES and waste of such fibres	5,05,484	Cotton yarn and thread bleached, dyed, coloured or mercerized	33,84,531
Synthetic fibres in staple lengths suitable for spinning and waste	53,66,885	Yarn of textile fibres mixed with metal	7,03,425
Waste materials from textile fabrics including rags	18,79,293	Yarn of textile fibres NES including paper yarn	3,17,06,067
Natural fertilizers of animal or vegetable origin not chemically treated	44,79,821	Cotton fabrics grey unbleached	18,29,47,200
Salt including salt put up for retail sale		Cotton fabrics other than grey bleached, dyed, mercerized, printed or otherwise finished	18,33,91,903
		Silk fabrics	7,15,295
		Fabrics of jute	28,98,52,142
		Fabrics of synthetic fibres and spun glass	25,89,980
		Fabrics of textile fibres mixed with metal	5,38,449
		Knitted fabrics, piece-goods of all textile fibres	17,50,565
		Tulle lace and lace fabrics of all fibres including net and netting	8,72,569
		Ribbons other than of silk and of synthetic fibres, trimmings, tapes and bindings of all fibres except elastic	43,12,018
		Cordage, cables, ropes, twines and manufactures thereof, fishing nets, rope makers wares	58,49,486
		Bags and sacks for packing, new or used	24,57,55,705
		Blankets, travelling rugs and coverlets of all materials	96,25,195
		Tarpaulins, tents, awnings, sails and other made-up canvas goods	20,32,609
		Bed linen, table linen, toilet linen and kitchen linen	1,39,56,067
		Carpets, carpeting floor-rugs, mats, matting and tapestries of wool and fine hair excluding artware	1,99,46,936

* See note on p.191.

EXPORTS—Contd.

Article	Value
	Rs.
Carpets, carpeting floor-rugs, mats, matting and tapestries of textile fibres other than wool and fine hair	90,30,572
Carpets, carpeting floor-rugs, mats, mattings of vegetable plaiting materials including coconut matting NES	1,41,59,854
Cement	21,86,261
Bricks, tiles, pipes and other products of brick-earth or of ordinary baked clay	23,83,964
Manufactures of mica, built up mica, products and articles made from sheet mica and built up mica	55,36,245
Silver unworked and partly worked	9,63,33,610
Precious and semi-precious stones including synthetic cut but not set	16,84,813
Jewellery of gold, silver and platinum group metals and goldsmiths and silversmiths ware including set gems except watchcase other than artware	87,31,513
Household utensils of iron and steel enamelled or not	16,05,698
Household utensils of aluminium	6,00,003
Household utensils of base metals except iron, steel and aluminium	13,03,443
Table and kitchen knives, forks and spoons of base metals including plated	5,69,143
Hardware of metal locks, padlocks, safety bolts, keys, fittings for doors, etc.	10,80,295
Metal containers for transport and storage including empty tin cans	7,43,116
Manufactures of metals NES	8,06,685
Internal combustion diesel and semi-diesel engines other than aircraft engines	5,25,230
Printing and book-binding machinery including printing plates etc. except photographic apparatus	2,07,767
Textile machinery and accessories including bobbins, spools and similar articles	6,63,078
Machinery and appliances other than electrical NES	23,83,067
Electric batteries accumulators	7,45,239
Radio apparatus for telegraphy, telephony, television and radar including broadcasting transmission and reception equipment, etc.	5,37,815
Portable electrical tools and appliances including domestic appliances	8,83,987
Bodies, chassis, frames and other parts for road, motor vehicles, except parts for motor cycles and side-cars	5,68,671
Parts of aircraft heavier than air not including rubber tyres, engines and electric parts	18,11,399
Lighting fixtures of all materials, gaslight and electric light, fixtures and fittings and parts thereof, lamps and lanterns	5,00,909
Furniture and fixtures of wood excluding artware	12,12,590
Metal furniture and fixtures including metal office cabinets	5,72,225
Travel goods, trunk, suit cases travelling bags, dressing cases, shopping bags, haversacks, packs and similar articles of all materials	20,94,979
Hand bags, wallets, purses, pocket-books and similar articles of all materials	10,08,619
Outerware knit or made of knitted fabrics	13,46,800
Outerware other than knitted	17,89,447
Clothing NES handkerchiefs, arm-bands, ties, scarves, shawls, collar corsets, suspenders and similar articles	19,22,585
Slippers and house footwear of all materials except rubber	14,83,092
Footwear wholly or mainly of leather not including slippers and house footwear	1,07,52,277
Footwear wholly or chiefly of textile materials not including slippers and house footwear	22,24,098
Cinematographic films exposed whether developed or not	49,58,799
Phonograph gramophone records	7,39,832
Books and pamphlets printed	29,69,749
Newspapers and periodicals	5,57,202
Printed matter on paper or cardboard NES	34,32,060
Candles, tapers and articles of inflammable materials NES, e.g. Solidified alcohol, sulphured wicks	14,54,403
Works of art and articles for collections	64,24,822
Postal packages not classified according to kind	12,70,591
Live animals not for food NES	46,95,414
Transactions, personal effects of travellers and immigrants samples and articles temporarily imported or exported and other special cases	1,53,61,955
Total value of exports	311,61,25,676

IMPORTS

The period covered below is from January 1 to June 30, 1957.

Only such items have been chosen as the value of whose imports is more than Rs. 5,00,000.

Article	Value
	Rs.
Poultry	7,90,854
Milk and cream including butter-milk, skim-milk and whey evaporated or condensed in liquid or semi-solid form	57,46,782
Milk and cream including butter-milk, skim-milk and whey, dry in solid form such as blocks and powder	3,00,75,780
Butter, fresh whether salted or not including melted	12,21,721
Cheese and curd	12,22,690
Eggs in the shell	43,19,863
Dairy products NES ice-cream, ice-cream powder, malted milk compounds and mixtures dehydrated products, etc.	1,37,40,557
Fish—fresh, chilled or frozen	1,14,20,345
Fish—salted, dried or smoked, but not further prepared	7,69,179
Fish, fish products and fish preparations in airtight containers including crustacea and molluscs	7,10,897
Wheat and spelt including meslin unmilled	3,22,15,146
Rice not in the husk including polished and broken rice	5,60,04,498
Maize corn unmilled	1,05,49,459
Cereals flaked, pearled or prepared in a manner not elsewhere specified, prepared breakfast food	15,88,067
Bakery products—breads, biscuits, cakes, etc.	5,73,174
Apples	20,93,485
Other fresh fruits NES namely melons, pine-apples, figs, berries, olives	41,07,783
Edible nuts, including fresh coconuts other than nuts chiefly used for extracting of oils	7,97,28,541
Dried fruits including artificially dehydrated	1,95,08,984
Vegetables chiefly for human food NES including sweet potatoes and vegetables frozen or in temporary preservative	8,13,708
Beet sugar and cane sugar refined	70,33,915
Other sugars and syrups NES e.g. lactose, maltose, glucose, maple sugar and maple syrup, invert sugars, levulose, artificial honey caramel	9,83,484
Cocoa beans	5,18,276
Tea	14,08,441
Pepper and pimento whether unground, ground or otherwise prepared	9,43,398
Spices except pepper and pimento whether unground, ground or otherwise prepared	1,35,98,038
Food preparations NES	36,40,028
Wine including grape must	5,27,413
Beer including ale, stout porter and other fermented cereal beverages	15,78,219
Distilled alcoholic beverages	38,64,928
Tobacco unmanufactured including scrap tobacco and tobacco stems	68,71,275
Cigarettes	7,79,483
Hides of cattle including buffalo and hides of horses, mules and asses undressed	44,48,482
Sheep-skins and lamb-skins except astrakhan carcass Persian lamb broadtail undressed	19,46,789
Goatskins and kidskins undressed	10,68,050
Copra	6,00,84,602
Natural rubber and similar natural gums	1,39,20,579
Synthetic rubber and rubber substitutes	43,29,881
Reclaimed rubber	8,07,425
Sawlogs and veneer logs conifer soft wood	5,55,790
Sawlogs and veneer logs non-conifer hard wood	42,63,243
Lumber sawn, planed, grooved, tongued, etc. non-conifer	77,12,841
Paper waste and old paper	44,52,756
Mechanical wood pulp	26,24,116
Chemical wood pump sulphite	98,86,867
Chemical wood pulp other than sulphite	66,59,689
Raw silk not thrown in hanks or in skeins	43,92,366
Sheep's and lambs' wool greasy or back washed	71,23,124
Sheep's and lambs' wool scoured whether or not bleached or dyed	39,17,291
Wool or fine hair carded or combed including tops	5,32,34,120
Waste of wool and of other animal hair	17,59,824
Raw cotton other than linters	31,73,05,678
Jute including jute cuttings and waste	2,90,48,580
Flax and flax tow and waste	5,72,334
Sisal and other fibres of the agave family	18,18,127
Manila fibre and musa textiles and Manila tow and waste	8,85,912

IMPORTS—Contd.

Article	Value	Article	Value
	Rs.		Rs.
Vegetable textile fibres NES and waste of such fibres	19,31,710	Phosphatic fertilizers and materials other than natural including superphosphate and basic dephosphorization slag	9,10,133
Synthetic fibres in staple lengths suitable for spinning, and waste	1,58,98,220	Potassic fertilizers and potassic fertilizer materials except crude potash salts	50,56,839
Natural sodium nitrate	24,27,326	Propellent powder prepared explosive and hunting or sporting ammunitions	99,93,194
Natural phosphates ground or unground	95,53,875	Fuses, primers and detonators	40,63,226
Natural asphalt	11,06,863	Pyrotechnical articles	5,18,958
Clay including chamotte and dinas earthenware	9,67,905	Synthetic plastic materials in blocks, sheets, rods, tubes, powder and other primary forms	3,07,87,316
Sulphur	1,64,30,945	Insecticides, fungicides, disinfectants including sheep and cattle dressing and similar preparations	18,17,220
Natural abrasives including industrial diamonds	15,15,233	Casein albumen gelatine glue and dressings	23,31,208
Building and monumental dimension stone not worked	6,67,952	Chemical materials and products NES	1,04,22,931
Asbestos—crude, washed, or ground	1,64,51,456	Leather	6,21,308
Feldspar, fluor spar, cryolite and chiolite	14,40,262	Machine leather belting and other articles of leather for machinery	43,28,585
Minerals—crude including ice	9,27,531	Rubber fabricated materials, e.g. pastes, plates, sheets, rods, threads, tubes of rubber	9,12,767
Iron and steel scrap	42,18,188	Rubber tyres and tubes for vehicles and aircraft	1,37,70,526
Manganese ore and concentrates	5,28,341	Hygienic medical and surgical articles of rubber not including tubes	5,00,767
Non-ferrous metal scrap	1,09,84,474	Manufactures of soft and hard rubber NES	17,37,427
Bones, ivory, horns, hoofs, claws and similar products	27,38,831	Fibreboards not paperboards	19,92,227
Plants and parts of plants for use in dyeing and tanning whether ground or not	29,78,320	Manufactures of wood NES	9,52,089
Natural gums, resins, balsam and lacs	78,26,203	Agglomerated cork materials	8,67,266
Vegetable materials for plaiting, e.g. for baskets and plaited rugs including bamboo	6,85,775	Articles made of natural or agglomerated cork NES	20,99,083
Vegetable saps, juices and extracts NES except dyeing and tanning extracts, and vegetable materials including pectin algae and kapok NES	6,45,242	Newsprint papers	2,48,52,056
Petroleum crude and partly refined for further refining including natural gasoline	12,20,10,996	Printing and writing papers in rolls and sheets other than newsprint	1,44,48,878
Motor spirit gasoline and other light oils for similar uses including gasoline blending agents	2,44,22,895	Common packing and wrapping paper	1,32,40,818
Lamp oil and white spirit kerosine illuminating oil	10,00,12,254	Paperboard, cardboard including corrugated cardboard but not including building board	33,06,138
Gas oil, diesel oil and other fuel oils	18,08,25,517	Paper and paperboard coated impregnated, vulcanized, etc. other than bituminized or asphalted	47,63,932
Lubricating oils and greases including mixtures with animal and vegetable lubricants	5,79,12,690	Paper and paperboard NES	22,63,481
Mineral jelly and waxes including petroleum	18,78,706	Articles of pulp of paper and of paperboard NES including cigarette paper cut to size for cigarettes	22,34,973
Pitch resin petroleum asphalt coke of petroleum and other byproducts of coal lignite petroleum and oil shale NES not chemicals	93,08,990	Thrown silk and other silk-yarn and thread including achappe and bourette	5,62,697
Animal oil, fats and greases excluding lard	34,98,931	Yarn of wool and hair	40,89,934
Palm oil, crude refined or purified	1,05,98,283	Cotton yarn and thread grey unbleached not mercerized	1,07,71,615
Coconut copra oil	1,69,24,976	Cotton yarn and thread bleached, dyed, coloured or mercerized	63,80,890
Tung oil, crude refined or purified	5,44,369	Yarn and thread of synthetic fibres and spun glass	8,08,02,525
Inorganic acids and anhydrides, e.g. nitric, sulphuric, hydrochloric acids	18,44,441	Cotton fabric other than grey bleached, dyed, mercerized, printed or otherwise finished	1,39,13,683
Copper sulphate	17,24,835	Silk fabrics	9,00,080
Sodium hydroxide or caustic soda	2,40,51,537	Woolen and worsted fabrics including fabrics of fine hair	62,14,078
" carbonate or soda ash	1,23,64,922	Fabrics of synthetic fibres and spun glass	56,39,790
Inorganic compounds and chemical elements NES	4,70,87,115	Tulle lace and lace fabrics of all fibres including net and netting	9,64,162
Aliphatic and other organic acids and anhydrides namely acetic acid	59,67,973	Felt and felt articles except hats and hoods for hats, hat bodies	11,28,323
Alcohols NES	50,29,782	Rubberized and other impregnated fabrics and felts except linoleums	19,11,235
Organic compounds NES including complex function alcohols and acids	5,24,36,166	Cordage, cables, ropes, twines and manufactures thereof: fishing nets, ropemakers-ware	6,70,219
Coal-tar dyestuffs and natural indigo including artificial colour lakes	6,08,32,724	Special products of textile materials and of related materials NES	22,04,543
Dyeing extracts vegetable and animal except indigo	8,07,542	Blankets, travelling rugs and coverlets of all materials	7,34,067
Tanning extracts except synthetic tanning materials	35,83,958	Made up articles of textile	5,44,860
Colouring materials including distempers other than of coal-tar origin	74,07,260	Cement	1,35,48,237
Prepared paints, enamels, lacquers, varnishes, artists colours, seccatives, paint driers and mastics	12,82,076	Building materials of asbestos, cement and of unfired non-metallic minerals NES	31,53,440
Vitamins and vitamin preparations	1,41,82,143	Refractory bricks and other refractory construction materials	1,46,81,890
Bacteriological products sera vaccines	9,91,079	Grinding and polishing wheels and stone	11,10,447
Penicillin streptomycin, tyrocidine and other antibiotics	2,27,51,058	Abrasive clothes and paper and similar articles	8,94,781
Opium alkaloids, cocaine, caffeine, quinine and other alkaloids, salts and their derivatives	16,46,697	Manufactures of asbestos not including building materials	37,16,258
Medicinal and pharmaceutical products NES	4,20,84,742	Carbon and graphite products except crucibles including lighting carbons, electrode carbon, brushes and brush stock and battery carbons	42,16,769
Essential vegetable oils	38,55,488	Refractory products other than refractory construction materials, e.g. retorts, crucibles, muffles, nozzles, plugs, etc.	15,50,677
Synthetic perfume and flavour materials and concentrates and essence greases and mixtures of alcohol and essential oils	34,87,076	Glass in the mass including broken and powdered glass and glass rods and tubings	10,16,387
Perfumery, cosmetics, dentifrices and other toilet preparations except soaps	50,50,307		
Soaps and cleansing preparations	5,85,020		
Wax, polish, paste, powder and similar preparations for polish and preserving leather, wood, metal, glass or other materials	8,05,886		
Nitrogenous fertilizers and nitrogenous fertilizer materials other than natural NES	67,89,658

LIST OF IMPORTED COMMODITIES 1st April to 31st December 1956.

Below we give a list of commodities imported into India with the exact quantity and value for the period 1st April to 31st December 1956.

To maintain a sense of continuity we should cover the twelve-month period 1st April 1956 to 31st March 1957. But it is not possible to cover this period in a single table because the classification of commodities from January 1957 has been changed, and the matching of the old and

new trade classifications is not possible in all cases. Also, these statistics are now compiled on a calendar year basis and not on a fiscal year basis as previously.

We are therefore constrained to break up the figures into two sets of tables. The first set covers the period 1st January to 31st June 1957 and gives figures for only a few major categories. See pages 186-190.

	Quantity	Value		Quantity	Value
Animals :		Rs.	Others		Rs.
Horses IV A	119 nos.	8,01,430	Sulphur	46,919 cwt.	32,65,062
Other kinds (IVB)	38,064 "	1,50,307	Zinc compounds (other than chloride)	1,289,551 "	1,70,10,056
Apparel			Other sorts of chemicals	950 "	2,41,720
Gold and Silver thread ..	—	15,87,928	Total of chemicals	—	6,20,11,996
Hats, caps, bonnets & hatters ware	—	2,23,061	China clay	153,533 cwt.	18,74,48,620
Second hand clothing	—	2,09,680	Clocks and Watches :		
Arms & Ammunition :			Clocks and Time-pieces	817,832 nos.	65,15,483
Shot-gun cartridges (filled)	3,634,980 nos.	8,72,950	Watches	853,093 "	2,34,93,911
Rifle & other cartridges (filled)	7,006,725 "	9,93,418	Parts of clocks and watches ..	—	7,85,259
Explosives	—	1,37,06,200	Total of Clocks and Watches	—	3,07,93,653

ALCOHOL INDUSTRY

ALCOHOL has three uses. It can be used as a drink. That is the use for which it is best known. Second, it can be used for industrial purposes, for instance in the manufacture of a number of chemicals. Third, it can be used as a motor fuel, for the production of mechanical power, when we call it power alcohol.

Potable Alcohol.—Three types of potable alcohol are produced in the country, beer, toddy, arrack and certain varieties of 'foreign liquors.' A great number of old pot, and coffee stills have always been in use but the major part of potable liquor is made in proper distilleries. There are also 24 big distilleries producing industrial and potable alcohol.

INDUSTRIAL ALCOHOL

Industrial alcohol is a very valuable material in the manufacture of chemicals like acetone, acetic acid, ether, chloroform, ethyl acetate, etc. It is also necessary as a solvent in the manufacture of fine chemicals, medical preparations, toilet, etc. Since the last war its importance if at all has increased. It is now essential in the manufacture of ammunition and of artificial rubber.

In 1950-51 there were as many as 10 power alcohol distilleries capable of producing over 2.9 million gallons of industrial alcohol. In addition, there were 24 distilleries producing potable and industrial alcohol. The capacity of these units for industrial alcohol is estimated at 9.3 million gallons. At present the capacity for industrial alcohol is estimated at 12.83 million gallons per annum (43 producing units). The trend of production has been as follows:

Year.	Rectified spirit (000 gals.).	Denatured spirit (000 gals.).

1955 ..	5,156.4	2,989.2
1956 ..	3,990.6	3,193.3

The undivided Government of India's Panel on Fine Chemicals, Drugs and Pharmaceuticals estimated that the medical requirements of the sub-continent were a million gallons annually and industrial requirements 10 millions, a target which they said ought to be reached in 15 years time.

To make this possible, it is argued, the first essential is to abolish the present excise duty on industrial alcohol and the second is to have a uniform policy for the country as a whole. Industrial alcohol should not cost more than a few annas a gallon. As it is it costs the distiller about eight annas to make it. When the producer's and middleman's profit is added the price will increase to a point where it becomes uneconomical to use it.

Consumption of industrial alcohol is estimated to have gone up from 2.4 million gallons in 1950 to 5.2 million gallons by 1955. In addition about 0.6 million gallons of alcohol are at present used in the manufacture of acetate rayon and are met from the production of power alcohol grade spirits.

POWER ALCOHOL

The importance of the power alcohol industry lies in its supplying a product which can replace an equivalent quantity of imported petrol. The rapid development of the sugar industry since 1931 has rendered large quantities of molasses available for its production.

Consumption of power alcohol in 1955-56 was estimated to be only about 10 million gallons as against 18 million gallons envisaged because of difficulties in providing facilities for mixed petrol with alcohol and of comparatively high cost of production of alcohol in certain areas.

The installed capacity and actual production in thousand bulk gallons are given below:

Year.	Capacity	Production
1946 ..	6,258	2,397
1947 ..	6,258	2,736
1948 ..	6,258	3,776
1949 ..	8,862	4,230
1950 ..	9,328	4,498
1951 ..	9,908	5,809
1952 ..	10,920	7,742
1953 ..	13,020	8,120
1954 ..	13,020	8,007.6
1955 ..	13,812	10,432.8
1956 ..	14,352	10,243.2

According to the Census of Manufacturing Industries, 1953, the fixed capital investment in the 47 distilleries and breweries (including power alcohol manufacturers) in the country was of the order of Rs. 2.47 lakhs in 1953. The number of persons employed in the industry in 1953 was estimated at about 4,750.

Imports of alcohol are banned, but small quantities are imported along with drugs and perfumed spirits or in the form of liquors. Exports of alcohol are confined to despatches of denatured spirit to Burma and Ceylon and small quantities of rum.

The principal raw material required is molasses. Out of a total production of six lakh tons of molasses in 1954 (estimated), Uttar Pradesh and Bihar accounted for about 90%. Other raw materials required in small quantities are sulphuric acid, ammonium sulphate and entertaining agents.

Difficulties in the supply of molasses and offtake and the unremunerative price of power alcohol have kept production at a low level compared to the installed capacity. With a view to overcoming these difficulties and ensuring a steady growth of the industry, a Committee was set up by the Ministry of Commerce and Industry in October 1955.

Based on the anticipated requirements during the Second Plan period, a combined production of 30 million gallons of power and industrial alcohol is fixed as a target to be achieved by 1960-61, while a combined capacity of 36 million gallons per annum by 1960-61 is suggested. It is estimated that a sum of about Rs. 1 crore will have to be invested during the Second Plan to achieve this capacity. This is exclusive of the outlay on the modernisation and improvement of existing units. About 2,000 additional persons are estimated to be employed in the industry during the Second Plan.

AUTOMOBILE INDUSTRY

IT would appear that the first motor car was imported into India in 1898. The practice up to the end of the first world war was to purchase complete motor vehicles directly from abroad or through agents or dealers in India.

It was in 1920 that two automobile manufacturers, one from the U.S.A. and the other from Canada, set up local companies to do business in motor cars and trucks.

General Motors India Ltd. commenced assembling trucks and cars from components and parts imported from the U.S.A. in c.k.d. condition in their factory at Bombay in 1925, while Ford Motor Company of India Ltd. commenced c.k.d. assembly of automobiles at Madras in 1930, and at Bombay and Calcutta in 1931.

All these plants of General Motors and Ford Motors have now, of course, shut down.

It is claimed by Peninsular Motor Corporation Ltd., Calcutta, that one of its sister companies was the first to start assembling cars and trucks from c.k.d. components and parts in its workshop at Calcutta in 1926.

Addison and Co., Ltd., commenced c.k.d. assembly of cars and trucks at Madras in 1930.

In 1944, two companies, Hindustan Motors Ltd., Calcutta, and Premier Automobiles Ltd., Bombay, with an authorised capital of Rs. 20 crores and Rs. 10 crores respectively, were established with a programme for progressive manufacture of complete automobiles.

In addition to the above, other firms in the field were: Standard Motor Products of India Ltd., Madras; Automobile Products of India Ltd., Bombay; Ashok Motors Ltd., Madras; Dewar's Garage and Engineering Works, Calcutta; Peninsular Motor Corporation Ltd., Calcutta; French Motor Car Co., Ltd., Bombay; Mahindra and Mahindra Ltd., Bombay and Addison and Co. Ltd., Madras.

The total annual assembling capacity of the 12 firms mentioned above was estimated around 84,014 cars and commercial vehicles. The total output of the 12 firms of both cars and commercial vehicles and the sales during 1951 and 1952 were as shown below:

	Production	Sales
1951 ..	21,577	22,993
1952 ..	14,878	15,728

It is evident that only a small part of the total capacity of the industry was being utilised. The Tariff Commission estimated that the average annual imports in the three pre-war years 1925-26 to 1927-28 were of the order of 25,000 motor vehicles. In the post-partition years, the average annual imports up to 1951-52 were 21,500 vehicles. Taking the whole period of 30 years, it is noteworthy that the volume of imports has remained more or less static in India while it has shown a striking increase in many other countries.

The total number of passenger cars and commercial vehicles on roads in 1951 was 288,000 comprising about 160,000 passenger cars and 128,000 commercial vehicles. If the average life of a passenger car is taken to be 12 years and a commercial vehicle 10 years, about 13,000 passenger cars and 12,000 commercial vehicles would be needed to be replaced every year to maintain the number of vehicles on the roads. These annual needs for replenishment of 25,000 vehicles do not, however, take into account the development of roads and road transport envisaged in the two Five-Year Plans.

MANUFACTURE

In accordance with the recommendations of the Tariff Commission report of 1953 Government have decided to concentrate production only in those firms which have a manufacturing programme. The type of vehicle, the scale of manufacture, etc. are also fixed in the way shown below:

Firm.	Nos.
Hindustan Motors Ltd., Calcutta ..	18,000
Premier Automobiles Ltd., Bombay	12,000
Standard Motor Products of India Ltd., Madras	2,950
Ashok Motors Ltd., Madras ..	7,540

Hindustan Motors will manufacture baby cars, light cars, big cars and medium trucks (Morris Minor, Hindustan 14, Studebaker car and truck).

Premier Automobiles will manufacture baby cars, big cars and medium trucks (Flat 1100, Dodge, De Soto, Plymouth cars, and Dodge, De Soto and Fargo trucks).

Standard Motor Products of India will manufacture baby cars and medium cars (Standard Ten and Standard Vanguard).

Ashok Motors will manufacture heavy trucks (Leyland 5 ton diesel trucks).

Two other manufacturing operations sanctioned are the Tata Locomotive and Engineering Co. Ltd. which will produce Tata-Mercedes Benz diesel trucks, and Mahindra and Mahindra Ltd. which will produce Willy's Jeep.

The installed capacity and actual production of the automobile industry during 1956 as compared with 1955 are indicated below:

(In numbers)

	1955	1956
Installed capacity	51,006	49,800
Production ..	22,088	32,136
of which:		
Cars ..	0,402	12,084
Jeeps and land rovers	3,336	4,140
Station wagons, utilities, mobile health vans	768	684
Commercial vehicles		
Trucks ..	6,456	10,920
Passenger Buses ..	3,036	3,408

In 1953 the number of cars produced was 4,936, of trucks 8,990. The respective figures for 1954 were 5,435 and 9,027.

In 1953 the number of cars sold was about 5,000 and of trucks about 4,400. The respective figures for 1954 were 5,806 and 8,007 and for 1955, 10,166 and 12,899.

At the end of 1957 Hindustan Ambassador attained 56 per cent completion in terms of value regarding indigenous production of parts. The Standard Vanguard car had attained 33 per cent. At the same time Dodge-Desoto-Plymouth car had reached 20-34 per cent, Dodge-Desoto-Fargo 49 per cent, Fiat car 38 per cent, Mercedes Benz truck 43 per cent.

A considerable number of the parts for Willy's Jeeps are also manufactured while certain minor parts required for the Studebaker car and truck are locally made.

Protection will continue till the end of 1967. And no more new manufactures will be allowed to enter the country.

Items like tyres, tubes, battery, all rubber parts, upholstery materials and paints are all obtained from indigenous sources for all the vehicles in the manufacturing programme.

There are 20 important firms licensed for making automobile ancillaries excluding garage and service tools and 10 have already gone into production. The total number of ancillary factories is, however, estimated at 146.

The total paid up capital invested in the industry as on December 31, 1957 was over Rs. 18.5 crores (foreign a little over Rs. 14 lakhs); working capital: Rs. 8.0 crores (excluding Tata Locomotive and Engineering Co. Ltd.). The industry employs over 18,360 people.

The following manufacturing industries are more or less well established: pistons and piston rings, cylinder liners (dry), fan belts, radiators, propeller shafts, bodies for automobiles, seat bench assembly, upholstery material, batteries, electric lamps and bulbs, ball bearings, tyres and tubes, paints, non-genuine components and parts. To the list are added gudgeon pins, electric horns and new ranges of piston.

Manufactures more recently started are: sparking plugs, fuel injection equipment, electric horns, shock absorbers, wheels and rims, spanners, and brake lining, clutch facings, piston rings, cylinder liners, oil seals, metal gaskets, scannell semi-trailers, brake lining, clutch discs and friction materials.

Over Rs. 4.4 crores are invested in ancillary industries. The working capital of this sector is Rs. 51 lakhs.

IMPORTS

Though production has gone up in the country, imports have not been reduced as expected. In fact they follow broadly the pattern of indigenous production, recording a substantial decline in 1952-53 and 1953-54 and a progressive increase since then. Except for a very limited number of motor cars imported complete, all the vehicles imported are in c.k.d. condition.

Year	Motor cars including taxi cars (Numbers)	Motor omnibuses, motor vans and lorries (Numbers)	Total	Value (Rs. lakhs)
1950-51	8,433	4,903	13,336	6.37
1951-52	9,963	4,712	14,675	7.76
1952-53	5,164	3,637	8,801	5.93
1953-54	5,816	4,189	10,005	6.08
1954-55	10,592	4,516	15,108	10.29
1955-56	10,562	8,891	19,453	13.46
1956 (April-Dec.)	6,710	6,004	12,714	8.92

AUTOMOBILES

A general note on price may be added here. Price is influenced by demand which in turn is influenced by price. Thus one of the factors that has inhibited the growth of the industry is the fact that internal demand is small. Hence the advantages of mass production cannot be availed of.

A complete automobile consists of 4,000 to 5,000 parts. Hence production cannot be concentrated in a single unit. Thus in most western countries there are always a large number of manufacturers of ancillary parts. This again is conditioned by the size of the demand.

SECOND FIVE-YEAR PLAN

The target of production for the industry is 57,000 automobiles by 1960-61. An overall investment of about Rs. 16 crores is estimated to be necessary during the Second Plan period. Regarding ancillary industries, ten firms are expected to commence production early in the period and an additional investment of Rs. 2 crores is likely to be invested.

Summary of the development programme during the Second Plan:

	1955-56	1960-61
No. of manufacturing units ..	6	6
Annual rated capacity on single shift (No.)	29,000	29,000
Estimated production (No.) ..	25,000	57,000
Consumption (No.) ..	23,000	57,000

Both automobile and tractor drawn trailers are being manufactured in India. Six firms with a total capacity of 5,232 trailers per year on single shift basis are in the field. The Government of India is keen on developing the automobile industry. Among the steps taken by the Government are the reduction of average import duty on motor vehicles and parts and restriction of manufacture to a limited number of types and models.

MOTOR CYCLES AND SCOOTERS

There is also a fair demand for motorcycles, scooters, motor cycles and auto-rickshaws. The demand for motor cycles at the end of the First Plan was estimated at 5,000 per annum and it is expected to rise to about 11,000 by 1960-61 inclusive of scooters.

The Madras Motors, Madras (since renamed Enfield (India) Ltd.) was granted a licence in 1954 to manufacture "Royal Enfield" motor cycles and it started production in May 1955 and by December 1955 turned out 419 motor cycles. The firm has also been licensed for the manufacture of 1,800 three-wheeled motor cycle chassis per annum. The Automobile Products of India, Bombay, has been permitted to manufacture annually 6,000 "Lambretta" scooters. It went into production in August 1955.

During 1956, 1,022 motor cycles and 5,264 scooters were manufactured as against 419 and 536 respectively in 1955.

CEMENT INDUSTRY

THE first venture in the manufacture of Portland Cement in India took place in 1904, in a small factory just outside Madras, but it quickly went out of business.

A few years later three new companies came into existence and laid the foundation of the industry as it exists today.

In 1925, following the result of an enquiry by the Tariff Commission, the necessity for co-operation among the manufacturing units was clearly emphasised and as a result, an Association known as the Indian Cement Manufacturers' Association was formed.

Inspired with a certain measure of confidence they took yet another step which was the formation of the Cement Marketing Company of India, Ltd.

The next step was the fusion of all the Indian cement manufacturing companies then in operation (with the exception of the Sone Valley Cement Co. Ltd.) into one unit known as the Associated Cement Companies Ltd., in 1936 whose Managing Agents are Cement Agencies Ltd.

By March 1952, there were 28 cement factories with an annual rated capacity of about 3.88 million tons.

During 1952-54, three new cement plants went into production and the expansion and modernisation programme of seven of the existing factories were completed with the result that the total annual capacity rose to about 4.4 million tons by the end of 1953-54 as against 3.88 million tons in 1952. Including the new ones the number of cement factories was 27 in March 1956 as compared with 21 at the beginning of the Plan. In March 1957 there were 28 cement factories, of which one was owned by the U.P. Government and one by the Mysore Government. Of the rest, all privately owned, seven were in Bihar, four in Bombay, three in Madras, two each in Mysore, Andhra, Madhya Pradesh, Rajasthan and the Punjab, and one each in Orissa and Kerala. The total capacity was about 6 million tons a year and the total production about 5 million tons. The number of factories in existence will rise from 28 early in 1957 to 44 at the end of the Second Plan period.

A sum of about Rs. 29 crores had been invested in the industry up to 1950-51 of which the A.C.C. accounted for Rs. 15.5 crores and the Dalmia Group Rs. 7 crores. Some 33,000 persons were employed by the industry in 1950-51. Excluding Rs. 2.92 crores spent on the 2 lakh tons cement factory of the U.P. Government at Churk, about Rs. 15 crores are estimated to have been invested in new units and expansions in the cement industry during 1951-56. The investment incurred by the Associated Cement Companies on their projects is estimated to amount to Rs. 11.76 crores during this period.

For the expansion of capacity in the private sector to 12.5 million tons by 1960-61 from 4.6 million tons in March 1956 (the capacity in the public sector in the two plan periods will be 5 lakh tons and 3 lakh tons respectively), an investment of about Rs. 80 crores is likely to be required. The development programme of the A.C.C. envisages an investment of Rs. 85 crores for stepping up the capacity of their factories from 2.782 million tons in March 1956 to 5.288 million tons by the end of the Second Plan.

Altogether the capacity of the industry is envisaged to be stepped up to 13.0 million tons per annum by the end of the Second Plan and a production target of 13.0 million tons.

Among the newer units completed special mention may be made of the U.P. Government's

factory at Churk which went into production in 1954 and that of the A.C.C. at Sindri, designed for operation on the calcium carbonate sludge of the fertiliser factory, which went into production in September 1955.

The progress in the expansion of capacity and production in the different years of the First Five-Year Plan is given below:

Year	Installed capacity	Actual production
	(million tons)	
1950-51	3.28	2.70
1951-52	3.71	3.28
1952-53	3.80	3.51
1953-54	4.24	4.03
1954-55	4.44	4.42
1955-56	4.93	4.60

The Government, after due consideration of a report submitted by the Tariff Commission, fixed the standard ceiling price of cement at Rs. 87 per ton *f.o.r.* destination. It also allowed a further Rs. 2 per ton, which the companies are required to hold in a separate fund for being used with the consent of the Government exclusively for rehabilitation and expansion purposes.

The cement prices were raised in 1957 by Rs. 15 per ton. Their increase followed the upward revision in the excise duty on cement from Rs. 5 to Rs. 20 per ton with effect from 16th May 1957.

The prices of indigenous and imported cement are pooled and its distribution has been taken over by the State Trading Corporation in order to provide for substantial import of cement in the interests of consumers and to rationalise properly and regulate the use of cement when its demand has phenomenally gone up so high.

IMPORTS & EXPORTS

Imports of cement before the outbreak of the Second World War were small and generally the cement was of special quality. During the post-war period imports by sea totalled about 150,000 tons in 1948-49 and 300,000 tons in 1949-50. In addition, about 25,000 tons and 100,000 tons were imported from Pakistan by land routes in the two respective years. Since 1950 imports were restricted to quantities included in trade agreements as well as to those in respect of which prior commitments had been made and were only about 17,000 tons in 1950-51. The quantity imported in the following four years was negligible.

There have been no exports except of very limited quantities to Pakistan under the trade agreements and to the Middle East, Ceylon and East Africa.

The imports and exports of cement by land and sea during the period of the First Plan were as follows:

Year	Imports	Exports
	(Tons)	
1951-52	10,312	87,758
1952-53	8,652	87,441
1953-54	6,894	86,116
1954-55	6,000	101,429
1955-56	10,717	51,351

During the first ten months (ended December) of 1956-57, India exported 5,320 tons of cement and imported 114,660 tons from abroad.

For 1958 the export permitted is one lakh tons.

DEVELOPMENT PLAN

The annual consumption of cement was 2 million tons per annum during the war years and rose to about 2.6 million tons during the post-war years, 1949-50 and 1950-51. In 1951 about 3.17 million tons of cement were delivered, while 1.714 million tons were supplied in the first half of 1952. The future demand for cement, exclusive of the needs of the multi-purpose projects was expected to be around 3.8 million tons by 1955-56. Including the demand of the projects and roads, the total was expected to reach 4.5 million tons by the end of the first Plan period. By 1960-61, the demand will substantially increase and the consumption is estimated to reach 12.5 million tons at the end of the Second Plan period.

To meet this increased demand, the Government has approved various expansion schemes which are expected to increase the rated capacity from 4.931 million tons in 1955-56 to 13 million tons by 1960-61. On the basis of these approved schemes, the State-wise distribution of the industry in 1960-61 is expected to be as follows:

States†	Number of Units	Rated Capacity (000 tons)
Bihar	7	2,324
Orissa	1	725
Uttar Pradesh	2	631
Madhya Pradesh	3	1,168
Madhya Bharat	1	80
Rajasthan	2	1,284
PEPSU	2	635
Saurashtra	5	1,470
Bombay	4	565
Madras	4	849
Mysore	1	104
Travancore-Cochin	1	55
Hyderabad	2	645
Andhra	5	898
Assam	2	231
Vindhya Pradesh	2	550
Total	44	12,294

† Pre-reorganisation.

The State-wise distribution of the industry during 1950-51 and towards the end of the period of the First Plan is indicated below:—

State*	1950-51		1955-56	
	No. of Units	Rated Capacity (000 tons)	No. of Units	Rated Capacity (000 tons)
Bihar	5	922	6	1,122
Orissa	1	725	1	165
Uttar Pradesh	2	631	1	200
Madhya Pradesh	1	350	1	350
Madhya Bharat	1	80	1	60
Rajasthan	1	225	2	525
PEPSU	2	242	2	370
Saurashtra	3	337	3	492
Bombay	4	565	2	300
Madras	5	770	3	642
Andhra	5	898	2	189
Mysore	1	84	1	84
Travancore-Cochin	1	50	1	50
Hyderabad	1	240	1	380
Total	21	3,282	27	4,951

* Pre-reorganisation.

CHEMICAL INDUSTRY

FOR purposes of industrial production, chemicals fall easily into one of two major groups: (a) Heavy Chemicals; and (b) Fine Chemicals.

The term "Heavy Chemicals" is applied usually to substances such as the common acids, alkalies, fertilizer, etc., which are the foundation of the entire chemical industry.

Fine chemicals, on the other hand, are manufactured generally in relatively small amounts since purity is important; their production requires great skill and care in each operation under accurately controlled conditions. In this category are included photographic materials, drugs and pharmaceutical products, paints, varnishes and pigments, dyestuffs, etc.

According to the latest data, there are over 250 factories with a capital investment of nearly Rs. 33 crores and providing employment for about 35,000 workers.

During the year 1953, the chemical industries as a class, as well as the many other industries closely allied to them, made fairly good progress. A new up-to-date plant for the manufacture of 30 tons of aluminium sulphate per day was set up by a Bengal company. A new unit for calcium centride (3,000 tons per annum) and another for ammonium chloride (8,000 tons per annum) were expected to go into production in 1954-55. Major industrial schemes recommended for approval by the Licensing Committee relate to production of industrial explosives (5,000 tons per annum), sodium hydro-sulphite (2,300 tons per annum) and hydrogen peroxide (1,440 tons per annum).

During 1954, the chemical industries made further progress. Out of 134 items at present manufactured in the country, production of all but 37 recorded an increase during the year. Among new products manufactured for the first time in the country during the year are: Sheet glass of 10-12 oz. gauge; penicillin; chloromycetin; glucial acetic acid and acetic anhydride; and bismuth salts.

The year 1955 continued the progress made in the previous year. In some cases, the record was improved. Substantial increase was registered in the production of soda ash, calcium chloride, benzene, sulphur black, chloramphenicol, sodium salicylate, phosphoric acid, benzene hexachloride, naphthalene and sulphur drugs. Penicillin, ammonium chloride and bismuth salts were manufactured for the first time and steps have been taken for the production of vat dyes, naphthols and bases, hydrogen peroxide and stabilised bleaching powder.

During 1956, production was maintained at a steady rate with regard to most chemicals. Among the chemicals produced for the first time were hydrogen peroxide, D.D.T., P.A.S., Salicylic acid, Vat dyes, particularly dark blue B.O. and Jade green, some naphthols and optical bleaching agents. Substantial increase in production was reported in respect of ammonium chloride, bleaching powder, chlorine, copper sulphate magnesium chloride, zinc chloride, benzene, carbon-di-sulphide, penicillin, Sulpha drugs, sulphur black and sodium salicylate.

There was, however, a slight fall in production of calcium carbide in 1956 as compared with the previous year. The utilisation of chlorine still remains an important issue, with its bearing on the development of electrolytic caustic soda industry in India, and is, therefore, being progressed.

The Development Council for Heavy Chemicals (Alkali) was initially constituted in 1955 and it completed two years of tenure by the end of March 1957. During 1957, the Council was reconstituted under the Chairmanship of Shri. C. R. Rao of M/s Tata Chemicals Ltd., who was also the Chairman of the first Council. The Council, during its two years of tenure of office, met several times and organised visits by its members to several factories falling within its purview.

Among the work done by the Council were the maintenance of systematic liaison on behalf of the industry with the offices of the Chief Adviser, Government of India, the Planning Commission, the Ministry of Transport and the Ministry of Labour. An examination of the targets for production in the alkalis group of industries, the co-ordinating of production programmes and the review of the progress of different programmes from time to time were the items which received priority. The programme for industrial development as relating to the alkalis group, appearing in the Government of India's Second Five-Year Plan, is in many cases based on the recommendations made by the Development Council. Statistics of production were obtained from manufacturers regularly and the Council kept itself informed of reasons for shortfall of production, if any. The chlorine problem received considerable attention and was discussed also with the Acids and Fertilizers Development Council.

An important function entrusted to the Council is the suggesting of norms of efficiency with a view to eliminating waste and obtaining maximum production, improving quality and reducing costs. A Sub-Committee of the Council made certain recommendations explaining in detail how efficiency was to be computed and submitted to the Council for purposes of comparison. On the basis of this, information was collected from different manufacturing units producing electrolytic caustic soda and its circulation among members was widely appreciated.

In the matter of fuller utilisation of installed capacity, suitable recommendations were made to the Government wherever there was shortfall from extraneous factors such as inadequate supply, inadequate transport, inadequate coal allotment. In a particular case, where expert assistance was asked for by a factory, a sub-committee of the Council made recommendations after a visit and these were found extremely helpful to the party concerned. Consistent with improvement in production efficiency, the Council also impressed upon the producers the necessity of ensuring adequate satisfaction to the consumer. The results of State trading in soda ash and caustic soda and their distribution through nominated channels were kept under regular review. Standardisation received similar attention and the Council co-operated with the work of the Indian Standards Institution in the matter of evolving Indian Standards.

Another important function performed by the Council was the collection and formulation of statistics relating to the industries covered by the alkalis group. The adoption of measures for increasing productivity of labour is a question still under consideration and the Ministry of Labour has been requested to conduct a survey of the wages, amenities and service conditions in heavy chemical industries in both the public and private sectors.

SULPHURIC ACID

The regionwise distribution of the capacity at the end of the First Plan as compared to June 1952 was as follows:

	Annual Rated Capacity in Tons	
	June, 1952	April, 1956
Assam	6,800	6,805
West Bengal & Bihar ..	56,560	79,770
Bombay*	35,013	57,025
Punjab* & Delhi .. .	14,955	12,880
Uttar Pradesh .. .	5,775	5,445
Madhya Pradesh* .. .	825	1,650
Madras*	13,530	15,180
Travancore-Cochin* ..		43,560
Rest of the Indian Union	56,183	20,395
Total	189,441	242,005

* Pre-organization.

During 1955, the output of sulphuric acid increased by 4 per cent. over that of 1954. Six schemes for its increased production with a total capacity of 136,000 tons, were sanctioned during the year. It may be mentioned here that one of the schemes was intended to use pyrites as a raw material.

The production of sulphuric acid registered an appreciable increase during 1956 as compared with the previous year, the total quantity actually produced being 165,408 tons, as against 156,000 tons.

The trend of production in tons is as follows:

1948, 80,004; 1949, 99,456; 1950, 102,480; 1951, 106,932; 1952, 96,084; 1953, 109,091; 1954, 150,876; 1955, 156,000; 1956: 165,408.

The Government fixed a ceiling price for sulphuric acid at Rs. 175 per ton ex-works, linking it to a price of Rs. 275 per ton for sulphur delivered to the works. Variations in the price of sulphuric acid have been provided for to allow for fluctuations in the price of sulphur.

The reduction in the price of sulphuric acid led to the closure of three chamber plants with capacities less than seven tons of acid per day. However, the capacity of 10 contact plants have been raised with the result that, although the number of units on production has gone down from 39 to 36 during 1956, the installed capacity has gone up from 209,000 tons in 1955 to 245,000 tons per annum.

The annual consumption of sulphuric acid in different industries in 1955-56 was estimated at 160,000 tons and was estimated to rise to 470,000 tons by 1960-61. The following picture is expected to emerge at the end of 1960-61:—

	1955-56	1960-61
Annual rated capacity (tons of 100 per cent. acid)	242,000	500,000
Actual production (tons of 100 per cent. acid) ..	170,000	470,000

ALKALI INDUSTRY

The alkali industry comprises the manufacture of soda ash and caustic soda, sodium bicarbonate, bleaching powder, benzene hexachloride, liquid chlorine and zinc chloride.

As against the rated capacity of 90,000 tons per annum, the production of soda ash in tons was as under:—

1948, 29,148; 1949, 17,916; 1950, 43,788; 1951, 47,532; 1952, 44,328; 1953, 56,838; 1954, 48,288; 1955, 77,268; 1956: 84,240; 1957, 91,925.

The production of soda ash increased from 48,288 tons in 1954 to 77,268 tons in 1955, representing more than 85 per cent. utilisation of present installed capacity, to 84,240 tons in 1956. Three new licences for the production of soda ash were issued during 1955 and expansion of one of the existing plants was approved. With the implementation of the new schemes, the installed capacity would rise to 283,000 tons a year.

On the basis of the Tariff Board's report in 1951 the estimated consumption of soda ash was placed at 115,000 tons. This was expected to rise to 155,000 tons by 1955-56 and to 230,000 tons by 1960-61.

The import policy and the high prices since 1951 gave an impetus to this nascent industry though the heavy imports allowed in the first two years of the First Plan caused some temporary difficulties to indigenous producers owing

to accumulation of stocks. Actual imports were 82,812 tons in 1951-52; 81,288 tons in 1952-53; 40,617 tons in 1953-54; 67,710 tons in 1954-55; 71,017 tons in 1955-56; 71,784 tons in 1956-57 (April-December).

The tariff protection to this industry has been extended to the end of 1958.

The following table summarises the programme of development of the soda ash industry:—

	1955-56	1960-61
Number of units	2	5
Annual rated capacity (tons)	90,000	253,000
Actual production (tons)	80,000	230,000

In 1957 the production in tons of hydrogen peroxide was 611, of bleaching earth 1,715, of hydrochloric acid 9,936, of sodium bicarbonate 4,784.

Caustic Soda.—The industry made considerable progress during the First Plan. There were only 9 factories in operation in 1951 with an installed capacity of 27,552 tons. By 1955, the factories rose to 12 with a capacity of 44,300 tons.

Actual indigenous production of caustic soda and the associated chemicals in the post-war period was as under:—

Year	Caustic soda in Tons	Liquid chlorine in Tons	Bleaching powder in Tons
1951 ..	14,722	5,268	3,583
1952 ..	17,064	6,240	792
1953 ..	22,908	8,136	1,944
1954 ..	29,307	9,782	2,928
1955 ..	34,248	11,580	2,700
1956 ..	39,420	15,072	4,656

In 1957 the production of caustic soda was 42,457 tons, of liquid chlorine 15,693 tons, of bleaching powder 5,343 tons, of calcium carbide 3,800 tons.

Imports of caustic soda were 62,750 tons in 1951-52, 25,540 tons in 1952-53, 49,360 tons in 1953-54, 49,355 tons in 1954-55; 50,713 tons in 1955-56 and 75,713 tons in 1956-57 (January-December).

The Second Five-Year Plan envisages that the installed capacity of the industry will rise from 44,300 tons in 1955-56 to 150,400 tons in 1960-61 and actual production from 36,000 tons to 135,400 tons.

Four new units were expected to commence operation during the first half of 1957-58.

The annual rated capacity for the production of superphosphates was 210,870 tons by the end of 1954. The factories are small and have survived because of import restrictions.

The production and consumption of superphosphates which received a setback in 1955 due to the fall in agricultural prices and rail transport difficulties recovered markedly during 1956. Production was: 105,058 tons in 1954, 74,160 tons in 1955 and 81,168 tons in 1956.

But in view of the importance of this fertilizer and that of ammonium phosphate the target of consumption is put at about 120,000 tons by 1960-61, when the production is expected to be 83,300 tons of superphosphate and 3,700 tons of ammonium phosphate.

The estimated needs of potassic fertilizers is roughly 80,000 tons by 1960-61 and it may be possible to recover about 22,700 tons from all the salt works in the country. In 1955, the Indian Potash Supply Agency was formed with the approval of Government, which is expected to assist the development of the production of potassic salts from the bitterns of salt works.

FINE CHEMICALS

The term "fine chemicals" is applied usually to substances such as photographic materials, drugs and pharmaceutical products, paints, pigments and varnishes, and dyestuffs. All the figures given below are in tons per annum except where otherwise stated.

The average annual demand has been estimated at 60 tons for calcium lactate, 80 tons for iron-ammonium citrate, 200 tons for potassium citrate and 50 tons for sodium citrate. Government have, on the Board's recommendation, converted the 36 per cent. standard and 26 per cent. preferential revenue duty on calcium lactate into a protective duty.

Production of bromine and bromides at one of the alkali works has been attempted and an annual output of 75 tons bromine, 36 tons potassium bromide and 14 tons sodium bromide has been recorded.

Coal, tar and wood distillation products are not sufficiently exploited to manufacture fine chemicals and even the war-time production of methanol and formaldehyde has been recently curtailed. Synthetic fine chemicals are yet to be turned out in India on a commercial scale.

Photographic Materials.—The basic chemicals required for the photographic industry are: (i) gelatin, silver halides and sensitizers in the coating of film, plate and paper base, and (ii) hypo sodium sulphite metal, hydroquinone and chrome alum in the processing stages.

Borax, boric acid, acetic acid and metal and photographic-grade sodium sulphite are still imported. The present capacity of sodium sulphite is 800 tons and output 300 tons which meet the full demand. Production capacity of 80 tons for potash chrome alum has been established. Hydroquinone is being manufactured in India since 1950 and the annual output is 25 tons. X-ray developing and fixing salts have been placed on the market since 1949.

Pre-war imports of raw film base into India were enormous, the film industry alone consuming some 80 million ft. per annum. The Celluloid Industries Panel has recommended the installation of a factory for manufacturing 80 million sq. ft. of all types of raw film, and this should synchronize with the manufacture of gelatin, silver halides, sensitizers and other photographic materials in adequate quantities.

MISCELLANEOUS CHEMICALS

The present position of some of the important products is as follows:—

	No. of units.	Annual rated capacity in tons.	Actual production in tons.	
			1955	1956
Alum	17	11,979	3,850	4,420
Aluminium sulphate	22	57,167	23,200	29,625
Ferrous sulphate	9	1,399	500	460
Copper sulphate	11	3,300	900	1,980
Sodium thiosulphate	5	2,120	976	914
Sodium sulphite	4	820	269	383
Sodium bisulphite	5	1,043	515	716
Nichromates	7	6,518	3,300	3,270
Sodium bicarbonate	2	4,620	4,125	4,452
Potassium chlorate	2	2,310	2,135	2,276
Zinc chloride	5	1,876	700	960
Calcium chloride	3	2,861	786	845
Magnesium chloride	4	39,600	6,111	8,540

FERTILISERS

So far in India the inorganic nitrogenous fertiliser almost universally employed has been ammonium sulphate. There are at present eight units in West Bengal and Bihar with a rated capacity of about 425,900 tons of ammonium sulphate per annum. The Sindri factory went into production in November 1951.

The output of ammonium sulphate has progressively risen from 45,395 tons in 1949 to 319,630 tons in 1953, to 340,223 tons in 1954 to 393,095 tons in 1955 and 389,017 tons in 1956.

Assuming country-wide application of nitrogenous fertilisers the annual needs would be about 12 million tons of ammonium sulphate.

In spite of the full utilisation of the capacity of the Sindri Factory, it has been necessary to import large quantities of nitrogenous fertilisers because of increasing demand. Production of ammonium sulphate at the Sindri factory went up from 321,000 tons in 1955 to 331,000 tons in 1956.

The Fertilizer Production Committee submitted its report in 1955 and suggested suitable location for the establishment of new plants.

As a part of the plans made by the Government of India for increasing fertilizer supply to 370,000 tons per annum by 1960-61, progress is being made rapidly in the expansion of the Sindri factory for the production of ammonium sul-

phatnitrate and Urea. Work on the establishment of another fertilizer factory at Nangal has been going well. It has been decided to set up a third factory at Neiveli in South India. After the implementation of the schemes both in the public and private sectors, it is expected that the annual installed capacity will be 582,000 tons of fixed nitrogen and the production 290,000 tons by 1960-61.

On 15th May 1957, the Government of India brought into force the Fertilizers (Control) Order 1957, with a view to regulating supply of chemical fertilizers of the prescribed standard to cultivators at fair prices. The order empowers the Central Government to fix the maximum price at which any fertilizer may be sold by a manufacturer or a dealer in a particular area and for a specific class of consumer with due regard to local conditions and other circumstances prevalent in that area.

Chemical.	Production.			Main uses.
	1954	1955	1956	
Acetic acid (tons)	1,009	2,375	2,484	Rayon, white lead, lead acetate, dyeing, rubber
Acetone (tons)	289	488	683	Solvent, explosives
Benzene (gals.)	6,28,000	25,46,000	3,43,024	Solvent
Cresote oil (gals.)	4,32,700	4,15,300	6,10,811	Insecticide
Naphthalene (tons)	6,71,000	8,50,000	9,52,000	Disinfectant, etc.

DRUGS AND PHARMACEUTICALS

Drugs and pharmaceuticals cover a large variety of products from simple extracts of vegetable drugs and glandular preparations to highly complex synthetic drugs and antibiotics.

In the field of antibiotics, a penicillin factory was established in the public sector. The Hindustan Antibiotics, located at Pimpri near Poona went into production in August 1955 with a capacity to produce 8.6 million to 9 million mega units of penicillin per annum. The production target of 4.8 million mega units fixed under the first Five-Year Plan was exceeded, with the production of 6.5 million mega units in 1955. During 1956, output touched 14 million mega units. The capacity is being expanded by 60 per cent. Chloromycetin is being produced by Parke Davis & Co. from the penultimate levobase which is imported. Their plant has a capacity of 3,800 kgs. Aureomycin is produced by the Atul Products from imported crude chlortetracycline. They have also taken up the manufacture of tetracycline.

The manufacture of sulpha drugs has made substantial progress in the country. Twelve units, which are engaged in their production, are stated to have a combined capacity of 22,000 kgs. per annum, although their actual production has been far below this capacity.

Among the new drugs recently developed for the treatment of tuberculosis are para-aminosalicylic acid (PAS) and isonicotinic hydrazide (INH). But their production has been very erratic.

Two manufacturers produce at present antileprosy drugs such as DDS and its derivatives. They have a total capacity for 2,920 kgs. of DDS.

Quinine, the most extensively used anti-malarial drug, has been produced in the country in the factories established by the West Bengal and Madras Governments. During the First Plan period the Madras Government established a new factory at Annamalai with a capacity of 80,000 to 10,000 lb. of quinine salt. Besides, some synthetic anti-malarials such as chloroquin and its salts are produced in India. There are three units engaged in their manufacture, with an estimated capacity of 1,890 kgs. per annum.

There are three manufacturers of anaesthetics with a total capacity of 712,352 kgs. of ether, 54,370 kgs. of chloral-hydrate and 32,800 kgs. of ethylchloride.

Among insecticides, DDT is produced on a commercial scale. The factory of the Hindustan Insecticides in Delhi went into production in March 1955. Production in 1956 was 500 tons. The capacity of the factory has been doubled. Another D.D.T. factory is now being erected by the Government of India at Alwaye in Kerala with an annual capacity of 1,400 tons. This factory is expected to commence production in 1958. Two factories manufacture benzene hexachloride with an annual capacity of 2,500 tons.

No substantial development in vitamin manufacture has taken place during the First Plan period. Shark liver oil is produced in factories set up by the Governments of Bombay, Madras and Travancore-Cochin. The existing factories have an estimated capacity of 70,000 gallons per annum of 6,000 i.u.g. of vitamin 'A'.

Still imports of drugs and pharmaceuticals continue to be considerable, particularly penicillin and other antibiotics, sulpha drugs, anti-malarials, vitamin preparations and proprietary and patent medicines. The total value of imports stood at about Rs. 10 crores in 1950-51, Rs. 15 crores in 1951-52, Rs. 11 crores in 1952-53, Rs. 12 crores in 1953-54, Rs. 13 crores in 1954-55, Rs. 15 crores in 1955-56 and Rs. 12 crores in 1956-57 (April-December). But exports, which were mainly confined to certain crude drugs of vegetable origin, have been of the value of Rs. 3 crores per annum.

The Ministry of Commerce and Industry appointed a Committee in February 1953 and the Committee submitted its report in June 1954, making a number of recommendations to improve the existing conditions in the pharmaceutical industry. In 1955, the Government set up a Developmental Council for the industry.

The requirements of drugs and pharmaceuticals are very large in India. Hence, schemes are included in the Second Plan for the expansion of the production of various drugs and medicines.

Some of the important schemes are listed below:

The factory at Pimpri proposes to expand its capacity for penicillin manufacture to 24 million mega units per year at a cost of Rs. 42.35 lakhs. Besides, this concern has under consideration the manufacture of certain other antibiotics like streptomycin. In the private sector, the Alembic Chemicals, Baroda, have a scheme for the establishment of a penicillin factory with a capacity of 4.8 million mega units per annum and the Standard Pharmaceutical Works, Calcutta, for the production of 1.8 million mega units of penicillin and 180 kg. of streptomycin. Besides, the Rainbaxy & Co., Faridabad, have also been given a licence to set up a plant for the manufacture of 3,000 kgs. of chloromphenicol as also the Mac Laboratories, Bombay for the manufacture of 500 kgs. per annum.

Two firms, Fedco, Bombay and Sarabhai Chemicals, Baroda, have been granted licences for the manufacture of procaine hydrochloride with an annual capacity of 60,650 kgs.

Three new schemes were licensed during 1956-57 for the manufacture of chloramphenicol. The production of isonicotinic acid hydrazide has commenced. About 200 lbs. were being produced a month.

Considerable expansion has taken place in the production of sulpha drugs, although such production is confined mainly to the processing of penultimate raw materials. However, manufacture of Sulpha diimide has been started from

more basic raw materials. A scheme for the production of other important sulpha drugs like elkosin was licensed during 1956-57 and other proposals for sulpha diazole and sulpha thiazole from more basic raw materials were under consideration.

The capacity for DDT in the public sector is planned to be stepped up substantially during the Second Plan. The annual capacity of the existing factory is to be expanded from 700 tons to 1,400 tons and a new plant will be set up with an annual capacity of 1,400 tons at Alwaye in Kerala.

There are at least 200 factories manufacturing paints and varnishes, but nearly 150 of them are very small in size. The bigger ones are concentrated in Bombay and Calcutta. Eighteen units with a capacity of 36,360 tons are in Calcutta, and 16 with an annual capacity of 18,360 tons are in Bombay. According to the Census of Manufacturing Industries (1953), the total capital invested in 46 units amounted to about Rs. 4.18 crores and the number of persons employed was about 4,980.

The aggregate installed capacity of the paints and varnishes industry is 64,800 tons. Actual production during 1956 was 41,424 tons, as against 39,036 tons in 1955.

An excise duty was imposed on paints and varnishes at 10 per cent. *ad valorem* with effect from March 1, 1955.

It is estimated that the consumption of paints, varnishes and enamels may go up from about 40,000 tons in 1955-56 to 60,000 tons in 1960-61. The demand for nitrocellulose lacquers may rise from about 3,00,000 gallons to 5,00,000 gallons. The existing capacity for ready-mixed paints and varnishes, i.e., 65,000 tons, is considered sufficient to meet the demand during the Second Plan; so also the present capacity of 8,00,000 gallons for nitrocellulose lacquers.

The following table summarises the development programme of the industry during the Second Plan:

	1955-56	1960-61
(a) Ready-mixed paints, varnishes, etc.:		
Capacity (tons) ..	65,000	65,000
Production (tons) .. (est.)	39,000	60,000
(b) Nitrocellulose lacquers:		
Capacity (gals.) ..	800,000	800,000
Production (gals.) .. (est.)	300,000	500,000

PROTECTION

In general for the chemical industry as a whole, protection for the bichromates, calcium carbide, caustic soda, bleaching powder and soda ash is due to expire on 31st December 1958; for hydro-quinone, stearic acid, oleic acid on 31st December 1959; for calcium lactate on 31st Dec. 1960; for titanium dioxide on 31st December 1961; and for dyestuffs on 31st December 1964.

COFFEE INDUSTRY

COFFEE cultivation is mainly confined to the hilly tracts of south India, from one thousand to six thousand feet above the mean sea level, and is centred in the Malnad area of Mysore, Madras and Kerala. In the lower elevations, which have a higher rainfall, the more delicate but better quality Arabica coffee has given place to the harder but coarser Robusta coffee.

The capital investment in the industry is estimated to be over Rs. 15 crores and the average annual value of the crop is over Rs. 8 crores. Nearly 176,000 people drawn chiefly from Kerala, and parts of Mysore are employed in the industry. Many of the coffee estates are inter-planted with orange trees, cardamom and pepper vines. There are about 50 species and sub-species of coffee plant in the country, the one most extensively cultivated being Coffee Arabica, the best in quality, with Robusta coming next in importance.

The area and production, of the two varieties of coffee from 1951 are as under:

AREA IN THOUSAND ACRES

Year	Arabica	Robusta	Total
1951-52 ..	168	67	235
1952-53 ..	168	72	240
1953-54 ..	169	77	246
1954-55 ..	167	85	252
1955-56 ..	162	92	254

PRODUCTION IN TONS

Year	Arabica	Robusta	Total
1951-52 ..	14,390	6,845	21,235
1952-53 ..	12,740	10,825	23,565
1953-54 ..	22,740	6,815	29,555
1954-55 ..	16,165	8,860	25,025
1955-56 ..	22,465	11,770	34,235
1956-57 ..	29,325	12,675	42,000

Increase in production has been followed by a rise in exports and internal consumption.

The following table gives the trend of exports:

Year	Exports in Tons*
1951-52 ..	2,200
1952-53 ..	3,000
1953-54 ..	9,613
1954-55 ..	3,525
1955-56 ..	7,954
1956-57 ..	15,155

* Out of the season's crop.

The latest estimate of the total production of coffee for 1956-57 puts it at the record figure of 42,000 tons.

The revised estimate of the production in 1957-58 is 37,000 tons (24,000 Arabica, 13,000 Robusta).

The quantity available for home consumption would be 26,845 tons.

The consumption in 1955 was 22,288 tons.

There is no export duty on coffee at the moment (Oct. 1957).

The possibility of further expansion of the coffee industry has been receiving Government's active consideration. An Officer on Special Duty had been appointed to conduct a field survey of the vast undeveloped areas in the South.

This officer who made his surveys along with the Chemist, Coffee Research Station, Balehonnur had completed his field surveys of Madras and Mysore except Nilgiris and Tinnevely in the former State. He had also submitted a report on The Andamans. His term of office had been extended till September 1957.

The average Pool sale prices per cwt. for 1951 to 1956 years were as follows:—

Year	Plantation 'A'	Arabica cherry Flats	Robusta cherry Flats
	Rs. a.	Rs. a.	Rs. a.
1951	218 11	197 14	196 6
1952	251 11	220 5	200 11
1953	219 4	188 14	150 1
1954	205 3	164 2	146 5
1955	217 5	180 11	158 14
1956	213 7	182 10	157 4

COFFEE BOARD

To stimulate internal consumption and to regulate exports a statutory body, now known as the Coffee Board, was set up under the Coffee Market Expansion Board. One of the serious problems the Board had to contend with in 1952 was the growing rise in the prices of coffee which advanced from Rs. 207 per cwt. of plantation type in April 1952 to a record level of Rs. 316 per cwt. in the following September. The Board effected increased sales of coffee and banned exports. In December 1952 a Bill was introduced in Parliament to amend the Act of 1942 for the purpose of ensuring better co-ordination between the Board and the Central Government and of providing adequate representation of consumer interests on the Board.

The Coffee Market Expansion (Amendment) Bill, 1954, was passed in November 1954. The bill provided for greater control by the Union Government over the Coffee Board and the industry as a whole.

AVERAGE INDEX NUMBERS OF WHOLESALE PRICES OF COFFEE

(Price for week ended August 19, 1939 = 100).

Year	Index
1950 ..	476
1951 ..	567
1952 ..	680
1953 ..	620
1954 ..	546.8*
1955 ..	616.0*

* Geometric mean of monthly averages.

MARKETING

Under the existing scheme of Coffee Control, all coffee estates in the country, big or small, are required to get themselves registered and to deliver the entire production, except quantities allowed for domestic consumption and seed purpose, to a Common Pool administered by the Coffee Board. Growers are paid in proportion to the value of coffee delivered to the Pool after deducting the cost.

The quantities of coffee released from the Coffee Pool for the internal market were 22,288 tons in 1955 and 23,807 tons in 1956.

Plantation Enquiry Commission

The Report of the Plantation Inquiry Commission (as the Committee was called) on coffee was published in the last week of November 1956. It observes that, although the total production of coffee in the country has increased considerably during the past 15 years, production per acre has not made any marked increase. The average yield is still just about 60 per cent. of the average yield in most of the coffee-growing countries of the world. Therefore, the Commission recommends that the yield from existing acres must be intensified at economic cost by the use of better strains of seeds, more manures and sufficient spraying against pests and diseases. With a view to regulating the internal distributive trade, the Commission has suggested the formation of a separate organisation under the aegis of the Board for manufacturing and marketing coffee powder. It may be stated here that the Board is already manufacturing and selling coffee in powder form. On the question of extension of acreages, the Commission recommends extension upto the minimum necessary to meet the growing internal demand and to maintain and develop the export markets. Statutory regulation of licensing of cultivation and production has been suggested in this connection. Another recommendation is that a coffee replanting fund should be instituted and that estates should be required to contribute a fixed sum annually to this fund.

These recommendations are under the consideration of the Government of India.

COIR INDUSTRY

COIR is the trade name given to the fibre obtained from the husk of the coconut fruit. This golden coloured fibre is also known in Europe as "Cocos Fibre". India and Ceylon have a virtual monopoly in the production of this by-product of the coconut industry.

In India the coir industry is practically confined to the coastal strip of Kerala State. It accounts for over one million acres of the coconut growing areas out of a total of 1.520 million acres in India. The distribution of the area under cultivation and production of coconuts (latest available) is roughly as follows:—

	Area in acres.	Production Percentage.
Madras*	605,765	41.3
Travancore	584,736	37.8
Cochin	67,058	4.3
Mysore*	170,180	11.3
W. Bengal	31,300	1.4
Orissa	30,021	1.8
Bombay*	20,197	1.8
Other States	7,592	0.3
	<u>1,525,759</u>	<u>100.0</u>

* Pre-reorganization.

The coir industry is organised partly on cottage basis and partly in factories. The production of coir fibre, yarn and ropes is essentially a cottage industry, while coir mats, matting, rugs, carpets, bags, etc. are manufactured in factories. About 300,000 people earn their living from this industry in Travancore alone and 60,000 in Cochin and about one lakh in Malabar.

There are two principal types of coir fibre—mat fibre and curled fibre. The bulk of the output consists of mat fibre. The yarn spun by hand is soft and even twist, while that spun on wheels is hard twist and not so even

as hand spun. Wheel spinning is gradually displacing hand spinning. Spinning is mainly done by women, boys and girls. Over 100,000 families are employed in this trade in Travancore alone.

Coir yarn has certain well-known trade descriptions. They are: (1) Angengo—Superior and Ordinary; (2) Mangadan; (3) Carruva; (4) Alapat—Real and Imitation (Ashtamudy); (5) Vycome; (6) Beach; (7) Roping; (8) Qullandy; (9) Beypore; and (10) Unsoaked—Fine unsoaked and unsoaked.

The yarn produced in the spinning districts is marketed chiefly in Alleppey where there are a large number of factories for the manufacture of mats, matting, rugs and carpets and also exporters of yarn.

Out of the 120,000 tons of coir fibre produced in India, only 600 tons are exported; the rest is spun into coir yarn. On an average, 23,000 tons of coir yarn are utilised in the manufacture of coir floor coverings such as mats and matting; 45,000 tons are exported as coir yarn; and about 52,000 tons are consumed in India itself for various purposes including manufacture of ropes and cordages.

In 1948 there were about 525 factories of which 474 were small ones with less than 20 looms and the rest large factories with more than 50 looms, having in all about 18,000 looms on mats and matting.

About 15,000 workers were engaged by these factories.

Following are the estimates of coir—manufactured and unmanufactured:—

State.*	Production (Tons).
Madras	25,038
Travancore-Cochin	97,000
Mysore	Not available
W. Bengal	225
Bombay	63
Total	<u>132,326</u>

* Pre-reorganization.

The coir industry in India is subject to violent fluctuations in prices and exports, causing often hardship to a large section of the population. This induced the Government of India to set up a Coir Board by special legislation called the Coir Industry Act, 1953. The Act also provides

for the control of the industry by the Union Government and for the levy of a customs duty on coir fibre, coir yarn and coir products. At present, the duty is levied on coir fibre and coir yarn only at the rate of eight annas per cwt. The annual revenue on this account comes to about Rs. 5 lakhs.

The Coir Board was established on July 6, 1954. Its chief function is the improvement of markets at home and abroad, thereby establishing a balance between internal consumption and exports so as to give the industry the required economic stability. The Board shall discharge its functions in accordance with the rules framed by the Central Government, which are under active consideration now. Meanwhile a delegation of the Board toured the country to find out how far the 50 per cent of the husk now used as fuel could be put to industrial use.

In the Second Five-Year Plan, the Board has schemes worth about Rs. 30 lakhs. They relate to the establishment of Research Institutes, sending out foreign delegations for market survey and study the uses of yarn in importing countries, opening of show-rooms and sales-depots, and propaganda.

In view of the importance of the coir industry as a foreign exchange earner, the Government of India has now enhanced the overall allocation for development of the industry for the Second Plan period to Rs. 1.70 crores, against Rs. 1 crore originally provided in the Second Plan.

The allocation for State schemes has been increased from Rs. 70 lakhs to Rs. 1.40 crores. The State Governments have been requested to consider the desirability of enlarging their programmes for development of the industry.

An increase of about Rs. 60 lakhs in the value of exports of coir fibre, yarn and other coir manufactures was registered during the first ten months of 1956-57 as compared with the corresponding period of the previous year.

The total exports of coir and coir goods during the period April 1956 to January 1957, were 67,200 tons, valued at over Rs. 8.04 crores as against 60,700 tons valued at Rs. 7.45 crores during the corresponding period of 1955-56. The exports during the complete year 1955-56 were valued at over Rs. 9.09 crores, as against Rs. 8.55 crores in 1954-55.

A sum of Rs. 4.3 lakhs was earmarked during 1957-58 for taking steps to increase the sale of coir goods within and outside India.

EXPORTS

Export of coir yarn, mats and matting, ropes and other sorts of coir are detailed below:—

(Tons)

Year.	Coir yarn.	Coir mats and matting.	Coir ropes.	Other sorts.
1951-52	45,269	11,510	5,869*	4,790
1952-53	48,446	12,408	4,422*	4,087
1953-54	55,570	13,486	3,930	7,031
1954-55	53,428	14,505	4,290	8,532
1955-56	54,162	13,936	5,055	6,117
April-Dec. 1956	40,404	10,286	3,800	3,637

* Includes export to Pakistan by land.

COTTAGE INDUSTRIES

TOTAL allotment for small-scale and cottage industries under the First Five-Year Plan: Rs. 31.2 crores.

The financial provision made in the Second Five-Year Plan is Rs. 200 crores. This does not include expenditure on the Ambar Charkha Programme and other Working Capital requirements. The Village and Small Scale Industries Committee (Karve Committee) had, however, recommended programmes and allocations involving a total outlay of Rs. 260 crores.

It is customary to refer to industries which are not required to be registered under the Factory Act as cottage and small-scale industries. There is no accepted line of distinction between cottage and small-scale industries but the use of electric power is one of the popular tests. A rough and ready definition now provided is that all those industries which employ up to 5 workers and use power or those which employ 100 workers and do not use power, are called small-scale industries.

An investment upto Rs. 5 lakhs and not more than 50 workers a shift is also regarded as a demarcation.

The data about their strength is extremely meagre. It is, however, very roughly estimated that at least 22 million persons are gainfully employed in these industries classified as under:—

Name of Industry	Persons employed in lakhs.
Textiles	58
Leather	24
Wood	21
Metals	42
Pottery, Ceramics, Tiles, Bricks, etc.	20
Vegetable Oils, Chemical Products, etc.	10
Food including Hand-pounding ..	20
Dress and Toilet	11
Miscellaneous including jewellery and toy making	17
TOTAL ..	220
	(Estimated)

In order to encourage more effectively the development of cottage and small-scale industries, the All-India Cottage Industries Board, constituted in 1948, was replaced by two Boards, viz., The All-India Handicrafts Board and The All-India Khadi and Village Industries Board (later turned into a commission). The former was constituted in November 1952, and the latter in February 1953. Other organisations are (i) Small-Scale Industries Board, (ii) The Coir Board and (iii) The Central Silk Board. The Coir Board and the Central Silk Board are statutory bodies.

Towards the end of 1952 the Government also constituted the All-India Handloom Board to deal specifically with problems affecting the handloom industry. A cess of three ples per yard has been levied on all mill-made cloth consumed within the country and is expected to yield every year about Rs. 6 crores. Schemes for the development of khadi and handlooms are to be financed out of this resource, though finances for khadi development programmes are not entirely dependent on the Cess Fund.

The Cottage Industries Directorate has been merged as a part of the Development Wing and is responsible, generally, for all small-scale industries.

The primary objective of the policy laid down under the First Five-Year Plan is to provide a field within which each cottage industry may be able to organise itself. Wherever a large-scale industry competes with a cottage industry, a common production programme should be evolved.

The programme may cover (a) reservation of spheres of production, (b) non-expansion of the capacity of a large-scale industry, (c) imposition

of a cess on products of a large-scale industry, (d) arrangements for the supply of raw materials and (e) co-ordination for research, training, etc.

To carry out research, the establishment of an institute for village technology has been recommended by the Planning Commission.

Finance for the development of village industries has to be viewed as a problem inseparable from finance for agriculture. The formation of industrial co-operatives is, therefore, considered essential. Meantime, the responsibility for revitalising village industries has devolved on the Government.

In the States the First Five-Year Plan provided Rs. 12 crores for cottage and small-scale industries. The responsibility for organising industrial co-operatives lies on the State Governments.

The question of training the artisans has received considerable emphasis in the First Five-Year Plan. The training centres maintained by the Central Government under the Directorate-General of Resettlement and Re-employment have trained during the past few years 144,000 persons.

The Ministry of Rehabilitation has arranged for the technical training of 52,000 persons from West Pakistan.

The plans of the State Governments provided for the following training programmes:—

	1950-51	1955-56
No. of Industrial Schools	365	456
No. of pupils trained	14,750	21,797
No. of technical and vocational institutions	260	407
No. of persons trained	26,708	42,997

In February 1955, a Small Industries Corporation, designed to assist small industries, was registered as a private limited company under the auspices of the Government of India. The Corporation will accept contracts for supplying orders to Government and issue sub-contracts for these goods to small-scale industries. The Corporation also undertakes and guarantees loans to such units from banks and has an authorised capital of Rs. 10 lakhs subscribed entirely by the Government of India.

TEXTILES

In the main, these are composed of two units—handlooms and khadi.

The details about the handloom industry have been given in the article on the cotton textile industry. Suffice it to say that there are about 2.9 million handlooms, working 200 days a year with an annual output of 1,200 million yards. The production in 1954-55 was about 1,300 million yards compared to 1,208 million yards in 1953-54. The production in 1955-56 was 1,470 million yards, and in 1956-57 it was 1,600 million.

The problem in 1953 as in the previous year was of finding an adequate market for handloom cloth. In January 1953 the Government restricted production by mills of bordered dhoties to 60 per cent of their production during 1951-52. This measure succeeded in bringing down the overall production of dhoties to within the required quota, i.e., to about 30,000 bales.

But there were difficulties in the way of enforcing this measure and it was, therefore, decided that a more effective way of enforcing compliance with the objective would be to levy an additional excise duty on the production of dhoties over and above this percentage.

Financial assistance to the handloom and Khadi industries is being provided by Government out of a cess of 3 ples per yard on mill-made cloth. This is expected to bring in a sum of Rs. 6 crores every year. During 1953-54, the actual expenditure on khadi from the cess fund

amounted to Rs. 1.88 crores. As regards village industries the All-India Khadi and Village Industries Board spent Rs. 131.35 lakhs during 1953-54.

The handloom industry had a better time in 1954. Adequate supplies of yarn were made available. A network of sales depots had also been opened at various places. On the recommendations of the Board, the Government sanctioned a sum of Rs. 544.11 lakhs to the States from the cess fund upto the end of September 1954 for the implementation of various schemes.

Schemes to supply better equipment to handloom weavers, provide working capital to weavers in co-operatives and facilitate marketing of handloom cloth were approved by the Government of India early in 1955.

Over Rs. 27 lakhs were sanctioned by the Union Ministry of Commerce and Industry to different States for implementing the schemes.

On the question of reservations of the fields of production, the Textile Enquiry Committee has come to the conclusion that the existing reservations in favour of the handlooms or improved handlooms and the domestic powerlooms industry must continue. At the same time, the Committee expresses the opinion that there should be, during the first conversion period, that is to say, upto 1960, no further extension of these reservations.

While the Committee agrees that the reservations should also extend to the large-scale powerlooms, i.e., units containing five or more powerlooms, this sector of the industry should be definitely warned that after 1960 it will be considered to be on the same footing as the large-scale organised mill industry and that it can expect no concessions. As there is a concentration of the powerloom industry in the State of Bombay, the Committee recommends that the Government of Bombay should conduct such enquiry as it may deem fit into all matters affecting the industry and take steps to facilitate an increase in the economic efficiency of the powerloom industry by a change in the character of its production, if necessary, and by the provision of centralised warping, winding, yarn supplies on beams, dye-houses, finishing plants, etc.

The Committee is of the opinion that there should be no prohibition on handlooms from producing plain cloths like mulls, voiles, etc. The recommendations of the Committee are under consideration.

The main emphasis of khadi is to minimise the pressure of the problem of under-employment.

Calico printing is an old industry in Farukhabad and Ahmedabad and is now extended to most of the other cities. Over 25,000 people practise this art. In Farukhabad alone there are over 2,000 printers. The industry's products have a wide export market. During 1952 the cotton mills printed about 30 million yards. The question of reducing mechanised printing is under examination, and it has been decided that no more expansion of the mill industry for garment-making and printing of cloth should be permitted.

Silk weavers are found in nearly every State. Assam and W. Bengal are, however, the largest producers of silk accounting for two lakh looms and 15,000 looms respectively.

India is the only country where tussar, eri and muga silk is produced.* The industry produces about 2 million lb. of silk and employs about a lakh of people. The annual consumption is about 3 million lb. with the result that a considerable quantity of raw silk is imported from abroad. The industry is now heavily protected and a Silk Board has been constituted to promote its growth. The progress made by the Board was, however, not appreciable. The constitution of the Board was amended so as to

* There are no reliable statistics.

bring in wider representation and also to bring in the entire silk industry in its purview. For the year 1958-59 an allotment of Rs. 16 lakhs was made by the Centre against an average of Rs. 34 lakhs in the preceding years.

The Government placed a sum of Rs. 30 lakhs in 1954-55 at the disposal of the Central Silk Board for financing various State Government schemes. Besides the old schemes, new schemes costing Rs. 20 lakhs for the promotion of the industry were launched in January 1955.

KHADI & VILLAGE INDUSTRIES

Khadi.—Cotton Khadi which has so far been woven from traditional charkha yarn will be produced in future in greater measures from Ambar Charkha yarn. Besides, the Textile Policy announced recently has allotted a production of 300 million yards of cloth for the decentralised spinning sector during the Second Five Year Plan period. Production of traditional khadi is proposed to be raised from 84 million yards to 60 million yards in the course of the Second Plan at a total expenditure of Rs. 21 crores including working capital, but this programme may have to be revised so as to fit in in the Ambar Khadi programme.

Government sanctioned to the Khadi Board Rs. 3.96 crores for the manufacture and introduction of 75,000 Ambar Charkhas during 1956-57. Substantial progress has so far been made in every direction. The Government tentatively accepted the Khadi Board's programme for the introduction of 150,000 Ambar Charkhas during the second year of the Second Five-Year Plan*. To produce the allocated 300 million yards by the end of 1960-61, it is estimated by the Board, that at least 800,000 Ambar Charkhas will have to be introduced. This programme is estimated to cost about Rs. 60 crores. The programme, if implemented will provide over the Plan period employment to 1,200,000 spinners, 160,700 weavers and about 50,000 persons in other ancillary processes.

Khadi, Woollen.—Spinning and weaving of wool are easier than that of cotton. At present the cottage industry has confined its activities to the production of carpets and kamblies.

The development programme for Woollen Khadi aims at increasing the production of blanketing cloth from about 250,000 yards in 1956-57 to one million yards in 1960-61, all sub standard cloth from 5 lakh yards to 15 lakh yards. These targets are to be achieved by organizing nine production centres in the principal woollen producing areas by the establishment of five finishing centres and two dyeing plants at an estimated total outlay of Rs. 1 crore. The programme when implemented will provide employment to 28,639 persons and distribute Rs. 3 lakhs as wages over the Plan period.

THE COMMISSION

In November 1956 Parliament passed the Khadi and Village Industries Commission Act (Act 61 of 1956) and the Commission was constituted on April 1, 1957.

Members:

Vaikunth L. Mehta (*Chairman*), Pranlal S. Kapadia (*Secretary*), R. Srinivasan, Sriman Narayan, Dwarakanath V. Lele.

The functions of the Commission will generally be to plan, organise and implement programmes for the development of Khadi and Village Industries.

In particular, the Commission may take such steps as it may think fit:

- to plan and organise the training of persons engaged in the production of khadi or in village industries;
- to build up a reserve of raw materials and implements and to supply them to persons engaged in the production of khadi or in village industries at such economical rates as may be suitable in the opinion of the commission;

- to provide for the sale and marketing of khadi or of products of village industries;
- to encourage and promote research in the technique of production of khadi or in the development of village industries, or to provide facilities for a study of the problems relating to khadi or village industries;
- to maintain or assist in the maintenance of institutions for the development of khadi or village industries;
- to undertake, assist or encourage the production of khadi or the development of village industries;
- to promote and encourage co-operative efforts among manufacturers of khadi and persons engaged in village industries;
- for ensuring the genuineness of, and for granting certificates to producers of, or dealers in, khadi or the products of any village industry;
- to carry out any other matter which may be prescribed.

The Schedule of Industries included in the Act and which comes under the purview of the Commission is as follows: Bee-keeping; Cottage Match Industry; Cottage Pottery Industry; Cottage Soap Industry; Flaying, curing and tanning of hides and skins and ancillary industries connected with the same and cottage leather industry; Ghani Oil Industry; Hand-made Paper; Manufacture of Cane-gur and Khandasari; Palm-gur making and other palm-products industry; Processing of cereals and pulses; Fibre (other than Coir); Blacksmithy and Carpentry.

AMBAR CHARKHA

The Ambar Charkha Programme for 1957-58 was originally as follows:

Rs. 10.5 crores would be given as loans and Rs. 4 crores as grants.

About 1,80,000 Charkhas would be manufactured and 1,50,000 would be distributed to trained spinners for independent operation.

But the response to the programme being below expectation, the scheme was scaled down towards the end of the financial year 1957-58.

Against the target of 180,000 charkhas, the authorities expected to distribute only 115,000 in 1957-58.

The allocation for 1958-59 has been further reduced to 100,000.

The budget allocations have been similarly halved: although Rs. 10 crores were provided under this head for 1957-58, only Rs. 5 crores are expected to be spent, which is also the provision for 1958-59.

The position at the end of August, 1957 was as follows:

Number of Charkhas manufactured 1,14,688.

Number of Charkhas distributed 77,192.

Production of Yarn 17.32 lakh lbs.

Production of Cloth 4.6 million sq. yds.

The greater part of the manufacture of Ambar Charkha was done in the 94 decentralised Saranjam Karyalayas established by the Khadi & Village Industries Commission by the end of August, 1957.

Out of the 35 Vidyalayas set up for training instructors, 30 were functioning by the end of August, 1957. 3,912 instructors were trained and 1,158 instructors were under training by the end of August, 1957. Besides 89,449 spinners and 1,278 carpenters were also trained.

By the end of August, 1957 Rs. 3.3 crores had been disbursed in connection with the Ambar Charkha Programme.

It is estimated that about 73,000 persons had been provided with employment till the middle of 1957.

The following is a description of the Ambar Charkha:

The Ambar Charkha is a four-spindle, hand-operated wooden spinning wheel, 21 inches long, 18 inches broad and 21 inches high, weighing 28 lbs. Apart from the frame made of seasoned wood, there are three wooden multi-grooved pulleys, one with four grooves, another with three and the third with two each of which is connected with the main hand-operated wheel by cotton bands.

The iron parts of the Charkha consist of four-spindle rings, four fluted rollers, one pair of gear wheels, harwar boss, travellers and springs. Besides these, there are four pairs of rubber rollers over the metal-fluted rollers, about 1½ inches broad.

The specially made tubular alivers, which are kept in a bundle on the off-side of the Charkha, are delivered through the fluted rollers into a small wire ring, and get twisted due to the fast revolving spindles. The winding of the yarn is made automatic through the traveller and the spinning ring.

The revolutions of the spindles average 7,000 to 9,000 per minute depending on the number of revolutions of the main wheel, which is linked to the spindles through cotton bands. The counts of yarn can be varied by shifting the band from one groove to another of the grooved pulleys and also by variations in the size of the tubular alivers used for spinning.

The present rated capacity of the Ambar Charkha is to spin counts of yarn from 12s to 40s, although counts of 40s and above can be spun, depending on the types of cotton and alivers made therefrom. In fact counts of 130s have been spun on the Charkha as an experimental measure. Though high count yarns have thus been spun on it, the Ambar Charkha is mainly directed to produce coarse and medium counts of yarn.

The rated or average capacity of the Charkha is taken at 8 hanks per day of 8 hours from cotton to spinning, or 16 hanks of yarn taking only spinning. Winding of yarn in each case is separate.

The Ambar Charkha, as it has been evolved, is simple in structure and mechanism, and all its parts, except the traveller, are either locally available or can be easily made locally. Experience in its manufacture shows that after initial training the village carpenters are capable of assembling the Charkha and servicing it efficiently. While the wooden frame can be easily made to standard size, all iron and rubber parts need to be made at factories.

An Ambar Charkha set consists of a carding and a drawing machine besides the Charkha, collectively estimated to cost Rs. 100. The arrangements to manufacture replaceable parts at selected central factories are expected to bring down the cost by Rs. 10/20 to Rs. 90/80 per Charkha set. Thus, the present four-spindle wooden Ambar Charkha evolved from the original model of it constructed by Mr. Ekambaranathan, satisfies almost all the criteria prescribed by Gandhiji.

Comparative analysis of the yarn spun on the Ambar and ordinary charkhas shows that the yarn on the Ambar Charkha has a tensile strength of 70 to 100 per cent as against an average of 60 to 70 per cent of the yarn on the ordinary charkha.

Government had a Rs. 3.96 crores scheme for the Ambar Charkha during 1956-57: manufacture of 75,000 charkha sets, establishment of 15 additional vidyalayas, 200 more parishramalayas, 50 more workshops, five main production centres, 10 sub-centres. At the time there were 15 vidyalayas and 100 parishramalayas.

OTHER INDUSTRIES

Coir-Making.—The aggregate production of the coir industry is approximately 1.3 lakh tons and supports about 4½ lakh persons. Exports

* The final programme as decided is for 115,000 machines. See below under 'Ambar Charkha'.

of coir products including coir yarn in 1954 were 14.8 lakh cwt. as against 14.5 lakh cwt. in 1953. A Coir Board has been set up to tackle the difficulties of the industry which is an important contributor to export earnings. The industry is mainly concentrated in Kerala and the State's plan lays down an elaborate programme for its development. The Coir Industry Act was brought into force from February, 9, 1954. During the year, the Government had sanctioned Rs. one lakh to the Board for its various activities. In addition, the Government had given a loan of Rs. 4 lakhs, and a grant of Rs. one lakh to the Travancore-Cochin Government for the organisation of Coir Co-operative Societies.

Village Oil Industry.—The Indian Central Oilseeds Committee has decided to start demonstration centres of improved ghanis in each of the Community Project areas and has recommended to the Government of India to levy an additional cess of one anna per maund for the first five years, and two annas per maund thereafter for financing the development of the village oil crushing industry. An attempt has been made to improve the efficiency of ghanis and several models of improved ghanis have been introduced.

Under the Essential Supplies Act, the Government of India has delegated powers to State Governments to check the indiscriminate growth of oil mills. Under the Industries (Development and Regulation) Act the Union Government is competent to prevent further growth of the large-scale industry.

The All-India Khadi and Village Industries Board has recommended that the crushing of sesamum oilseeds should be completely reserved for the ghanis. It has also suggested the allocation of quantities of different oilseeds to mills and to ghanis. The Oilseeds Crushing Enquiry Committee was set up in January 1955.

During the First Five Year Plan period the total amount allocated to the Khadi Board for the development of this industry was Rs. 43.93 lakhs. Production of oil during this period amounted to 66,495 B. Maunds which provided employment to 8,607 tells. 104 Model Production Centres have been set up and 1,463 improved ghanis introduced. 7,067 old and 1,540 new ghanis have been registered with the Khadi Board during the period.

The Village and Small Scale Industries (Second Five Year Plan) Committee examined the programme for the development of this industry under the Second Five Year Plan and proposed that measures should be adopted for discouraging and, wherever necessary, regulating on a regional basis the crushing of sesamum, nigar and karadi seeds by the mills. In view of the difficulty experienced by ghani owners even when organised co-operatively to secure supply of oil seeds in a highly competitive market, it will be necessary to organise marketing arrangements with a view to ensuring requisite supplies of oil seeds from season to season. It has also been suggested that no new oil mills should be allowed to be set up except in areas where it is not possible to adopt alternative methods of crushing oil seeds and that the proceeds of cess levied on existing mills should be utilised for improving the technical equipment and marketing facilities of the ghani industry. It is also proposed that interest-free loan should be given to village oil men so that they can become shareholders of co-operative societies.

The development of the vegetable oil industry depends in part on the possibilities of diverting larger supplies of edible oil seeds to ghanis for crushing and on the possibilities of inducing oil mills to utilise greater quantities of cotton seeds. In the Second Five Year Plan, the Board has proposed extension of assistance to one lakh tells on ordinary ghanis and fifty thousand tells on improved ghanis to purchase shares of co-operative societies with a view to improving their operative conditions. 400 Model Centres are proposed to be organised and 400 filter

presses will be distributed among these centres. The total cost of the programme is estimated at Rs. 6.7 crores excluding working capital.

The development programme when implemented will provide employment to 1.5 lakh tells and distribute Rs. 28.70 crores as wages over the Plan period. Total production of oil over the Plan period is estimated at 8.3 lakh tons of oil, 13.93 lakh tons of oil-cake, collectively valued at Rs. 200.63 lakhs.

The implementation of the programme depends on the provision of direct assistance for marketing of oil. To encourage tells working on the improved ghanis to form themselves into co-operative societies and to market their oil through them and also to offer partly the price differential between mill and ghani oil, the Board has proposed a subsidy of Rs. 1-14-0 per B. Maund of oil sold.

Besides providing direct employment to tells, the industry will provide employment to 5,000 people and many other artisans like carpenters, blacksmiths, etc.

Paddy Husking.—Hand pounding of rice is an important village industry. It processes about 65 per cent of the paddy. The First Five Year Plan aimed at improving the hand process for increased recovery of rice and production of bran in a pure form by introducing paddy husking stone chakkis in place of the pounding method.

The Food Ministry has declared that the huller type mills are a destructive type of equipment for milling, particularly raw rice. Under the Essential Supplies Act, the Union Government is competent to prohibit the establishment of rice mills. At present there are 15,000 huller mills in the country. The All-India Khadi and Village Industries Board has urged the Central Government that there should be no further increase in the number and capacity of the huller mills and that the use of the huller type for pounding rice should be banned.

Problems of development of this industry have been reviewed by an expert committee known as the Rice Milling Inquiry Committee (1954). The Village and Small-Scale Industries (Second Five Year Plan) Committee also made recommendation regarding the programme for this industry. It is proposed in the Second Five Year Plan that all power driven rice mills should be licensed and that no new mills should be allowed to be set up nor expansion of the capacity of the existing mills allowed, except where it is considered absolutely essential in the public interest in special circumstances.

During the First Five Year Plan period the total expenditure on the development of this industry amounted to Rs. 39.61 lakhs. 12.70 lakh B. Maunds of paddy have been dehusked providing seasonal employment to 13,050 hand-pounders. 1,224 chakkis, 196 Dhenkis and 161 winnowing fans have been distributed among various production centres.

The Second Five Year Plan envisages the processing of 4 million tons of paddy through the manufacture and distribution of 43,000 chakki-dhenki units, 143,000 improved (Assam) dhenkis and 1,500 winnowing fans over the Plan period. The implementation of the Rs. 5 crores development programme will provide seasonal employment for 6.78 lakh persons and distribute Rs. 28.06 crores as wages over the Plan period.

The programme also envisages the training of 600 supervisors and 1,000 mistries to meet the requirements of trained personnel for the implementation of the programme.

The popularisation of hand-pounded rice and the organisation for its regular supply to urban areas constitute important parts of the programme. Over the Plan period the programme provides for the constitution of 200 nutrition committees to carry on intensive propaganda through trained nutritional guides, and the organisation of 200 city and 200 town depots.

The Karve Committee recommended the imposition of an excise duty on the output of mills and the payment of a subsidy to hand-pounders to reduce the price differential between hand processed and mill processed rice. A subsidy of annas 6 per B. Maund is paid on production through co-operative societies and/or registered, recognised institutions.

Beekeeping.—Bee-keeping is a cottage industry which has not to compete with any machine. The industry is not, however, well developed. The total yield of honey in the country does not exceed 12 million lb. a year and hardly a third gets into commercial channels. Consequently there have been heavy imports of honey.

The First Five-Year Plan contemplated an intensive development of bee-keeping in selected areas in which the industry had already made some progress. For instance, Madras, Bombay, Uttar Pradesh, Punjab, Mysore, Travancore-Cochin and Coorg offer scope for intensive development. In each selected area there would be a sub-station serving a group of 20 to 30 villages. The scheme provided for training of staff and bee-keepers and for supply at subsidised rates of beehives and other appliances. Co-operatives of bee-keepers were envisaged for collecting and marketing of the honey.

Government sanctioned Rs. 16.25 lakhs to the Khadi Board for the development of the bee-keeping industry during 1953-54 to 1955-56. 67,680 lbs. of honey have been produced during the First Plan period. 15 area offices, 140 sub-stations, 25 model apiaries and 5 model production centres have been organised. Seasonal employment was provided to 4,700 persons. 29,770 hives have been distributed to farmers at subsidised rates.

During the Second Five Year Plan period, the All India Khadi and Village Industries Board have proposed to establish 25 area offices, 600 sub-stations and 100 model apiaries. The development is estimated to cost Rs. 1.3 crores.

The implementation of the programme may result in the output of 119.5 lakh lbs. of honey valued at Rs. 239 lakhs over the Plan period. 80,000 beekeepers may get part-time seasonal employment and earn Rs. 1.20 crores over the Plan period.

A separate provision for the training of 1,000 school children is a special feature of the development programme.

Paper Making.—The All-India Village Industries Association has a separate department for hand-made paper which mainly imparts training and carries on research in paper industry. The Association has encouraged the paper industry throughout the country. The methods of production are fairly satisfactory and the processes and implements are being improved year after year. Cotton rags, jute waste, paddy straw and grass of any kind that grows to a height of two feet, plantain stalks, sugarcane waste and waste paper are the chief raw materials. Hand-made paper is generally used for documentary purposes.

The five-year programme, therefore, suggests the production of high-grade hand-made paper at all existing centres. These centres will receive assistance in respect of equipment, training and research. Pulp-making is proposed to be done by power-operated machines, while other processes will be done by hand. It hopes to support 1,000 paper makers and turn out annually 1,400 tons of high-grade paper.

The total outlay for the development of the Handmade Paper Industry amounts to Rs. 15.98 lakhs over the First Five Year Plan period. The industry provided full-time employment to 2,347 paper makers. 1,261 tons of handmade paper was produced in 31 units established during the period.

The development programme for handmade paper industry proposed by the Khadi Commission in the Second Five Year Plan visualises the establishment of 50 factory units and 400 cottage units for commercial production of 4,000 tons of handmade paper for sale in the open market

by 1960-61 and 400 school units, which will be largely self-sufficient. The programme is estimated to cost Rs. 1.09 crores excluding working capital.

The production programme envisaged in the Plan may provide employment to 12,000 workers and distribute Rs. 72.05 lakhs as wages over the Plan period.

To provide trained personnel required to implement the programme, the programme provides for the establishment of one Research-cum-Training Centre with an annual capacity for training 100 persons.

The bulk of production envisaged in the programme is high grade handmade paper. As the prices of comparable varieties of mill-made paper at home and imported from abroad are relatively lower, the programme provides a subsidy of Rs. 250 per ton or Rs. 0.1-0.9 per lb. on production to narrow down the existing price differential.

Soap Making.—In the village industry programme has been included a small scheme for the promotion of non-edibles and for manufacturing soaps from them. The main object is to utilise material now going to waste. The scheme aims at establishing production-cum-demonstration centres in different States where neem and other non-edible oil will be produced and utilised in soap manufacture.

Neem oil is at present produced in small quantities in Madras, Uttar Pradesh and Bombay. Neem trees are, however, in abundance all over the country and a survey recently conducted in Madras has shown that about 72,000 tons can be collected annually in that State alone. Actually however 20,000 tons of seed are crushed to yield 1,650 tons of neem oil. The neem oilcake is also a valuable manure.

Washing soap can be manufactured very easily on cottage scale provided caustic soda, oils, tallow, etc. can be made available at reasonable prices.

The question of encouraging this industry in rural areas by levying a cess on large-scale production and reserving a portion of the market is under investigation. In the case of washing soap, a differential excise duty has been imposed and a subsidy of one anna per seer of neem and non-edible oils used in making soap is given.

Government has sanctioned Rs. 52.77 lakhs to the Khadi Board for the development of Soap Making from non-edible oils during 1953-54 to 1955-56. 6,492 B. Maunds of soap and 8,904 B. Maunds of cakes have been produced during the First Plan period in about 114 different types of units. The industry has provided seasonal employment to nearly 1,900 persons over the Plan period.

In the Second Five-Year Plan, the Khadi and Village Industries Commission has proposed the establishment of 90 oil production centres, 340 oil-cum-production units in the Intensive Areas with a collective productive capacity of 14,300 tons of non-edible oil and 8,400 tons of soap during the last year of the Plan. The programme is estimated to cost Rs. 2.99 crores excluding working capital. 89,110 tons of oil, 91,280 tons of oilcakes and 22,420 tons of soap collectively valued Rs. 8.68 crores are expected to be produced over the Plan period. The development programme may provide full-time employment to 10,840 persons and seasonal employment to 89,400 persons, distribute Rs. 176 lakhs and Rs. 147 lakhs as wages respectively to each category of workers.

Special provision has been made for the training of the supervisory staff in this industry also.

Palm Gum.—According to a recent estimate India has 50 million palm and corresponding varieties of trees. At present some four million trees are tapped and yield 55,000 tons of palm gum. It is estimated that about 5.3 lakh persons are engaged in this industry.

The Khadi and Village Industries Commission had been sanctioned a total amount of Rs. 18.89 lakhs for the development of palm gum industry during the first Five Year Plan. The development of the industry resulted in the production of 39.41 lakh B. Maunds of Palm Gum and 6,051 B. Maunds of other products. The industry provided seasonal employment to 3.88 lakh persons during the period.

During the Second Five Year Plan the Khadi and Village Industries Commission proposes to establish 105 special units, 1,180 each of A and B units over the Plan period to organise production. 50 Palm Gum Co-operative Federations and 72,000 small co-operative units of individuals will be assisted. Among other schemes, mention may be made of the colonisation units, propaganda units and training units. The total estimated cost of the programme is Rs. 3.43 crores. The programme when implemented will produce 15.73 lakh B. Maunds of Palm Gum valued at Rs. 3.14 crores, besides many other subsidiary products. The programme will provide seasonal employment to 105,000 tappers and distribute Rs. 235.89 lakhs as wages over the Plan period. About 150,000 people will also be employed as pan boilers and auxiliary workers and about Rs. 3 crores will be distributed to them as wages.

Gur and Khandasari.—Gur and khandasari are well established in areas where there is not enough cane to start a sugar factory. Because the operations are near the field, the industry is carried on even in factory areas. The object of the programme is to extend the use of improved types of cane crushers to obtain a higher percentage of extraction.

In the First Five-Year Plan, the Government spent Rs. 11.48 lakhs on the development of Gur and Khandasari Industry. The programme was implemented through the All India Khadi and Village Industries Board. 1.69 lakh tons of ordinary Gur, 46,000 tons of quality Gur and 1,000 tons of Khandasari totally valued at Rs. 6.7 crores were produced. The industry provided perennial full-time employment to 920 persons and seasonal part-time employment to 5,847 persons. 40 Multipurpose Co-operative Societies were also organised among which 1,184 improved crushers, 45 centrifugals and many other improved implements were distributed.

The development programme of the Second Plan for the Gur and Khandasari Industry aims primarily at improving the level of technical efficiency through the introduction of better equipment and processes. The possibility of adopting the vacuum pan process on a decentralised basis for the manufacture of Khandasari will be investigated. For the Gur Industry efforts will be focused on the technical side, on the introduction of power driven crushers and the improvement of pans and furnaces and the formation of gur producers' co-operatives with a view to dealing with the problems of improving the keeping capacity of gur, proper storage, packing and standardisation of gur.

The Khadi and Village Industries Commission proposed (i) the establishment of 23 production units in the sugar-cane growing States and of 143 co-operative societies to organise production, distribution of improved implements and sale of products in selected areas; (ii) manufacture and distribution of 65,000 Kolhus and an equal number of pans, 241,000 gur moulds, 19,000 each of cube frames and percolators, 51,200 stocking drums for gur and 90,000 crystallisers and 4,000 centrifugals for the Khandasari Industry and (iii) the erection of 10 carbon factories for ensuring adequate supplies of improved juice clarificants. The programme is estimated to cost Rs. 7.7 crores excluding the working capital required.

The implementation of the development programme will result in the production of qualitatively improved gur at the annual rate of 8.45 lakh tons in the last year of the Plan. The development programme will cover 260,000 artisans in the Gur Industry and about 16,000 artisans in the Khandasari Industry, besides

providing employment to 21,667 persons, in the ancillary process of the industry. About Rs. 9.55 crores would be distributed as wages over the Plan period. A Central Training Institute is also proposed to train supervisory staff for the implementation of the programme. About 20,000 persons will be trained over the Plan period.

Leather.—According to the livestock census there are over 21.2 crores big animals and 9.52 crores sheep and goats. About one-tenth of them die every year and if the dead bodies are properly disposed of, commercial products worth Rs. 30 per big animal can be recovered. The gross income from this source is about Rs. 40 crores per annum. An attempt has been made to organise the small cottage units into co-operative societies for the purchase of raw materials and marketing of finished goods.

The object of the scheme is to minimise waste due to the incomplete utilisation of dead animals. The programme provides for recovery work, tanning, leather craft and organisation of co-operatives of village leather workers.

The First Five-Year Plan had provided an outlay of Rs. 40.31 lakhs on the various development programmes to be implemented through the All India Khadi and Village Industries Board. 155 tanning centres, 21 training-cum-production centres, 56 model tanneries and 40 bone crushing units were organised during this period, besides having distributed 186 bone digestors among various centres of production. The Second Five-Year Plan has proposed the continuance of the policy of not allowing expansion of the capacity of large-scale units in the cottage leather footwear and tanning industry so that a substantial part of the increased demand is met by Small Scale and Cottage Units. The development programme for the industry will aim primarily at raising the present extremely low level of technical efficiency of these small units by providing common services, facilities for improved tanning, finishing, etc. at well equipped centres. Large factories are to be encouraged to purchase to take up as much production of producer goods as possible. It is also proposed that financial assistance should be extended by Government in the form of loans to workers to enable them to become shareholders of co-operative societies and also for producing improved equipment and for working capital.

The Khadi Commission has proposed a development programme for this industry under the Second Five-Year Plan which envisages the establishment of 2,500 tanning centres, 350 tanning centres and an extension programme for 35,000 shoe-makers to bring them within the folds of co-operative societies. A scheme for the housing of tanners and layers is also an improvement part of the programme.

Besides the production centres, the Plan proposes to have many training-centres to train the required personnel for implementing the programme.

The implementation of the development programme will help to produce 8.44 lakhs of pieces of tanned hides, 2.70 lakh lbs. of glue and 7 million pairs of footwear, besides other by-products valued collectively at Rs. 7.5 crores over the Plan period. Over the Plan period the value of production is estimated at Rs. 20.78 crores. The programme may provide employment to 7,000 persons in tanning, 2,450 in tanning and 150 persons in the manufacture of glue. In 5,500 tanning centres, 350 tanning centres and 75 glue making centres respectively. Besides, the programme envisages to extend finance to 35,000 shoe-makers. About Rs. 4.9 crores will be distributed as wages among the various categories of artisans over the Plan period. The total outlay on the programme is estimated at Rs. 5.0 crores, which is exclusive of working capital required.

50 Marketing depots for the disposal of the various goods produced at the production centres will be organised over the Plan period.

Matches.—Eighty per cent of the production of matches is at present controlled by one international combine, and several Indian factories are partially lying idle. In addition it is estimated that about 0.6 million gross is the output of the cottage industry.

The All-India Village Industries Board recommended to the Union Government that a cess be levied on large-scale production and the proceeds be used for subsidising the manufacture by cottage industry and other small-scale manufactures. It has been decided to create a new category of match factories called class "D" producing upto 25 gross boxes a day and to subsidise them by an enhanced rebate on the excise duty.

The First Five-Year Plan provided an expenditure of Rs. 21.83 lakhs on the development of cottage match industry through the All-India Khadi and Village Industries Board.

The development programme of the Second Five-Year Plan period, for the Cottage Match Industry aims at the establishment of 1,000 "D" Class factories over the Plan period with a productive capacity of 29.25 million gross boxes at a total estimated cost of Rs. 1.1 crore over the Plan period.

The output of Cottage Match is likely to amount to 26.25 million gross boxes of 60's valued at Rs. 17.72 crores. The implementation of the programme will result in providing full-time employment to 10,000 persons and part-time employment to one lakh persons and distribute Rs. 8.41 crores as wages over the Plan period.

The programme makes a provision for the establishment of Research Laboratories for carrying on research as well as for intensive propaganda to influence the consumer preference for Cottage Matches.

To market the matches produced in various units the programme visualises a network of Marketing depots under two categories, Central

and Divisional. A separate provision is also made for training the required personnel to implement the programme.

Pottery and Earthenware.—The village potter has been gradually eliminated by new tastes and requirements. On the other hand, the demand for bricks, tiles, earthen pipes and crockery has been fast rising.

The Bengal Ceramic Institute established in 1941 has been engaged in solving the problems of the cottage workers in the pottery trades and also functions as a training centre. It has successfully introduced the production of Rockingham pottery. The problem of standardising cheap, durable, and easily cleanable cooking earthenware has been taken up.

The Government Ceramic Factory at Gudur, in Andhra State has been running an artisan course since 1947 for training students in improved methods of pottery making.

In Mysore State experiments on production of low temperature vitrified ware, of glass pots for bangle making and of single fired red clay glazed articles—all from local materials—are being made at the Government demonstration centre in Belgaum district.

Rs. 5.79 lakhs have been sanctioned to the All-India Khadi and Village Industries Commission for the development of the Village Pottery Industry for introducing improved equipment. During the Second Five-Year Plan period assistance to pottery industry will be continued through the provision of improved wheels, moulds for pipes and special tiles, etc. and improved furnaces.

INTENSIVE AREAS SCHEME AND MARKETING SCHEME

Among the general schemes of the Khadi and Village Industries Commission, reference may be made to the Intensive Area Scheme. This scheme aims at the integrated economic development of selected contiguous areas with a

population ranging between 20 and 80 thousands with a view to developing village industries as an integral part of rural economy. The Commission's programme for the Second Five-Year Plan proposes to increase the number of Intensive Areas from 35 in 1955-56 to 200 at the end of the Second Plan, at a cost of Rs. 2.77 crores.

The Khadi and Village Industries Commission proposes to set up a comprehensive marketing organisation to assist village artisans in obtaining raw materials, tools of production and facilities for the sale of their products. It is proposed to have a three tier organisation consisting of regional marketing depots, sub-depots operating under each regional marketing depot and retail shops each operating under the sub-depot. To co-ordinate the activities of the regional depots and to assist with advice regarding the advance purchase of raw materials, tools of production, etc., it is proposed to set up a Central Marketing Intelligence Bureau for depots with the Central Office of the Commission.

Government Purchases.—The Central Government has decided that every effort should be made to increase purchases for Government purposes from cottage and small-scale industries by giving preferential rates and relaxation, where necessary. A Conference to popularise the use of Khadi was convened in August 1953 and following this meeting, Government departments have placed inquiries for Rs. 62 lakhs worth of Khadi and so far Rs. 1.06 crore worth has been purchased by the Government. Purchases of core products for various Government departments came to more than Rs. 8 lakhs in 1953. A Stores Purchase Committee was appointed by the Government to examine *inter alia* the question of meeting Government requirements for the products of cottage and small scale industries.

The details of the progress of expenditure for the development of small and cottage industries in the First Four Years of the First Plan period are given below :—

Progress of Expenditure
(Rs. lakhs)

	1951-52	1952-53	1953-54	1954-55
Khadi	2	9	110.00	408.00
Handloom	0.14	6.33	181.44	498.8
Village Industries	0.59	0.73	21.00	70.00
Handicrafts	4.5	2.6	14	30
Sericulture	1.4	2.7	12.8	30
Small-scale industries	5.6	7.9	33.2	153.4

The development expenditure on khadi and handloom is being met out of the Cess Fund since 1953-54.

FORD FOUNDATION

The Ford Foundation International Planning Team on Small Industries which was invited to formulate plans for the development of village and small-scale industries with a view to creating more opportunities for remunerative work, arrived in India in November 1953 and submitted their report in March 1954. The Government of India has implemented some recommendations. They are:

(1) Four Regional Institutes of Technology for small industries are established—which would act as service agencies and would assist small industries in improving their technique

of production and management; in obtaining credit and finance; in securing proper raw materials; in marketing their goods to the best possible advantage; and in promoting patterns of development calculated to make small-scale industries ancillary to large-scale industries by bringing about co-ordination of production programmes.

(2) A Small-Industries Corporation to organise production for meeting Government orders has been established.

Village and Small-Scale Industries (Second Five-Year Plan) Committee* submitted its report to the Government of India in October

1955. It suggested that (a) The six† All-India Boards in the village and small-scale industries should be put under one and the same Central Ministry; (b) There should be adequate funds for the promotion of these industries. Undue economy will lower the chances of success; (c) There should be a definite programme for development.

The Committee suggested that the expenditure would come up to Rs. 280 crores. Out of this allocations proposed for the Centre are about Rs. 25 crores and for the States over Rs. 234 crores. The Committee suggested several ways and means to promote the small-scale industries in the Second Five-Year Plan.

* Also called the Karve Committee.

† The six Boards are: Small Scale Industries Board, the All-India Handloom Board, All-India Handicrafts Board, All-India Khadi and Village Industries Board (now called All-India Khadi and Village Industries Commission), All-India Silk Board, All-India Coir Board.

FILM INDUSTRY

BELOW we give a list of the more important events in the film industry during 1956 and 1957.

The production of feature films in 1956 reached the record number of 296.

The import of raw film and other accessories was drastically cut during the second half of 1957.

The Bill for the establishment of a National Film Board which was introduced in Parliament in December 1956 was withdrawn in July 1957 as a measure of economy. The Bill which also provided for the setting up of a Film Finance Corporation was a very comprehensive piece of legislation.

The Children's Film Society produced its first report of its work during the twenty-two months it was in existence—upto March 1957. It produced two feature films—*Jaldeep* (8,400 feet), *Char Dast* (7,800 feet)—and acquired and adapted for children two more—*Ramanahatri ka Nyaya* (from Prabhat's *Ramanahatri*), *Bal Ramayana* (from Prakash's *Ramayana*)—each 7,000 feet long. It had spent Rs. 6 lakhs. *Jaldeep* was exhibited in Bombay during December 1957.

The Society has its headquarters at Sapru House in New Delhi.

The feature that won the President's Gold Medal was a Bengali picture *Kabuliwala* (Charuchitra).

The Government of India have now decided to give cash prizes for the first two award-winning entries in the three categories, feature, children and documentary.

The total number of documentaries released in 1956 was 69 as against 67 in 1955. Out of this the Films Division released 48 titles in 1956 as against 55 in 1955.

The Films Division was making rapid progress. While in 1951-54 it produced on an average 39 documentaries with 70 release prints of each, during 1954-57 the average annual production was 59 documentaries with 157 prints of each. Also, while in the earlier period the documentaries were mostly one-reelers (1,000 feet), in the second period they were mostly two-reelers (2,000 feet).

The actual figures for the two financial years 1955-56 and 1956-57 were respectively 67 documentaries (142 reels) and 69 documentaries (136 reels).

There has also been a great expansion in the non-commercial exhibition. The figures for the period 1954-57 were 1,812 prints in 35 mm and 37,707 prints in 16 mm.

Among the documentaries released during the year, those on Khajuraho, Madura Minakshree temple, Banaras (in colour), Festival of Kashmir (in colour), and A Day with the Prime Minister Nehru, deserve special mention.

A special documentary on Hiraakud showed the project and its vast potentialities; another on Pimpri described the manufacture of Penicillin. There were three films on the N.E. Frontier (four reels in colour and the rest in black and white) showing the land of the Nagas and the problems it presented to the administration. It included a documentary on General Thimayya's visit to the Naga land.

The Films Division also recorded the visits of distinguished foreign officials: Marshal Tito, Vice-President Hatta of Indonesia, the King of Nepal, Crown Prince of Laos, King Ibn Saud, the Shah of Iran, the Emperor of Ethiopia, Mr. Chou-en Lai, the Prime Minister of China.

Films were also made of NNRC and INO in Korea, the visit of Mr. Nehru to Saudi Arabia, the coronation of the King of Nepal, and of the meeting of the Colombo Powers.

The Government of Bombay made an announcement that every quarter it would refund the entertainment tax collected on the film during the previous quarter which was judged by a panel as the best exhibited in that period. The motive was to improve the technical as well

as the educational quality of the films. Films in three languages by producers in Bombay alone were eligible. (Marathi, Gujarati and Hindi).

A number of Indian pictures won international awards:

Pather Panchali, the winner of the President's Gold Medal for 1955 was judged the best human document at the Cannes International Film Festival in 1956.

Kabuliwala, the winner of the President's Gold Medal for 1956, won an award at the Berlin Film Festival in 1957.

Gautama the Buddha, a full length documentary, commissioned by the Films Division was regarded as suitable for the award for plastic beauty at the Cannes International Film Festival in 1956.

Khajuraho and *Spring Comes to Kashmir* made a mark at Manila and Berlin respectively.

Aparajita, another Bengali picture, a successor to *Pather Panchali*, won the Grand Prix at the Venice Film Festival (1957) while the Children's Film Society's *Jal Deep* was awarded at the same festival, a certificate of merit.

Six Indian films were shown at a Festival held in U.S.S.R. and six Soviet films were shown in India at a festival of Russian films. Representative delegations attended the festivals and a very useful exchange of views took place.

The Claire awards are given on the basis of a readers' poll. The awards for 1956 were as follows:

Best play: Rajkamal's *Jhanak Jhanak Payal*
 Baaje: Direction: V. Shantaram for *Jhanak Jhanak*; Actor: Dilip Kumar in *Devdas*; Actress: Nutan in *Seema*; Supporting actor: Motilal in *Devdas*; Supporting actress: Vyjayantimala in *Devdas*; Music direction: Shankar and Jaikishen in *Chori Chori*; Story: Amiya Chakravarty in *Seema*; Cinematography: Rulhu Karmakar in *Shree 420*; Sound Recording: A. K. Parmar in *Jhanak Jhanak*; Editing: G. G. Mayekar in *Shree 420*; Art Direction: Kanu Gandhi in *Jhanak Jhanak*.

The Filmfare awards for 1957 were as follows:

Best Picture: "Mother India."
 Best Director: Mehboob Khan ("Mother India").
 Best Actor: Dilip Kumar ("Naya Daur").
 Best Actress: Nargis ("Mother India").
 Best Supporting Actor: Raj Mehra ("Sharada").
 Best Supporting Actress: Shyama ("Sharada").
 Best Music Director: O. P. Nayyar ("Naya Daur").
 Best Story: Akhtar Mirza ("Naya Daur").
 Best Cinematography: Faredoon A. Irani ("Mother India").
 Best Editing: Shivaaji Awdhut ("Sharada").
 Best Art Direction: M. R. Achrekar ("Pardees").
 Best Sound Recording: Kaushik ("Mother India").

CENTRAL BOARD OF FILM CENSORS

The Central Board of Film Censors, examined during 1956-57, 637 films of over 2,000 ft. (330 Indian and 307 imported) while those under 2,000 ft. numbered 1,250 (530 Indian and 720 imported).

Of over 860 films classed as predominantly educational, only 79 were Indian while the rest were imported.

Most of the censoring of imported films is now concentrated in Bombay in order to have more uniformity.

During 1956-57, 46 imported films were refused certificates while as many as 75 were classed as for Adults only ('A' certificate).

From the lot of "five-year-old" imported films, when they came for revised censoring, 22 were given 'A' certificate and four were refused certificates.

In all 2,344 films were seen afresh while the number of those that came up for revision was 1,031.

With regard to Indian production, three were refused certificate and 13 classed as 'A'.

The total footage cut still continues to be high—it was 63,000 ft. in 1956.

Under the proposed legislation constituting a National Film Board (now withdrawn as mentioned above) the work of the censors was to have been done by a Film Certification Bureau.

Codes for producers and directives for the guidance of the members of the Censor Board are, at the time of writing (Dec. 1957), more or less finalised.

The film producers have been told that the following restrictions must be observed:

- (i) Gods and goddesses must be depicted with respect and decorum, and no distortion would be allowed in treating them.
- (ii) Vivid details of crime and violence should not be shown; Courts and police should be treated with dignity and decorum due to them.
- (iii) No community should be a target of ridicule.

16 MM. FILMS

The use of the 16 mm. film for propaganda and publicity is realised by Governments, municipalities, and trade and industry.

The Union Government maintains for the Five Year Plan publicity 48 units (46 vans; 1 boat and 1 bullock cart), which are equipped with 16 mm projectors.

The Government of Bombay have more than 80 vans similarly provided.

The Bombay Municipal Corporation, the Khadi Board and the Handloom Board, are all making films for educational propaganda and using the films on mobile units.

A Government of India report says that during 1956-57, their mobile units were responsible for 10,577 film shows, before an audience aggregating nearly 60 lakhs. That the film is yet a novelty to most villagers in India is perhaps part of the attraction.

The increasing use of the 16 mm films is reflected in the number of copies of some of the documentaries sold by the Films Division. During the two years, 1955-57, it is reported that 6,000 copies were sold of 16 mm alone.

The Community Development Projects and the National Extension Service Blocks seem to be using the films as a regular part of their work. Obviously there is a considerable number of projectors in use throughout the country.

Many industrial houses maintain a regular stock of films for non-commercial use.

About 120 full length Indian features, mainly in Hindi, Marathi and Gujarati, are also available in 16 mm.

Economy of cast and storage are two main factors in favour of the 16 mm. film (1,000 ft. of 35 mm. = 400 ft. of 16 mm.). Colour is also easily available and the film can be processed and copies made in India itself.

The layout for the 16 mm. film theatre is small and the whole equipment is portable (about the size of two portable typewriters in all).

For popularising children's films, special theatres will be required in many places and for such new theatres 16 mm. is the right solution.

There are in addition 16 mm. libraries of films suitable for non-theatrical audiences maintained by the British Information Services, the British Council and the U.S. Information Services through their regional offices.

In the Defence Forces, 16 mm. films have been extensively used for training and entertainment. There are Inspectors of Visual Education under Directors of Education in the States who do valuable service by using 16 mm. projectors.

The biggest single 16 mm. library of films in India is maintained by the Inspector of Visual Education in Bombay who makes the films available regularly to schools under him.

The Ministry of Education in Delhi has started building up a library of 16 mm. educational films.

FILM DISTRIBUTION

Distribution as a distinct unit is a relatively recent development. In 1928 there were 11 film distributing agencies all dealing in foreign films. In 1938 their number rose to 214 and, ten years later, to 887. On the other hand, distributors of foreign films dropped from 37 in 1938 to 10 in 1948.

The Film Enquiry Committee has pleaded for more cinema houses. A study of the relevant statistics however does not support the demand.

The average for all India is taken to be 600 persons per cinema per day and for such audience to be available the population must be in the vicinity of 30,000.

EXPORT MARKET

The Film Industry earns about Rs. two crores through export of films outside India. Excluding those in Pakistan, there are about 2,500 theatres available for the showing of Indian films in countries where Indians live in some concentration and where Indian films are welcomed by the residents of the region. An organised effort, however, has not yet been made. The Asian and African market is so large that it can help to relieve to a considerable extent the pressure on the industry. The Government of U.S.S.R. was also interested in importing Indian films. The Films Division already shows some of its documentaries in East Africa, Ceylon, Thailand and Nepal. Documentaries were also sent for the TV circuits in U.K. and on the Continent. In Canada a non-commercial distribution of Government of India's films is arranged through the National Board of Canada. China is another good market because of the great interest of the Chinese people in India.

The main export market for Indian films at present is Pakistan; but Indian exporters are now put to considerable difficulty. Other markets are countries which have large concentrations of Indians such as Malaya, Indo-China, Burma, Ceylon and Africa.

Imports of exposed cinematograph films have been fairly heavy. Until 1936-37 imports remained below 10.8 million feet, touched the peak at 28 million feet in 1938-39 and dropped to 8.9 million feet in 1942-43 owing to wartime conditions. In the post-war period imports recovered to 16.2 million in 1945-46 and thereafter fluctuated between 15 million feet and 12 million feet.

Under the import control regulations, import of foreign films is subject to a monetary ceiling and distributors are authorised to remit up to 70 per cent. of the gross revenue.

CINEMATOGRAPE ACT

The regulations of films for exhibition and of the cinemas take place under the Indian Cinematograph Act. The power of certifying films was until the amendment of the Act in 1949 vested in the State Governments. Since production was concentrated in the three States of Bombay, Bengal and Madras and imports also mainly took place through the three ports in those States, the first examination of films for certification was done mainly by the Boards at these three cities. The Act as amended in 1949 made a distinction between films considered suitable for exhibition to adults only and those suitable for general exhibition.

A Bill was introduced in Parliament in November 1952 to amend the Act with a view to removing certain defects noticed in the course of actual administration. Under it the responsibility for deciding whether a film is or is not suitable for public exhibition is entrusted to the Central Board of Film Censors; but powers are vested in the Central Government to declare that any film already certified as uncertified and notice has to be given to the person who has been granted certificate to show cause why the film should not be uncertified. This delay is sought to be avoided by the amendment. Provision has also been made in the Bill making it obligatory on persons delivering a certified film to a distributor or exhibitor to transmit information and documents relating to the certificate which would enable punishment of the exhibitor if he shows the film with portions cut out by the Board before certification. The difficulties encountered in proceedings against persons for interpolation and exhibition of unauthorised scenes in certified films are sought to be encountered by the Bill. Enhancement of the penalty has also been suggested. The Bill was passed in April 1953.

The Censorship Rules as amended in 1953 provide for a deposit of a 35 mm. or 16 mm. version of the certified film or its shooting script as a condition precedent to the issue of a certificate. Such a certificate is valid for ten years from the date of issue and old films once censored have to be recensored if the previous certificate has been in effect for five years or more.

PRODUCTION OF FEATURE FILMS

Year	1953	1954	1955	1956
Hindi ..	97	118	126	123
Bengali ..	50	48	52	54
Tamil ..	42	37	46	51
Telugu ..	29	27	24	27
Marathi ..	21	18	12	13
Kanarese ..	7	10	15	14
Malayalam ..	7	8	7	5
Others ..	7	7	5	9
Total ..	260	273	287	296

INDIAN PRODUCERS

The total number of Indian feature films produced from 1931 to 1956 was 4,909. A language-wise break-up is as follows:

Hindi 2,712; Tamil 666; Bengali 656; Telugu 302; Marathi 265; Gujarati 92; Kannada 72; Malayalam 52; Punjabi 44; Assamese 13; English 12; Oriya 8; Persian 6; Arabic 2; Others 7.

The total number of Indian film producers from 1931 to 1956 was 2,244. Of these 1,580 were single picture producers. The language break-up is as follows:

Hindi 1,040 (708); Tamil 334 (228); Bengali 322 (230); Telugu 187 (139); Marathi 143 (99); Gujarati 60 (49); Kannada 60 (40); Malayalam 35 (27); Others 73 (60).

DOCUMENTARIES

Below we give figures to show the production and release of documentaries:

Year	Production		
	Films Div.	Others	Released
1951-52 ..	32	4	36
1952-53 ..	32	7	39
1953-54 ..	35	8	43
1954-55 ..	33	6	39
1955-56 ..	58*	14	67
	(125 reels)	(20 reels)	(142)
1956-57 ..	48*	13	69
	(94 reels)	(32 reels)	(136)
		7	
		(9 reels)†	

* Most of these films have more than one reel per title.

† These were obtained from the State Governments for release through the Films Division circuit.

Note: Not all the documentaries produced are released in the same year. The number of releases therefore is not a total of the first two figures.

ADDITIONAL PRINTS

The additional prints given below were in addition to the regular requirements for commercial distribution.

Year	35 mm	16 mm
1954-55 ..	771	10,533
1955-56 ..	825	13,842
1956-57 ..	216	13,332

FILMS DIVISION

Year	'000 Rs.	
	Revenue	Expenditure
1950-51 ..	22.00	34.79
1951-52 ..	25.00	31.00
1952-53 ..	33.00*	37.77
1953-54 ..	34.00*	43.00
1954-55 ..	33.00*	47.40
1955-56 ..	37.00*	67.87
1956-57 ..	40.00*	81.02
1957-58 ..	—	108.72

* The figure includes other revenue by sale of prints and surplus material and rentals.

The figures down to 1956-57 are revised estimates, and the figure for 1957-58 is the budget estimate.

CINEMAS IN INDIA AND THE "CIRCUITS" (1951)*

Circuit	Places	Permanent Cinemas
1. Bombay ..	501	619
2. Central ..	272	501
3. North ..	162	285

* In April 1957, there were 3,577 cinemas in the circuit of the Films Division.

GLASS INDUSTRY

THE glass industry is regarded as a key industry by virtue of its versatility and the service it renders to the industrial growth of the country, meeting as it does the domestic and industrial needs and also adding grace and artistic touch to healthy life and living.

The more commonly used raw materials are: sand, borax, soda ash and salt cake, dolomite, lime or limestone, salt petre and sulphur, manganese dioxide and colouring materials. Though supplies of sand are in plenty, its quality is not uniform. Nearly all the glass factories of northern India and West Bengal obtain their requirements of sand from the Allahabad district. Subsequent to the Tariff Board's inquiry in 1953, little progress has been made in the installation of grading and washing equipment for sand. Borax is mostly obtained from abroad, while soda ash is received from indigenous manufacturers and importers. Sufficient quantities of lime or limestone are available. Coal is the commonest fuel. The bulk of refractories is obtained from indigenous sources. The demand for refractories by the glass industry is estimated at about 10,000 tons per year.

The industry comprises the manufacture of sheet glass, blown and pressedware and bangles. The industry has developed mainly under the private sector with reported capital investment of Rs. 9 crores in 1955.

Some 19,000 workers excluding those engaged in cottage industries are employed in the industry. Government protection to the sheet glass section was granted in 1950 and was extended upto the end of 1957. The rate of protective duty was fixed at 45 per cent ad valorem in 1950, but was raised to 70 per cent in January 1955.

In 1951, there were 142 glass factories in India with an installed capacity of about 213,250 tons per annum. Of these, 35 units with a capacity of about 30,000 tons had been closed for over three years. There were in 1956 134 glass factories registered under the Industries (Development and Regulation) Act, 1951, with an installed capacity of about 339,084 tons. Of these, 92 units with a capacity of about 278,016 tons are actually working; 25 factories (about 44,000 tons) are temporarily closed; and 22 (with about 23,000 tons) are, more or less, permanently closed. The effective capacity of the industry may therefore, be taken at about 322,016 tons per annum. The regional distribution before the States were reorganised in Nov. 1956 was :—

State.*	No. of units.	Installed capacity.
		Tons.
West Bengal	28	90,800
Bombay	18	49,100
Uttar Pradesh	24	63,900
Madras	9	10,800
Bihar	8	39,600
Madhya Pradesh	5	3,660
Punjab	3	9,300
Delhi	3	4,400
Rajasthan	2	2,700
Hyderabad	2	4,800
Mysore	2	1,160
Other States	5	10,800
Total ..	109	291,020

* Pre-reorganisation.

The manufacture of bangles was undertaken by about 100 units, mostly established on a cottage industry basis and localised in the Ferozabad district in Uttar Pradesh and Belgaum district in Mysore. The rated capacity of these factories is placed at 85,000 tons.

Besides, penicillin vials, sheet glass of sizes less than 16 oz. and over 32 oz., glass tubing by automatic drawing, narrow-mouth thermos flasks and decorated aerated water bottles are some of the items newly manufactured in the country during the First Plan.

OUTPUT

Actual output of glass and glassware is shown by the following table :

—	1953	1954	1955	1956
Bottles & Phials (tons)	40,780	47,840	55,272	62,418
Sheet Glass (million sq. ft.)	22.7	38.0	38.9	47.4
Laboratory Glass (tons)	1,321	1,510	2,496	3,387
Glass Shells for electric lamps (lakh pieces)	169.2	225	261	359
Table & Pressedware (tons)	17,620	22,050	25,456	28,219
Lampware	12,400	12,680	16,690	19,867
Thermos flasks	290	180	312	330
Miscellaneous glassware	963	2,450	2,272	3,031

The annual rated capacity of the glass industry (excluding bangles, in regard to which there has been no significant change) increased from 213,250 tons in 1950 to 339,084 tons in 1956. In the case of sheet glass, where substantial expansion was envisaged in the First Plan, the capacity and production have both gone up from 23.4 million sq. ft. and 9.57 million sq. ft. respectively in 1950 to 101.28 million sq. ft. and 47.37 million sq. ft. in 1956.

On the basis of production plus imports minus exports, the internal demand for various types of glass and glassware in 1956 may be roughly estimated at 132,000 tons. Of this, the estimated production is only 143,587 tons, which is lower than the production target of 168,510 tons. The production of glass bangles has been running, more or less, steady at about 16,000 tons per annum during the Plan period. It is estimated that a gross fixed capital of Rs. 2.5 crores was invested in the glass industry during the First Plan.

But the annual demand for glass and glassware is likely to increase to about 200,000 tons by 1960-61. By that period, the installed capacity of the industry will be raised to 388,084 tons per annum. It is estimated that the capital requirements of the glass industry inclusive of replacements and modernisation will amount to about Rs. 8 crores during the Second Plan period. The industry in the organised sector is expected to employ about 25,000 persons in 1960-61 as against 18,500 persons in 1955-56 if the production target of 200,000 tons is achieved.

It is expected that at the end of the Second Plan, exports and imports will balance each other at about Rs. 50 lakhs per annum. The Government have during the past few years been helping the industry in a number of ways; they have granted rebate of duty on heavy soda ash, provided technical help, set up a Central Glass and Ceramic Research Institute and the National Instruments Factory.

Protection for the sheet glass industry is due to expire at the end of December 1960.

Imports and exports are as follows :

(Rupees in lakhs)

—	1952-53	1953-54	1954-55	1955-56	Apr.-Dec. 1956
Imports	128.05	135.84	139.02	163.70	130.18
Exports	24.23	21.40	20.76	17.49	20.12

The following table summarises the programme of development during the period of the First Plan :—

—	1950-51		1955-56	
	Annual rated capacity.	Actual production.	Annual rated capacity.	Actual production.
	Tons.	Tons.	Tons.	Tons.
Bangles	85,000	16,000	85,000	16,000
Sheet glass	11,700	5,950	52,200	24,000
Blownware and pressedware including glass shells	201,550	86,100	287,900	127,500
Safety glass (m. sq. ft.)	0.5	0.5
Optical glass	12	10
Total (excluding bangles and safety glass)	313,250	91,950	390,012	163,510

HIDES, SKINS AND LEATHER

THE Republic is regarded as a surplus area in respect of its resources of raw hides and skins. It is estimated that normally it produces 16.2 million cow hides, 5.5 million buffalo hides, 23.2 million goat and 15.1 million sheep skins a year. Only a portion of the cattle and buffalo hides is obtained from slaughtered animals and the bulk, about 75 to 80 per cent, is derived from animals that die a natural death.

The bulk of the production is carried on in small towns and villages.

The tanning industry comprises four sections, viz., 1. organised tanneries producing finished vegetable tanned buffalo leather and chrome tanned upper leather; 2. tanneries producing vegetable tanned leather known to the trade as E. I. kips and E. I. tanned skins; 3. small-scale chrome tanneries producing chrome tanned upper leather; and 4. village tanneries producing vegetable tanned cow and buffalo leather and vegetable tanned leather from goat and sheep skins.

At the commencement of the first national Plan, there were 26 organised tanneries producing vegetable tanned buffalo and cow leather, of which 16 also produced chrome tanned upper leather. Their annual rated capacity in terms of cow hides (one buffalo hide = 2 cow hides) was

3.184 million hides for vegetable tanning and 1.976 million hides for chrome tanning. Early in 1956, there were 24 such tanneries on the active list of the Development Wing of the Ministry of Commerce and Industry with an installed capacity of 3.304 million hides for vegetable tanning; 13 of them produce chrome leather with a capacity of 1.679 million hides.

The number of factories and annual rated capacity in 1956 of each of these sections was as follows:—

	Number of factories.	Capacity in million.
1.	24 (13 produce chrome)	3.30 (hides for vegetable tanning)
2.	500	1.679 (hides for chrome tanning)
3.	250	16-17 (tanned hides)
4.	..	20-22 (tanned skins)
		3 (hides)
		8 to 9 (raw hides)
		3 to 4 (raw goat and sheep skins)

The second section is mainly concentrated in South India, while the third is located in Calcutta and worked by the Chinese.

PRODUCTION

The following is the trend of production:—

Year.	Chrome and tanned hides.	Vegetable tanned buffalo and cow hides (in terms of cow hides).	Leather cloth (000 yards).
	(thousands)	(thousands)	
1952	879.6	1,478.4	954.0
1953	650.4	1,298.4	985.2
1954	700.8	1,370.4	1,263.4
1955	668.4	1,635.6	2,623.2
1956	741.6	1,692.6	2,618.4

According to the census of manufactures, 1952, the total fixed investment in 94 tanning factories giving employment to 8,180 workers was Rs. 83.21 lakhs and the working capital Rs. 268 lakhs.

According to the information supplied by the manufacturers registered under the Industries (Development and Regulation) Act, the total capital invested in the large-scale units manufacturing leather and leather goods in 1956 was about Rs. 9.37 crores and the number of persons employed was about 9,400. The number of persons employed in the small-scale leather and leather manufacturing industry, as per the National Income Committee's Report (1954), was 763,000 in 1950-51.

The following table gives the position:

Year	Raw hides	Raw skins	Hides, skins, tanned or dressed	Unwrought leather
Imports:				
1951-52	79.1	44.0	..	6.6
1952-53	50.8	28.4	..	6.9
1953-54	56.5	54.7	..	8.8
1954-55	25.9	17.3	0.7	6.8
1955-56	66.5	23.3	..	6.7
April-Dec. 1956	78.52	30.15	1.84	6.62
Exports:				
1951-52	61.8	7.62.2	25.02.2	30.2
1952-53	2.3	6.53.5	20.11.5	15.7
1953-54	6.06.7	24.07.2	22.4
1954-55	7.13.0	20.54.3	18.0
1955-56	6.52.7	22.52.3	20.6
April-Dec. 1956	416.0	15.07.80	11.45

The main problems about raw material relate to the supply of hides and skins and wattle bark. Supplies of hides have to be arranged from Pakistan. As for wattle bark, the Government of Madras has taken steps for bringing 21,000 acres under wattle plantation. Up to the end of 1953-54, about 18,310 acres had been planted. Nursery and small-scale field tests are being carried out in Awam, Bombay, Orissa, Punjab, Uttar Pradesh and West Bengal for locating

suitable areas for the planting of wattle trees. The indigenously available *Xerodaphne* bark is stated to be a potential substitute for wattle bark.

It is estimated that the demand in 1960-61 may come to 23 million tanned hides and 26 million tanned skins. The quantities of the principal raw materials required for this target are: Raw hides 23.5 million pieces; raw skins 26.5 million pieces; lime 25,000 to 35,000 tons;

wattle bark and extract, 35,000 tons; other barks 350,000 tons; myrobalsans 28,000 to 33,000 tons.

FOOTWEAR INDUSTRY

The principal use of leather is for the production of footwear. In 1951, there were nine large-scale footwear factories with an annual rated capacity of 4.724 million pairs of Western type footwear. In 1956, there were 12 such units with an annual rated capacity of 5.975 million pairs. There has been no real increase in the capacity, only some units already in existence came within the purview of the Industries (Development and Regulation) Act, 1951 and were registered. The capacity of these factories for Indian type footwear fluctuates with demand.

The following table gives the regional distribution of the capacity for Western type footwear early in 1956:

State	Unit No.	Annual Capacity (pairs)
Uttar Pradesh ..	7	2,277,000
West Bengal ..	1	3,442,000
Bihar	1	174,200
Madras*	1	75,000
PEPSU*	1	4,800
Mysore*	1	1,200
Total	12	5,974,800

* Pre-reorganization.

The output of the large-scale factories since 1951 is given below:—

	Western type (million pairs).	Indian type (million pairs).
1951	3.641	2.074
1952	3.867	1.806
1953	3.348	2.304
1954	3.263	2.061
1955	3.243	2.303
1956	3.620	2.911

Reliable production figures for the small-scale and cottage units, which are responsible for manufacturing more than 90 per cent of the total output, are not available. The present output is estimated at 12 to 13 million pairs of Western type footwear and 65 to 70 million pairs of Indian type footwear.

Imports of leather footwear during the First Plan period were very small while exports were much higher. The following table gives the trend in exports and imports from 1950-51:

Year	Imports (in pairs)	Exports (in pairs)
1951-52	2,290	1,465,500
1952-53	225	1,027,100
1953-54	465	1,218,600
1954-55	1,490	1,569,819
1955-56	1,816	1,577,764
April-Dec. 1956 ..	14,173	1,437,235

An excise duty of 10 per cent *ad valorem* has been imposed on footwear since March 1, 1954. Only power-operated factories employing 50 or more workers and using more than two H.P. come under this levy.

It is estimated that the total requirements of leather footwear in 1960-61 would be 100 million pairs for domestic consumption and 2 million pairs for export purposes. This would be an increase of 13.5 million pairs over the 1955 level. This additional demand is proposed to be met by a fuller utilization of the existing capacity in the organised sector and by developments in the cottage and small-scale sector and no expansion of capacity is envisaged during the Second Plan period in the large-scale sector of the industry.

For achieving the target of 102 million pairs in 1960-61, the following quantities of raw materials will be required: 12.25 million tanned hides and 4.75 million tanned skins; 5.4 million reels of thread for uppers and 360 tons for others; and 285 million pieces of eyelets.

JUTE INDUSTRY

THE following table gives the details of the production trends of raw jute in the Indian Union:—

Year	Lakh acres	000 bales
Average		
1946-47	5.3	1,320
1947-48	6.5	1,695
1948-49	8.3	2,055
1949-50	11.6	3,089
1950-51	14.5	3,301
1951-52	19.5	4,678
1952-53	18.2	4,605
1953-54	11.96	3,129
1954-55	12.43	2,928
1955-56	17.39	4,197
1956-57	18.83	4,221

For 1957-58 the production of jute has been estimated at 4,088,000 bales of 400 lbs. each and the area under jute at 17,54,000 acres.

The all-India yield per acre was 932 lbs. in 1957-58 against 899 in 1956-57.

Following the partition India has not only ceased to be an exporter of raw jute but depends for quality jute imports from Pakistan. These are arranged under bilateral trade pacts concluded periodically for a short duration.

Supply and distribution of jute 1955-56 and 1956-57:

(I.J.M.A. Statistics, Monthly Summary).

Though India has achieved self-sufficiency, she still depends on Pakistan for quality jute.

The following table gives the trend of I.J.M.A. mill consumption of raw jute:—

Year ended June	Lakh bales
1950-51	52.52
1951-52	56.85
1952-53	52.53
1953-54	50.24
1954-55	58.63
1955-56	64.28
1956-57	62.29

The progress of the industry during the past few years is summed up in the following table:—
(in thousand tons).

Year (July-June)	Production*				Exports from India	Stocks*
	Hessian	Sacking	Others	Total		
1942-43	484	662	59	1,205	689	276
1943-44	393	522	39	954	635	196
1944-45	415	545	40	1,000	683	177
1945-46	464	581	40	1,085	709	188
1946-47	418	510	34	962	750	176
1947-48	482	520	33	1,035	896	120
1948-49	434	577	29	1,040	875	107
1949-50	285	505	35	825	754	71
1950-51	330	493	35	858	716	90
1951-52	309	607	29	945	795	99
1952-53	348	511	33	892	676	134
1953-54	390	445	31	866	811	87
1954-55	399	558	38	995	866	88
1955-56	403	623	69	1,095	875	127
1956-57	423	527	70	1,025	862†	116

† Provisional.

In order, however, to have a correct perspective on the prices of raw jute and jute manufactures, the following index number of prices will be interesting:—

INDEX NUMBER OF PRICES (Base July 1914=100)

Period	Raw Jute	Manu- factured Jute
Average of 1929-33	59	88
" " 1934-38	49	69
" " 1939-43	87	184
" " 1944-48	188	274
" " 1949-53	322	431
1950	301	424
1951	517	645
1952	277	386
1953	227	307
1954	248	331
1955	233	328
1956	293	313
1957 Jan.	344	335
Feb.	328	311
March	336	308
April	336	315
May	369	326

The figures of exports in the financial years 1954-55 to 1956-57 are as follows:—

	1954-55	1955-56	1956-57
Twist and Yarn (lb.)	6,684,919	5,082,518	6,109,734
Manufactures			
Bagging for Raw Cotton (cwt.) ..	495,238	631,853	784,432
Canvas	14,408	11,078	9,456
Carpets	14,896	8,294	11,524
Sacking Gunny Bags (tons)	427,862	419,415	408,704
Hessian Gunny Bags	22,647	33,032	44,809
Sacking Gunny Cloth	12,853	13,383	12,254
Hessian Gunny Cloth	346,971	349,101	383,964
Total of Jute Manufactures including twist and yarn (tons)	850,869	863,261	898,515

JUTE MILLS

In 1955 there were 112 registered jute mills with a total number of 68,637 looms; of these 101 were located in West Bengal. The loomage on June 30, 1955 was about 69,000 capable of producing 100,000 tons of jute goods per month.

104 mills had a fixed capital of Rs. 31.38 crores and a working capital of Rs. 33.83 crores in 1954. In the same year, 253,000 workers found employment in the industry.

Ever since the devaluation of the Indian rupee and non-devaluation of the Pakistani rupee, supplies of raw jute from Pakistan badly needed by Indian jute mills became difficult and while there was a boom in the demand for jute goods due to outbreak of hostilities in Korea in mid-1950, the production of jute goods outside India considerably increased. This competition became intense following Pakistan's decision to charge a higher price for supplies meant for India and, consequently, the Government reduced the export duty on jute goods by substantial amounts. In August 1955, immediately after the devaluation of the Pakistan rupee export duties were abolished.

Jute mills increased their working hours from a reduced level of 42½ hours to 45 hours a week from July 1954 and further to 48 hours a week from October 1954.

The main problems facing the industry, observes the Planning Commission, are shortage of raw material, modernisation of equipment and possible competition in the foreign markets from substitutes and other products. Lack of finance is a major factor deterring the industry from undertaking modernisation. The task, therefore, is to utilise the existing capacity more fully by procuring greater supplies of raw jute. On this basis, it is expected that the output of the mills could be stepped up from 1,150,000 tons in 1955-56 to 1,200,000 tons in 1960-61 and exports from 875,000 tons to 9,00,000 tons.

LAC INDUSTRY

LAC is a resin which finds extensive application in industries. It is a resinous protective secretion of an insect which lives by sucking the sap of certain trees and shrubs called lac hosts.

There are four crops of sticklac, named after the Hindu months in which the collection of each crop commences. These are 'Baisakhi' and 'Katk' from one strain of the insect (Rangeeni) and 'Jethwi' and 'Aghani' from another strain (Kusumi). The first processed product, after the crushing and washing of sticklac is known as 'seedlac'. From this shellac is manufactured either by melting it (seedlac) manually in cloth bags held near a fire place called 'bhattas' or by the mechanised process of extraction with suitable solvents.

India is the chief source of supply of sticklac and till 1950 accounted for nearly 85 per cent of the world production. But since then production in Thailand has rapidly increased and now accounts for about 30 per cent of the world production. The average production of sticklac in different States from 1946-56 is as follows:—

State	Average Crop (in maunds)
Bihar	4,53,500
Madhya Pradesh	2,93,000
West Bengal	2,38,500
Bombay	64,000
Assam	17,000
Orissa	17,000
Uttar Pradesh	12,500
Other States	20,500
Total	11,16,000

There are no regulated markets for trading in sticklac. The manufacture of shellac is a cottage industry and the number of shellac factories varies from season to season. According to the latest information there are about 366 factories in the country; only two of these which are located in Calcutta are fully mechanised.

Yield from sticklac varies from year to year and locality to locality.

Roughly the yield of seedlac and shellac is 65 per cent and 55 per cent of sticklac.

The cost of manufacturing one maund of shellac from seedlac is about Rs. 16 and of converting sticklac into seedlac is Rs. 8. In 1939 these were roughly Rs. 2-8 and as. 8 respectively.

PRICE TRENDS

Prices of shellac and seedlac have been subject to wide fluctuations.

During the First World War, the price of T.N. Shellac at Calcutta ranged between Rs. 32 and Rs. 50 per maund but the upward movement initiated in 1917-18 lifted it beyond Rs. 300 in October 1920. Then followed a downward trend except for a slight recovery in 1927-28 and 1934-35, and the rate touched the bottom at Rs. 18 in 1933-34 and sought a fresh lower level at Rs. 12 per maund by April-June 1939.

During the Second World War—July 1942 to April 1946—the prices were controlled on T. N. basis at Rs. 64 and later at Rs. 71.

After decontrol, the prices started rising, but in March 1950 they fell to Rs. 95 on T. N. basis as compared with an average price of Rs. 130 in December 1949.

Following the outbreak of the Korean war, the price touched Rs. 190 in January 1951 but declined by the end of March 1952 to Rs. 92 per maund.

During 1952-53 the market was subdued with pure T. N. Shellac fluctuating between Rs. 84 and Rs. 66. There has been a firm trend since 1953 April and in November the rate was around Rs. 107 per maund.

In 1954 the prices went down to about Rs. 90 per maund in March but started rising and reached Rs. 178 in January 1955. But due to a very good crop it started falling and reached Rs. 136 by September 1955. It rose to about Rs. 163 in November 1955 but started falling due to a very good crop in Thailand and reached Rs. 111 by April 1956. Between May and September 1956 the prices rose to about Rs. 130 per maund but again due to a very good Katki crop in the country and a good crop in Thailand and the prospect of a good Baisakhi crop the prices came down to Rs. 95 per maund on T. N. basis by the end of January 1957.

In the absence of demand owing to a wait and watch policy adopted by foreign buyers the prices further declined to Rs. 85 per maund on T.N. basis by the end of March 1957.

EXPORTS

About 90 per cent of the total quantity of processed goods is exported.

The U.S. is the best customer, followed by the U.K. and Germany. Since 1953 the U.S.S.R. has also been buying a sizable quantity.

The data relating to exports during 1955-56 and 1956-57 are given below (in cwt.):—

	1955-56	1956-57
BUTTON LAC		
U.K.	6,498	5,836
U.S.A.	4,833	4,748
Other countries	3,258	4,121
Total	14,589	14,705
SEEDLAC		
U.K.	12,959	11,742
U.S.A.	1,33,362	1,03,463
Others	25,857	25,480
Total	1,72,178	1,40,685
SHELLAC		
U.K.	69,147	82,589
U.S.A.	57,084	54,074
Germany (West)	26,998	23,895
Others	1,64,861	2,00,607
Total	3,18,110	3,61,165
STICK	3,206	1,187
OTHER KINDS	60,471	47,443
TOTAL	5,68,554	5,65,134

During the first nine months of 1957, 4,01,000 cwt. of shellac valued at Rs. 5-4 crores were exported. In 1958 the quantity, it was expected, might be the same as in 1957 but the value might be less by about Rs. 2 or 3 crores.

Lac has made significant contributions to the development of art and industry.

Shellac is consumed chiefly by five industries.

The gramophone industry consumes about 11 to 13 thousand tons.

The varnishes and paint industry absorbs something like 4 to 6 thousand tons.

The total demand from the electrical industry is estimated at 3,000 tons as against 6,000 tons in pre-war years.

Nearly 3,000 tons are used in the hat industry as a stiffening material.

The manufacture of sealing wax requires about 1,500 tons.

For the promotion of the improvement of methods of cultivation and manufacture of lac in India the Indian Lac Association for Research was formed by traders in Calcutta in 1921 and the Government found the funds by levying a cess on all exports of lac other than refuse lac at annas four per maund and for refuse lac annas two per maund. This association set up the Indian Lac Research Institute at Namkum (Ranchi).

At the suggestion of the Royal Commission of Agriculture in 1927 this association was succeeded by the Indian Lac Cess Committee which was established under the Lac Cess Act of 1930 formed "for the improvement and development of the cultivation, manufacture and marketing of Indian lac". By this Act the cess was raised to annas seven and annas five respectively. With effect from April 1948 this cess was doubled. In order to associate the members of Parliament with the Committee and also to provide adequate representation to all the lac growing States the Indian Lac Cess Act has recently been amended.

On 19th September 1956, the Committee celebrated its Silver Jubilee and to mark the occasion brought out a Souvenir publication containing an exhaustive survey of research and statistics on lac and a detailed directory of lac trade. This publication is available from the Secretary, Indian Lac Cess Committee, Circular Road, Ranchi.

The Indian Lac Cess Committee works under the control of the Ministry of Agriculture, Government of India.

An Export Promotion Council for shellac has also been formed under the Central Ministry of Commerce and Industry to promote exports of shellac.

At the suggestion of the Bihar Shellac Enquiry Committee and the Indian Lac Cess Committee the Government of India banned futures trading in shellac and seedlac.

Under the Second Five-Year Plan it is proposed to spend Rs. 50 lakhs for the development of the industry. The more important of the schemes are (i) 50 broodlac farms to increase the production of lac to 16 lakh maunds; (ii) Seven regional testing laboratories for testing shellac and (iii) A number of storage godowns in order to provide better marketing and credit facilities.

MISCELLANEOUS INDUSTRIES

Agricultural Implements: There are 61 factories manufacturing the implements, with a productive capacity of 26,880 tons in terms of steel. The Tata (Agrico) Jamshedpur is the largest unit with an annual capacity of 12,000 tons. They also include two units in the public sector, viz., the Nahan Foundry and the Mysore Implements Factory. Actual production by the organised sector was 18,195 tons in 1952, 8,046 tons in 1953, 12,728 tons in 1954, 13,875 tons in 1955 and 14,908 tons in 1956. In addition there were 350 small units registered with State Governments.

Agricultural Machinery: In 1950 there were eight organised units manufacturing power-driven pumps with a capacity of 33,460 pumps per annum. At the end of 1956, the number was 27 with an annual installed capacity of 65,692 pumps.

The actual production was 34,000 in 1950-51; 46,000 in 1951-52; 25,000 in 1952-53; 28,000 in 1953-54; 29,500 in 1954-55; and 36,000 in 1955-56.

During the calendar year 1956, 46,881 pumps were manufactured as against 34,441 in the preceding year.

Imports of centrifugal pumps including turbine pumps were worth in 1950-51 Rs. 57 lakhs; 1951-52 Rs. 95.6 lakhs; 1952-53 Rs. 80.6 lakhs; 1953-54 Rs. 60.4 lakhs; 1954-55 Rs. 59.3 lakhs; 1955-56 Rs. 51.6 lakhs; April-Dec. 1956: Rs. 59.16 lakhs.

Total demand in 1955-56 was about 40,000 pumps, and it is expected to rise from 85,000 to 86,000 pumps by 1960-61. To meet this increased demand, some schemes have been recommended under the Second Five-Year Plan. With their implementation, the capacity will increase to 74,700 pumps per annum.

For the first time, pumps above 6" in diameter, multi-stage pumps (up to 10 stages), axial flow pumps, screw pumps, sewage disposal pumps and self-priming pumps were manufactured.

There is a Development Council for power-driven pumps and diesel engines.

Diesel Engines: At the beginning of the First Plan there were five units engaged in the manufacture of diesel engines with a combined annual rated capacity of 6,320 engines. By the end of the Plan, the number increased to 16 with a capacity of 19,759 engines per annum. This number rose to 17 at the end of 1956 with a total annual installed capacity of 22,169 engines. Actual production during 1956 aggregated 12,015 engines. In addition, three more firms with a capacity of 10,000 engines for the manufacture of road vehicular type of diesel engines were established to meet the automobile requirements.

The production of diesel engines of different horse power was: 5,540 in 1950-51; 7,263 in 1951-52; 2,909 in 1952-53; 5,244 in 1953-54; 9,273 in 1954-55; and 10,000 in 1955-56.

The total demand by 1960-61 is estimated at between 20,000 and 21,000 engines upto 50 H.P.

The Jaymes Beechey & Co., Bombay have been granted a licence for the manufacture of 2,400 diesel engines ranging from 3 to 30 H.P. in collaboration with foreign concerns. Another licence has been granted to Ruston & Hornsby (India) Bombay for the manufacture of high horse power diesel engines ranging from 100 to 1,000 H.P. with a capacity of 200 engines per annum. On the basis of all these schemes, the capacity and production targets envisaged in the Second Five-Year Plan are 220,000 H.P. and 204,000 H.P. respectively.

Agricultural Tractors: At the beginning of the Second Plan, there was no regular tractor manufacturing plant. The requirements are met by imports. The imports were: 1950-51, 4,980; 1951-52, 7,148; 1952-53, 1,227; 1953-54, 3,195; 1954-55, 2,939.

It is estimated that more than 20,000 tractors are in use at present in the country as against 10,000 in 1949-50. And the total requirements for all types of tractors by 1960-61 have been estimated by the Committee on Tractors and Tractor drawn Agricultural Implements at 5,000 per annum.

The Standard Motor Products of India, Madras, have been licensed to manufacture 4,800 tractors a year in association with the Standard Motor Co. of the U.K.

Machine Tools: Till 1939, the development of machine tools came largely from private

enterprise. But when the war broke out, the Government of India had to take steps for the manufacture of machine tools badly needed for war supplies and so the industry developed rapidly. But the unloading of huge stocks of machine tools from war surplus and heavy imports dealt a blow to the industry. The protection recommended by the Tariff Commission did not help it much. It was the First Five-Year Plan that really pulled it up. At present, there are 18 units, two owned by the Government and 16 by private enterprise, manufacturing graded machine tools. The capital investment (private) is about Rs. 90 lakhs and the total number of persons employed exceeds 2,000.

The position in respect of actual production during 1955 and 1956 is shown below:

Article	1955		1956	
	No.	Value Rs.	No.	Value Rs.
Complete tools	3,064.	67,88,381	3,016	1,08,18,455
Accessories	7,488	6,51,937	15,418	12,04,224

As a result of a comprehensive census of the existing machine tools in the private sector, it has been found that there is ample scope for expansion. So the Government appointed in February 1956 a Committee to assess the overall requirements and the pattern of future development of the industry.

As a part of the overall programme, an expansion of the Hindustan Machine Tools is envisaged during the Second Plan. The production of lathes at the Jalahalli Works of this concern is expected to be worth Rs. 1.6 crores in 1960-61. The production in the private sector is currently worth about Rs. 75 lakhs per annum. A provisional target of Rs. 3 crores worth of machine tools is proposed for 1960-61 for the public and private sectors pending submission of the Report of the Expert Committee.

The capacity of the machine tool industry in terms of value was Rs. 3.9 crores in 1956 as against Rs. 1.42 crores in 1955.

According to Mr. M. Smith, U.S. Assistant Secretary of Commerce for International Affairs, the existing machine tool plants in India supplied about 20 per cent of India's present needs and that the remainder would have to be supplied from abroad. By 1960-61 at the end of its Second Five Year Plan, India hopes to increase its machine tool output ten-fold to a total value of 20 million dollars (Rs. 950 lakhs).

Mr. Smith said there were now 80,000 machine tools in operation and by 1960-61 it was estimated 170,000 would be required.

Cotton Textile Machinery: The principal items are carding engines, spinning ring frames and looms. The target capacity and production in the First Plan for carding engines was 600 and in the Second Plan 1,692. There was only one unit with a capacity for 600 engines. Actual production was 1951: 158; 1952: 108; 1953: 192; 1954: 436; 1955: 600; 1956: 732.

The total value of the textile machinery produced in 1957-58 was Rs. 9 crores. It is expected that by 1961 self-sufficiency would be achieved in most items.

It is estimated that the annual demand under the Second Plan is 1,400 for new units and 600 for replacement, totalling 2,000 units. To meet this demand, the Government has approved the proposal of the private sector for 600 carding engines by the National Machinery Manufacturers and 300 by Texmaco for implementation.

At present the annual demand is estimated at 2,810 ring frames, 7.8 lakh spindles, 23.4 lakh spinning rings, 312,300 fluted rollers and 14,625 looms.

About spinning ring frames, there were 2 units with a rated capacity of 396 pieces per annum. Two more units were expected to start production early in 1955 bringing the total capacity to 996 ring frames against the Plan target of 800. Actual production was 1951: 291; 1952: 255; 1953: 197; 1954: 314; 1955: 888; 1956: 1,111. The production target set in the Second Plan is 1,896.

About looms, there were three units with a capacity for producing 4,320 looms per annum; the target capacity in the First Plan was 4,980. The actual production was 1951: 2,166; 1952: 1,527; 1953: 1,340; 1954: 1,970; 1955: 2,346; 1956: 2,476. The target production set in the Second Plan is 6,000 looms.

The production of spindles rose from 5.72 lakhs in 1954 to 10.5 lakhs in 1956, of fluted rollers from 2.26 lakhs to 3.84 lakhs.

Protection to the industry was extended upto the end of 1957 at the protective duty of 10 per cent. for spinning ring frames and looms.

Ball Bearings: There is one unit with an annual rated capacity of 600,000 ball bearings on a single shift basis. The actual production was 1951-52: 249,661; 1952-53: 496,108; 1953-54: 691,607; 1954-55: 669,590; 1955-56 (estimate): 889,500. The production includes ball bearings of 8" bore. The total demand by 1960-61 is estimated at 2.4 million bearings which the existing firm would be able to meet with its expanded capacity and by working on a multiple shift system. The production of 21 different sizes of roller bearings was undertaken for the first time.

The number of ball bearings actually produced during the calendar year 1956 was higher at 1,040,104, the figure for 1955 being 806,232.

Protection had been granted upto the end of 1956.

Bicycles: The number of cycles produced in 1950-51 amounted to 1.01 lakhs and in 1951-52 to 1.20 lakhs. By 1953-54 the number manufactured by the six major producers had risen to 2.89 lakhs and 1954-55, with the commencement of production by some new units, the production reached the level of four lakhs. The production in 1955-56 was estimated to be about 5.8 lakh cycles as against the target of 5.8 lakhs envisaged in the First Plan.

At the end of 1956, there were fourteen units manufacturing complete bicycle. The aggregate annual capacity was 852,500. The actual production in the calendar year 1956 was higher at 663,969, and in 1957 it was estimated at 8 lakhs.

But the internal demand has shown a steady rise. From 4.03 lakh cycles in 1951-52 it moved up to about 6.8 lakhs in 1956-57. It is expected that the offtake will go up to 11 lakhs at the end of the Second Plan. Besides, an export of 1.5 lakh cycles is also envisaged.

This is to be achieved through the organised sector as well as the decentralised sector of the industry. In the beginning of March 1956, there were about 460 small-scale units. In view of the considerable employment potentialities of the small-scale sector, it is considered that it will be enabled to produce 2.5 lakh cycles per annum by 1960-61. The balance of 10 lakhs is expected to be produced by the organised sector which includes 13 major units.

A Development Council was constituted for this industry in December 1953.

There are 23 leading manufacturers of bicycle components and parts, besides a large number of small units. All types of bicycle components are now produced within the country though production is not always adequate in quality or in quantity. Consequently most manufacturers of complete bicycles still import some components. It was expected that by 1955 the value of components would not exceed Rs. 7 or 8 per bicycle. Production: Rs. 290.9 lakhs in 1954-55 and Rs. 311.5 lakhs in 1955-56.

The industry can practically meet all internal requirements.

Protection was granted upto the end of 1956.

Sewing Machines: At the end of the First Plan there were three organised units engaged in the manufacture of complete domestic sewing machines with a total capacity of 40,500 machines per annum. This has since gone up to five units with a total annual capacity of 60,200 machines. Actual production in 1956 was 130,388. It is estimated that the present demand for the domestic and industrial types of machines of 130,000 to 160,000 machines per year may go up to 300,000 by 1960-61. This can be met by the production from the small-scale sector as well as from the organised sector with its expanded capacity. Of these about 30,000 machines are earmarked for export. Production—32,965 in 1950-51; 48,116 in 1951-52; 52,206 in 1952-53; 68,417 in 1953-54; 80,776 in 1954-55; 110,000 (estimate) in 1955-56.

The protection granted to the industry has been withdrawn since January 1, 1955.

Hurricane Lanterns: There are 11 units with a capacity of 4,042,800 lanterns a year. The Second Plan target is 6 million. Production was: 1950-51: 3.2 million; 1951-52: 3.9 million; 1952-53: 3.5 million; 1953-54: 4.5 million; 1954-55: 5.1 million; 1955-56: 5.4 million.

During the calendar year 1956, 5,179,719 lanterns were produced.

Actual export was 1950: 15,036; 1951: 14,136; 1952: 108,264; 1953: 449,734; 1954-55: 349,079 valued at Rs. 8.83 lakhs; 1955-56: 204,670 valued at Rs. 5.16 lakhs; April-Dec. 1956: valued at Rs. 88,726.

Protection has been withdrawn since January 1, 1955.

Grinding Wheels: There are three units with a rated capacity of 1,760 tons. It is expected that with the completion of the expansion schemes, this rated capacity will increase to 2,110 units which is considered to be adequate to meet the demand by 1960-61. Production—1950-51: 231 tons; 1951-52: 352 tons; 1952-53: 390 tons; 1953-54: 395 tons; 1954-55: 525 tons; calendar year 1956: 681 tons; 1956: 1,112. Imports: 1050-51: 209 tons; 1951-52: 202 tons; 1952-53: 93 tons; 1953-54: 112 tons; 1954-55: 158 tons; 1955-56: 60 tons.

Protection had been granted upto the end of 1957.

Electric Goods: The value of electrical consumer goods produced in 1957 (lamps, fans, radio sets, batteries) was estimated at Rs. 25 crores. The Second Plan target is Rs. 40 crores.

Dry Batteries: There are five units with a capacity for producing 224.5 million dry cells a year. The Second Plan target is 225 million. Production—1950-51: 136.5 million; 1951-52: 146.0 million; 1952-53: 125.0 million; 1953-54: 153.0 million; 1954-55: 148.4 million; 1955-56: 161.1 million. About 105.6 million cells were produced in 1956 as against 86.13 million cells in 1955, both being calendar years. The exports were 1950: 85,193 valued at Rs. 0.2 lakhs; 1951: 1,445,673 valued at Rs. 2.68 lakhs; 1952: 1,114,966 valued at Rs. 2.92 lakhs.

Attempts are being made to manufacture the raw material in this country—manganese dioxide, sealing compound, carbon electrodes.

There has been no protection since January 1954.

Storage Batteries: There were 13 units with an annual rated capacity of 316,500. The anticipated demand in 1960-61 is 420,000. Production—1951-52: 212,836; 1952-53: 186,000; 1953-54: 179,000; 1954-55: 210,100; 1955-56: 255,086; Calendar year 1956: 314,199.

There is progress in the diversification of products and a greater degree of self-sufficiency about raw materials. Among the different products are aircraft batteries and railway requirements. Schemes for the manufacture of dry-charged batteries, iron-clad batteries, heavy duty and traction batteries have been approved. Raw material manufacture includes refined lead and microporous rubber separators.

Between the years 1951 and 1954 the imports averaged Rs. 27.6 lakhs. Exports were only a few thousands.

Protection to the industry has been withdrawn since January 1, 1956.

Electric Cables and Wires: Actual production of 1. bare copper conductors, 2. winding wires, 3. rubber insulated cables and flexibles, 4. A.C.S.R. cables is as follows:

	in tons (1)	in tons (2)	in mil. yd. (3)	in tons (4)
1952	7,522	383	36.2	2,381
1953	7,372	226	48.4	3,280
1954	7,576	318.59	62.7	5,481
1955	8,434	605	86.1	8,045
1956	10,255	762	106.6	11,287

The major schemes envisaged in the Plan are the Hindustan Cable Factory in the public sector for producing different kinds of cables, (this started regular production on Sept. 1, 1954), the expansion of the Indian Cable Company at an estimated cost of Rs. 2.8 crores, the expansion of capacity for A.C.S.R. cables from 2,500 tons to 5,000 tons per annum, the creation of producing facilities for 500 tons of insulated aluminium conductors per annum.

A new rod mill of the Indian Cable Company with an installed capacity for producing 6,700 tons of black copper and aluminium rods, 100 tons of cotton and paper covered wires and 3 million yards of plastic insulated cables and flexibles per annum has been established.

About A.C.S.R. the expansion of capacity is estimated to be of the order of 13,000 to 14,000 tons per annum.

Electric Fans: There are 19 units with an installed capacity of 401,700 fans per year. The Second Plan target capacity is 600,000 fans per year in 1960-61. There are plans for expansion which will result in a production capacity of 466,800 fans per year.

Actual production was 1950: 194,100; 1953: 199,468; 1954: 238,850; 1955: 282,236; 1956: 338,932.

Exports of electric fans are expected to reach about 40,000 per year by 1960-61. Exports were: 1952-53: 8,655 valued at Rs. 4.9 lakhs; 1954-55: 10,869 valued at Rs. 13.6 lakhs; 1955-56: 16,456 valued at Rs. 19.51 lakhs; Apr. to Dec. 1956 valued at Rs. 11.57 lakhs.

Electric Lamps: There are 11 units manufacturing general lighting service lamps with an installed capacity of 43.8 million lamps per year. The target is 50 million by 1960-61.

Production was, 1950: 14 million; 1953: 19.8 million; 1954: 22.86 million; 1955: 23.51 million; 1956: 29.9 million.

There is progress in the manufacture of other kinds of lamps—train lighting, coloured lamps, fluorescent tubes, torch bulbs, radio dial lamps, cycle dynamo lamps, auto bulbs, telephone switch-board lamps. Manufacture of components has also started—brass lamp caps. Glass shell production is being expanded to meet the entire requirements of the lamp industry.

Electric Motors: There were 14 units with a total capacity of 339,100 H.P. in 1956. When all the schemes for expansion are implemented the total capacity is expected to rise to about 833,700 H.P. by 1960-61.

Actual production was, 1950-51: 99,000 H.P.; 1951-52: 153,000 H.P.; 1952-53: 160,000 H.P.; 1953-54: 161,000 H.P.; 1954-55: 201,000 H.P.; 1955-56: 271,000 (estimate).

During the calendar year 1956 the production amounted to 359,062 H.P. (59,742 now) as against 251,915 in 1955.

A.C. 3 phase induction motors upto 225 H.P. and motors of the slip-ring type of up to 125 H.P. are now being produced in the country.

Protection has been granted upto the end of 1958.

Electric Transformers: On April 1, 1956, there were 13 units with an annual rated capacity of 657,000 KVA per annum. When the present schemes for development are implemented, the capacity will go up to 1,310,000 KVA per annum—against the Second Plan target of 1.5 million KVA by 1960-61.

Production was 1950-51: 179,000 KVA; 1951-52: 202,000; 1952-53: 231,000; 1953-54: 327,000; 1954-55: 434,000; 1955-56: 629,000.

Production in the calendar year 1956 was 919,198 KVA as against 564,713 KVA in 1955. The rated capacity at the end of 1956 was 934,000 KVA, the number of units being 14.

Imports were valued at Rs. 154 lakhs in 1950-51; Rs. 144.5 lakhs in 1951-52; Rs. 149.4 lakhs in 1952-53; Rs. 197.5 lakhs in 1953-54; Rs. 161.6 lakhs in 1954-55; Rs. 173.41 lakhs in 1955-56, and Rs. 146.98 lakhs during April-December 1956.

Protection was granted upto end of 1956.

Seap: There are 90 organised units with a capacity of 253,770 tons. The Plan target is 357,000 tons by 1960-61. A large part of the existing capacity is idle.

Production by organized factories was (in tons) 1951: 86,000; 1952: 85,000; 1953: 82,200; 1954: 88,000; 1955: 99,000, 1956: 110,250. The cottage industries are estimated to produce 30,000 tons annually.

Exports were 1950: 280 tons; 1951: 1,580 tons; 1952-53: 1,300 tons valued at Rs. 32.56 lakhs; 1953-54: 571 tons valued at Rs. 13.57 lakhs; 1954-55: 542.6 tons valued at Rs. 14.57 lakhs; 1955-56: 413.8 tons valued at Rs. 9.67 lakhs; Apr. to Dec. 1956: 209 tons valued at Rs. 5.88 lakhs.

Matchboxes: There are 242 units with a rated capacity of 35.3 million gross boxes. The Second Plan target is 36.8 million gross boxes.

Actual production was in millions of gross boxes, 1951: 29.3; 1952: 32; 1953: 29.3; 1954: 26.5; 1955: 31.18; 1956: 29.46.

Both imports and exports are negligible.

The First Five Year Plan laid great emphasis on the development of the cottage sector and a number of measures to help development are under consideration.

Plywood: The number of units on the approved list of DWCI is 65 with an annual installed capacity of 150.6 million sq. ft. Besides there are a large number of unapproved factories with an estimated capacity of about nine million sq. ft. Actual production of tea-chest plywood in million sq. ft. was 1950: 44.9; 1952: 71; 1953: 50; 1954: 62; 1955: 91.13; 1956: 98.33.

Protection had been guaranteed upto the end of 1957.

Razor Blades: The estimated production of razor blades in 1957 was about 336 million. The total installed capacity of Indian factories

was about 615 million. Permission has been granted to open new factories. The retail price of indigenous blades was about annas four to eight per packet of ten blades. It is not possible to make an assessment of the actual requirements of razor blades in India. Imports are not allowed at present.

Thermos Flasks: The production of thermos flasks in India, which was just a little over 6,000 dozens in 1951, increased to about 54,000 dozens in 1957.

The production in 1956 was over 48,000 dozens and in 1955 about 44,000 dozens.

The present demand in the country is estimated at between 60,000 and 70,000 dozens of flasks per year. This is expected to increase to 1,00,000 dozens by the end of the Second Plan period.

There are now three units in the country manufacturing thermos flasks with a total installed capacity of over 1.07 lakh dozens per year. Licences have been granted to establish two more units. When these schemes take shape, the total installed capacity will go up to 2.27 lakh dozens per year.

The value of imports of thermos flasks in 1956-57 was just over Rs. 8.3 lakhs. For the period January to August 1957 the imports were valued at over Rs. 56,000.

Three units are engaged in the manufacture of ampules by automatic machines. The total capacity of these three units is over 35 lakh ampules per month. Besides these there are a number of small-scale units manufacturing ampules by the table-blowing process.

NON-FERROUS INDUSTRY

THE position regarding these metals is briefly described below:

(a) **Aluminium Ores:**—India is rich in deposits of high grade Bauxite which are estimated at 250 million tons, but the total reserves of workable deposits are said to be around 28 million tons. These are generally located in the Jabalpur and Balaghat Districts of Madhya Pradesh; Belgum District in Mysore; Kolhapur, Thana and Kalra Districts in Bombay; Ranchi Plateau in Bihar; and Shevaroy Hills in Salem, Madras. The known estimates of 250 million tons of bauxite make possible production of about 40 to 50 million tons of virgin aluminium metal.

(b) **Copper Ores:**—Copper pyrites is the principal ore of copper. The deposits of copper pyrites in India are in Singhum and Baragunda in Bihar; Khetri mines in Jaipur; Sikkim State, Mysore State and in the Salem District of Madras State. Although only the Singhum deposits are worked at present, the copper belts of Sikkim and Khetri are very promising.

(c) **Lead Ores:**—Lead ores are known to occur at a number of places in India. Special mention may be made, however, of lead deposits in Jaipur and in Jawar Mines in Udaipur, where lead is found in association with zinc; in Chhota Udaipur in Bombay and in Hazaribagh in Bihar.

(d) **Antimony Ores:**—Antimony ore deposits have been found at the Shigree Glacier in Lahaul, Kangra District, Punjab.

(e) **Zinc Ores:**—At present zinc deposits are known to occur at only two places in India: Zawar mines in Udaipur and in the Bisan District in Kashmir State.

(f) **Tin Ores:**—Hazaribagh, Bihar.

PRODUCTION

The production of refined copper in tons is as follows: 1946—6,310; 1947—5,932; 1948—5,964; 1949—6,390; 1950—6,614; 1951—7,083; 1952—6,079; 1953—4,920; 1954—7,161.6; 1955—7,281; 1956—7,623.4. The installed capacity of the industry was 6,999 tons in 1948; grew to 7,200 in 1955, since when it has stood at this figure.

As regards processing of semi-manufactures the only production was of brass sheets by the Indian Copper Corporation Ltd. averaging about 8,000 tons per annum, and electric copper wires

and insulated cables by the Indian Cable Co. Ltd. A more recent development is the manufacture of brass and copper pipes and tubes. Their annual capacity is 360 tons but the actual production has never exceeded 11 tons and 60 tons respectively.

For antimony a smelter was set up during the war at Bombay by the Star Metal Refinery with a capacity of 300 tons per annum. This capacity has now been increased to 1,000 tons per annum. The ore brought from Chitral State (Pakistan) was used for smelting antimony and the plant had reached full production in 1946-47. After the partition of the sub-continent, the ore supplies from Chitral were cut off and as a result the production suffered. The production from 1949 to 1956 was: 100 tons in 1949, 375 tons in 1950, 327 tons in 1951, 181 in 1952, 131 in 1953, 530 in 1954, 504 in 1955 and 589 in 1956.

There is a new Lead Smelter at Katrasgarh in Bihar with a capacity of 7,000 tons per annum. The production of lead in 1949 and 1950 was, however, only about 600 tons a year due to the difficulties of transporting ore from the Jawar mines in Udaipur to the Smelter. The company has now set up an ore dressing plant at the mines which will reduce the weight of the ore to be transported. The capacity of this plant is reported to be 9,000 to 10,000 tons of lead concentrates of 60 to 65 per cent. lead and 7,000 to 8,000 tons of zinc concentrates averaging 55 per cent. zinc. There are also lead refineries in Bombay and Calcutta, which started working in 1955. The production in tons is as follows: 1948—625; 1949—594; 1950—627; 1951—859; 1952—1,131; 1953—1,694; 1954—1,788; 1955—2,234; 1956—2,497. The installed capacity in 1951 was 6,000 tons and remained unchanged in 1955.

SEMI-MANUFACTURES

The greatest progress in the non-ferrous industry made since 1939 is in regard to the semi-manufactures. Several brass and copper rolling plants were started for rolling brass and copper sheets mainly in Bombay. The combined capacity of these new plants is about 20,000 tons per annum.

Some lead sheets are also manufactured in the Calcutta area, but at present they are rolled in 3 ft. width, while the chemical industries require lead sheets of 7 to 9 ft. width. Aluminium and lead foil for tea-chests are

also manufactured in the Calcutta area and the present capacity is estimated to be sufficient to meet India's requirements.

Several rolling plants for rods and bars of brass, copper, etc. were started during the war; afterwards an Extrusion Press was set up in Calcutta by National Tubes and Pipes Ltd. Arsenical copper rods which are required for railway locomotives as boiler stays were manufactured in Jaipur by the Jaipur Metal Industries Ltd. during the war and all the requirements of railways can be met by indigenous production. The present capacity for rods and tubes of brass and copper may be estimated at about 10,000 tons, which is enough to meet the present requirements of the country. The manufacture of lead pipes was started during the war at Konnagar.

A new plant for lead pipes was also set up in Bombay during 1949. The present production is about 350 tons per annum, but this could be increased to 1,000 tons, if required.

A plant for the manufacture of electrical wires and cables was set up near Calcutta during the war by the National Insulated Cable Co. The total production of electrical bare copper wire and cables of this company and the Indian Cable Co. during 1956 amounted to 10,260 tons, the figure for the previous year, 8,436 tons. The installed capacity aggregated 17,790 tons.

Two plants one in Bombay and the other in Calcutta for the manufacture of enamelled copper wire required for making electric motors and fans have a total capacity of 2,000 lb. per day.

A number of concerns have been started for manufacturing different kinds of non-ferrous alloys. The refining and reconditioning of railway scrap and other industrial non-ferrous scrap is now done in this country, which was formerly largely exported. The total present alloying capacity in the country may be estimated at about 20,000 to 25,000 tons per annum.

A plant for the recovery of silver from old coins has been taken for implementation at the Alipore Mint. This plant will also be able to recover about 8,000 tons of electrolytic copper from copper scrap.

A scheme for erecting a ferro-manganese plant with an annual capacity of 100,000 tons, has been implemented. This plant is installed at the Hirakud Dam site in collaboration with

an Italian firm. But the target capacity has been stepped up from 100,000 tons to 160,000 tons per annum in view of the higher target for steel production. Seven new projects have been approved so far and the installation of further capacity is under consideration. It is expected that by the end of the Second Plan, there will be nine plants with an installed capacity of 171,800 tons. But the actual production then will reach only 160,000 tons, out of which 60,000 tons will be for internal consumption and 100,000 tons for export.

In most cases there is a protective duty of 30 per cent. In the case of zinc and lead sheets the protective duty is fixed at 20 per cent. and of arsenical copper rods, brass rods and brass wires, a protective duty of 35 per cent. The import duty on machinery is 5 per cent. which is applicable to all industries.

ALUMINIUM

Aluminium is the only non-ferrous metal which India can produce in large quantities because of extensive deposits of bauxite and adequate supplies of bulk power. There are two units. The Indian Aluminium Co. is working in collaboration with the Canadian Aluminium Co. The principal activities of this company are: (1) the mixing of bauxite in the Lohardaga region of Bihar; (2) the processing of bauxite ore to alumina at Muri, Bihar; (3) the electrolytic reduction of alumina to aluminium metal at Alwaye, Kerala; (4) the rolling of aluminium metals to sheets and circles at Belur, W. Bengal; and (5) the manufacture of aluminium powder

and paste at Kalwa, Bombay. The Aluminium Corporation has an integrated plant near Asansol.

At the commencement of the First Five Year Plan, the total capacity of the two plants for aluminium ingots was 4,000 tons and of their rolling mills was 3,500 tons. But at the end of the Plan, the installed capacity of the industry was 7,500 tons of ingots and the fabricating capacity 25,900 tons per annum. During the period a total investment of about Rs. 2.25 crores is estimated to have been incurred.

A protective duty of 30 per cent *ad valorem* plus a surcharge of 5 per cent of the total duty was charged on imports of aluminium during the period of the First Plan. This protection will continue upto December 31, 1958.

The production of aluminium in tons since 1948 is as follows:—1948—3,369; 1949—3,489; 1950—3,596; 1951—3,848; 1952—3,566; 1953—3,758; 1954—4,886; 1955—7,225; 1956—6,500. The present installed capacity is 7,500 tons.

Except bauxite and coal, most of the other raw materials are available only partly or not at all from indigenous sources. Caustic soda and soda are not produced in enough quantities, cryolite, aluminium fluoride, carbon blocks and filter cloth have to be imported, and the possibilities of producing greenland in this country are yet to be investigated.

The demand for aluminium has been estimated at 25,000 tons. It seems that about 35,000 to 45,000 tons of aluminium represent the minimum requirements by 1960-61. The handicaps of the

industry are the small capacity of the units, the inherent refractory nature of Indian bauxite which costs more to mine, the low alumina content of Indian bauxite, the high cost of electric power, the cost of railway freight and expensive raw materials such as petroleum coke.

To meet the increased demand, there are different schemes for the expansion of the industry under the Second Plan. Active steps have already been taken for the establishment of a 10,000-ton aluminium smelter at Hirakudi by the Indian Aluminium Company. It is expected to go into production in 1958. The expansion programme of the Aluminium Corporation of India, scheduled to be completed by the end of 1959, will raise the capacity of their Asansol plant to 5,000 tons per annum. Besides, a new smelter is being erected under the aegis of the National Industrial Development Corporation. An expert body examined the question of the most suitable location for the plant and recommended that two smelters of 10,000 tons each provided with facilities of expansion to 20,000 tons in due course should be set up at suitable sites—Mettur and Rihand Dam area. One of the 10,000-ton smelters is expected to come into operation during the Second Plan period, while the other may commence operation in the early stages of the Third Plan.

By the end of the Second Plan, overall investment in the industry is estimated at about Rs. 22 crores and about 3,000 to 4,000 additional persons are expected to find employment in this industry. The number of smelters will increase from two to four, the installed capacity from 7,500 tons to 30,000 tons and the fabricating capacity from 25,900 tons to 32,000 tons.

IMPORTS OF NON-FERROUS METALS

	1954-55	1955-56	Apr.-Dec. 1956
Aluminium (Cwts.)	247,605	316,108	218,045
unwrought (Cwts.)	68,180	103,594	32,735
Brass, Bronze, etc. (Cwt.)	139,818	38,757	69,351
Copper (Cwts.)	539,651	362,445	510,803
unwrought (Cwts.)	394,757	341,882	499,715

OPIUM INDUSTRY

POPPY is generally cultivated and does not grow in a wild state. In India, cultivation of poppy for the production of opium is carried on by growers licensed by the Government, on behalf of the Government of India, who undertake to sow the poppy, lance the capsules, collect the latex, and deliver the drug at the weighing centre at a price fixed by the Government of India.

The Opium purchased from the cultivators is sent to the Government factories at Ghazipur or Neemuch, where it is chemically tested and prepared for export and internal consumption.

In addition to being a narcotic, opium is used in many essential medicinal drugs. Because of its harmful effect as a dope, the Central and State Governments have adopted various measures to put an end to normal traffic; at present only a very small fraction of the population makes habitual use of the drug.

Poppy cultivation for the purpose of production of opium is confined to the States of Uttar Pradesh, Madhya Pradesh and Rajasthan. The cultivation in the Territory of Himachal Pradesh was discontinued with effect from 1st October, 1954. The cultivation of poppy starts in November and the crop is harvested in April or May. Preparation of the land for the reception of the seed is a prolonged process, the field being given 10 to 15 ploughing.

The area under poppy cultivation for the production of opium and the quantities of opium produced during the opium years (1952-53 to 1955-56) are given below :—

	Opium year	Area Cultivated (Acres)	Produce at 70° Mds.
Uttar Pradesh	1952-53	30,760	5,404
	1953-54	19,098	3,614
	1954-55	12,521	3,093
	1955-56	12,531	2,324
Madhya Pradesh	1952-53	30,018	6,658
	1953-54	19,999	4,771
	1954-55	18,841	3,775
	1955-56	18,535	4,094
Rajasthan	1952-53	20,804	4,800
	1953-54	12,772	3,247
	1954-55	12,075	2,761
	1955-56	12,174	2,821
Himachal Pradesh	1952-53	2,047	85
	1953-54	1,784	45

N.B. :—The opium year starts on 1st October and ends on 30th September.

Only a small percentage of the opium is sold to the State Governments after processing, and the balance is exported for medicinal and scientific purposes.

Some opium is also supplied to Pakistan for quasi-medical purposes.

The quantities of opium exported during the opium years 1952-53, 1953-54, 1954-55 and 1955-56, are given below :—

Opium Year	Exports (in tons)
1952-53	119-5/14
1953-54	258-4/14
1954-55	211-5/14
1955-56	245-7/14

At a Conference of the State Governments held in 1949 it was decided to reduce the supply of opium to the States at the progressive rate of 10 per cent every year so that the supply of opium to the public for oral consumption (for non-medical or quasi-medical purposes) might be completely stopped with effect from 1st April, 1959. This decision was reiterated by the All India Narcotics Conference held in September, 1956.

After 31st March, 1959, opium will, however, be supplied to registered opium addicts through Government Depots on medical permits issued by the appropriate medical authorities.

The quantities of excise opium supplied to the State Governments during the financial years 1953-54 to 1955-56 are given below :—

Financial Year	Mds. Mds. Cnts.
1953-54	2,514 27 8
1954-55	2,031 20 0
1955-56	1,734 34 8

In 1944, the Central Government erected an Alkaloids Plant at the Ghazipur Opium Factory for extraction and manufacture of various alkaloids from opium.

The quantities of various alkaloids exported and sold in the internal market during the opium years 1953-54 to 1955-56 are given below :—

Opium Year	Quantity exported	Quantity sold in internal market
	Lb. oz. dr.	Lb. oz. dr.
1953-54	725 0 0	1,784 4 11
1954-55	791 2 3	2,027 5 1
1955-56	760 8 0	2,556 13 8

INTERNATIONAL CONTROL

International efforts to control opium date back to the beginning of the present century, and the League of Nations and the United Nations Organisation have, during the last four decades, been endeavouring to confine its use solely to medicinal and scientific purposes. An International Opium Commission met in Shanghai in 1909 as a result of which the first Opium Convention was drawn up at the Hague in 1912. Several treaties on narcotics have been signed since then but all efforts at limiting production of opium have met with limited success.

The Geneva Convention of 1925 provides for measures to regulate international trade in opium and other dangerous drugs. The latest International Protocol signed at New York on June 23, 1953 aims at limiting the production and control of the international and wholesale trade in opium, and incorporates many of the salient features of the comprehensive Indian system of control. This Protocol has however, not yet come into force.

Until the establishment of the plant for the manufacture of alkaloids, opium as a source of revenue lost its importance because of the deliberate policy of the Government to curtail opium consumption and exports. Between 1941-42 and 1946-47 the net receipts fluctuated between a surplus of Rs. 43 lakhs and a deficit of Rs. 52 lakhs. Since then the trends have been more helpful for the Central budget. Details for more recent years are given below :—

(In lakhs of rupees)

	1955-56 (Account)	1956-57 (Revised)	1957-58 (Budget)
REVENUE :			
Sale of opium to State Governments	53.00	27.88	32.03
Sale of medical opium	2.00	3.10	3.25
Sale of alkaloids	13.00	14.44	14.50
SALE ABROAD :			
Sale of raw opium	1,36.00	1,74.66	1,95.85
Sale of medical opium	—	—	—
Sale of alkaloids	4.00	3.23	3.50
Sale of miscellaneous	1.00	0.95	0.91
Total	2,09.00	2,24.04	2,50.04
Refunds	—	—0.04	—0.04
Net Revenue	2,09.00	2,24.00	2,50.00

PAPER INDUSTRY

THE bulk of the production comprises the more common types of paper, especially printing and writing paper. The manufacture of superior varieties is also undertaken but on a restricted scale. The following table gives the trend of production :—

(In 000 tons)

	1951-52	1952-53	1953-54	1954-55	1955-56	1956-57
Printing & Writing ..	82.98	90.99	92.88	112.28	148.83	153.51
Wrapping ..	25.39	22.68	21.48	24.63	36.37	40.01
Special Varieties ..	2.70	3.04	3.41	5.53	7.15	7.50
Paper Boards ..	24.03	20.12	20.12	26.66	39.52	43.14
Total ..	135.09	136.84	137.89	169.09	231.87	244.26

Early in 1951, there were 17 paper factories with an annual rated capacity of about 186,000 tons. Since then, three new plants have gone into production. In April 1956, the annual rated capacity of the paper and paper-board industry stood at about 210,000 tons. This capacity is exclusive of the capacity of the Travancore Rayons for transparent paper estimated at 1,800 tons per annum. Newsprint was not manufactured in the country at the beginning of the First Plan. Since then, the State-aided Nepa Paper Mills has been established. But the production target of 27,000 tons has not been reached and the production of newsprint in 1955-56 is estimated to have been only about 4,200 tons. In regard to strawboards, there were in April 1951, 18 factories on the active list of the Development Wing of the Ministry of Commerce and Industry with a total capacity of 48,500 tons per annum. This number rose to 24 in April 1956 with an annual installed capacity of 59,380 tons.

The aggregate installed capacity of the paper industry in 1957 is estimated at 250,000 tons, as against 211,900 tons in 1956 and 186,200 tons in 1955. The total production of paper during the first six months of 1957 was nearly 102,000 tons, as against 94,700 tons in the corresponding period in the year before. In 1956, about 193,000 tons of paper were produced, as against 184,884 tons in 1955.

The gross fixed investment in the industry during 1951-56 was estimated at about Rs. 11 crores and it found employment for about 8,000 persons.

The State-wise distribution of the paper and paper-board industry in April 1956 is given below :—

State.*	No. of units.	Annual rated capacity (tons).
West Bengal ..	4	66,100
Bihar ..	1	29,000
Orissa ..	1	36,000
Uttar Pradesh ..	2	9,500
Punjab and PEPSU ..	1	15,000
Bombay ..	4	11,900
Madras ..	1	600
Madhya Pradesh ..	1	8,000
Andhra ..	1	2,000
Hyderabad ..	1	15,000
Mysore ..	2	11,000
Travancore-Cochin ..	1	6,000
	20	210,100

* Pre-reorganization. Imports of paper and pasteboard in the recent years are as follows :—

1952-53—21 lakh cwt.

1953-54—25 lakh cwt.

1954-55—27 lakh cwt.

1955-56—30 lakh cwt.

Apr.-Dec. 1956—20 lakh cwt.

Exports have not been appreciable in the past. There has, however, been an improvement in shipments from 34,035 cwt. in 1952-53 to 46,586 cwt. in 1954-55 but a decline again to 43,276 cwt. in 1955-56. During the first nine months of 1956-57, exports of paper amounted to 38,769 cwt.

Paper and paper pulp had protection from 1925 to April 1947.

Certain new varieties of paper and paper-board were manufactured for the first time in the country during the First Plan period. These are cigarette tissues, coated boards, art and chromo paper, sensitised cheque paper and cellulose film. The production of transparent paper by the Travancore Rayons also increased appreciably during the period.

The demand for paper and paper-board has developed at a rather faster rate than was visualised in the Plan. But the demand for strawboards has hardly risen at all. The actual consumption on the basis of domestic production plus imports is given in the table below :—

(In 000 tons).

Year	Pro-duction 1	Imports 2	Consumption	
			1 + 2	Plan estimates
1951-52	135.0	38.0	168.0	175.0
1952-53	137.0	39.0	176.0	175.0
1953-54	137.9	42.0	179.9	
1954-55	169.0	38.0	207.0	
1955-56	231.9	38.0	269.9	200.0

The following table summarises the development of the industry during the First Plan and the planned development during the Second :

	1950-51		1955-56		1960-61	
	Annual rated capacity (000 tons)	Actual output (000 tons)	Annual rated capacity (000 tons)	Actual output (000 tons)	Annual rated capacity (000 tons)	Actual output (000 tons)
Paper and paper-board	136.6	114	210	200	450	350
Newsprint	30	4.20	60	60
Strawboard and other
2bre boards ..	48.6	22	59.3	32.0	59.8	35 to 40

Sabal grass and bamboo are the chief raw materials which are available locally. The use of imported woodpulp has been gradually discouraged and hardly 10 per cent of the raw material is imported. Of late, however, the industry has been placing a greater reliance on rags, hemp, hemp ropes and wastepaper. One important mill is exclusively dependent on wastepaper and rags.

For many years the paper pulp section of the Forest Research Institute at Dehra Dun has been carrying out experimental work in connection with the development of new fibres for paper-making.

Recent enquiries show that Kashmir and Tehri-Garhwal can supply fir and spruce in quantities sufficient for the establishment of newsprint mills in Kashmir and U.P. The two species of wood are well known raw material for the production of mechanical pulp for use in newsprint manufacture and the suitability of both the species from the two States has recently been tested at the Forest Research Institute, Dehra Dun.

DEVELOPMENT PROGRAMME

During the First Plan period, the consumption of paper and paper-board increased on an average by about 8 per cent. per annum. It is likely it will show a progressive increase of 10 per cent. during the Second Plan. On this basis, the demand by 1960-61 may be about 350,000 tons. The demand for newsprint would go up to 120,000 tons; while that for strawboards and other boards may be placed at 40,000 tons by end of the Plan period. Plans are therefore afoot to step up the capacity. A sum of Rs. 44 crores, over and above the investment of about Rs. 4.25 crores in public sector projects, will have to be invested in the paper and paper-board industry during the Plan period, to achieve the target capacity of 450,000 tons. The investment on newsprint factories is placed at Rs. 6 crores for 60,000 tons.

The Madhya Pradesh Government Newsprint Factory went into trial production in January 1955 using imported chemical pulp to start with. The estimated total cost of the NEPA Mills in Madhya Pradesh is about Rs. 6 crores.†

The basic raw materials required by the mills, viz., bamboo and salai wood, will be available within the State of Madhya Pradesh, but the auxiliary raw materials like caustic soda, soda ash, salt cake, liquid chlorine, china clay, etc., may have to be obtained from outside the State.

† See also under 'Government Industrial Undertakings'. A newsprint factory is also to be set up at Bodhan in Andhra before the end of the Second Plan. Capacity : 30,000 tons a year.

PETROLEUM INDUSTRY

THE total production of petroleum in India (before the starting of the three new petroleum refineries) was less than 71 million gallons (286,000 long tons) a year while the total requirements were in the neighbourhood of 1,114 million gallons (3.7 mln. long tons).

The total consumption of petroleum products in India for 1956 was about 4.8 million long tons which is an increase of eight per cent over the figures for the previous year.

The increased consumption was reflected chiefly in kerosene and high speed diesel.

The only productive oil fields are in Assam, and the Digboi Refinery of the Assam Oil Company has a refining capacity of 7,900 barrels (1,100 long tons) a day, while Indian requirements in barrels will be around 105,000 (14,908.7 long tons) a day.

The money spent on the imports of petroleum would be about Rs. 80 crores a year for importing about five million tons of crude oil and products.

The Government of India entered into an agreement with three oil companies for refining oil in India—the Standard-Vacuum Company of America, Burmah-Shell of U.K., and the Caltex also of America. The Standard-Vacuum and the Burmah-Shell have their refineries in Trombay Island near Bombay, while the Caltex has its refinery near Visakhapatnam in Andhra.

During the First Five-Year Plan period, the installed capacity for the refining of crude petroleum increased by 3.2 million tons with the establishment of two new refineries at Trombay near Bombay and during the Second Five-Year Plan by 0.675 million tons by a third one at Visakhapatnam in Andhra. The plant of the Standard-Vacuum Oil Company went into production in August 1954. This plant has an annual capacity of 1.2 million tons in terms of input of crude oil. The Burmah-Shell Refinery which has an annual capacity of 2.0 million tons of crude petroleum commenced production in January 1955.

The Caltex refinery at Visakhapatnam which went into production in July 1957 has a capacity to refine 0.675 million tons of crude petroleum per annum.

The three refineries represent the biggest single foreign investment in the country. According to the agreement with the Government of India certain privileges were extended to the companies: exemption from nationalisation for twenty-five years, freedom from certain provisions of the Industries Development and Regulations Act. The companies in their turn have agreed subject to certain conditions that they will use Indian crude oil whenever available, train Indian personnel, and make the byproducts of the refineries available for subsidiary manufactures such as cosmetics, disinfectants, fertilisers, fumigants, plastics, polishes.

The Assam Oil Company, which is the only producer of mineral oils making use of indigenous petroleum crude have recently intensified their prospecting and exploratory operations. In 1954 a new gasoline plant and a new lubricating oil distillation unit were added to the refinery at a total cost of Rs. 58.5 lakhs. Their combined annual capacity is placed at 9.8 million gallons of gasoline and lubricating oil.

The production capacity of all the refineries by the end of 1957 was of the order of 4.3 million tons in terms of crude processed per annum.

IMPORTS

The imports of petroleum products are :—

(million gals.)

	1951-52	1952-53	1953-54	1954-55	1955-56	1956 April-Dec.
Kerosene	254.5	267.7	299.1	310.2	233.8	219.54
Diesel Oil	162.3	156.7	166.6	194.8	79.5	62.00
Other Fuel Oils	205.8	161.0	195.4	151.2	21.5	4.69
Lubricating Oils	48.6	61.7	37.9	56.3	39.3	40.56
Motor Spirit (including aviation spirit)	251.0	243.4	269.6	214.4	73.1	28.57
Total†	926.5	893.5	968.6	937.4	774.5	1,142.46

† Includes other sorts.

During the First Plan period, the total fixed capital expenditure in the refining industry is estimated at Rs. 45 crores.

But this capacity will be inadequate for meeting the expanding requirements of petroleum products. It is provisionally envisaged that the consumption would by 1960-61 register an increase of 45 to 50 per cent. over the level at the end of the First Plan. The establishment of additional facilities for petroleum products is, therefore, necessary.

It is, however, closely linked with the exploratory work on the occurrence of oil that has now been vigorously taken up*. In the opinion of geological experts, the discovery of naturally occurring crude petroleum in the eastern part of India is a possibility.

In the half year Jan. to June 1957 the imports were as follows: Petroleum crude and partly refined: 1.4 mln. tons; aviation spirit: 16.5 mln. gallons; other motor spirit: 1.6 mln. gallons; other sorts: 3.4 lakh gallons.

BURMAH-SHELL REFINERIES LTD.

Burmah-Shell Refineries Ltd. was incorporated in India on 3rd November 1952, for the purpose of constructing and operating a petroleum oil refinery on a 450-acre plot of land in south-west Trombay—near Bombay.

Site clearance and construction work was first started in April 1953 and the major part of the work was completed by the end of 1954.

The Refinery commenced operations on January 30, 1955.

The crude oil intake of the Refinery is about 2,000,000 tons per annum, the crude oil comes from the Persian Gulf area.

The Refinery manufactures per year approximately 150 million gallons of Motor Spirit, 82 million gallons of Kerosene, 85 million gallons of High Speed Diesel Oil, 33 million gallons of Light Diesel Oil, 170 million gallons of Furnace Oil and 165,000 tons of Bitumen. It manufactures also Petroleum Gas.

The total cost of the refinery will be about Rs. 31 crores, and the total labour staff employed in the refinery including all categories is about 1,500.

Residential quarters for key operating staff have been provided a short distance from the refinery, and in addition, Burmah-Shell Refineries Ltd., have paid Rs. 40 lakhs to the Bombay Government for the provision of houses for Refinery labour employees and their families in the Chembur-Ghatkopar area.

Burmah-Shell Refineries Ltd., have also provided a 10-acre recreation ground for their staff and labour employees. The Burmah-Shell Refineries operation is estimated to save India Rs. 7.5 crores annually in foreign exchange.

CALTEX OIL REFINERY

The Caltex Oil Refinery, costing Rs. 15 crores, went into full operation in July 1957 at Visakhapatnam. The products include petrol, kerosene, diesel oil and fuel oils from the Refinery's flexible two-stage crude oil distillation unit, the fluid catalytic cracking unit with gas recovery facilities, the polymer plant, the propane decarboxylation unit and treating and blending plants.

About 9,000 construction workers were employed at the site during peak period, and in operation the Refinery now has a permanent staff of about 500.

The Refinery annually processes 0.675 million tons of crude oil which yields 13,500 barrels a day for refined products. It occupies an area of 515 acres.

STANVAC REFINERY

The Standard-Vacuum Refining Co. of India Ltd. started construction of the refinery in December 1952 and production started in July 1954.

The refinery which is situated on Trombay Island near Bombay cost about Rs. 17.5 crores. It employs a staff of about 800, and has a designed output of 25,000 barrels (3,549.7 long tons) a day—about 300 million gallons (1,034,483 long tons) a year.

The refinery is designed to use crude oil from the Middle East to produce the following fuel products: Gasoline—94 mln. gallons (295,597 long tons); Kerosene—40 mln. gallons (140,351 long tons); Diesel Oils—55 mln gallons (207,547 long tons); Fuel Oils—101 mln. gallons (428,160 long tons).

Generally speaking, the refinery will meet about 20 per cent of the country's needs.

It was reported in the middle of 1957 that the Standard Vacuum Oil Company had decided to expand its refinery in Bombay to increase production from 25,000 to 33,500 barrels a day. The expansion scheme was to cost Rs. 5.5 crores.

Production of kerosene, now in short supply, was to be stepped up and petroleum gas and bitumen was to be produced for the first time by Stanvac. The gas would be bottled and distributed for domestic use.

Arrangements were likely for improving the quality of motor spirit and proposals for the manufacture of aviation petrol and lubricants at the Stanvac refinery were under study.

The company was at the time negotiating with the Government for the sale of refinery gases for the manufacture of fertilisers at a projected plant at Trombay.

Expansion of the refinery would enable India to save Rs. 1.2 crores in foreign exchange annually on the import of refined products.

* See next page.

OIL EXPLORATION AND POLICY

The future requirements are somewhat as follows:—

In 1956 the consumption of the main petroleum products was about 4.8 million tons, being equivalent to about 5.2 million tons of crude oil. In the eight years previous to that the average off-take had been increasing at the rate of 10 per cent every year.

The requirements of crude oil at the end of the Second Plan would be of the order of 7.6 million tons, of 14 million tons in 1966 and about 52 million tons in 1976.

Exploratory efforts should be directed towards finding additional crude oil production of 4.5 million tons by 1961, 25 million tons by 1971 and 60 million tons by 1976.

The total investment required by 1976 to ensure self-sufficiency in crude oil and its products would be of the order of Rs. 3,000 crores or Rs. 600 per ton of new production. Half the investment will be required by 1971 at the rate of about Rs. 80 crores per annum until 1966 rising to Rs. 170 crores per annum during the Fourth Plan, and Rs. 300 crores per annum during the Fifth Plan.

These are small investments compared with the cost of importing crude oil, which would rise to about Rs. 500 crores per annum by 1976.

To reduce the drain on the foreign exchange it will be necessary to manufacture heavy oil field equipment in the country. It should be possible to start with pipe mills. The capital involved will not be very large.

As a part of the Second Five-Year Plan, the Government of India have entered the field of oil exploration and development. Private enterprise also operates, with or without Government participation under concessions granted by the State.

The problems of oil exploration, drilling and refining are under the Ministry of Steel, Mines and Fuel, Government of India.

Under the Ministry is a Commission called the Oil and Natural Gas Commission with headquarters at Dehra Dun in U.P.

The Commission has three members. The Minister for Mines and Oil is Chairman—at present Mr. K. D. Malaviya. The other two members are Mr. A. M. N. Ghosh and Mr. Bose previously of the Ministry of Finance, who acts as Financial Adviser to the Commission.

In this connection the Ministry of Steel, Mines and Fuel has an officer on special duty—at present Mr. K. K. Sahni.

The Commission is the chief advisory body on oil though the task of administering and implementing oil agreements between the Government and the oil companies is in the hands of the Ministry of Steel, Mines and Fuel.

The Commission has the power to inspect oil fields held by private concessionaires for ensuring full development and elimination of waste.

It can conduct geological and geo-physical surveys, drilling and prospecting independently or in conjunction with other Government or private agencies. It will organize laboratory investigations, collect and publish statistics and maintain information regarding production, trade and mining rules.

At present oil exploration is conducted by three agencies: The Oil and Natural Gas Commission, the Indo-Stanvac Petroleum Project, and the Assam Oil Company (a subsidiary of Burmah Oil Company).

The Commission is now conducting surveys either on its own or in conjunction with foreign agencies in the Punjab and Rajasthan areas. Similar work is carried out by the Standard Vacuum Oil Company in W. Bengal and by the Assam Oil Company in Assam. The Canadians

and the Russians have conducted aero-magnetic and geological surveys in the Rajasthan, Punjab, Bihar and U.P. areas.

The Stanvac exploration in West Bengal is based on an agreement between the Government of India and the Company in 1953. The area stretches from the border of East Pakistan to the west of Burdwan, and is 10,000 square miles. The preliminary surveys which cost about Rs. 125 lakhs excluding equipment the cost of which was Rs. 40 lakhs did not reveal any signs of oil.

The first well was drilled in April 1957 at a place about 3½ miles east of Burdwan and was abandoned. The second at Gilai was also abandoned. The third well at Jalangi in Murshidabad District is now being drilled.

NEW COMPANY

In Assam exploration continues in the Nahorkatiya, Moran and Hugrijan areas. It is estimated that the proved and probable oil reserves in Nahorkatiya might ensure a production of about 2½ million tons of oil and 45 million cubic feet of gas (equal to 0.6 million tons of oil) per year for a period of about 15 years. The proved oil reserves in Moran have not been estimated.

Until the end of 1957, 30 wells were drilled in Nahorkatiya (includes Hugrijan) of which 19 have proved to be producing wells; 6 wells were drilled in Moran of which 3 are successful.

In the old Digboi field it may soon be necessary to curtail production to about 2½ lakh tons per year in order to prevent a more rapid decline later and to ensure maximum ultimate recovery from this declining field. It is satisfactory that the production now available from Nahorkatiya has more than made up this loss and that it has thus been possible to increase refining at Digboi to the maximum capacity of the refinery with consequent reduction in the volume of oil products which have to be imported to meet the country's needs.

About the prospects of further discoveries in Assam making possible a substantial increase in the production target above the present level of 2½ million tons per annum—this possibility depends firstly on the degree of effort and success which can be maintained in the Nahorkatiya-Hugrijan and Moran areas which may enable us to increase the target before very long to about 3 million tons per annum. But the second and perhaps the more important factor lies in the degree of effort which can be put speedily into further exploration—not only in the other somewhat restricted areas on which considerable work has already been done, but also in the other areas in Assam which still call for further geo-physical reconnaissance. These other areas are extensive and given the very considerable additional effort required have prospects of yielding comparable results.

The Government of India proposes to set up two rupee companies. One of these in collaboration with the Burmah Oil Co. will explore and tap oil in the four concession areas comprising 502 square miles held by the Assam Oil Company, a subsidiary of the Burmah Oil Company. The other will refine the crude oil thus produced.

An agreement for setting up a company to prospect for oil was in fact signed on Jan. 14, 1958. It will exploit known oil resources in the Nahorkatiya, Hugrijan and Moran areas of upper Assam.

The new company, to be named Oil India Private Ltd., will have an authorised capital of Rs. 50 crores. Two-thirds of the shares will be owned by the Burmah Oil Company and the rest by the Government of India.

The new company will take over the assets of the Assam Oil Company, a subsidiary of the Burmah Oil Company, in the newly discovered oil areas of the Brahmaputra valley.

It will be registered in Assam.

The new company will undertake production of oil and construct and operate a pipeline for the transport of the crude oil to Barauni, in Bihar, where one of the two proposed State-owned refineries is to be established.

A second refinery will be set up at an intermediate point between the Assam oil wells and Barauni.

The pipeline will be laid in two stages, first up to the site of the proposed Assam refinery, and later up to Barauni itself.

The Government of India has already appointed consultants to undertake the pipeline survey and refinery project studies. Sizes, exact locations and production patterns for the two refineries will be finalised after the consultants' report is ready.

The Burmah Oil Company has offered a sterling loan of ten million pounds to the new company to meet the foreign exchange content of the cost of the first stage of the construction of the pipeline. Indians will be preferred to others for employment in the company.

The exploration in the Rajasthan and Punjab areas are conducted by the Oil Commission in collaboration with foreign agencies, Russian, Canadian and Rumanian. In Rajasthan only aero-magnetic and geo-physical explorations have been conducted so far. The area explored is in Jaisalmer District and the places are Hamargarh, Khoyala, Dewa, Tannot, Kishengarh.

In the Punjab drilling operations have started at Jwalamukhi in the Kangra valley. There will be nine locations in all, three in Jwalamukhi, one each in Bahl, Jansuri, Dharmala, Yoi, Nana and Nurpur. Each operation will take about six months and the project as a whole will cover about five years.

Preliminary construction work in connection with drilling at location no. 1 in Jwalamukhi started in 1956 August. The drilling here is undertaken by a Rumanian agency and was started in April 1957.

PRESENT PROGRAMME

The policy for the two years (1957, 1958) is to confine exploration and drilling to Jwalamukhi and Cambay.

While a Rumanian drill will work in Jwalamukhi in the Punjab, about 100 Soviet technicians will operate the three drills that have been ordered from Russia—two in Jwalamukhi and one in Cambay in the first half of 1957.

The Oil Commission has worked out a programme for collaboration with other agencies which will cost about Rs. 11 crores: Rs. 400 lakhs for collaboration with the Assam Oil Company; Rs. 202.5 lakhs with the Standard Vacuum for the Bengal area; Rs. 500 lakhs for collaboration with other Indian or foreign firms that may prospect for oil in the next five years.

The Commission's own independent prospecting programme for the next five years would be: Jaisalmer (Rajasthan) Rs. 805.6 lakhs; U.P. and Punjab Rs. 202.4 lakhs. Prospecting will be along the Siwaliks in the Punjab and the Ganga basin in U.P.; Third, the Sunderbans in West Bengal Rs. 504.6 lakhs; Fourth, Cambay in Bombay Rs. 705 lakhs.

The indications at the end of 1957 were that Indian refineries might draw 80 per cent of necessary crude oil from the country's own wells in the next five years (1958 to 1962).

The Second Plan allocation for exploration, drilling and refineries is Rs. 11.5 crores; but this is subject to revision. The Oil Commission had asked for an allotment of Rs. 30 crores.

Two refineries are in the offing, in the east in the public sector.

The Varad Committee was appointed in 1956 to advise the Government on the location of the refinery in the public sector in the east.

It was estimated that there would be very little difference in the respective costs of the refinery at three sites. The cost would be Rs. 23.14 crores in Calcutta, Rs. 23.97 crores in Barauni and Rs. 24.97 crores in Gauhati. The overall cost (refinery, railway, pipe-lines etc.) would be Rs. 68.65 crores in Calcutta, Rs. 68.67 crores in Barauni, and Rs. 50.97 crores in Gauhati.

The cost of a twenty-inch pipe line from Nahorkatiya to Calcutta would be Rs. 46.30 crores, while the cost of additional railway facilities required to transport refined products from Gauhati to West Bengal would be Rs. 12.35 crores.

The annual recurring costs in Gauhati would be the highest. Placed at Rs. 15.23 crores, the figure compares with Rs. 11.73 crores for Barauni and Rs. 10.76 crores for Calcutta.

The cost of processing crude oil will thus be Rs. 101 per ton in Gauhati, Rs. 77.8 per ton in Barauni, and Rs. 71.8 per ton in Calcutta. This works out at six annas two pies per gallon in Gauhati, four annas eight pies per gallon in Barauni and four annas six pies per gallon in Calcutta.

REPORTS ON EXPLORATION

A group of Soviet Oil experts made a report on oil exploration to the Government of India which was made public on 21st May, 1956.

The experts recommended among other things:

1. In the next five years it would be best to concentrate on the Rajasthan and Punjab areas for exploration. Here prospects are encouraging.

2. Simultaneously, geological, geo-physical investigations as well as deep test-drilling in the Ganga valley and West Bengal, geological and geo-physical survey and core-drilling in the Cambay area and geological and geo-physical investigations on the Madras coast—all these should be carried on simultaneously.

3. The organisation of research for oil geology to lay a scientific foundation for oil and gas prospecting.

The area to be covered by magnetic survey and gravity is about 176,000 square miles, and by geographical mapping 11,400 square miles.

Fourteen gravity, 10 seismic, 14 geological, five core-drilling and five deep test-drilling parties have to be organized.

An agreement was also signed with the Soviet Union on 21st May, 1956. The Soviet Union was to supply two oil drilling rigs with spares and accessories for a year's operation at a cost of Rs. 74 lakhs. They were to arrive in India before the end of 1956 and were to be erected free of charge in the Jwalamukhi and Janauri areas of Kangra District in the Punjab. A team of 44 Soviet experts would operate the drills initially and train Indian personnel for a minimum period of six months at a cost of Rs. 5.25 lakhs per drill.

Another group of 40 Soviet technicians would undertake a geo-physical survey principally of the oil bearing areas of the Kangra valley. The rest of the experts will be paleobotanists and paleo-ontologists for the geological laboratory of the Oil Commission in Dehra Dun.

In addition the Soviet Government would supply seismic equipment, together with two shot-hole drilling rigs.

PETROLEUM PRICES

Mr. K. K. Sahni, at present officer on special duty at the Ministry of Steel, Mines and Fuel, submitted a report to Government chiefly on the profits and remittances of foreign oil companies operating in India, but also on oil exploration in general. The report was submitted some time in 1956 November.

The contents of the report have not, however, been made public.

It was reported at the end of 1957 that Government of India were studying the economics of nationalising the four major oil marketing companies in the country with a view to making petroleum products available to the consumer at cheaper rates. This report was, however, contradicted by the Prime Minister, Pandit Nehru at a Press Conference held in New Delhi on 2-1-58 when he stated that the Government of India does not have any such proposal in any form before it.

Talks between the Government of India and the representatives of the oil industry have been in progress on the subject of oil prices in India for some time.

SYNTHETIC PETROL

The question of the manufacture of synthetic oil from low grade coal available in the country has been under consideration for a number of years. In May 1954, the Government appointed the Synthetic Oil Committee. In deference to the recommendation made by this Committee, the Government invited three foreign firms, Messrs. Heinrich Koppers, Messrs. Lurgi, Germany and Messrs. M. W. Kellogg, U.S.A., to prepare project reports in this connection. Simultaneously, an Experts Committee was also appointed to give guidance to the foreign firms. This Committee, after examining the project reports, recommended a project for implementation under the Second Plan. This project envisages the manufacture of soft coke from non-coking coal and utilisation of the by-products for the production of synthetic petrol. But the Plan has not made any provision for this project and a final decision can be taken after more is known of the prospects of obtaining crude petroleum from indigenous sources.

The Govt. have examined the scheme of the expert committee, and whilst it considers these to be feasible it has not been possible to make any financial provision for them because of foreign exchange and rupee resources shortages.

PLASTICS INDUSTRY

THE plastics industry in India was largely developed during the Second World War and is primarily concerned with turning out finished product from imported raw material. At present there are about 110 major factories and several small ones operating on a cottage industry basis.

The industry has made considerable progress since 1948. In 1956 there were more than 80 firms engaged in plastic moulding as against 40 in 1948. The industry is centred mainly in Bombay and Calcutta. About 43 moulding firms are on the active list of the Development Wing of the Ministry of Commerce and Industry. These firms possessed 187 compression moulding presses with a capacity of about 12,600 tons, 244 injection moulding machines with a capacity of about 683 oz. and 47 extruders of sizes ranging from 1" to 4½".

There are three units manufacturing polyvinyl chloride (PVC) plastic coated cables, wires and flexibles with an annual capacity of 11 million yards. Five units are manufacturing leather cloth with a capacity of 7.8 million yards per annum. There is one unit producing phenolic resin laminates, with a capacity of 540 tons per annum. There are three units manufacturing polyethylene films, layflat tubings and have an aggregate capacity of 610 tons. All told the total investment in the industry is estimated at more than Rs. 6 crores and the labour employed is over 10,000.

The processes used by the industry are: (1) Compression moulding, (2) Injection moulding,

The imports of plastic raw materials, plastic manufactures and leather cloth are given below:

	1951-52	1952-53	1953-54	1954-55	1955-56	Apr.-Dec. 1956
Synthetic Resins & Moulding Powder	158.16	140.11	148.10	187.88	231.36	240.92
Semi-fabricated Plastic materials	97.97	87.53	88.45	87.73	96.03	108.43
Finished Plastic goods	12.44	11.39	4.12	2.37	5.14	5.55
Leather Cloth	53.02	3.22	5.14	5.19	1.83	2.61

The consumption of plastic goods in India before the last war was estimated at 500 tons per annum. In 1949, the Indian Tariff Board estimated the demand at 4,000 tons per annum, of which about 75 per cent. was estimated to be for domestic and utility articles and 25 per cent. for industrial goods including electrical accessories. Practically the whole of the demand is met from indigenous production.

The country is now an exporter of plastic goods. The following is the yearly exports of plastics from India:

Year	Rs. lakhs
1951-52	6.45
1952-53	13.03
1953-54	15.98
1954-55	14.45
1955-56	7.62
Apr.-Dec. 1956 ..	1.63

In order to encourage exports, an Export Promotion Council was set up in 1955. It has also been decided to allow rebate of import duty at specified rates on raw materials used in the manufacture of plastic goods intended for export. At present the concession is given on urea formaldehyde, cellulose acetate/cellulose acetate butyrate and polystyrene moulding powders.

Imported moulds are expensive and a central tool room for the design and production of moulds is contemplated. The present demand for P.V.C. sheets (without textile base) is estimated at 400 tons. There is, therefore, a big scope for its manufacture. Polythene film and dentures also have a big potential market. The application of cellulose plastics, nitrate and acetate is the basis for industries such as acetate rayon and photographic film. The demand for phenolic resin used by the surface coating industry is about 500 tons a year. In view of the possibility of urea becoming available in the country, the manufacture of urea plastics

(3) Extrusion, (4) Fabrication, and (5) Coating of fabrics by plastics. Articles manufactured cover an extensive field ranging from electrical accessories and insulated electric cables to spectacle frames, artificial leather and waterproof cloth. Metal using of plastics has been successfully undertaken by a few firms.

The production increased to the highest level of 300,000 gross per month in 1956 as against the average of 208,500 gross in 1955. The trend of production of compression and injection moulded goods since 1951 is given below:—

Year	Production (million gross)
1951	1.48
1952	1.54
1953	1.86
1954	1.31
1955	2.48
1956	3.70

Nearly 25 per cent of utility goods comprised combs, while bottle caps made up 60 per cent of industrial goods. Production of mechanised toys has been an important achievement in recent years.

A new factory producing polystyrene commenced operation in 1957. Two other factories—one at Kishna (Calcutta) and the other at Bombay—are being erected to manufacture polystyrene, employing alcohol as raw material. The total capacity of these two units is 5,100 tons

per annum. The other schemes which have almost been completed are those for the manufacture of urea formaldehyde moulding powder, P.V.C. Composition from resin and cellulose acetate moulding powder from imported flakes.

RAW MATERIALS

The consuming capacity of the industry in respect of raw materials is about 8,000 tons of Thermosetting moulding powders and about 6,000 tons of Thermoplastic moulding powders. A large part of the raw material is imported. Imports of raw materials were stepped up from Rs. 1.1 crores in 1950-51 to Rs. 1.9 crores in 1954-55 and to Rs. 2.31 crores in 1955-56. Phenol formaldehyde moulding powder, phenol and formaldehyde and alkyl resin are manufactured in the country out of imported basic materials. At present, three concerns, Industrial Plastics Corporation, Plastic Products of India, Satara and Indian Plastics, Kandivli, all in Bombay are manufacturing phenol formaldehyde moulding powder with a combined capacity of 1,182 tons per annum.

The machinery installed in the industry is almost wholly imported. It is estimated that about 250 moulds are used by the industry each year. In 1954, 240 moulds valued at about Rs. 15 lakhs were imported as against 260 in 1953. But there are two or three engineering firms in the country making some of the simple types of moulds. In addition, there are about 20 plastic moulding concerns which have set up their own tool rooms.

(Rs. lakhs)

Bakelite moulding powder:

Year	Production (lbs.)
1952	667,200
1953	837,600
1954	1,057,200
1955	1,600,800
1956	2,205,600

The annual installed capacity of the P.F. moulding powder sector in April 1957 was 2,352,000 lbs.

The protection for P.F. moulding powder and buttons will expire on 31st Dec. 1959.

The Tariff Commission recommended in 1950 that protection should be extended to the plastics industry till March 1953. The period was further extended to December 1955 to enable the Tariff Commission to review the position. The protection was later extended upto December 1956.

PLASTIC GOODS

The present position of the plastic goods is shown below. Figures relate to 1956.

Processes.	No. of units.	Present installed capacity	Production in 1956
Compression moulding	45 (major units)	12,566 tons	3.7 million gross articles.
Injection moulding	N.A.	618 oz.	N.A.
Extrusion:			
Polyethylene films and layflat tubings	3	610 tons.	553 tons.
P.V.C. unsupported sheets	1	1.5 mil. yds.	0.26 mil. yds.
Lamination	1	1.21 mil. lbs.	0.62 mil. lbs.
Coating:			
Leather cloth P.V.C.	5	7.80 mil. yds.	2.64 mil. yds.
Leather cloth nitrocellulose	1	0.45 " "	0.32 mil. yds.

SECOND FIVE-YEAR PLAN PROGRAMME

There is no doubt that in India the potential demand for different types of plastic goods is large, although it is difficult to foresee the demand for some of the finished plastic goods consumed for non-industrial purposes. It is best, therefore, to assess the total require-

ments in terms of the demand for moulding powders. This is estimated to be about 11,000 tons in 1960-61. To meet this demand the target for capacity during the period is 12,810 tons, which will involve an investment of Rs. 4 crores.

RAYON INDUSTRY

WORLD'S first rayon factory capable of producing about a hundred pounds of rayon a day was erected in France in the year 1884. Today the world production of rayon, inclusive of staple fibre, has risen to the staggering amount of over 3,000 million pounds.

The rayon industry is a post-war industry. There are at present three plants in operation, viz., Travancore Rayons Ltd., Perambavoor, the National Rayon Corporation Ltd., Kalyan, Bombay, with an annual production capacity of 4 million lb. and 7.9 million lb. respectively of filament yarn and the Sirsilik Ltd. in Andhra Pradesh with a production capacity of 4.0 million lb. based on the cellulose acetate process.

The first came into production in July 1950 and the second in February 1951. Both the factories have adopted the viscose process. The third started production in 1954.

The units operating the viscose process produce also carbon disulphide and sulphuric acid in the factory with the exception of Travancore Rayons Ltd. which purchase them from FACT Ltd. Sirsilik Ltd. has facilities for producing acetic acid, acetic anhydride and acetone to meet its needs.

At the beginning of the First Plan, there was only one unit producing rayon filament with a capacity of 4.0 million lb. per annum. With the completion and subsequent expansion of the new units of the National Rayon Corporation, and Sirsilik Ltd. the installed capacity for rayon filament increased to 22.3 million lb. by the end of 1955-56.

Progress on the cellulose acetate plant of Sirsilik Ltd. did not keep to schedule owing to financial difficulties. The factory went into production only in June 1954.

A new plant with a capacity of 10 tons of viscose rayon yarn and 10 tons of Staple fibre per day is to be set up by the Indian Viscose Corporation Ltd., a Rs. 8 crore project under the joint collaboration of the Silk and Art Silk Mills Association, Bombay, and Siala Viscosa, Italy. The factory was scheduled to go into production early in 1957. Latest reports, however, indicate that no progress has so far been made.

The production of rayon filament has increased steadily year by year.

The following table indicates the production of rayon filament since 1950-51:

(million lb.)			
Year	Viscose Rayon	Acetate Rayon	Total
1950-51	0.4	—	0.4
1951-52	6.0	—	6.0
1952-53	8.5	—	8.5
1953-54	10.1	—	10.1
1954-55	11.7	1.4	13.1
1955-56	13.4	2.5	15.9

The estimated level of production in 1955-56 was far short of the target of 22 million lb. visualised in the First Five Year Plan.

As against 15.16 million lb. of rayon yarn produced in 1955, the production during 1956 aggregated 19.50 million lb.

The potential needs of rayon filament is estimated at 70 to 75 million lb. per annum. The maximum consumption on the basis of import and indigenous production so far was 55.2 million lb. in the period from April 1955 to January 1956. This suggests that even after the completion of the schemes mentioned above, it will not be possible to meet fully from indigenous sources the demand for rayon.

Staple Fibre: Before the First Five Year Plan, there was no plant for staple fibre. The factory

of the Gwalior Rayon Silk Manufacturing (Weaving) Co. went into production in February 1954 with a capacity of 15 tons per day (11.2 million lb. per annum). The firm expanded the capacity to 18 tons per day in January 1955 and to 21 tons per day in December 1955. The present annual capacity is, therefore, about 7,560 tons. The firm produced 5,712 tons of staple fibre in 1955 and 7,848 tons in 1956. The First Plan envisaged that consumption would be 14.2 million lb. in 1955-56. But it averaged a little over 28 million lb. per annum during the Plan period and it was expected to be about 30 million lb. in 1955-56.

The investment in the rayon industry during the Plan period is estimated at Rs. 7 crores. This is inclusive of investment in ancillary plants attached to the rayon units for the manufacture of sulphuric acid, carbon disulphide, etc.

The rayon and staple fibre industry has progressed considerably during the Plan period. The dull variety of viscose rayon yarn was produced for the first time in the country in 1955. The acetate variety of rayon yarn is also produced in both qualities, bright and dull.

The installed capacity and actual production of the rayon industry during the years 1955 and 1956 are given below:

Article	1955			1956		
	No. of units	Capacity tons	Production tons	No. of units	Capacity tons	Production tons
Continuous filament viscose rayon yarn	2	7,920	5,731.65	2	8,160	7,275.69
Continuous filament acetate rayon yarn	1	1,800	1,039.33	1	1,800	1,413.74
Viscose staple fibre ..	1	5,400	5,707.20	1	5,400	7,905.85

The First Plan recommended the establishment of a pulp plant of 100 tons per day capacity based on the soft timber resources available in the Himalayan region. But the project did not make much progress on account of the difficulties involved in the extraction of the timber.

Art Silk Weaving Industry: The Development Council for the art silk industry, set up in 1955, has suggested a target of 350 million yards of art silk cloth to be achieved by 1960-61. This will be an increase of about 20 per cent in the present *per capita* consumption of art silk fabrics.

The Tariff Commission estimated the number of powerlooms engaged in the production of art silk fabrics in 1955 at 37,727. The industry is big and largely concentrated in Bombay with over 28,000 of the powerlooms. Licences have been issued for the installation of over 3,500 powerlooms. In addition, there are a number of

handlooms producing art silk fabrics, mainly mixed fabrics. Their exact number is not known, but the Tariff Commission estimates it at 150,000. The capacity of an average powerloom is considered to be 20 yards of cloth per shift and that of four handlooms is considered to be equivalent to one powerloom. Thus the total capacity of the industry amounts to about 465 million yards on the basis of a single shift.

The actual production, however, is much below the estimated capacity. The Tariff Commission has estimated that the average production during the three years 1951-53 was 245 million yards per annum. Therefore, no further expansion of the industry is envisaged during the Second Plan.

The production in 1954 was 181.21 million yards; in 1955, 231.16 million yards; and in 1956 over 251.86 million yards.

IMPORTS

Imports consist of staple fibre, rayon yarn, yarn of rayon staple fibre and rayon piece-goods and were as follows:—

Year	Yarn		Piece-goods		Staple fibre (cut fibre and waste)		Staple fibre yarn		Total including other goods mixed
	Quantity (million lbs.)	Value (Rs. lakhs)	Quantity (million yds.)	Value (Rs. lakhs)	Quantity (million lbs.)	Value (Rs. lakhs)	Quantity (million lbs.)	Value (Rs. lakhs)	Value (Rs. lakhs)
1950-51	35.3	14.71	1.8	41.7	12.6	189.9	1.25	30.9	1739.4
1951-52	36.5	17.29	3.0	82.4	36.5	1010.1	3.73	117.0	2953.8
1952-53	22.24	7.85	1.15	26.34	4.14	65.50	4.31	74.53	—
1953-54	38.39	12.04	2.43	51.96	27.22	377.67	1.89	46.04	—
1954-55	40.85	12.69	4.12	90.59	27.32	374.63	0.81	21.75	—
1955-56	50.78	15.44	9.84	185.12	14.50	191.67	—	—	—
1956 (Apr.-Dec.) ..	47.62	13.74	5.56	101.94	34.62	429.04	3.02	26.09	—

Some quantities of art silk fabrics, particularly the finer varieties, are at present imported. It is expected that these imports will largely, if not entirely, cease during the Second Plan period. There has also been some export of art silk fabrics, but this is not making much headway. An Export Promotion Council has been set up to stimulate exports.

The programme of development for the rayon and staple fibre industry envisaged for the Second Plan is summarised below:

	1955-56		1960-61	
	Annual Capacity	Production	Annual Capacity	Production
Rayon Filament (Million lb.)	22.3	15.9	68.3	68.0
Staple Fibre (Million lb.)	16.0	13.2	38.0	38.0
Chemical Pulp (Tons)	30,000	30,000
Art silk cloth (export in million yards)	..	2.5	..	10.0

RUBBER INDUSTRY

INDIA produces about 23,500 tons of raw rubber constituting a little over one per cent of the world output. Of an area of about 207,250 acres under rubber cultivation, nearly 75 per cent is located in the State of Kerala. Other rubber growing areas

are the districts of Coimbatore, Salem, Nilgiris, Madura in Madras State and Coorg in Mysore State. Cultivation on a small scale exists in Assam.

The following are the details:—

Year	Production (Tons)	Tapable Acreage	Average yield per acre in Lbs.
1950	15,599	137,888	253
1951	17,148	148,739	258
1952	19,863	170,000	262
1953	20,967	172,800	272
1954	22,493	173,000	291
1955	22,481	207,250	243
1956	23,444	231,000	227

The year 1952-53 was notable for a slump in the world rubber trade with London price falling by more than half. In this country, the price of indigenous raw rubber was revised in October 1952 on the recommendation of the Tariff Commission from Rs. 122-8-0 to Rs. 138 for grade I rubber per 100 lbs. with suitable differential

for other grades. In February 1955 it was raised to Rs. 150 per 100 lbs. and in September 1955 to Rs. 155-12-0.

With more factories coming into existence every year the consumption of rubber is increasing. It was 21,063 tons in 1952, 21,908

in 1953, 25,487 tons in 1954, 27,543 in 1955 and 28,906 tons in 1956. Imports of raw rubber had, therefore, to be permitted in 1954 and 1955. Imports in 1954 were 3,371 tons, in 1955 they were 3,839 tons and 6,463 tons in 1956.

RUBBER GOODS

India has a modern manufacturing industry. The variety of goods manufactured covers almost the entire range of requirements of the country. They include tyres and tubes of all kinds, footwear, water-proof rubberised fabrics, ebonite rods and sheets, latex foam cushioning and sponge, hoses of all types, V-belts and fan belts, rubber conveyor belting, and mechanical rubber goods. Of these, the manufacture of tyres and tubes accounts for about 70 per cent of the total consumption of rubber and bulk of capital investment, followed by foot-wear with 15 per cent annual consumption. In the case of the majority of these items, with the exception of tyres and tubes, considerable surplus capacity exists in the country. The total investment in the industry is estimated at about Rs. 13 crores and the number of persons employed is about 21,800.

The progress of the manufacturing industry is given below:—

Product	1954	1955	1956
Footwear (Lakh pairs)	312.0	349.2	360.4
Toys, Balloons, etc. (Lakh Doz.)	183.6	229.3	255.5
Tyres :			
Automobile (000) ..	825.5	882.3	937.0
Cycle (000) ..	5,226.0	5,748.1	6,306.7
Tractor (No.) ..	19,154	24,526	30,771
Aero (No.) ..	2,511	4,408	3,656
Cab (thousand ft.) ..	324.0	370.8	290.3
Tubes :			
Automobile (000) ..	754.4	785.5	918.5
Cycle (000) ..	5,577.6	5,593.8	6,371.4
Tractor (No.) ..	16,881	23,110	30,714
Aero (No.) ..	1,566	2,444	2,292
Hoses :			
Radiator (000) ..	151.2	186.6	248.4
Vacuum Brake (000) ..	604.9	808.1	552.0
Other Types (000 ft.) ..	4,706.0	5,734.8	6,804.8
Fan Belt (000s.) ..	459.1	655.3	724.8
Ebonite (000 lb.) ..	109.0	130.3	210.0
Waterproof (000 yds.) ..	2,309.7	2,119.0	2,574.0
Latex foam sponge (000 lb.) ..	935.4	1,489.3	1,772.2

While the price of raw rubber has been periodically reviewed and fixed by the Government, no control was exercised over the prices of rubber tyres and tubes. This led to frequent complaints that the prices charged for these goods by the manufacturers were excessive. An inquiry was made by the Tariff Commission in 1956. The Commission estimated the fair prices of different types of tyres and tubes and recommended that these prices should remain in force till December 31, 1957, subject to a formula for adjustment on account of variations in the cost of raw rubber, fabric and carbon black. The Government accepted these and other recommendations and the tyre companies were called upon to issue a revised price list with effect from Oct. 10, 1956.

The programme of development for the rubber goods industry envisaged for the Second Plan period is summarised below:—

	1955-56	1960-61
Annual Capacity :		
1. Automobile tyres ..	9,50,000	14,60,000
2. " tubes ..	9,50,000	14,60,000
3. Bicycle tyres ..	60,00,000	1,18,00,000
4. " tubes ..	81,00,000	1,18,00,000
Production :		
1. Automobile tyres ..	9,10,000	14,60,000
2. " tubes ..	8,10,000	14,60,000
3. Bicycle tyres ..	57,50,000	1,18,00,000
4. " tubes ..	55,90,000	1,18,00,000
Exports :		
1. Automobile tyres ..	60,000	1,50,000
2. " tubes ..	60,000	1,50,000
3. Bicycle tyres ..	70,000	3,00,000
4. " tubes ..	90,000	3,00,000

IMPORTS AND EXPORTS

Before World War II, India was exporting considerable quantities of raw rubber and importing most of the rubber manufactured goods required in the country. At present, the export of raw rubber has not only been stopped, but limited quantities are imported to supplement indigenous production. On the other hand, rubber manufactured goods are exported to neighbouring countries and imports are very small.

(In lakhs of Rs.)

	Imports		Exports	
	1955-56	First nine months of 1956-57	1955-56	First nine months of 1956-57
Raw Rubber ..	195.6	275.72	0.57	0.66
Pneumatic tyres ..	26.9	135.63	66.87	13.09
Pneumatic tubes ..	2.4	3.65	5.1	1.23
Bicycle tyres ..	0.8	35.05
Bicycle tubes ..	0.4	4.16
Solid rubber tyres ..	7.1	6.60	1.2	1.44
Other manufactures (excluding apparel, boots and shoes) ..	17.9	16.28	11.7	7.18
Total ..	251.1	476.99	85.44	23.60

SERICULTURE AND SILK

SERICULTURE is carried on mainly as a subsidiary to agriculture. The country's total production of raw silk is placed at nearly 34 lakh lbs. per annum. Of this quantity, mulberry silk accounts for about 24 lakh lbs. and non-mulberry silk for about 10 lakh lbs. The major portion of mulberry raw silk is produced in Mysore. This State accounts for more than 70 per cent of the total output of mulberry raw silk in India. The other important producing States are West Bengal, Jammu and Kashmir and Madras. The most important producers of non-mulberry silk are Assam, Madhya Pradesh, Orissa and Bihar.

About 62,802 lbs. of spun silk and 45,703 lbs. of noli yarn were produced in India during 1956. Out of the total quantity of silk waste of the order of 19,42,345 lbs. including mulberry and non-mulberry, only 6,90,187 lbs. were consumed within the country, the rest being exported to other countries on the recommendation of the Central Silk Board.

The total area under mulberry is about 1,74,219 acres at present. Mulberry is cultivated both as rain-fed and irrigated crop. The yield of leaf per acre per year from rain-fed garden is about 4,000 lbs. Average yield per acre in irrigated mulberry gardens in 1956 was about 12,000 lbs. Whereas the yield per acre from mulberry graft garden was 20,000 lbs.

In Mysore and Madras (put together) there are about 24 lakh families who are directly or indirectly engaged in sericulture industry. The total production of cocoons per year is about 278 lakh lbs. and the raw silk produced may be put at 18 lakh lbs. for Mysore and Madras.

Based on the area under mulberry, the total requirement of disease-free layings is estimated to be about 720 lakhs of layings per annum for Mysore and Madras.

After the Government Organisation was set up, the Central Farm at Channarayana began to produce small quantities of disease-free layings on 'Pasture System' and to educate ryots to use them. To supplement the work of the grainages which produce only disease-free seed by a controlled campaign of seed cocoon production, there are now 4,000 selected seed cocoon rearers to produce Mysore seed cocoons, capable of producing about 4,000 lakhs of seed cocoons, i.e., the entire requirements of the industry for seed cocoons in Mysore and Madras. About 98 per cent of the cocoons produced in the State is used for reeling and only 4 per cent for seed purposes. Sericultural education in Mysore is given in a practical manner in the Government Silk Farms, such as Channarayana, Mysore, Kolar, Mugur and Sidlaghatta.

CENTRAL SILK BOARD

The Tariff Commission submitted its report on the Sericulture Industries to the Government of India in 1952.

In 1953-54, the Tariff Commission recommended extension of protection for 5 years from January 1, 1954. As the existing duty inhibited demand by creating a rise in the price of indigenous silk, the duties on silk raw and cocoons, silk yarn, yarn spun from silk waste, silk fabrics like pargee fugi, etc. should be reduced to 80 per cent *ad valorem* exclusive of surcharge, while the existing rates of duty on silk waste and volla, yarn spun from silk volla and silk sewing thread should be continued.

The Government accepted the proposal for the extension of protection. It decided that the existing rates of duties should not be reduced, but, stated that the position would be kept under watch and suitable action would be taken, when necessary.

The Central Silk Board was constituted by the Government of India in the year 1949 under the Central Silk Board Act, 1948. The Board is charged with the responsibility of organising the development of the silk industry in India. It examines the schemes of development formulated by the various State Governments and recommends grants by the Central Government for financing the schemes. The Board came under the administrative control of the Production Ministry on 15th June 1955. Since May 1957 when the Ministry of Production was abolished it has been under the control of the Ministry of Commerce and Industry.

The Board functions with its own funds drawn from the Government of India as grants-in-aid under the Silk Board Act. Though the Act empowers the Government of India to levy and collect as a cess an excise duty on flature raw silk and on all spun silk, it has not been considered advisable to invoke the provision of this section in the interest of the indigenous sericultural industry.

The head office of the Board was shifted to Bangalore with effect from 1st February 1957.

SECOND FIVE YEAR PLAN

The capital outlay of the programme under the Second Five Year Plan is estimated at Rs. 5.0 crores which excludes a sum of Rs. 1.5 crores provided for the silk weaving sector. The total outlay of silk and sericulture thus comes to Rs. 6.5 crores, as against a negligible outlay of Rs. 1.3 crores under the First Five Year Plan.

The development programme for silk industry envisages improvement of mulberry, better silk worms seed supply and organisation, development of silk reeling, utilisation of by-products, development of non-mulberry silk industry, co-operative marketing and testing, sericultural research and education, and stabilisation of prices.

Mulberry Silk: As regards mulberry silk, an important item in the development programme relates to the reduction in costs of cultivation of mulberry leaf through substitution of existing mulberry with higher-yielding grafts in both rain-fed and irrigated areas, evolving of new varieties of mulberry of higher yield, and improvement in cultivation methods, manuring, etc. These and other measures for bringing about improvement in mulberry and cocoons will be supplemented by steps to modernise silk reeling, encourage substitution of improved basins for country *charkhas* and converting the improved basins for flatures into multi-end basins, and introducing central cooking system and drawing chambers. Utilisation of by-products in the spun silk industry is necessary for the service of the reeling industry and steps are proposed to be taken to rehabilitate and extend the spun silk industry. And as an experimental measure, co-operative societies for raising young worms of the first and second stages collectively are to be established.

Also included are proposals relating to (1) co-operative marketing and testing of cocoons; (2) grading of cocoons; (3) introduction of a system of payment of cocoon prices on actual yield; (4) further development of work in the conditioning of houses at Calcutta and Bangalore and at the Berhampur station; (5) establishment of two training institutes for training personnel for sericulture departments in the States.

Non-Mulberry Silk: As regards non-mulberry silk, the development programme provides for plantations, as well as improvement of basic seed cotton production for *eri*, *muga* and *tassar*. The organisation of seed supply, improvement of spinning and reeling, marketing, and training and research will be undertaken more or less on lines similar to those for the mulberry silk industry.

State Schemes: The Government of India has so far sanctioned for 1956-57 as many as 138 grants amounting to Rs. 27.98 lakhs for the development of sericulture industry under various State schemes. Loans and grants of the order of Rs. 24.92 lakhs have also been granted for 12 other schemes. The latter include the establishment of a modern flature at Malda (West Bengal), the setting up of a raw silk marketing society in Bangalore, and modernisation of flature machines in Jammu and Kashmir.

West Bengal tops the list of States which received grants, with Rs. 4.7 lakhs, while Jammu and Kashmir, Bihar, Assam, Mysore and Madras follow with grants amounting to Rs. 4,23,764, Rs. 3,67,932, Rs. 3,38,263, Rs. 2,39,350 and Rs. 2,27,165, respectively. About 147 schemes for the development of sericulture industry during 1957-58, which have been drawn up by 12 States, are under examination.

IMPORTS, PRICES

During the first half of 1956, the Silk Board imported 109,916 lbs. of raw silk, of which 30,088 lbs. were allotted to States, 22,618 lbs. to silk associations and 40,181 lbs. to actual users. About 16,093 lbs. were also earmarked for export promotion purposes.

Since June 1956, however, the import of raw silk has been arranged by the State Trading Corporation of India (Private) Ltd., though the distribution has remained with the Silk Board.

It is proposed to depute five officers to Japan for training in sericulture and two officers to China for training in silk-worm seed production and silk reeling. In furtherance of measures for the development of sericulture industry in the country, a foreign Race Seed Station and a Central Sericulture Training Institute are proposed to be started in Mysore State.

More mulberry plantations and silk worm rearing centres will be set up and training in sericulture provided under Government of India schemes.

For implementing these schemes the Union Ministry of Commerce and Industry has sanctioned grants of about Rs. four lakhs to the State Governments of Jammu and Kashmir, Assam, Madhya Pradesh, Andhra and Mysore.

In Jammu and Kashmir, 62,000 mulberry trees are to be planted. A basic mulberry graft nursery is to be established in Mirgund. Eight mobile rearing centres for demonstration purposes and four collective incubatory centres are to be set up in Jammu. Also a model worm rearing centre is to be opened in the State.

The existing sericultural farms and grainages are to be expanded in Assam for which an additional grant of about Rs. 1.3 lakhs has been sanctioned to the State. The State also gets another grant for the purchase of grafts.

For establishing a silk farm at Sardarpur, Madhya Pradesh has been given a grant.

In Andhra Pradesh a model rearing house is to be constructed in the silk farm at Salval in the Warangal district. The farm is designed to demonstrate and train boys of aboriginal tribes in the Japanese method of mulberry cultivation and rearing of silk worms. For this and for providing working capital for the purchase of cocoons from the rearers a sum of over Rs. 46,000 as grants and loans has been sanctioned to the State. Assistance has also been given to enable the State to send its personnel for training in other silk-producing States. Sericulture demonstration and propaganda will be organised in the villages of Andhra.

Mysore gets three grants which will be utilised for conducting research on silk worm nutrition, for the supply of mountages to sericulturists of Kollegal and for the Chawki rearing centre in Coorg.

The Silk industry was greatly handicapped by the very high level of prices prevailing in the country during 1954-55. Though the landed price of silk was not very high, the actual sale prices were as high as Rs. 54 per lb. in April, 1954. The Government of India, therefore, considered that the best course in the circumstances would be to restrict imports through the agency of the Central Silk Board which should also be entrusted with the distribution of the Silk to the actual user, etc. The entire quantity of 2 lakh lbs. of Chinese Silk imported by the Board was lifted by the parties against full payment. The import and distribution of Chinese Silk had a salutary effect in bringing down the prices of not only imported silk but also indigenous filature raw silk. The stabilisation of the market for silk has helped greatly in infusing a sense of security among the sericulturists. It has also enabled the Board to pursue the development programme for planned development of the industry.

With the stabilisation of the market for raw silk, it has been possible to ensure a steady and fair remuneration to silk-work rearers and cottage reellers. The level of employment has also been maintained at a satisfactory level, giving part-time employment to nearly four to

five million persons in the several branches of the industry in the villages.

Mr. V. Nanjappa, I.C.S., Textile Commissioner and Chairman, Central Silk Board, at a meeting of the 11th General Body held at Bangalore on 26th April 1957, explained the benefits that have accrued to the sericulture industry by the canalisation of imports through the State Trading Corporation (Private) Ltd., since the licensing period July-December 1956 and said :— "Canalisation of imports of raw silk through the agency of the Government has not only minimised the quantum of imports but has also helped both the weaving and sericulture industries in the promotion of their respective interests by preventing violent and rapid fluctuations, which were chronic before the canalisation of imports by a Government agency. The release of imported silk at prices fixed by the Central Silk Board had had a salutary effect on the price of Indian raw silk. The prices of silk have been steady more or less for the past two years."

Protection for the industry will continue till the end of 1958.

Below we give some facts and figures relating to the industry for the year 1956.

Mulberry Raw Silk Production in 1956

(All in lbs.).

State*	Filature	Charka	Duplon Silk	Total
Mysore†	1,03,446	14,13,564	55,582	15,72,592

SHIPPING INDUSTRY

TOWARDS the end of the Second World War, the Planning Department of the Government of India appointed a Policy Committee on Shipping. It observed: "India possesses a distressingly small number of deep sea ships which at the outbreak of the war stood at no more than 30 with a total of less than 180,000 tons gross. The rectification of this state of affairs should be one of the immediate post-war objectives."

This was followed by the constitution of a Reconstruction Policy Sub-Committee, with Dr. C. P. Ramaswami Aiyar as Chairman, in 1945. This Sub-Committee submitted its report in March 1947 which was approved by the Policy Committee. Its principal recommendations were:—

(1) India needs two million gross tons of shipping to carry more than 10 million tons of cargo and about three million passengers a year. The figure does not include country craft.

(2) Hundred per cent of the purely coastal trade of India, 75 per cent of India's trade with Burma and Ceylon and with geographically adjacent countries, 50 per cent of India's distant trades and 30 per cent of the trades formerly carried in Axis vessels in the Orient should be secured for Indian shipping in the next five to seven years.

(3) As the Indian shipping industry is still very young, emphasis should now be placed on how Indian companies can expand their fleets and the Indian Shipping Board should be empowered to control deferred rebates, rate-cutting and all other evils arising from monopolies.

The Government of India, by their Resolution dated July 12, 1947, fully endorsed the views of the Committee. They agreed that the definition of "Indian Shipping" should be shipping owned, controlled and managed by Indian nationals. They also laid down that the following conditions should qualify any shipping company for treatment as "Indian shipping companies":—

(a) The steamers of the companies should be registered at a port or ports in India. (b) At least 75 per cent of the shares and debentures of the companies should be held by Indians in their own rights. (c) All the directors should be Indian. (d) The managing agents, if any, should be Indian.

PRESENT POSITION

The subsequent developments may be summarised as follows:—

(1) Plans for setting up three corporations, each with an authorised capital of Rs. 10 crores were announced in November 1947. The first Government-sponsored shipping corporation (The Eastern Shipping Corporation) was registered on March 24, 1950 with a capital of Rs. 5.5 crores.

As a result of certain provisions of the new Company Act, 1956, in regard to Managing Agents, the Corporation became a full-fledged State enterprise with effect from August 15, 1956. Another State shipping enterprise, the Western Shipping Corporation was set up in 1956 with an authorised capital of Rs. 10 crores.

The Eastern Shipping Corporation has a fleet of seven vessels with orders for three more (overseas vessels) and one cargo-cum-passenger with the Hindustan Shipyard. In 1956-57 it made a profit of Rs. 31,71,038.

The Western Shipping Corporation has only a tanker at present (end of 1957) which is on charter with the Burmah Shell Company. The Corporation has placed orders for four vessels all at foreign shipyards (two German and one Italian and Yugoslav respectively).

It is intended that the Western Shipping Corporation should run the Indo-Pollah service and also function on the Persian Gulf Service. At a later stage it is to extend its operations to the Red Sea.

(2) Indian shipping companies participated in overseas trade for the first time in 1948. Two of them are members of the India-U.K.-Continent Conference Lines and have 30 vessels operating in the trade. As on 31st March 1957, five Indian companies were engaged in the overseas trade with 43 ships totalling 289,273 gross registered tons. Indian shipping companies are now serving the following foreign trades: India-U.K./Continent; India-Persian Gulf; India-Australia; India-Japan/Far East; India-Singapore; India-East Africa. A new shipping service between India and Black Sea ports was introduced in February 1957 under an agreement concluded by the Government of India with the U.S.S.R. Government in April 1956. A few vessels are also operating in the international tramp trade.

At the end of 1957, India had 331,000 G.R.T. in the overseas section.

(3) The coastal trade of the country was reserved in 1950 for Indian vessels in response to a public demand which had been made for the past 25 years. With effect from January 1, 1951, a new Indian Coastal Conference, consisting primarily of Indian shipping companies commenced functioning and the two British shipping companies became associated members. The Indian-owned tonnage employed on the coast as on 31st March 1957 consisted of 81 vessels of a total G.R.T. of 232,167.

At the end of 1957, India had 240,000 G.R.T. in coastal traffic.

(4) The first tanker to fly the Indian flag was purchased by the Great Eastern Shipping Co. and was entered on the Indian register in 1956. The vessel has been placed in the coastal trade on charter to the Standard Vacuum Oil Co. A second tanker has since been bought by the Western Shipping Corporation and has been chartered to the Burmah Shell Company. The question of acquiring a third tanker, the second in the public sector, is now under consideration. The Western Shipping Corporation is negotiating with the Caltex Ltd. in this regard.

The more recent progress of Indian shipping is given in the following table:—

Year.	No. of companies.	No. of ships.	Tonnage (G.R.T.).
1948 ..	15	72	249,261
1949 ..	20	84	332,490
1950 ..	23	90	364,632
1951 ..	23	92	366,646
1952 ..	26	100	383,911
1953 ..	25	111	422,452
1954 ..	30	124	435,300
1955 ..	30	126	465,264
1956 ..	30	125	478,307
1957 ..	25	130	571,440

The Shipping Policy Committee fixed in 1947 a target of two million tons to be attained by 1954. Eight of the present 25 companies own one vessel each. Six own a vessel each under 1,000 G.R.T., while another owns a vessel of 2,200 tons. Six others own two vessels each under 3,500 tons. Thus 14 out of 25 companies own only 20 vessels with an aggregate tonnage of 13,048 G.R.T.

Six ferry steamers with an aggregate G.R.T. of 4,754 are engaged in the carriage of passengers on the Konkan Coast and carry approximately a million and a half passengers per year.

Twenty-four steamers owned by 9 companies with an aggregate G.R.T. of 42,042 run between the Kandla and the Tuticorin Range. On an average they carry about eight lakh tons of cargo every year on the West Coast of India.

Forty-one vessels of 198,464 G.R.T. owned by 9 shipping companies participate in the wider coastal trade of India carrying about 20 lakh tons of cargo every year.

Planning.—Taking into account the financial resources available, a programme of development was formulated which aimed at raising the total gross registered tonnage to over 600,000 by the end of the period of the First Five Year Plan. In order to assist the shipping companies in replacing obsolete tonnage operating on the coast and expand, Government had provided funds for constructing ships at Vishakhapatnam; a total of 100,000 G.R.T. was expected to become available from this shipyard during the period of the First Plan.

At the beginning of the First Five Year Plan, India had a tonnage of 390,707 G.R.T. The target under the plan was to add 215,000 G.R.T. after allowing for obsolescence to the extent of 60,000 G.R.T., thus increasing the tonnage to 600,000 G.R.T. by 31st March 1956. On that date the actual tonnage stood at 480,000 tons, but taking into consideration the tonnage on order in Indian and foreign yards, the target is expected to be reached soon. In the Second Five Year Plan it is proposed that about 301,000 tons should be added after allowing for obsolescence of 90,000 tons. Thus by the end of the 2nd Plan, the total tonnage is expected to reach 900,000 G.R.T. With the achievement of this target, Indian tonnage is expected to carry at least 15 per cent of the country's overseas trade as against the present 5 to 6 per cent, 50 per cent of the trade with adjacent countries as against 40 per cent at present, besides 100 per cent of coastal trade. In the First Plan a sum of Rs. 19 crores was provided for shipping and this was subsequently raised to Rs. 26.3 crores. Actual expenditure over the First Plan period was about Rs. 18 crores. In the Second Plan a provision of Rs. 45 crores including the carryover of Rs. 8 crores has been made for shipping expansion. The full amount has already been utilised in placing the orders for ships in Indian and foreign yards by the shipping companies in the private and public sector, though the tonnage ordered will be inadequate to enable the merchant marine to reach the proposed target of 900,000 tons.

Commitments for 8 coastal ships and 20 overseas vessels were made in the first year of the second Plan. That represented tonnage to the extent of about 170,000 G.R.T. The entire sum of Rs. 37 crores has already been spent for meeting the cost of these fresh orders. Including the replacement of 90,000 G.R.T. of old ships, India will have to place orders for the purchase or construction of about 210,000 G.R.T. to reach the target of 900,000 G.R.T. by March 1961.

A constructive measure which the Government has taken is to establish a non-lapsable shipping development fund. The Fund will be built up through (1) annual contributions from the Consolidated Fund of India, (2) all repayment of loans advanced to Indian shipping companies, and (3) all payments by way of interest on such loans. The immediate effect of the constitution of the Fund is that a sum of Rs. 7 crores representing the repayment of loans and interest charges will become available for further investment in the Second Plan period. This will be in addition to the Rs. 37 crores allotted under the Second Plan. Contributions to the Fund from the general revenue were expected to commence in 1957-58, but certainly in 1958-59.

Another welcome decision the Government has taken is to introduce some uniformity in the rates of interest on its loans to the shipping.

industry. These rates of interest, which at present are 2½ per cent for the overseas sector and 4 to 4½ per cent in the coastal sector, will be changed into a uniform 'effective' rate of 3 per cent for all loans irrespective of the sector to which they are applied.

According to the Sailing Vessels Committee's Report it would seem that sailing vessels continue to carry a substantial volume of cargo. It is estimated that 150,000 tons of shipping under sail consisting of about 2,000 vessels carry about a million to a million and a half tons of cargo every year. These vessels employ about 40,000 men, 2,500 masters, 2,500 mates and about 35,000 seamen. Taking the average cost of these vessels at Rs. 250 a ton, the capital outlay is computed at Rs. 4 crores.

A comprehensive Bill relating to shipping is now before Parliament (March 1958).

SHIP-BUILDING*

The credit for building the first modern ship-building yard goes to the Scindia Steam Navigation Co., Ltd. This was founded at Vishakapatnam in 1941; the company completed two berths in 1947. The first steamer built in this yard was launched on March 14, 1948 by Mr. Nehru. A third berth of the same capacity (building of ships ranging from 320 to 550 ft. in length and from about 5,500 tons to about 15,000 tons dead weight capacity) was ready in 1953. The yard is equipped with a fitting-out wharf 1,200 ft. long, which will be capable of fitting-out six ships of large size and 3 medium sized ships in one year. On the engineering side, the hull and structural shop has a fabricating capacity of 8,000 tons of steel per year.

On January 21, 1952 "Hindustan Shipyard Ltd." was registered to take over this yard. The Government of India holds a two-thirds interest in the Company and Scindias one-third. The valuation of the shipyard was provisionally agreed at Rs. 270 lakhs which will be paid by the issue of fully paid shares of the new company for Rs. 103 lakhs and the balance in five equal annual instalments. The aggregate initial capital of the company was to be Rs. 309.9 lakhs.

After the transfer of the shipyard to the new company, a five-year plan for its development was formulated which was estimated to cost Rs. 15.84 crores between 1952-53 and 1956-57. Out of this, Rs. 11.77 crores were envisaged to be spent during the four years ended 1955-56.

With a view to obtaining the necessary technical assistance, an agreement was made with a French firm for 5 years.[†] This provided for advice in setting up a fully equipped designing and estimating office, organisation, development and management of the shipyard and the building of ships as well as help in procuring supplies from France and training Indians in France. In return, the firm would receive 4 per cent commission on the annual turnover of the yard.

The total issued capital of the yard is Rs. 452.75 lakhs, of which the Government holds shares valued at Rs. 348.50 lakhs, the balance being held by the Scindias.

The Government sanctioned a sum of Rs. 196 lakhs for the first phase of development of the yard which was expected to be completed by the end of 1956. The Government has already advanced for the development works Rs. 163.50 lakhs, of which the yard had spent Rs. 129.87 lakhs up to the end of February 1957.

The annual break-up of the expenditure was visualized as under:—

(Rupees in lakhs).

Year.	Acquisition of yard.	Development of yard.	Loans against ships built at yard.	Subsidy.	Total.
1951-52	89.6	10.0	182	—	231.6
1952-53	40.0	100.0	100	42	282.0
1953-54	40.0	110.0	50	60	260.0
1954-55	40.0	110.0	50	60	260.0
1955-56	40.0	145.0	120	70	375.0
1956-57	7.0	150.0	180	70	407.0
	206.6	625.0	682	302	1815.6

At the end of March 1957 it was announced that the Government had decided to construct a second ship-building yard. But neither the identity of the consultants nor the site for the shipyard had been decided at the time.

A mission from the U.K. which was to help to decide the location of the second ship-building yard completed its tour of possible sites towards the end of November 1957. Its report was expected by the end of March 1958.

Under a Cabinet reorganisation scheme, shipping became the sole concern of the Transport Ministry early in 1951. While matters of policy are dealt with in the Ministry, the newly created office of the Director-General of Shipping serves as an executive office, as distinct from the Secretary, for the co-ordinated implementation of policy. The office of the Controller of Indian Shipping, the Mercantile Marine Department and the Lighthouse Department have come under his administrative control.

The administration of the Merchant Shipping Acts and Rules made thereunder, at the ports is undertaken by the Principal Officers, Mercantile

Marine Department at the principal ports. The Assistant Director of Seamen's Welfare and his officers carry out the planning and execution of schemes and projects for seamen's welfare, scrutiny of the schemes and projects recommended by the Welfare Committees at the ports and administration of the Merchant Seamen's Welfare Amenities Fund.

National Welfare Board For Seafarers: In 1955, the Government of India constituted the National Welfare Board for Seafarers to advise the Government on all matters relating to the welfare of seafarers. The Board consists of Government members, representatives of port authorities, shipowners, seafarers and of voluntary societies dealing with welfare of seamen.

Employment Of Seafarers: The Government of India has taken over the work of recruitment of seafarers in Bombay and Calcutta for ensuring equitable distribution of the available volume of employment among the registered seafarers. For this purpose, a Seamen's Employment Office was set up in Bombay in June 1954 and in Calcutta in March 1955.

* See also under 'Government Industrial Undertakings'.

† The agreement is now terminated (April 1958).

STEEL INDUSTRY*

THE first successful and the most outstanding attempt to manufacture steel in the country on a commercial basis was that of the Tata Iron & Steel Co. which started its Steel Works at Sakchi in the year 1908. Pig iron was made in 1911 and the first steel ingot a year later.

The Indian Iron & Steel Company was started in 1918 at Hirapur about 4 miles from Asansol junction on the Eastern Railway for producing pig iron. Eighteen years later it floated another company, the Steel Corporation of Bengal to manufacture steel. Towards the end of 1952 the two companies were merged.

An iron works was started at Bhadravati in Mysore State in 1921 to which a steel plant was added in 1934. During World War II, a 25-ton basic furnace together with two small electric furnaces were installed.

The combined capacity of all these three factories in January 1957 stood at 2,221,200 tons of pig iron and 1,730,000 tons of finished steel.

The total capital investment is about Rs. 61 crores and the number of workers employed about 60,000.

The recent trend of production is given below :—

Year.	Pig iron.	Steel ingots.	Semi-finished steel.	(000 tons) Finished steel.
1949	1,528	1,352	1,105	930
1950	1,562	1,438	1,142	1,004
1951	1,709	1,500	1,249	1,076
1952	1,685	1,578	1,308	1,103
1953	1,655	1,507	1,230	1,018
1954	1,793	1,685	1,452	1,243
1955	1,757	1,704	1,457	1,260
1956	1,807	1,736	1,484	1,316

The production and imports in tons of finished steel from 1956 are visualized as follows :—

1956-57 :	1,335,000 and 1,850,000
1957-58 :	1,385,000 and 1,200,000
1958-59 :	1,510,000 and 600,000
1959-60 :	2,085,000 and 600,000
1960-61 :	4,080,000 and 200,000

Since 1924 there have been three main tariff enquiries into the case of the iron and steel industry—in 1924, 1926 and 1934. In between there were three supplementary enquiries and five special enquiries for the subsidiary industries in India. The scheme of protection sanctioned as a result of the tariff enquiry held in 1934 was to remain in force for seven years till 31st March 1941. Before, however, this protection expired, World War II intervened, and the protective duties on imported steel were continued from time to time by continuation Acts, the last extension being for a period of one year till 31st March 1947.

Alloy, tool and special steel were protected upto 31st Dec. 1955.

Since the war in 1939 the price and distribution of steel have been controlled by the Government. The permission for free sale of sheets and plates by Registered Stock-holders, which was withdrawn in August 1953 was again restored in May 1954. During 1954, production of finished steel reached the high level of 1.2 million tons and imports amounted to 3.5 lakh tons. Consequently, it was possible to allot larger quotas of steel to consumers. The total allocation amounted to 14.5 lakh tons as against 12.9 lakh tons in 1953. The demand of the Defence Services, Railways, Industrial Maintenance and Packing and Development Schemes in the Government and the private sector were mostly met in full.

The selling prices of steel were raised on the average by about Rs. 15 per ton with effect from March 29, 1954. The entire scrap price schedule

was revised, with certain classes going down and others rising in prices. Tinplate selling prices were reduced by about Rs. 50 per ton on April 1, 1954. Again in 1955, the selling price of steel was increased twice, first by Rs. 20 per ton on the average from July 1, 1955 and by Rs. 80 per ton from October 1, 1955.

The prices of all controlled categories of steel were raised by Rs. 70 per ton uniformly in May 1957. The increase followed the enhancement of of excise duty on steel from Rs. 4 per ton to Rs. 40 per ton with effect from 16th May 1957.

The retention prices of steel produced by the Tata Iron and Steel Co. were raised by an average figure of Rs. 32 per ton for 1952-53, Rs. 47 per ton for 1953-55 and Rs. 87 per ton for 1955-60 as a sequel to an inquiry by the Tariff Commission. The Tariff Commission submitted its report regarding steel retention prices payable to the Indian Iron & Steel Co. early in 1954. It recommended an increase of Rs. 66 per ton for the period 1953 to 1956. But the Government decided on an average increase of Rs. 59 per ton and fixed the period from 1953 to March 31, 1955 and a further increase of Rs. 15 per ton for 1955-60. Retention prices for tin plates were also revised during 1954 and on the recommendation of the Tariff Commission, they were fixed at Rs. 807 per ton for 1953 the same level as for 1952 and were reduced to Rs. 762.9 per ton for 1954-56.

The sale prices of pig iron was raised by Rs. 60 per ton with effect from 11th June 1956, in order to accommodate the enhanced retention prices payable to producers, to provide funds for sale at uniform prices at all rail heads, and to finance pig iron imports on a subsidised basis. Arrangements had been made to import 150,000 tons of pig iron on a subsidy basis during 1956-57. Actual imports were, however, lower.

RAW MATERIALS

The important raw materials are iron ore, coking coal, manganese ore, refractories made from magnesite, dolomite, chromite, fireclay, etc. and fluxing materials like silica, limestone and fluor-spar. Sulphur is also required for the manufacture of sulphuric acid.

In regard to most of these raw materials, India enjoys a favourable position. The deposits of iron ore are plentiful and of a superior quality, the average iron content of the ore being as much as 69 per cent as compared with 40 per cent in Europe and 60 per cent in the U.S. This is also true of manganese ore, magnesite and dolomite. Known deposits of coking coal are estimated at between 1,500 and 2,000 million tons.

The principal raw materials brought from abroad are spelter for galvanizing, tin for tin plates, ferro-tungsten, nickel, chromium and fluor-spar. Deposits of fluor-spar are located in Madhya Pradesh; but they are yet to be exploited.

As raw materials account for nearly 80 per cent of the cost of pig iron and 60 per cent of the cost of finished steel, they provide the explanation for the low cost of steel produced in India.

RE-ROLLING MILLS

The re-rolling mills manufacture a variety of products from blooms and billets. In the initial stage the revenue duty on imported billets was removed to encourage the industry and by 1939 there were 32 re-rolling mills with a productive capacity of 140,000 tons. Towards the end of 1942 when control over distribution of scrap and billets was introduced, out of the 130 mills then existing only 75 came within its purview. Later several mills were compulsorily closed under Government orders.

At the end of 1955, there were in existence 142 re-rollers—20 registered rollers and 122 unregistered re-rollers—with an annual capacity,

on a three-shift basis, of 335,000 tons and 383,000 tons respectively. Their output during the First Plan was :

	Registered (Tons)	Unregistered (Tons)
1951	73,179	23,510
1952	68,636	25,426
1953	83,349	28,554
1954	109,832	37,068
1955	120,306	58,336

In addition to these, a few are manufacturers of special products such as tin plates, wire and wire products, fish plates and spikes, bars and rods, bolts and nuts, rivets, spring steel, hoops and strips and are called "secondary producers". Their number during the First Plan was eight.

There are two spun pipe plants at the Kulti works of IISCO with a total capacity of 155,000 tons of piping a year.

In 1933-34 the Tariff Board stated that the re-rolling mills had a place in the iron and steel industry in India. The subsequent inquiries have revealed that a large proportion of the mills are inefficient and uneconomic in addition to such handicaps as the acute shortage of raw materials.

The main problem of the re-rolling industry is the shortage of billets and scrap. So, while the registered re-rollers could operate their plants on a single shift basis, the unregistered re-rollers hardly achieved 35 to 40 per cent utilisation of their capacity.

The re-rollers at places like Amritsar, Jullundur, etc. situated at considerable distance from the ports had to incur heavy freight charges which inflated their production costs. Relief was given to them from May 1954 through the fixation of a maximum freight charge at Rs. 60 per ton. Similarly in 1955-56 the Government extended the port prices to Jamshedpur and Burnpur to encourage the growth of industries in the vicinity of steel plants.

FIVE-YEAR PLANS

The Planning Commission has estimated that the demand for steel will rise from 2.34 million tons in 1952 to 2.8 million tons by 1957, while that for foundry pig iron will be stepped up by 100,000 tons to 700,000 tons.

At the beginning of the Plan, the following programmes of expansion were under execution :—

(1) The Mysore Works took up certain schemes for execution in the post-war period. These cover expansion of cement production and direct recovery of acetic acid from pyro-ligneous liquor, erection of two electric pig iron furnaces each capable of producing 100-110 tons of pig iron per day, and modernisation of iron ore mines and extension of forest tramways to ensure an adequate supply of wood fuel and mineral raw materials.

(2) The Steel Corporation of Bengal and the Indian Iron Company had at first projects under execution to increase the installed capacity for finished steel to 345,000 tons by 1953-54.

They had also formulated additional proposals to enable them to produce another 350,000 tons of finished steel and 400,000 tons of foundry iron at a cost of Rs. 31.7 crores spread over 1953-57.

(3) The Tata Iron and Steel Company formulated a programme of expansion and modernisation of their works at a total cost of about Rs. 22.40 crores apart from normal capital expenditure for replacement and maintenance which is estimated to cost additional Rs. 10.21 crores. A subsequent assessment of the investment in the Programme made it imperative to revise the overall expenditure to Rs. 42.6 crores. Their plan envisages the raising of the capacity for finished steel from 750,000 tons to 931,000 tons by 1957.

* See also under 'Government Industrial Undertakings'.

The above schemes were expected to produce the following results :—

	Unit	1950-51	1957-58
Rated capacity of finished steel ..	Tons '000	1,015	1,650
Production—			
Pig iron (for foundries) ..	"	350	750
Finished steel ..	"	976	1,650

The Plan had stipulated that the future expansion of the industry should provide for the production of an additional 150,000 tons to 200,000 tons of billets for the re-rolling industry. The expansion will also call for the creation of certain additional transport facilities involving an outlay of about Rs. 10 to Rs. 12 crores.

The Planning Commission was of the view that in spite of the expansion contemplated, there would be a short-fall of a million tons of steel and therefore, urged the establishment of a new iron and steel plant through collaboration between the State and an experienced Indian concern. The total expenditure on this during the period of the first Plan was expected to be about Rs. 25 crores and negotiations for participation by foreign concerns and the World Bank were advocated.

The expansion scheme of the Mysore Iron and Steel Works was reviewed in 1952-53 when it was found that the capital investment would be substantially higher than envisaged under the Plan. By the end of 1953 the first electric pig iron smelter went into production. The second went into production by December 1955.

During the review of the expansion scheme, it was felt that the Works should concentrate on high priced steels rather than mild steel products. So on the report of the T.C.M. experts, the broad development under the Second Plan was finalised. So far the Government has approved schemes relating to a cast iron spun pipe plant of 17,000 to 18,000 tons annual capacity estimated to require an investment of Rs. 45 lakhs; and a sintering plant for the utilisation of iron ore fines involving an expenditure of Rs. 45 lakhs. Altogether a sum of Rs. 138.86 lakhs was estimated to have been invested in the Works during 1951-56.

The expansion scheme under the Second Plan is estimated to cost about Rs. 6 crores and when completed the capacity of the Works is expected to reach one lakh tons of finished steel. Apart from this, the output of ferro-silicon is proposed to be expanded for meeting the requirements of all the steel plants.

By the end of 1953-54, the Indian Iron and Steel Co. completed its major extension plan, viz., the Morgan Mill, boiler plant and ash handling equipment. Its capacity for finished steel stood at 350,000 tons in 1956-58 as against 225,000 tons at the commencement of the first Plan. During the period, the actual investment on the developments is estimated at Rs. 15.27 crores.

According to the estimates made by the Tariff Commission, the production of saleable steel by this plant during the Second Plan is about 2.6 million tons at an overall investment of Rs. 42.53 crores.

As regards further expansion designed to raise capacity to 620,000 tons of steel and 500,000 tons of foundry pig iron per annum or alternatively 700,000 tons of finished steel and

400,000 tons of foundry pig iron per annum a loan of \$1.6 million dollars was obtained from the World Bank and a special advance of Rs. 10 crores from the Equalisation Fund and a loan of Rs. 7.9 crores (including Rs. 5 crores sanctioned in 1949) were sanctioned by the Government. The World Bank has given another loan of \$20 million to the Company for expansion purposes. The Company is now engaged on the Scheme for stepping up the production capacity from 3 lakh tons to 8 lakh tons of saleable steel by 1958-59.

The modernisation and expansion scheme of the Tata Iron and Steel Co., designed to increase capacity for finished steel from 750,000 tons to 931,000 tons in 1957-58 progressed satisfactorily. An investment of about Rs. 3,414 lakhs (out of a total capital expenditure of Rs. 4,260 lakhs for the entire programme) was made upto 1946. The Government of India has agreed to grant a special loan of Rs. 10 crores to assist the completion of the programme. The capacity of the company in 1957 was estimated around 8 lakh tons.

The Tatas had another project for the expansion of their iron and steel factory still further. This project would cost about Rs. 61.9 crores and take about 30 months to complete. The expansion would raise the total capacity to about two million tons. The Tata Iron and Steel Co. have entered into an agreement with the Henry J. Kaiser Co. of California, U.S.A. for this purpose.

The Company obtained a loan of 32.5 million dollars from the World Bank and nine U.S. and Canadian Banks in November 1957.

The production of two million tons that is aimed at would be reached about the end of 1959-60.

Early in 1957, the first stage of the expansion programme was reached when two 100-ton open hearth furnaces were put in operation. It is the aim that the present output of 8 lakh tons of finished steel should be raised to nine lakh tons in 1957-58, to 1.2 million tons in 1958-59 and finally 1.5 million tons in 1959-60 equivalent to two million tons of steel ingots.

The Tariff Commission envisages a total output of 5.9 million tons of steel with an investment of about Rs. 85 crores in 1961.

PUBLIC SECTOR

The year 1956 witnessed the finalisation of the schemes for three iron and steel plants in the public sector. One factory, which will have an initial capacity of one million tons of steel per annum, is located at Rourkela in Orissa State. An agreement was signed with the Krupp-Demag Combine for financial and technical collaboration in the execution of this major industrial project. Construction started in 1955.

An agreement has also been signed between the Governments of India and the U.S.S.R. to set up a steel plant with an initial capacity of one million tons of steel ingots at Bhilai in Madhya Pradesh. Eventually its capacity is proposed to be raised to one million tons of rolled products. Construction work on this is in progress.

A third plant is being set up in the public sector at Durgapur in W. Bengal. This will produce about 750,000 tons of light and medium sections and bars in addition to about 350,000

tons of pig iron. An Agreement has been reached with a consortium of British steel interests for the construction of this plant.

The total cost of all the three steel plants in the public sector was estimated as :—Rourkela Rs. 165 crores; Bhilai Rs. 115 crores; and Durgapur Rs. 115 crores. These estimates did not include the cost of the three townships, two ore mines, fees to the consultants and the cost of Indian and foreign experts. But mainly on account of an increase in the cost of material and labour in the countries from which plant was to be imported, the estimates have been revised. The Durgapur Plant is expected to cost Rs. 188 crores and the Rourkela Plant about Rs. 170 crores excluding customs duty and contingencies. The estimates for the Bhilai Plant, when revised, would be about Rs. 131 crores.

The steel expansion programme both in the public and the private sectors will thus entail an overall investment of over Rs. 525 crores.

According to the present time schedule, the Rourkela Plant and the Bhilai Plant are expected to go into production as a whole by the end of 1959. The Durgapur Plant would be in full production by middle of 1961.

Although all these plants have an ingot capacity of one million tons each, their layouts have taken into account the possibility of their further expansion in later years. Thus the Bhilai Plant provides for ultimate expansion to 2.5 million tons of ingots per annum and the Rourkela and the Durgapur Plants to about 1.25 million tons of ingots each. The actual output of saleable steel from these three steel plants and the Mysore Iron and Steel Works is placed at about 2 million tons in 1960-61.

To relieve shortage due to the wide gap that exists between the demand for steel and the supplies available from internal sources, there have been sizeable imports of steel amounting to about 177,000 tons in 1951, 195,000 tons in 1952, 247,511 tons in 1953, 387,401 tons in 1954 and 904,000 tons in 1955. Of this, the imports of steel during the years 1952-53 and 1953-54 under the T.C.A. programme amounted to 12,326 tons and 97,734 tons respectively, while imports in 1954 totalled 119,250 tons.

The aggregate imports of steel during 1956 amounted to 18 lakh tons, as against 9 lakh tons in 1955. Arrangements were concluded with various countries, including the U.S.S.R., W. Germany, Japan, the U.K., Poland, China, Belgium and Yugoslavia, for the supply of steel during the period 1956-58.

An agreement has been signed with the Soviet Union for the supply of one million tons of steel in the first three years of the Plan period.

The total output of saleable steel during the Second Plan period is estimated at about 11 million tons as against the overall requirements over the five years assessed by the Planning Commission at about 17 million tons. Production will be equal to the demand only in the last year of the Plan.

During the First Plan, exports of steel were mainly restricted to obligations arising from bilateral trade agreements and other inevitable commitments. With the completion of the steel development programmes, Indian steel should be available for export, especially to the whole of South-East Asia. The Second Plan envisages an export target of 2 lakhs to 3 lakhs tons of steel in 1960-61.

SUGAR INDUSTRY

THE sugar industry is the second largest industry in India, next only to the cotton textile industry, with a capital of about Rs. 73 crores of which about Rs. 30 crores is fixed capital and Rs. 42 crores working capital. The annual value of the industry's products for 1956-57 is about Rs. 165 crores.

It has a considerable influence on the agricultural economy in so far as it brings additional remuneration to those who take to the cultivation of sugarcane.

The economy of Uttar Pradesh and Bihar is particularly tied with the development of this industry since 70 per cent of the sugar production is in these two States.

The industry also produces a variety of raw materials for other industries such as power alcohol, paper, paper board and straw board.

The labour employed in sugar factories is roughly 140,000 skilled and unskilled workers, and about 3,500 University-educated men.

A Central Wage Board for the sugar industry was appointed in December 1957.

The growth of the industry is attributable to the protection given to it in 1932 for a period of 14 years. The import duty in pre-war years was as much as Rs. 9-4 per cwt. of which Rs. 2 represented the quantum of the excise duty on indigenous production. Protection was continued till 1950 but it was of an academic interest since imports were negligible from 1937.

In 1931-32, there were only 32 sugar factories in the country, but at the beginning of the First Five-Year Plan, there were 158 factories. This rose to 168 in the first year of the Second Plan (1956-57). Of these 19 factories had been lying idle for several years.

The industry has so far developed in the private sector, the only exception being some of the former Indian States in which the State Governments substantially contributed to its development by financial participation and in other ways.

The year 1952 was notable for another innovation inasmuch as the first factory was built by cane producers on a co-operative basis in the Ahmednagar District in Bombay State.

The Government of Bombay is giving active support and encouragement to the establishment of co-operative mills by contributing to the share capital of these concerns. In 1957 there were five units in the State. At the end of the Second Plan period there would be 18 producing two lakh tons of sugar annually.

The Government of India gave permission in 1954 for the establishment of 43 new sugar factories and substantial expansion of 42 existing factories. These new factories are expected to give an additional production of 725,000 tons. Subsequently, licences were given for the setting up of 11 more new mills and expansion of 27 existing units. Through these programmes, and the utilisation of two old plants, the sugar industry's capacity is expected to rise to 2.5 million tons in 1960-61. The proposal for setting up sugar refineries has been postponed indefinitely.

On the basis of an average operating season of 120 working days and assuming a recovery of 10 per cent sugar, the rated capacity of the 168 factories existing in 1956-57 is estimated to be over 1.96 million tons of sugar per annum. The industry in Uttar Pradesh and Bihar alone has a capacity to produce 1.15 million tons.

While announcing their sugar policy for 1953-54, the Government sanctioned an increase in the minimum price payable for sugarcane by vacuum pan factories to Rs. 1-7-0 per maund for gate deliveries and Rs. 1-5-0 per maund at rail centre.

The Government also decided that this increased price would be applicable to the 1954-55 season. This increase of 2 annas would have meant an increase in sugar prices of Rs. 1-4-0 per maund. But, in order to keep the fair price of sugar at the previous year's level of Rs. 27 per maund, the Government decided to discontinue the special additional excise duty of Re. 1 per maund of sugar imposed in the previous

year. The Government of India announced on November 18, 1954, its decision to apply on a voluntary basis a formula for linking the price of cane to that of sugar. Under this formula, the cane grower gets an extra price over and above the minimum price of Rs. 1-7-0 per maund. The aforesaid minimum price for sugarcane was continued during 1955-56 and 1956-57 also.

The State-wise production in the two seasons 1955-56 and 1956-57 is given below :—

States	Sugarcane crushed (1,000 tons)		Sugar produced (1,000 tons)	
	1955-56	1956-57	1955-56	1956-57
Uttar Pradesh	10,187	11,037	989	1,067
Bihar	3,289	3,218	319	308
Bombay	1,673	2,155	195	246
Andhra	1,457	1,473	138	137
Punjab	426	775	38	71
Madhya Pradesh	381	489	36	47
Mysore	566	451	57	45
Madras	608	656	54	79
Rajasthan	145	165	14	16
Kerala	87	134	8	12
Orissa	44	45	4	4
West Bengal	96	103	10	9
All India.	18,939	20,701	1,662	2,021

The size of the factories operating in the country varies widely from 50 tons to over 2,000 tons of cane crushing capacity per day. It is generally accepted that factories with a minimum cane crushing capacity of 800 tons per day should be considered as economic units. On this basis, only half the number can be considered economic.

RAW MATERIALS

The principal raw material is sugarcane. Its consumption in 1956-57 was over 20.7 million tons for a production of 2.02 million tons of sugar. Cane produces a little less than a tenth of its weight in sugar. Approximately 28 to 29 per cent of cane is consumed by sugar factories.

About 90 per cent of the acreage under cane is now under improved varieties; but the yield per acre has not improved materially and this accounts for the high cost of sugar.

The following table gives the details :—

Year.	Acre under sugarcane (000 acres)	Total output of sugarcane* (000 Tons)
1950-51	4,214	56,180
1951-52	4,792	60,680
1952-53	4,376	52,600
1953-54	3,498	43,673
1954-55	3,994	57,600
1955-56	4,565	59,820
1956-57	5,019	67,450

The first estimate of acreage for 1957-58 is 5,022,000.

* In terms of the weight of the cane.

PRODUCTION

Price of sugar is not controlled now. But there was control from 1942 to October 1952 except for a brief period in 1947. During this period the controlled price of sugar was linked with the minimum price for cane fixed for Uttar Pradesh and Bihar. Besides the excise duty, a provincial cess was also levied. Since 1944 the floor for cane prices has been and is being slowly lowered.

Since gur was excluded from the orbit of control, the parity price for gur was always higher.

The production capacity of the industry which stood at 17.40 lakh tons of sugar at the end of the first Five Year Plan is to be extended to 25

lakh tons by the end of 1960. Licences have been granted for expansion of 69 existing factories and for the establishment of 54 new factories including 39 co-operative factories.

The Plan for the industry for 1957-58 aims at a production target of 2.16 million tons, the estimated production during 1956-57 being 2.02 million tons. The investment will be about Rs. 24 crores, of which Rs. 19 crores will be spent on the setting up of 22 new factories and Rs. 5 crores on the expansion of 17 existing factories.

The details of sugar production are given below :—

Year Ended October	Installed capacity (Lakh Tons)	Sugar output (Lakh Tons)
1951	15.40	11.16
1952	15.40	14.97
1953	15.40	12.94
1954	15.40	10.01
1955	15.40	15.90
1956	17.40	18.62
1957	19.60	20.29

CONSUMPTION

The per capita consumption of sugar in the pre-war period was 6.6 lbs. During 1950-51, on the basis of a production of 1.1 million tons of sugar being consumed by a population of 355 million, the per capita consumption worked out at about 7 lb. In addition, gur amounting to three times the quantity of sugar is also consumed in the country so that the total per capita consumption is not much behind that of other countries.

On the basis of a population of 365 millions and of a production of 1.5 million tons of sugar in the country by utilising the entire rated capacity available, the per capita consumption of sugar was expected to be increased to 8.7 lbs. by 1956-56.

This quantity might be deemed sufficient under present economic conditions, according to the Planning Commission. Actually, the per capita consumption of sugar during 1956-56 was 11.1 lbs. and, in 1956-57, it was 12.08 lbs.

The main problem is of cane supply. The factories in Uttar Pradesh and Bihar are in a number of cases situated so near each other that there is competition between them for cane. The industry has also been complaining of the prices fixed for cane. Several factories have not enough covered storage facilities for molasses.

The First Five-Year Plan for cane cultivation envisaged an increased output equivalent to 703,000 tons (in terms of *gur*) of which Uttar Pradesh was expected to account for 410,000 tons. The additional production targets (in tons) for other States were: Bombay 80,000, Madras 80,000, Punjab 70,000, Bihar 50,000 and other States 13,000. The targets were however, not fulfilled. The net total increase in the output of cane during the plan period was only 240,000 tons.

The development schemes to increase the per acre yield, which were started during the First Plan period with a total expenditure of

about Rs. 80 lakhs were extended year by year in view of the encouraging results. Out of a target of 10 lakh acres to be covered during 1955-56 under the campaign for intensive manuring, 8.08 lakh acres were covered with 10 lakh maunds of ammonium sulphate. The target for 1956-57 was 15 lakh acres of which 13.81 lakh acres had been covered by the end of September 1956. The total cost of sugarcane development schemes came to Rs. 10.45 crores.

Another part of the development programme should consist of enabling some of the factories to shift to areas or States where a plentiful supply of cane is assured. These and other remedial measures should enable the industry which has a productive capacity of over 1.0 million tons of sugar to produce by 1960-61 about 2.5 million tons as against 1.12 million tons in 1950-51 and 1.86 million tons in 1955-56.

With the removal of all quantitative restrictions on the consumption of sugar in 1952-53, the demand for it rose steeply to about 17 lakh

tons per annum. The total quantity of sugar consumed during the 1956-57 season is estimated at 20 lakh tons.

During 1956-57, a quantity of 200,000 tons of sugar was allowed to be exported; the quantity actually shipped was about one lakh tons.

The policy for the 1957-58 sugar season is almost the same as before: no statutory control, factories to keep 25 per cent of sugar produced as reserve, formula linking price of sugarcane to sugar, and price of cane Rs. 1.7-0 per maund at gate and Rs. 1.5-0 at rail centre.

The production in 1956-57 season was the highest at 20.2 lakh tons. It was due to larger supplies of cane and extended season. The average All-India recovery of sugar from cane suffered some setback, the figure for 1956-57 being 9.74 per cent., as against 9.83 per cent in 1955-56.

TEA INDUSTRY

TEA ranks after jute as the second largest item in India's export trade. It earns every year a foreign exchange of about Rs. 140 crores and a revenue of about Rs. 19 crores from export duty and Rs. 4 crores from excise. The State Governments also derive considerable revenue from the agricultural income-tax on tea grown within their jurisdiction as well as from the sales tax, carriage tax, octroi, etc. on the commodity.

The indigenous plant growing in wild conditions was first discovered in Assam in 1820 and 15 years later the East India Company started an experimental garden which was sold to the Assam Company in 1840. In less than 100 years India became the tea shop of the world.

There are about 6,840 registered gardens with a total area of nearly 800,000 acres under tea. Of these, over 582,119 acres are in Assam and West Bengal, while Madras, Mysore and Kerala account for nearly 174,462 acres, and the rest are in Bihar, U.P., Tripura, Punjab and Himachal Pradesh.

The industry as a whole gives employment to a labour force of almost 1.2 million.

There are over 700 joint stock companies engaged in the tea industry. The total paid-up capital in the industry as a whole is about Rs. 74 crores. The number of Indian companies is about 540 with a paid-up capital of about Rs. 25 crores.

The annual production of tea is about 665 million lbs. of which about 623 million lbs. are exported. India meets over 50 per cent of the world demand for tea.

With the cessation of bulk buying in April 1951 and the re-opening of London auctions, the tendency was for better types of tea to do well at the auctions.

By the end of 1951 the sellers' market was at an end and common teas, which were the worst to be affected, fetched only Rs. 1.3 a lb. at the end of March 1952 as compared with Rs. 1.14 a year before. Simultaneously production costs began to soar and in 1952 the extension of the Minimum Wages Act to the plantation industry prevented many gardens from covering their costs out of prices.

In May 1952 an official team inquired into the problems and recommended certain measures for temporary relief. These included deferred payment of excise duty, guaranteeing the banks of a portion of the loans to gardens, relaxation of provisions in the matter of advance payment of income-tax and supply of more wagons. The labour also agreed to forego certain concessions. Thus a substantial cut in production costs was effected by the end of 1952.

By this time tea prices had again begun to look up but to make sure of the recovery the industry decided to effect a voluntary cut of 8 per cent in production and pay more attention to quality. The crisis had forced the closure of over 100 estates; but as a result of the above measures, the industry managed to turn the corner.

The latter part of 1953 saw a dramatic change from the weak markets of the previous year and since then prices have boomed to record levels in the world markets. The whole of the benefit of this change of fortunes did not, however, accrue to tea plantations because apart from additional costs arising from the operation of the Plantations Act, the Government sought to take an increased share in the proceeds of the industry.

The total production in 1954 was 644 million lbs. and that for 1955 was 663 million lbs. The production in 1956 was 664 million lbs.

The estimate for the 1957 season is 726.56 million lbs.

Under the International Regulation Scheme the export quota for India was 470 million lbs. But in 1954 the Government permitted an export of only 464.9 million lbs. The International Tea Agreement expired on March 31, 1955 and was not renewed. For the 1955-56 season the export permitted was 480 million lbs. which was about 69.3 per cent of the crop basis of estates.

The tea export quota fixed for 1956-57 was 453.3 million lbs., representing 63.4 per cent of the total estates' crop basis. For 1957-58 season the quota fixed is 460.96 mln. lbs. This is about 63.44 per cent of the crop basis for the year.

The rates of excise duty on tea are:—

	In Np per lb.
Loose tea	6.25
Package tea (converted from duty-paid loose tea)	18.75
Package tea	25.00

The export duty is regulated according to price, and may therefore vary from time to time. The duties as fixed are given below. The figure in brackets shows the price per lb.:

1956: January: As. 6 (Rs. 3-1-5); February: As. 6 (Rs. 2-14-1); March: As. 6 (Rs. 2-11-4); April: As. 6 (Rs. 2-13-4); May: As. 6 (Rs. 3-4-3); June: As. 6 (Rs. 3-5-0); July: As. 6 (Rs. 2-13-11); August: As. 6 (Rs. 2-8-5); September: As. 6 (Rs. 2-11-5); October: As. 6 (Rs. 3-3-9); November: As. 6 (Rs. 4-1-11); December: As. 8 (Rs. 4-3-0).

1957: January: As. 8 (Rs. 4-3-0); February: As. 6 (Rs. 3-15-0); March: As. 6 (Rs. 3-6-1); April: 37.6 nP (Rs. 2-64); May: 25 nP (Rs. 2-41); June: 25 nP (Rs. 2-47); July: 25 nP (Rs. 2-43); August: 38 nP (Rs. 2-55); September: 38 nP (Rs. 2-74); October: 38 nP (Rs. 3-48); November: 38 nP (Rs. 3-30); December: 38 nP (Rs. 3-38).

The following table shows the growth of the industry from 1927 to 1957 :—

Year	Area under tea in thousands of acres	Production in millions of lb.	Year	Area under tea in thousands of acres	Production in millions of lb.

TEXTILE INDUSTRY

COTTON

The statistical position of cotton in the Indian Union is summed up in the following table :—
(In lakhs of bales)*

	1953-54	1954-55	1955-56	1956-57
Opening Stock	17.96	20.0	26.7	21.66
Production	44.70	54.0	46.0	49.70
Imports	6.90	6.2	5.0	6.07
Total Supply	69.56	80.2	77.7	77.33
Mill Consumption	46.00	47.7	46.0	52.55
Exports	1.50	3.1	5.0	3.01
Extra Factory Consumption ..	2.70	2.7	2.7	2.20
Total Distribution ..	50.20	53.5	53.7	58.76

According to the information furnished by the trade, the total cotton supply, available in the 1956-57 season was estimated at 77.33 lakh bales, of which 71.26 lakh bales were Indian cotton, including 24.26 lakh bales of carryover with both the trade and the mills on August 31, 1956. The total mill consumption was estimated at 52.55 lakh bales (46.75 lakh bales of indigenous cotton and 5.80 lakh bales of foreign varieties). Exports amounted to 3.01 lakh bales and the extra factory consumption 2.20 lakh bales, thereby allowing a carryover for the 1957-58 season at 18.57 lakh bales. The 1956-57 season therefore started with substantially bigger stocks.

The latest trade estimates of the production of cotton in 1957-58 is 52 lakh bales.

The sharp recession in cotton prices resulted in the relaxation of the cotton control in the field of movement and the Government had to reiterate in March 1952 its assurance about supporting the floor prices. The prices later rallied and, encouraged by the floor remaining untouched, the Government raised the floor for 1952-53 season by Rs. 50 with a view to providing a fresh stimulus to cotton growing.

In view of the satisfactory supply position, forward trading in cotton was permitted from December 1952 within the ring of the East India Cotton Association.

The supply position of cotton having improved, a number of control measures were further relaxed. Movement controls were removed and the three-tier system of licensing cotton dealers which prevailed in 1951-52 was replaced by a two-tier system. Forward trading in cotton was allowed to be continued during the 1955 season, subject to certain measures proposed by the Forward Markets Commission. At present, the only real control is of the floor and ceiling prices. On December 23, 1955 the Forward Markets Commission suspended forward trading in cotton on grounds that prices had shot up in speculative business.

However, the market was re-opened on June 18, 1956. The by-laws of the East India Cotton Association were suitably amended to ensure smooth functioning of the market. There were two hedge contracts, one with Jarilla 25/32" Fine as its basis and the other with Vijay 27/32" Fine as basis—as against the former single hedge contract with Jarilla 15/16" Fine as basis. Secondly, the delivery months for the contracts were advanced. Thirdly, the margin system was tightened up and a provision for special cleaning was introduced. Fourthly, the provisions regarding the reporting of information by members were made more comprehensive.

Besides, the Government of India announced on June 27, 1956, that the floor and ceiling prices of cotton for the 1956-57 season would remain unchanged from the 1955-56 season.

The floor and ceiling prices for Jarilla Fine 25/32" are Rs. 495 and Rs. 820 respectively and for Vijay 27/32" Rs. 610 and Rs. 970 respectively.

In the sphere of trade the Government announced that the licensing for the import of raw cotton of stapling 1 1/16" and above from U.S. would be suspended. Any further imports would have to be made under the American Aid Programme. Later, it was decided that applications for licences for import from soft currency area would be entertained only for Karnak and Menoufi cotton from Egypt stapling 1 1/16" and above. Subsequently, on August 2, the Government stopped the licensing of imports of raw cotton from the United States under the aid programme.

Import policy during the cotton season 1956-57 was influenced, to a large extent, by the availability of foreign exchange. The acute shortage of foreign exchange forced the authorities to continue the restriction on cotton imports, especially from the sterling area.

Among the foreign cotton affected by this restriction, East African growths was the most important.

Of the total imports of 593,390 bales during the period 1st September 1956 to 17th August 1957, East Africans accounted for only 130,323 bales, as against 222,759 bales during the same period last season out of a total of 592,732 bales.

The position in regard to Egyptian cotton has, however, eased a little, thanks to the Indo-Egyptian cotton agreement which provided for import of 40,000 bales of Egyptian cotton on rupee account. Almost the entire quantity permissible under this agreement was absorbed by the end of the season.

American cotton was more easily available, thanks to the U.S. Aid Programme. Indian mills availed themselves of the facilities offered under the Indo-U.S. trade agreement and as a result the share of U.S. cotton in imports increased substantially. In fact, U.S. cotton which occupied only an insignificant position in imports last season, topped the list in the year under review. For instance, imports of U.S. cotton during the period 1st September to 17th August, aggregated 342,497 bales, as compared with 14,783 bales during the same period last season.

The Government of India fixed the floor and ceiling prices of Indian cotton during the 1957-58 season at the same level as those for the 1956-57 season. The floor and ceiling prices for Jarilla with stapling 25/32" are Rs. 495 and Rs. 820 per candy and those for Vijay with stapling 25/32" Rs. 565 and Rs. 925 per candy.

Trading in the new crop contract commenced on 23rd June 1957, I.C.C. Jarilla (basis Fine Mogial 25/32") standing at Rs. 690.

For the 1957-58 season, according to the amendments effected to the By-laws of the E.I.C.A. there is only one hedge contract, called

the Indian Cotton Contract. The basis of the contract is Fine M.G. Mogial Jarilla 25/32" staple. Delivery months are March, May and August. Trading in the new crop hedge contract will be subject to the amendments made to the By-laws of the Association and will be within the floor and ceiling prices fixed by the Government for the 1957-58 season, i.e., Rs. 495 and Rs. 820 for Fine Jarilla 25/32" staple, the same as in the previous season.

COTTON MILL INDUSTRY

The cotton textile industry, which is the largest single industry in the country, has made rapid strides during its existence of a century. India holds the third place among the countries of the world in its capacity for yarn and cloth based on mechanical equipment and stands second on the basis of cotton consumption.

In addition to providing means of livelihood for nearly 10 million handloom weavers, the mill industry provides direct employment to more than 798,000 workers.

The total number of mills in the country in Aug. 1957 was 499, the number of spindles installed 12.9 million, of looms 206,126, the number of persons employed 798,599 and the cotton consumed 2,802,800 candles.

The capital invested is estimated at Rs. 122 crores, and the annual value of the output amounts to Rs. 395 crores.

The record of the industry during the First Five-Year Plan is impressive. Not only has it achieved the target of cloth output set in the Plan but it has exceeded it. In 1956, the production of cloth amounted to 5,306 million yards as against the target of 4,700 million yards. The output of 1,671 million lb. of yarn in the year was higher than the target of 1,640 million lb. The production of handloom cloth was only 1,509 million yards as against 1,700 million yards in the Plan while that of powerloom cloth was 278 million yards. Altogether, the cloth production was 7,093 million yards compared with 4,618 million yards at the beginning of the First Plan.

Out of this output, 804 million yards were actually shipped as against 893 million yards shipped in 1955. Of this, mill piecegoods accounted for 747 million yards (836 million yards in 1955) and handloom cloth 57 million yards (57 million yards in 1955).

The various fiscal measures adopted by the Government and the constitution of an export promotion council are expected to assist the industry in stepping up exports. A scheme of voluntary inspection of cloth meant for export has also been instituted.

Export of yarn continued to be strictly regulated.

The Textile Enquiry Committee, also known as the Kanungo Committee, which was asked to make a comprehensive enquiry into the various sectors of the cotton textile industry, namely, the mills, the powerlooms and the handlooms, submitted its Report in September 1954 in which it made a number of recommendations towards their improvement.

The Committee opposed the expansion of the weaving side of the mill industry, but suggested the replacement of plain looms with automatic looms at the rate of 5,000 a year for the next 20 years.

It recommended that an export target of 1,000 million yards a year should be maintained.

It estimated that by 1960 the per capita cloth consumption in the country would increase to 18.5 yards and that with an estimated population of 400 million, the consumption would rise to about 7,400 million yards by that year.

The Committee was of the view that an extra production of 1,800 million yards would be required to meet the internal demand in 1960, which should be achieved through the improved type of handloom and powerloom industries.

It suggested a phased programme for the conversion of the 12 lakh active handlooms in the country into semi-automatic looms or powerlooms to make the handloom technically more efficient. It stated that under the programme, three lakh handlooms should be converted into 2-13 lakh improved handlooms and powerlooms over a period of six years, and the conversion of the remaining looms should be carried out in two or three five-year periods, so that in 15 or 20 years' time the entire industry would have been converted into decentralised improved handloom or decentralised domestic powerloom industry.

On the question of reservations of the field of production, the Committee was of the opinion that the existing reservations in favour of handlooms or improved handlooms and domestic powerlooms must continue upto 1960 only.

SECOND FIVE-YEAR PLAN

The programme for the development of the cotton textile industry under the Second Five-Year Plan was announced by Mr. T. T. Krishnamachari, who was at the time Commerce and

Industry Minister, Government of India, at New Delhi on June 18, 1956. By the end of 1960-61, the *per capita* consumption of cloth in the country is expected to reach 18.5 yards, in addition to the export target of 1,000 million yards a year. This would involve a production of 8,400 million yards. But the present production of all the three sectors is about 6,700 million yards a year. Therefore, the country would require an additional quantity of 1,700 million yards of cloth.

This quantity has been allocated thus: 700 million yards for handloom industry from mill yarn; 300 million yards for handloom industry from Ambar Charkha yarn; 200 million yards for powerlooms to be introduced in the handloom sector; 350 million yards for mill sector for export purposes, leaving an allotted balance of 150 million yards.

The quantity of 850 million yards for export and allotted to the mill sector is required to be produced through the installation of 18,000 automatic looms. It has also been decided to allow the installation of 35,000 powerlooms spread over 1956-57 and 1957-58.

By June 1956, over 10,000 looms had been allotted. A further allocation of 6,000 looms was made in February 1957.

Certain conditions were laid for the allocation.

It was laid down that all the cloth produced on these looms would be earmarked for export and the allocation of looms was being made on a guarantee being given by the mills that in addition to 87½ per cent of their past exports all the cloth produced on these looms would be exported and that any cloth sold internally therefrom would be subject to penal excise duty as given below:

If the cloth diverted into the internal market from the export quota does not exceed five per cent, of the export quota, six naye paise per square yard.

If the cloth diverted into the internal market exceeds five per cent. of the export quota but does not exceed 10 per cent. thereof: On the quantity which does not exceed five per cent. of the export quota, six naye paise per square yard and, on the balance, nine naye paise per square yard.

If the cloth diverted into the internal market from the export quota exceeds 10 per cent. of the export quota: On the quantity which does not exceed five per cent. of the export quota, six naye paise per square yard; on the quantity which exceeds five per cent. of the export quota but does not exceed 10 per cent. thereof, nine naye paise per square yard; on the balance, 12 naye paise per square yard.

The following table gives details about the distribution of mills in India, as on 31st August 1957.

Where situated	Number of Mills	Number of Spindles Installed	Number of Looms Installed	Average No. of Hands employed	Approximate Quantity of Cotton consumed in cwts.
Bombay City and Island (a)	66	3,180,954	64,134	212,608	4,671,086
Ahmedabad (b)	71	2,056,174	41,580	130,658	2,489,662
Rest of Enlarged Bombay State (c)	75	1,704,864	33,621	117,352	2,358,629
Total: Bombay State	212	6,941,992	139,335	460,618	9,519,377
Rajasthan (d)	11	162,692	3,412	11,795	363,664
Punjab (e)	7	131,156	1,650	6,053	212,415
Delhi (f)	7	170,032	3,842	14,355	564,809
Uttar Pradesh (g)	20	830,212	13,998	52,933	1,347,556
Andhra Pradesh (h)	15	164,116	1,669	10,562	296,975
Madhya Pradesh	20	507,900	12,447	47,405	1,118,775

Orissa	2	52,848	864	4,317	109,711
West Bengal (i)	40	580,468	10,862	46,115	805,910
Madras	118	2,647,784	8,481	101,159	2,878,393
Kerala	14	179,492	1,609	9,393	229,208
Mysore (j)	18	437,998	4,955	27,083	645,274
Pondicherry	3	75,464	2,155	5,977	114,576
Grand Total	*499	12,906,622	206,126	798,599	18,219,600

* This number does not include 34 mills which have either been registered and or are in the course of erection. (a) One mill not working. (b) One mill not working. (c) Seven mills not working. (d) One mill not working. (e) One mill not working. (f) One mill not working. (g) Five mills not working. (h) One mill not working. (i) One mill not working. (j) One mill not working.

The actual production of yarn and cloth is as follows:—

Year	Yarn in 000 lbs.	Cloth in 000 yards.				
		Coarse	Medium	Fine	Superfine	Total
1949	1,359,119	452,068	2,309,169	809,240	833,726	3,904,203
1950	1,174,220	421,819	1,781,436	1,200,453	261,383	3,665,091
1951	1,303,861	363,561	2,080,858	1,347,946	283,866	4,076,186
1952	1,450,000	604,000	2,709,000	1,194,000	195,000	4,802,000
1953	1,510,000	599,000	2,136,000	839,000	304,000	4,878,000
1954	1,565,000	939,110	2,565,000	461,280	350,100	5,011,000
1955	1,637,000	592,510	2,747,850	458,270	300,120	5,098,000
1956	1,671,304	719,000	2,796,156	444,033	347,295	5,306,584

In 1957 the production of cloth was 5,315 million yards, and of yarn 1,779 million pounds.

† Pre-reorganization.

On the basis of the full rated capacity of the industry, about 50 lakh bales of cotton are required compared to the actual indigenous supply of 46 lakh bales (commercial crop) in 1955-56. During 1956 the cotton consumption by mills was 49.91 lakh bales of which Indian cotton accounted for 43.72 lakh bales and foreign cotton for 6.19 lakh bales.

The estimates of the other important raw materials are given below:—Card clothing—3,500 sets; Bobbins—425,000 gross; Shuttles—8,300 gross; Reels—800,000 sets; Reeds—400,000 pcs.; Pickers—37,500 gross; Mutton tallow—3,600 tons; Starch—36,000 tons; Coal tar dyes—5,900 tons; Hydro-sulphite of soda—2,000 tons; Zinc chloride—3,000 tons; Caustic soda—15,000 tons.

SMALL-SCALE INDUSTRY

It is estimated that there are 2,850,000 handlooms and 23,800 powerlooms in existence in the country. About 65 per cent of the powerlooms are located in Bombay State† though the handloom industry has witnessed the largest development in Madras State†.

The regional distribution of powerlooms and handlooms, together with their estimated requirements of yarn is given below :—

State†	No. of Powerlooms	Annual yarn Requirements (m. lb.)	No. of Handlooms	Annual yarn Requirements (m. lb.)
Bihar	147	0.72	196,218	47.10
Bombay	15,742	76.82	161,255	38.70
Madhya Pradesh	1,123	5.48	105,000	25.20
Madras	1,415	6.91	841,140	201.87
Orissa	10	0.05	129,686	31.12
Punjab	1,339	6.53	46,357	11.13
Uttar Pradesh	342	1.67	253,311	60.69
West Bengal	1,354	6.61	97,151	23.32
Hyderabad	167	0.81	149,000	35.76
Madhya Bharat	24	0.12	18,500	3.72
Mysore	1,803	6.36	35,000	8.40
Rajasthan	36	0.18	28,000	6.24
Saurashtra	269	1.40	20,000	4.80
Travancore-Cochin	10	0.04	80,167	19.23
Ajmer	10	0.05	2,016	0.48
Delhi	481	2.35	750	0.18
Other Areas	28	0.01	190,164	166.46
Total	23,800	116.11	2,851,685	684.40

† Pre-reorganization.

The actual production of handloom and powerloom cloth in the years 1950 to 1956 is given below :

Year	Handloom	Powerloom
1950	805	148
1951	850	157
1952	1,109	204
1953	1,200	221
1954	1,318	243
1955	1,480	273
1956	1,509	278

According to the Government's textile policy referred to above, 200 million yards of the additional requirements have been allotted for production from powerlooms to be introduced in the handloom sector. A number of State Governments have already indicated their desire to instal these looms totalling about 35,000.

HANDLOOM CLOTH

The handloom industry is by far the biggest cottage industry in India and had been going through a difficult period during the last two years. Some time ago its main handicap was lack of sufficient yarn. Supply of free yarn has, however, been increasing steadily and the monthly average for 1954 is 85,015 bales as compared to 72,000 bales in 1953. On the basis of yarn supply, handloom production is estimated at 1,318 million yards in 1954. Exports of handloom cloth in 1954 amounted to about 56 million yards as compared to 62 million yards in 1953.

The years 1955 and 1956 maintained the upward trend in this sector. The output was 1,480 million yards in 1955 and 1,509 million yards in 1956. During 1956 India exported 59.8 million yards. In 1955 it was about 55.8 million yards.

Under the Second Five-Year Plan, out of the additional quantity of 1,700 million yards of cloth required to meet the total estimated demand for 8,400 million yards in 1960-61, as much as 1,000 million yards have been allocated to this sector. This is in addition to the present annual output of 1,500 million yards. Of this additional quota of 1,000 million yards, 700 million yards will be produced from mill yarn and 300 million yards from Ambar Charkha yarn.

The Government of India sanctioned a sum of Rs. 10.9 crores to State Governments for the development of the handloom industry from September 1953 up to March 31, 1956.

The State Governments have been asked to establish necessary machinery to collect statistics of handloom cloth production. Meanwhile such production is estimated on the basis of yarn deliveries to the States.

The number of persons engaged in khadi production is about 700,000; and annual sale is about Rs. 3 crores.

The following measures have been adopted to improve the export trade in handloom cloth :

1. Exports of handloom cloth and manufactures thereof are allowed under O.G.L. and no export duty is levied on such cloth;
2. Representative varieties of handloom cloth have been supplied to the Indian Commercial Representatives for being exhibited in show-rooms;
3. Participations in International Trade Fairs

and Exhibitions are arranged for by the Government; 4. An Export Marketing scheme has been sanctioned by the Government and is being implemented by the Madras State Handloom Weavers' Co-operative Society.

AMBAR CHARKHA*

A significant development of the year 1955-56 was the emergence of the Ambar Charkha, an improved hand-operated spindle. In April 1956, the Government of India set up a special committee under the Chairmanship of Mr. S. S. Khara, Secretary, Union Ministry of Production, to investigate the economic and technological aspects of the Ambar Charkha. The Committee submitted its interim recommendations to the Government two months later and the final report was placed before the Lok Sabha on June 23, 1956. This was published in August 1956.

The Committee recommended the introduction of 75,000 Charkhas for 1956-57 and about 200,000 for 1957-58. The Government accepted the scheme for 1956-57. Also, 15 more training centres and 100 more production-cum-training centres were opened this year. About 50 work-shops and five main and sub-production centres were also set up. The Union Government sanctioned over Rs. 3.27 crores for implementing the programme.

Khadi and Village Industries Commission : In September 1956, Parliament adopted a Bill for the establishment of a Commission for the development of Khadi and Village Industries. This body has powers to plan as well as implement schemes for the extension of khadi and village industries. At the same time, the All-India Khadi and Village Industries Board functions as a panel advisory body.

IMPORTS AND EXPORTS

The following table gives the sea-borne export trend of all cloth :—

Year	Twist and Yarn		Cloth	
	Million lb.	Rs. in crores	Million yd.	Rs. in crores
1952-53	17.9	4.4	618.75	61.46
1953-54	22.2	4.7	765.5	63.1
1954-55	1.2	0.3	819.0	63.15
1955-56	23.1	4.21	740.0	56.60
1956 (April to Dec.)	6.92	1.50	567.08	42.71

The year 1952 witnessed the emergence of a buyers' market in cotton textiles and the accumulation of unsold stocks was accompanied by a fall in prices. As a result, there was a progressive relaxation of control measures and restrictions. In October the prices of a number of varieties including dhooties, sarees and mulls were de-controlled and the policy was further extended

to coatings, twills, etc. with effect from January 1, 1953, leaving about one-third of the mill production subject to price control. With effect from July 1, 1953 the cloth control was totally abolished.

The production control was used towards the end of 1952 for helping the handloom industry by reserving the production of certain varieties

(including sarees woven of dyed yarn, dhooties with borders of certain width, lungies, sarongs, etc.

In the post-war period, foreign exchange difficulties have resulted in shutting out imports of cotton textiles except (a) umbrella cloth and special fabrics; (b) yarn of 80s and above required for handloom purposes; and (c) yarn of 30s and 60s for manufacture of heads and reeds.

* See also under 'Cottage Industries'.

While India was an important importer of cotton goods for several years she has now become an important exporter. In January 1953 the Government provided a stimulus to exports by reducing the export duty on coarse and medium cloth from 25 per cent *ad valorem* to 10 per cent. Later at the end of 1953 the 10 per cent duty on medium cloth was also abolished. In 1955, import duty on cotton textiles was reduced following the British Government's representation that Indian import duties were prohibitive.

The Karve Committee on Village and Small-Scale Industries (Report published in October 1955) estimates the country's aggregate cloth requirements at the end of the second Five-Year Plan (1960-61) at 8,450 million yards, including 1,000 million yards for export as against the 1955 output of 6,750 million yards. The Committee wanted the entire additional demand of about 1,700 million yards to be met by expansion of handloom production. The mill industry, however, was opposed to this view and suggested a vigorous policy of rehabilitation and modernisation of plant and equipment in mills in order to undertake additional production.

DEVELOPMENT PROGRAMME

Cotton cloth (mill-made and handloom) available for consumption per head averaged 15 to 16 yards in pre-war years. The consumption in 1951-52 was, however, estimated at 12.6 yards as against 9 yards in 1950-51, and has been fixed at not less than 13 yards for 1952-53 so as to be progressively increased to 15 yards by 1955-56.

To enable the handloom industry to meet the consumer resistance, the Government constituted an All India Handloom Board in December 1952.

In regard to the mill industry, it was found that apart from cotton shortage, there were about

150 inefficient and uneconomic units. Another important problem related to diminishing productivity.

Excise Duties. On August 31, 1956, the Government of India announced its decision to raise the excise duty on four varieties of mill cloth with effect from September 1, 1956. The rates of increase are one and a half annas per sq. yard on superfine cloth (i.e., the excise duty of 4 annas per sq. yd.), one and a quarter anna per sq. yd. on fine cloth (i.e., three annas per sq. yd.), one anna per sq. yd. on medium cloth (i.e., two annas), six pies per sq. yd. on coarse varieties other than dhories and sarees (i.e., one and a half annas per sq. yd.). These duties are estimated to bring in an additional revenue of Rs. 17.5 crores during the seven months in 1956-57.

Export Promotion Council. The Council opened its first office in Baghdad in February 1956 and then other offices in Singapore, Lagos, Rangoon, Aden and Mombasa. Besides, it has taken part in many exhibitions—Industrial Exhibitions in New Delhi, the Leipzig Fair, the Pakistan Trade Fair and the Milan Samples Fair. It has undertaken the publication of a handbook known as *The Indian Textile Industry*. The Council has also brought about an overseas edition of its fortnightly *Bulletin*.

Indo Burma Textile Deal. During 1955-56 India and Burma signed an agreement, under which India was to supply Burma cotton textiles worth Rs. 19 crores against payment of American cotton which the U.S. had contracted to sell to Burma.

The following table summarises the programme of development of the whole industry as approved by the Planning Commission for the Five-Year Plans:—

	Unit	1952-53	1955-56	1960-61
Rated Capacity of Mill Industry				
Spindles	No.	11,175,283	12,051,209	13,631,209

Cloth	m yd.	1,000	873	1,000
Cotton Needed—				
	m bales	4.5	4.9	6.1

* Including 18,000 automatic looms

TOBACCO INDUSTRY

INDIA is one of the three major producers of tobacco in the world, the other two being U.S.A. and China. Tobacco is also an important item in India's foreign trade.

The area under tobacco in 1956-57 was 1,007,000 acres and the production in tons was 308,000.

The more important tobacco growing States in India are Andhra, Madras, Bombay, U.P., Mysore and Bihar.

The tobacco plants are mainly of two varieties—*nicotiana rustica* and *nicotiana tabacum*. The first has a higher nicotine content and is used in hookahs, for purposes of chewing and in making snuff. The second has a smaller nicotine content and is used in the manufacture of cigarettes, cigars and cheroots.

There are six main tobacco producing areas in India—the Guntur area in Andhra Pradesh, the Charotar area in Gujarat in Bombay State, the Nipani area in Mysore, the southern Madras area, north Bihar and Bengal area and Uttar Pradesh and Punjab area.

The Guntur area comprises the districts of Guntur, East and West Godavari, and the adjoining portions of Telangana. The variety grown is *nicotiana tabacum*.

The Charotar in Gujarat covers Anand, Borsad, Petlad and Nadiad talukas of the Kaira District. Here also the chief variety is *nicotiana tabacum*.

The Nipani area is made up chiefly of the District of Belgaum in Mysore State and certain areas in North and South Satara and Kolhapur districts in Bombay State. Here both the varieties are grown though *nicotiana tabacum* predominates.

In Madras State the chief tobacco growing districts are Madura and Coimbatore.

The north Bihar area covers the districts of Muzzafarpur, Purnea and Darbhanga, and in the north Bengal area the districts of Jalpaiguri, Malda, Berhampore and Dinajpur. Here both the varieties are grown.

Uttar Pradesh comprises the districts of Farukhabad, Etah and Sitapur and the Punjab area comprises the districts of Jullundur and Ferozepur. Both the varieties are grown in these areas.

The development of tobacco cultivation, marketing and research are looked after by the Indian Central Tobacco Committee with headquarters in Madras. The Committee has a tobacco research institute at Rajahmundry (Andhra Pradesh), cigar and cheroot tobacco research station at Vadasandur (via) Dindigul (Madras), hookah and chewing tobacco research station at Pusa (Bihar), wrapper and hookah tobacco research station at Dinhat (West Bengal) and a cigarette tobacco research sub-station at Guntur (Andhra Pradesh).

Another station for cigarette tobacco was started in February 1957 at Hunsur in Mysore State where soil and climate are different from those of the Guntur area where production of flue cured Virginia cigarette tobacco is mainly concentrated.

About tobacco manufactures, there are over 4,600 bidi manufacturers, about 300 chewing tobacco manufacturers, over 300 snuff manufacturers and about 16 important cigarette manufacturers.

Export of tobacco is allowed freely without any restrictions.

There are about 86 associations connected with the tobacco industry.

INTERNAL CONSUMPTION

The following table shows in lb the quantities of raw tobacco that was cleared for home consumption for various manufactures in India.

	1953-54.	1954-55.	1955-56.
Hookah	117,103,843	116,208,871	121,393,720
Bidi	116,369,238	122,033,468	152,306,611
Cigarette (Flue cured Virginia)	30,679,197	29,901,427	32,876,645
Cigar and Cheroot	38,082,478	43,269,566	46,073,752
Chewing	109,017,949	116,945,899	118,700,268
Snuff	8,740,361	9,679,141	9,679,262

PRODUCTION OF CIGARETTES, ETC.

The following table shows the production and consumption of cigarettes, etc. in India (excluding imported manufactured products).

(In Numbers)

	Production. (1953)	Consumption. (1953-54)	Production. (1954)	Consumption. (1954-55)	Production. (1955)	Consumption. (1955-56)
Bidis	N. A.	N. A.	N. A.	N. A.	N. A.	N. A.
Cigarettes	1,968 Crores	1,977.5 Crores	2,064 Crores	2,125.2 Crores	2,283 Crores	2,384.3 Crores
Cigars and Cheroots ..	N. A.	471,863,100	N. A.	438,070,900	N. A.	454,983,800

In 1956 the number of cigarettes produced in crores was 2,616.

N. A.—Not available.

Note: Figures are subject to revision.

VEGETABLE OIL INDUSTRY

INDIA is one of the most important producers of oilseeds in the world and is consequently a large producer of vegetable oils as well as an exporter of oils and oilseeds.

The following figures show the average production of different varieties of oilseeds in recent years along with their share in world production :—

	Average Indian Production (lakh tons)	As percentage of world Production
Groundnut	30.0	36
Castor seed	1.2	26
Linseed	4.0	15
Sesamum	5.0	20
Cotton seed	13.0	13

The following table gives the actual production—in thousand tons—of oilseeds during the seasons 1955-56 and 1956-57 :—

	1956-57	1955-56
Groundnut	4,086	3,862
Castor seed	129	124
Linseed	349	414
Sesamum	451	457
Rape and mustard	1,017	848
Total	6,032	5,705

The actual production of oil from the five major oilseeds has been estimated as follows :

(000. Tons).

	Groundnut	Castor	Sesamum	Rape and Mustard	Linseed	Total
1952-53 ..	628	36	140	247	103	1,154
1953-54 ..	847	37	165	246	103	1,398
1954-55 ..	938	39	184	291	114	1,566
1955-56* ..	878	39	143	242	123	1,440
1956-57* ..	928	41	179	294	104	1,513

* Estimates only.

IMPORTS AND EXPORTS

The following table shows the total imports and exports of oil and of some varieties since 1954-55 :—

(In gallons).

	1954-55	1955-56	April-Dec. 1956
Imports (Total)	11,330,645	8,778,336	8,911,204
Coconut Oil	5,889,866	5,449,548	3,585,396
Linseed	136	2,528	1,223
Other Sorts	5,440,643	3,326,260	3,324,585
Exports (Total)	39,467,424	68,258,422	19,922,352
Groundnut Oil	24,834,930	30,188,499	19,141,8
Linseed Oil	2,399,657	18,573,331	7,259,010
Castor Oil	7,253,090	9,374,321	8,600,665

On the basis of the minimum per capita consumption of fats in this country the total consumption of fats of the entire population would work out at 7 million tons as against the present estimated consumption of 1.2 million tons.

In 1954-55, about 1.14 million tons of vegetable oils (including coconut oil) and about 255,000 tons of vanaspati were estimated to have been consumed for edible purposes in the country. This means a per capita consumption of 8.2 lb. (6.7 lb. of edible oils and 1.5 lb. of vanaspati). It is likely to go up during the Second Plan. Assuming the higher consumption at 8.8 lb. the total requirements of vegetable oils and vanaspati for 400 million people would be about 1.65 million tons by 1960-61.

The consumption of vegetable oils in industries has considerably risen since the last war.

In 1951, there were about 174 large-scale oil mills on the active list of the Development Wing of the Ministry of Commerce and Industry engaged in the production of edible oils with an annual rated capacity of about 680,000 tons of oil on a single shift basis. During 1951-56, no new large-scale units or substantial expansion of existing large-scale mills for the crushing of oilseeds (except cottonseed) came into existence. In March 1956, there were 2,097 oil mills registered under the Factories Act.† The State-wise* distribution of these oil mills was as follows: Assam 73; Bihar 92; Bombay 375; Madhya Pradesh 101; Madras & Andhra 540; Orissa 7; Punjab 39; Uttar Pradesh 125; West Bengal 66; Hyderabad 298; Madhya Bharat 101; Mysore 23; PEP&U 12; Rajasthan 29; Saurashtra 120; Travancore-Cochin 56; Other States 40. The total crushing capacity of the mills in the country is estimated at 56 lakh tons per annum in terms of oilseeds.

It is also estimated that there are about four lakh village ghats in the country with an annual crushing capacity of about seven lakh tons of oilseeds. Thus the total crushing capacity is estimated at 63 lakh tons in terms of oilseeds. But the total output of oilseeds in recent years is estimated at 55 to 60 lakh tons. Therefore, a part of the available capacity is lying idle.

The capital invested in the organised industry is estimated at Rs. 24.4 crores and the number of workers at 45,580. The most important oilseeds consumed in large quantities for the production of oils are groundnut, linseed, rape and mustard, castor seed and sesamum seed. Small quantities of cottonseed and mohwa seed are also crushed.

production of 5,103,000 tons in 1950-51. Consequently, the supply of oil was expected to rise from about 1,113,000 tons in 1949-50 to about 1,272,000 tons by 1955-56. The total supply of vegetable oils of all varieties including about 110,000 tons of coconut oil was thus expected to be 1.88 million tons by 1955-56. But the production in 1954-55 is estimated at 1.76 million tons.

COTTONSEED

The Commission has recommended measures for assisting the cottonseed industry, introduction of solvent extraction process to secure higher overall recovery of oils and wider utilisation of neglected resources of oil-bearing materials such as neem, mohwa, karang and marotiy which grow wild.

Since the Industries (Development and Regulation) Act, 1951, came into force, eight firms have been granted licences for setting up vegetable oil mills on the condition that they will crush cottonseed only. In addition, the Madhya Pradesh Government had, under the Second Plan, a proposal for installing a plant with a crushing capacity of 15,000 tons of cottonseed per annum. The total installed capacity of the 9 units is estimated at 98,200 tons per annum in terms of seed. Besides, the crushing of cottonseed is carried on along with other seeds by a large number of mills. As against the target of an additional 7,500 tons of cottonseed oil envisaged under the Plan, the output of cottonseed oil was estimated to be about 9,000 tons in 1955-56.

Special efforts are being made to develop the cotton seed oil industry on modern lines. There were eight units equipped with delinting and de-hulling machines in 1955. Six more units were licensed during 1956, thereby bringing the total capacity for cotton seed oil crushing to 277,100 tons of seed. Among the steps taken to increase the consumption of cotton seed oil by vanaspati factories is a reduction of excise duty. Export of cotton seed oil as well as decorticated cotton seed oil cake was licensed freely. The policy of not licensing new mills or expansion of existing oil mills has been continued. The production of oil in 1956, however, showed a slight increase.

In regard to solvent extraction of oilcakes, the Government had given licences by the end of March 1956, to install plants with a capacity of 340,000 tons of oilcakes, which together with the capacity established before the industry came under statutory control, made a total of 400,000 tons per year.

Production of oil by solvent extraction of oilcakes during 1956 aggregated 4,500 tons, as against 2,650 tons in 1955. The rise in output was due to the commencement of operations by three more units. Thirty-two licences had been issued up to the end of 1956 under the Industries Act for the establishment of solvent extraction plants.

The development programme for the vegetable oil industry in the Second Plan is indicated in the following table :

	1954-55	1960-61
Production of oil :		
1) Solvent extraction from oilcakes ..	7,000	64,000
2) Cottonseed Oil	9,000	30,000
Total (all sources) ..	1,760,000	2,110,000
Utilisation of oil :		
For edible purposes	1,140,000	1,190,000
For Vanaspati manufacture ..	260,000	430,000
For other industrial purposes ..	230,000	280,000
Exports	140,000	210,000

* Pre-reorganisation States.

† The number is estimated at about 3,000 at the end of 1957.

On the basis of the production statistics of important vegetable oils including kardi, niger, cottonseed and coconut for 1954-55, the output of vegetable oils in the year is estimated to be about 17.6 lakh tons compared with 11.13 lakh tons in 1949-50 taken as the base year. This represents a considerable improvement in the availability of oils in comparison with the previous years and the target of 18.0 lakh tons envisaged in the first Plan has also been surpassed.

VANASPATHI

The Vanaspathi Industry though a minor branch of the Vegetable Oil Industry is one of the most highly organised and efficient industries. Its history is interesting. It started on a small scale in 1930.

In April 1951, there were 48 vanaspathi factories in India with an annual rated capacity of about 333,000 tons. In March 1956, their number had increased to 51 with a rated capacity of about 412,100 tons. Out of these, one is the Government Hydrogenation Factory at Kozhikode having an installed capacity of 3,000 tons per annum. Besides, there are seven factories with an annual rated capacity of 33,000 tons. It is the Government's policy not to permit any further expansion of the industry as the present capacity is adequate to meet all the requirements of 4 lakh tons. The aggregate installed capacity of the industry in 1956 was 412,100 tons per annum. At the end of 1955, the capacity was lower at 380,232 tons. The actual output of Vanaspathi during 1956 amounted to 255,612 tons as against 260,784 tons in 1955.

In 1957 the production was estimated at 320,000 tons.

The consumption of vanaspathi in India has increased at an average rate of about 20,000 tons per annum during the First Plan period. It is assumed that the consumption will rise at the rate of 25,000 tons per annum during the Second Plan. On this basis, the internal consumption may be estimated at about 330,000 tons in 1960-61.

In 1956-57 the internal consumption was estimated at 253,000 tons.

The following table summarises the progress of the industry:

(tons)			
Year	Production	Consumption	Exports
1951-52 ..	180,000	177,000	3,000
1952-53 ..	199,000	196,000	2,800
1953-54 ..	199,000	196,000	900
1954-55 ..	225,000	216,000	9,370
1955-56 ..	270,000	255,000	15,000

In 1956-57 the exports amounted to 11,150 tons valued at Rs. 2.06 crores. The value of the exports in 1955-56 was Rs. 1.75 crores, in 1954-55 it was Rs. 1.48 crores.

There is no export duty on Vanaspathi.

The State-wise distribution of factories at the beginning of 1956 with annual capacity was as follows:—

State	In production	Under construction	Annual capacity (tons)
Bombay ..	10	..	114,500
Saurashtra ..	4	..	80,000
West Bengal ..	5	..	60,800
U. P. ..	5	..	54,000
Delhi ..	2	..	43,000
Punjab ..	2	..	10,500
Andhra ..	3	..	18,000
Madras ..	6	..	22,980
Mysore ..	4	..	10,800
Madhya Pradesh ..	2	..	21,300
Other States ..	5	..	27,500
Total ..	51	..	412,100*

* Estimated. † Pre-reorganization.

The gap between the installed capacity and actual production has continued to remain wide as will be seen from the following table:—

Year	Installed Capacity Tons	Production Tons
1950 ..	310,725	171,636
1951 ..	325,725	172,320
1952 ..	339,225	190,812
1953 ..	368,232	191,652
1954 ..	368,232	225,000
1955 ..	380,232	260,784
1956 ..	412,100	255,612

The net capital invested in the industry is about Rs. 23 crores. Besides 10,000 workers directly employed, the industry provides indirect employment for nearly 60,000 workers.

Edible Oils constitute the chief raw material of the industry.

The table below summarises the programme of development in the Second Plan:

(Tons)		
	1955-56	1960-61
Installed Capacity	445,000	445,000
Production ..	270,000	400,000
Internal Consumption ..	255,000	375,000 to 380,000
Exports ..	15,000	20,000 to 25,000

WOOLLEN INDUSTRY

THERE are three main groups of mills, those which operate both woollen and worsted systems, those with woollen or worsted systems only, and lastly, the Amritsar group of mills which purchase ready spun yarn, and from that stage occupy themselves in weaving, dyeing and finishing.

Among the first group, the Cawnpore Woollen Mills and the New Egerton Woollen Mills, Dhariwal, each with more than 15,000 spindles and operating both woollen and worsted systems,

are the largest units in India at the present time.

In 1951 there were 44 factories including four put up since the war and the total capital employed was estimated at Rs. 7 crores. The industry gave employment to about 18,000 workers. The number of powerlooms and spindles installed were 2,039 and 116,800 respectively. But early in March 1956, the number of factories had been higher at 122 with 3,950 powerlooms and 157,178 spindles installed on the basis of a double shift.

The regional distribution of woollen mills and their capacity at the end of 1955-56 were as follows:

State*	No. of units	Capacity (Numbers)		
		Woollen Spindles	Worsted Spindles	Powerlooms
Bombay	12	12,226	47,936	605
Saurashtra	1	2,130	7,032	84
Mysore	3	10,478	..	221
Uttar Pradesh	4	12,358	9,672	368
Kashmir	1	1,542	1,500	18
West Bengal	5	1,380	5,094	76
Madhya Bharat	1	516	..	20
Punjab	94	20,402	25,182	2,558
Delhi	1
Total	122	61,032	95,146	3,950

* Pre-reorganization.

Woollen manufactures consist of blankets, rugs, shawls, lols, coating, overcoating, tweed, flannel, serge, etc.; but the major portion is of coarser and heavier types of goods. The trend of production of woollen and worsted fabrics and yarns during 1954-55 and 1955-56 is detailed below (mill sector):

A. Woollen and worsted fabrics	1954-55 1955-56	
	(million yards)	
1. Suitings	5.31	4.93
2. Blankets and Rugs	2.07	3.30
3. Melton and Shoddy	1.03	0.49
4. Lohls and Shawls	1.60	2.14
5. Uniform Cloth	1.21	0.88
6. Other Sorts	2.54	3.20
Total	13.76	14.94

B. Yarn (million lb.)		
1. Woollen Yarn	9.10	10.56
2. Worsted Yarn	11.64	11.00
Total	20.74	21.56

The fall in production during the years 1951-52 and 1952-53 was mainly due to the difficulty of marketing the goods as a result of consumer resistance to high prices. Since then, however, the fall in the prices of raw wool and finished goods has been accompanied by the broadening of the demand as well as production. Against the target of 25 million lb. envisaged for 1955-56, the actual production was 14.94 million yards of woollen/worsted fabrics and 21.56 million lb. of yarn.

The position in respect of installed capacity and actual production during the years 1955 and 1956, as also in the first seven months of 1957, is indicated below:

	1955	1956	Jan.-July 1957
Yarn (million lbs.)			
Capacity	19.00	19.00	19.00
Production	20.70	25.44	14.85
Fabrics (million yds.)			
Capacity	24.00	24.00	24.00
Production	13.96	16.20	8.22

The consumption of woollen goods in India is low in comparison with other countries. The production of the mill sector was 13.76 million yards in 1954-55 and 14.94 million yards in 1955-56. Production in the cottage sector is about 4.5 million yards. Thus the indigenous output amounts to about 19 million yards. Imports during 1952-55 averaged 3.5 million yards. The total quantity available for consumption is thus about 23 million yards.

IMPORTS, EXPORTS

Imports of wool and woollen goods have remained at a fairly high level, the annual value being of the order of Rs. 11.12 crores in 1954-55, Rs. 11.88 crores in 1955-56 and Rs. 10.08 crores during the period April-December 1956. The import of wool tops accounted for nearly Rs. 7.16 crores in 1954-55, Rs. 7.46 crores, in 1955-56 and Rs. 7.01 crores during the nine months ended December 1956. The large imports

of wool tops are indicative of an important gap in the structure of the industry, the combing capacity of which is considerably short of the demand for wool tops.

The exports of woollen manufactures declined from Rs. 6 crores in 1950-51 to Rs. 4.4 crores in 1953-54 and to Rs. 3.87 crores in 1954-55 and to Rs. 3.97 crores in 1955-56. During the nine months April to December 1956, the exports aggregated Rs. 3.30 crores. The export of woollen yarn, which was totally banned, has been permitted since March 1954 in view of the improved supply position, but not much progress has been made. Export of raw wool is placed at Rs. 8.61 crores in 1954-55 and Rs. 9.78 crores in 1955-56 as against Rs. 5.87 crores in 1953-54. Exports during April-December 1956 were valued at Rs. 7.27 crores.

The total capital investment in the industry amounted to Rs. 9.5 crores in 1953. The fixed capital investment on new units and

expansions during the First Plan period was about Rs. 75 lakhs. The labour force was 17,000 in 1955-56.

A Development Council for the Woollen Industry was constituted by the Government of India in July 1955.

SECOND FIVE-YEAR PLAN

Under the Second Five Year Plan the output of woollen and worsted fabrics by the organised mill sector is expected to be stepped up from the present level of about 15 million yards to about 20 million yards by 1960-61. The yarn requirements of all the sectors will be 12 million lb. of woollen yarn and 15 million lb. of worsted yarn per annum.

But there is no combing plant in the country to produce wool tops. So it is proposed to establish during the Period a plant with a capacity of about 9 million lbs. involving a capital investment of Rs. 2.25 crores.

The development programme for the woollen textile industry, mill sector, in the Second Five Year Plan is indicated below:

	1955-56	1960-61
Spindlage and Loomage		
Woollen sector-spindles	61,032	62,768
Worsted sector- ..	96,416	1,23,416
Powerlooms	3,950	4,051

Annual rated capacity on double shift

	1955-56	1960-61
Woollen Yarn (million lb.)	17	17.5
Worsted Yarn (million lb.)	21	28
Woollen and Worsted fabrics (million yd.)	48	50

Production

	1955-56	1960-61
Woollen tops (million lb.)	9
Woollen yarn (million lb.)	10.6	12
Worsted yarn (million lb.)	11.0	15
Woollen & Worsted fabrics (million yd.)	14.9	20

HOSIERY INDUSTRY

According to the Tariff Commission, there were in 1951, 875 units, excluding four mills having a hosiery section, of which as many as 843 were in the Punjab with a capital investment of approximately Rs. 3 crores. Only 56 units were, however, registered under the Factories Act and 45 used electric power.

The Ludhiana factories numbering about 805 work during the season, but have a rated capacity for consuming 10.425 million lbs. of yarn annually. The annual rated capacity of the four woollen mills having hosiery section is estimated at 1.313 million lbs. of yarn. The actual production of the industry has, however, been very much less than the rated capacity and has been estimated as under by the Tariff Commission in terms of weight of the finished products:—

Year.	Lakh lbs.
1949	27.89
1950	27.67
1951	20.22

It is estimated that about 4 million lb. of hosiery and knitting yarn are at present consumed by the Ludhiana hosiery units and about 0.5 million lb. by the hosiery units located in other States. Some of the organised mills also produce worsted hosiery goods, consuming about 0.5 million lb. of yarn. Thus the total quantity of yarn consumed by the hosiery industry is estimated at around 5 million lb.

MINES AND MINERALS

By courtesy of Mineral Economics Division, Indian Bureau of Mines, Government of India.

ALLOTMENT under the First Five-Year Plan (mineral development)...Rs. 1.06 crores.

Allotment under the Second Five-Year Plan: Rs. 73 crores.

The mineral wealth of India, as at present known, though by no means inexhaustible, comprises an adequate range of useful products necessary for industrial development.

The reserves are ample in respect of minerals essential for basic industries—coal and iron—but the country is deficient in a fairly long list of vital minerals like ores of copper, tin, lead, zinc, nickel, cobalt and in sulphur and petroleum.

Coal, iron ore, manganese ore, ilmenite, kyanite (and mica for which data are not available) are produced in quantities of real importance to industry and other sections of economy.

Of these mica, manganese ore, kyanite and ilmenite are wholly or largely exported.

The position with regard to aluminium ore, refractories, abrasives, limestone, etc., may be considered as fairly adequate while in respect of titanium and thorium ores and of mica, the country has considerable reserves.

An idea of India's present mineral production is given in the tables below:

MINERALS ADEQUATE FOR INDIA'S NEEDS

Mineral	Production in 000 tons	
	1955	1956
Bauxite	81	91
Coal	38,226	39,430
Ilmenite	251	336
Iron ore	4,678	4,858
Kyanite	12	20
Sillimanite	2	5
Magnesite	58	92
Manganese ore	1,583	1,687

MINERALS WITH FAIRLY ADEQUATE SUPPLIES

Mineral	Production in 000 tons	
	1955	1956
Barytes	8	6
China clay	117	173
Other clays	N.A.	N.A.
Fire clay	87	115
Felspar	6	3
Chromite	5	53
Gold (000 oz.)	211	209
Gypsum	690	850
Salt	2,887	3,174

MINERALS WITH DEFICIENT SUPPLY

Mineral	PRODUCTION	
	1955	1956

MINERAL NEEDS OF INDUSTRIES

Mineral	Estimated annual consumption (1956)	
	Estimated annual consumption (1956)	Estimated requirements in 1960-61
Coal (m. tons)	35.10	60
Limestone (m. tons)	8.2	23.3
Gypsum (000 tons)	836	1.97
Iron ore	3,149	10,500
Manganese ore	100	500
Bauxite	92	175
Ilmenite	Negligible	3
Sulphur	84	210
Rock phosphate	55	400
Petroleum crude (m. tons)	N.A.	N.A.
Pyrites	Not estimated

As part of the national policy to ensure efficient working of known mineral deposits, the Mines and Minerals (Regulation and Development) Act was put into force on 25th October, 1949. By Section 5 of this Act the Central Government is empowered to make rules for regulating the grants of mining leases or for prohibiting grants of such leases in respect of any mineral or in any area.

By Section 6 of the same Act, the Central Government is empowered to make rules for conservation and development of minerals and by Section 7 to make rules for the modification or alteration of the terms and conditions of the leases granted prior to the commencement of this Act, so as to bring the terms and conditions of leases granted in accordance with the rules made under Sections 5 and 6.

Section 4 of the Act provides that any prospecting licence or mining lease granted after the commencement of that Act otherwise than in accordance with those rules, shall be void and shall have no effect.

The Central Government have so far issued three sets of rules: The Mineral Concession Rules, 1949; The Petroleum Concession Rules, 1949 and the Mineral Conservation and Development Rules, 1955.

Lately, the Ministry of Steel, Mines and Fuel have framed mining leases (Modification & Terms) Rules, 1956, under Section 7 of the Mines and Mineral (Regulation and Development) Act, 1948. These Rules were published in the *Gazette of India* in Part II, Sec. 3 of 16th September, 1956.

In Oct. 1957 the Government of India decided that private parties were in future to be granted mining leases for minerals listed in Schedule A of the Industrial Policy Resolution of 1956, which is normally reserved for the public sector.

The minerals included in the Schedule 'A' of the Resolution are coal and lignite, mineral oils, iron ore, manganese ore, chrome ore, gypsum, sulphur, gold, diamond, copper, lead, zinc, tin, molybdenum and wolfram.

The step was taken by the Central Government in view of the extreme urgency of increasing India's foreign exchange earnings.

The State Governments were requested to expedite action on pending applications especially in regard to iron ore and manganese.

In 1952 the Government of India enacted the Coal Mines (Conservation and Safety) Act, for the purpose of taking under its control the regulation of coal mines to the extent as provided in the Act. The Indian Mines Act, 1923 was re-enacted after making suitable amendments in 1952 and called Indian Mines Act, 1952.

Government of India has also framed rules for atomic energy minerals and other minerals used for the production or use of atomic energy or for research. This Act is known as The Atomic Energy Act, 1948.

GOVERNMENT ORGANISATIONS

The Geological Survey of India prepares geological base maps showing mineral deposits, and also tackles the engineering problems connected with the country's hydro-electric development as well as ground water supply. In order to cope with the growing need of the country the Department has been expanded quite rapidly in recent years.

The Indian Bureau of Mines gives advice to the Government on mineral concessions, takes up exploratory work for proving of minerals and ore deposits required for various industries; undertakes research and beneficiation of low grade ores; inspects mines to ensure improvement in mining practices and conservation of minerals; advises the Government regarding mineral policy; advises the Government and other interested parties regarding the uses, occurrences and marketing of different minerals; and collects and publishes mineral production statistics.

The Atomic Energy Department looks after the development and processing of such minerals and substances as may be used for the production or use of atomic energy or for research into matters connected with it. The Central Government have declared the following substances and all their respective components as prescribed substances for atomic use:—Uranium minerals, thorium minerals, beryllium minerals, vanadium minerals, lithium minerals, radium, zirconium, graphite, deuterium, plutonium, neptunium and minerals containing the above metals and accessories ingredients, such as uraniferous allanite, triplite, columbite and tantalite.

The Government of India have also set up a separate wing known as the Natural Oil and Gas Commission for exploration of oil and gas in the country. To start with, work at the Jwalamukhi area in the Kangra district of the Punjab, where there is drilling for oil, has been intensified.

The Coal Board under the Ministry of Steel, Mines and Fuel looks after the mining and development of collieries in the public sector and the distribution of coal to various consumers.

For the import and export of important minerals like iron ore, manganese, etc., there is now a State Trading Corporation under the Ministry of Commerce and Industry.

MINERAL TRADE

The total value of the mineral produced in 1956 was of the order of Rs. 125.5 crores as against Rs. 107.0 crores in 1955. This represents about 1 per cent of the total national product. The principal minerals like coal, manganese, mica and iron ore have shown a marked improvement in production.

The total export of ores of minerals from India in 1956 fetched foreign exchange worth Rs. 50 crores compared with Rs. 37 crores in the year before.

The exports of metals in 1956 were valued at Rs. 544 lakhs which was 73 lakhs higher than that for 1955.

The value of the imports of ores and minerals in 1956 was Rs. 962 lakhs as against Rs. 1,099 lakhs in the preceding year.

EMPLOYMENT

Six lakhs twenty-eight thousand and five hundred eighty-one (62,581) persons were employed in mines in 1956. Of these 60 per cent were in collieries.

The actual break-up of the persons employed in mines is given below :—

	1955	1956
Coal	347,980	352,429
Manganese Ore	89,907	109,948
Salt*	38,296	N.A.
Iron Ore	34,218	37,301
Mica	30,632	33,973
Gold	17,787	17,860
Others	31,925	77,040†
Total employment in mines	590,745	628,581

* Small units were re-aligned and formed into co-operatives.

† Includes salt mines.

This is exclusive of people employed in connected industries which figure is estimated around two lakhs.

COAL

The most important coal fields are Raniganj in West Bengal and Jharia and Bokaro in Bihar. The Raniganj and Jharia fields contribute about 82 per cent of the total output. The best coking coal comes from Giridih, Jharia and Raniganj. Other States in which coal is found are Madhya Pradesh, Orissa, Andhra, Madras, Kerala, Bombay, Assam, Rajasthan and Kashmir.

There are about 882 coal mines working in India.

Indian coal falls mainly into two classes namely, high grade steam and low grade steam.

The Metallurgical Coal Conservation Committee placed the reserves of coking coal at 329.6 million tons in respect of selected grade, 395.7 million tons of grade I quality and 49.1 million tons of grade II quality. With stowing, washing and blending the Committee thought that a reserve of 2,000 million tons of good quality coking coal could be obtained. The Geological Survey of India estimated the reserves of non-coking coal at 39,650.25 million tons of which Gondwana coal represented 37,113.25 million tons and balance tertiary coal.

The following table gives the details of output :—

Year	Production (million tons)
1947	30.07
1948	29.82
1949	31.44
1950	32.31
1951	34.43
1952	36.30
1953	35.98
1954	36.78
1955	38.23
1956	39.43

In 1949 the mineral concession rules were revised by the Government of India. The rules limit the period of the leases to twenty years with the option of one renewal for another twenty years. The rules also require the certificate of approval from the State Governments. The Government has also constituted a committee to consider all applications for opening mines.

Mechanisation in the industry is at an early stage of development. In the year 1955, on an average, there were 442 coal cutting machines in about 144 mines which produced 23.6 per cent of the total output. Also, there were 4 mechanical loaders and about 88 mechanical conveyors in operation.

In earlier times the coal used to be sold by the name of steams. An Indian Coal Grading Board was constituted in 1926. The maintenance of grades requires beneficiation but only about 70 collieries are fitted with screening plants and mechanical chutes, the rest are worked by hand labour.

The Coal Grading Board split up the area into Raniganj and Jharia coal fields and carried out extensive work in the field of grading.

In 1944 the necessity was felt to control production and distribution of coal and the Colliery Control Order introduced what is known as Coal Commissioner's grade.

Under the Coal Mines (Conservation and Safety) Act, 1952, the Central Government is empowered (1) to adopt measures for the safety of coal mines or for conserving coal, (2) to authorise the Coal Board to deal with problems of the industry, (3) to levy excise duty on coal and coke, and (4) to frame rules for regulating the industry.

The coal industry is thus subjected to a comprehensive control embracing production, allocation, prices and wages. Levies on exports also differ from country to country.

The Second Plan aims at the long awaited rationalization of the coal industry both in the matter of regional distribution of coal and the preservation of coking coal for metallurgical process.

The target for coal production by 1960-61 has been fixed at 60 million tons. At the same time the question of conserving metallurgical coal and washing of coal up to grade 4 has been given high priority during the Second Five Year Plan. There are already three washeries in the private sector at the Jamadoba, West Bokaro and Lodna collieries which supply washed coal to the Tata Iron and Steel Company and the Indian Iron and Steel Company. It has already been decided to set up a coal washing plant at Bokaro-Kargali with a capacity for 2.2 million tons of coal per annum. The washed coal from here will be supplied to the Bourkela and Bhilai steel plants. Another washery is proposed to be set up at Durgapur. A provision of Rs. 6 crores has been made in the Plan for setting up coal washeries.

Because of the paucity of coal deposits in south India, high priority has been given to the development of the multi-purpose 'South Arcot Lignite Project' at Neyveli. This plant will be producing 380,000 tons per annum of carbonised briquettes. (See under 'Government Industrial Undertakings'.)

Out of the 22 million tons of additional coal to be raised by 1960-61, 12 million tons will be raised in the public sector and 10 million tons in private sector.

To organise the production of coal in the public sector, Government have set up a wing under a Coal Production and Development Commissioner who will be the administrative head of the existing State collieries and the new collieries proposed to be established during the Plan period.

The control of coal, exercised under the colliery control order regarding distribution, price, etc., and the general control over private industry has been entrusted to a separate authority, the Coal Controller. The existing State collieries are administered by the National Coal Development Corporation (Private) Ltd. located in Ranchi. This will also look after the collieries which will be established during the period of the Plan.

The approximate quantity of coal consumed by some of the principal consumers in India during 1956 was in million tons: Railways 13.37; iron and steel plants 3.31; electric supply companies 3.17; cement factories

1.76; cotton mills 1.81; paper mills 0.59; jute mills 0.47; engineering works 0.35; domestic coke 1.65; brick burning works 2.25.

IRON ORE

On account of the high ash of Indian metallurgical coke, it is usual in estimating the Indian iron ore reserves to accept only ores with an iron content of 60 per cent and above. Ores below this iron content are used only in very small quantities in Indian blast furnaces.

India possesses about one-fourth of the total world reserves of iron ore and is the biggest single country possessing such a large quantity of iron ore deposits.

The region-wise reserves proved and indicated are shown below in million tons:

HÆMATITE ORES (in million tons)

Bihar and Orissa: Singhbhum 1,047; Keonjhar 988; Bonai 648; Mayurbhanj 60; total 2,743.

Madhya Pradesh: Dhalli-Rajhara 114; Bailadila 610; Rowghat 740; Jabalpur 100; total 1,564.

Bombay: Ratnagiri 5; Goa 15; Chanda 22; total 42.

Andhra	41
Kashmir	5
Mysore	904
Rajasthan	5
Punjab	2
U. P.	10
Total (Hæmatite ores)	5,316 million tons.

The total possible reserves of hæmatite ores are 17,680 million tons.

MAGNETITE ORES (in million tons)

The reserves proved and indicated in million tons are:

Madras: Salem-Tiruchirappalli 305.

Mysore: 215.

Bihar and Orissa: 5.

Himachal Pradesh: 60.

Andhra: 20.

Total (Magnetite ores): 605 million tons.

The total possible reserves of magnetite ores are 1,610 million tons.

LIMONITIC AND SPATHIC ORES (in million tons)

The reserves proved and indicated of limonitic and spathic ores are:

Bengal: 800 million tons; and the possible reserves 2,000 million tons.

The grand total of all ores proved and indicated is 6,421 million tons and the possible reserves 21,240 million tons.

Large deposits of high grade ores are limited to a few areas of which the following fields require special mention :—

(i) *Singhbhum and Orissa*: In what is known as the Singhbhum Iron Belt, consisting of the Singhbhum District, in which the Tata Iron & Steel Company's Steel Works are situated, and the neighbouring areas, there exist some of the richest iron ore deposits in the world. The iron content of the ore considered usable varies from 60 per cent to 65 per cent.

The proposed Durgapur steel plant will meet its requirement from the iron ore occurring in the neighbouring regions. The Bonai ore range which is the extension of the main iron ore range will feed the Rourkela steel plant. The Indian Bureau of Mines has worked in this area for proving iron ore deposits for the Rourkela steel plant.

(ii) *Mysore*: There are big deposits of hæmatite and quartz-magnetite ore in Mysore but the latter are of low-grade and would require concentration before using them. The ores used in the Bhadravati Iron Works are from the Bababudan Hills and can be compared to Singhbhum ores containing about 60 per cent iron.

Limonite deposits are also known to exist but they have not been properly explored owing to transport difficulties.

(iii) **Madras:** Very large deposits, mainly magnetite, occur in Salem. They have been estimated at 305 million tons. They will, however, require concentration before use, and there may be considerable losses in the process.

(iv) **Madhya Pradesh:** Large deposits of hematite are found in the Bastar, Drug and Jabalpur districts of this State. Dhali-Rajhara, Rowhat and Balladila ranges in the Drug and Bastar districts are the major deposits in Madhya Pradesh. These three ranges are the main sources of iron ore for the Bhilai steel plant.

The exploratory work for blocking the iron ore deposits at Jharandalli in Rajhara Pahar, from where the Bhilai steel plant will draw its supplies was done by the Indian Bureau of Mines. In addition to iron ore, the Indian Bureau of Mines has also done operations in respect of limestone at Bhanpuri, dolomite at Bhanpuri, dolomite at Batapara and manganese ore at Balaghat area, in Madhya Pradesh for the requirements of the Bhilai steel plant.

(v) **Other Areas:** In Andhra the Balladila range is reported to have hematite deposits which are inaccessible and far away from coal fields.

The only source of high-phosphorus ore is in Bengal. It is poor in iron content being 35 per cent to 45 per cent and the more easily available ore in this locality has been exploited.

The deposits in the Ceded Districts in Andhra are estimated to be not less than 300 million tons.

The contribution of Mysore to iron ore production ranges between 40,000 and 60,000 tons, and the rest comes practically from Bihar and Orissa.

The following is the trend of production :—

Year	000 Tons
1951	3,657
1952	3,926
1953	3,784
1954	4,308
1955	4,678
1956	4,858

There has been a growing export trade in iron ore as indicated below :—

Year	Tons
1949-50.. .. .	4,300
1950-51.. .. .	84,513
1951-52.. .. .	290,036
1952-53.. .. .	811,025
1953-54.. .. .	1,261,977
1954-55.. .. .	1,008,878
1955-56.. .. .	1,362,776

The present yearly production of iron ore is 4.86 million tons and the target for the Second Five-Year Plan is 12.5 million tons. Of these, 10.3 million tons are expected to be consumed in the country, and 2.2 million tons would be available for export.

MANGANESE ORE

India is rich in manganese ore. Extensive deposits occur in Madhya Pradesh, Orissa, Andhra, Bombay, Mysore, Bihar, and Rajasthan. It is estimated that the deposits in the main belt of Nagpur and Bhandara in Bombay State and Balaghat in Madhya Pradesh alone contain reserves of the order of 100 million tons upto a depth of 800 ft., of which 55 million tons are of shipping grade ore having 45 per cent manganese and above. Twelve million tons of ore are estimated to be available from deposits in the other States. A major part of the output is exported at present.

The following is the trend of output and exports (000 tons).

Year	Production	Exports
1951	1,292	907
1952	1,462	1,409
1953	1,902	1,354
1954	1,413	1,042
1955	1,583	1,232
1956	1,647	1,866

To conserve good quality ore, export has been controlled since 1948. At present the export of high grade manganese ore is allowed to the extent of one million tons including 12,000 tons of battery grade. There is no quota restriction on the export of low grade. To conserve high grade ore Government is encouraging the setting up of beneficiation plant to improve low grade coal and promote export. A heavy media separation plant for beneficiating low grade ore has been set up by the C.P.M.O. Co. at Balaghat. Similar plants are being put up by other industrialists. The Government is also encouraging the setting up of new units for the manufacture of ferro-manganese for which a production target of 160,000 tons during the Second Five-Year Plan has been proposed.

The export price for manganese ore which had touched Rs. 175 per ton during the Korean boom and remained almost steady around Rs. 155 in 1952 steadily declined to Rs. 110-7-0 by October 1953, then there was a recovery to Rs. 143 in October, 1954. It went up to Rs. 180 per ton in the latter half of 1955. Exports which had declined, also showed a tendency to pick up towards the end of 1954 as a sequel to the removal of the export duty.

The position improved in 1956. The price was quoted at Rs. 220 to Rs. 230 per ton during the months of July, August and September.

The Government imposed an export duty on grade basis again with effect from 1st September, 1956.

The export duty was as follows :—(i) 30% Mn. or below : Free from duty ; (ii) Over 30% Mn. and not exceeding 40% Mn. : Rs. 10 per ton ; (iii) Over 40% Mn. not exceeding 44% Mn. : Rs. 20 ; (iv) Over 44% Mn. : Rs. 30.

In February 1958 Government abolished the export duty on certain types of ore and reduced the duty on others.

During 1956 the manganese ore produced, amounted to 1.69 million tons of which 1.39 million tons were exported.

By the end of the Second Five-Year Plan period the production and export figures are expected to reach 2 million tons and 1.5 million tons respectively.

MICA

Mica has been treated as a strategic mineral and India accounts for a big slice of the world trade in it.

The principal mica deposits are concentrated in Bihar, Rajasthan and Andhra.

In Bihar the mica belt is 60 to 80 miles long and about 12 to 16 miles wide and produces "ruby" mica which is in great demand all over the world.

At present Rajasthan is responsible for about 25 per cent of the Indian production. Most of the production from Rajasthan is sent to Bihar to be split and marketed.

The mica belt in the Nellore district in Andhra is about 40 miles long and 5 to 10 miles wide. The greater portion of the Andhra output is of "green" variety.

Statistics of mica production are not reliable and export figures are always higher than production figures. The quantity and value of mica exported from India are given below :—

Year	Quantity in 000 cwt.	Value in lakhs of Rs.
1948-49	340.2	593.7
1949-50	297.7	684.5
1950-51	283.4	958.5
1951-52	407.7	1320.9
1952-53	294.1	901.1
1953-54	254.6	799.6
1954-55	373	672
1955-56	519	837

CHROMITE

Chromite is an important strategic mineral of which India has moderate supplies.

The chief deposits are in the Singhbhum district of Bihar, the Mysore and Hassan districts of the Mysore State, the Ratnagiri and Sawant-

wadi areas of Bombay State, the Krishna district of Andhra, the Salem district of Madras and the Keonjhar district of Orissa.

No reliable estimates of reserves are available but the following figures in tons may be given :—Reserves in tons : Mysore (135,000) ; Bombay (67,000) ; Orissa (200,000) ; Salem (200,000).

The following table gives details regarding production and export of chromite ore :—

Year	Output	Exports
1951	17	9
1952	35	9
1953	65	15
1954	45	23
1955	89	48
1956	53	42

Export of chromite which was unrestricted till 1948 was brought under control and a ceiling of 10,000 tons was prescribed. In September 1955 the restriction on exports was removed.

MAGNESITE

Large deposits of magnesite used in the manufacture of magnesium salts, metallic magnesium and refractory bricks are known to occur in Salem (Madras), Hassan, Coorg and Mysore (Mysore), Almora (U.P.), Idar (Bombay), Durgapur (Rajasthan) and Singhbhum (Bihar).

Of these, the chief producing centres are Salem, Hassan and Mysore.

The deposits in Madras and Mysore States are known to contain 100 million tons upto a depth of 100 ft. Large deposits of magnesite have been discovered near Almora in U.P.

About a half of the output is used in the manufacture of refractory bricks for steel works and a considerable quantity is exported.

The output and export of magnesite from Madras and Mysore from 1950 to 1955 are given below :—

Year	Output (Tons)	Exports (Cwts.)
1950	52,859	16,465
1951	117,460	49,085
1952	89,041	31,277
1953	92,748	42,533
1954	70,507	25,362
1955	67,509	21,879

The total all-India production and export of magnesite in 1956 was : production, 91,711 tons and export, 691,000 cwt.

GYPSUM

Gypsum deposits are known to exist in several parts of India. The better known gypsum bearing regions are in Rajasthan (Jodhpur, Bikaner and Jaisalmer) and in Madras (Tiruchirappalli district).

The total reserves are estimated at 95 million tons, of which more than half is located in Rajasthan.

Smaller deposits also occur in Tehri-Garhwal, Himachal Pradesh and parts of western India ; but these have not been explored.

The annual production from Indian deposits from 1950 is given below :—

Year	Output (Tons)
1950	206,385
1951	208,602
1952	411,000
1953	586,000
1954	610,000
1955	690,000
1956	850,000

The entire output is consumed in the country for the manufacture of fertilisers, cement and plaster of Paris. The cement industry consumes 3 to 4 lbs. of gypsum for one ton of cement produced. The annual requirements of the Shakti fertiliser factory is about 600,000 tons of gypsum.

The Planning Commission has estimated that by the end of 1960-61 the country will require 1.97 million tons of gypsum. The figure is based on the capacity envisaged for industries which use this mineral. There is a proposal to set up two additional plants similar to Sindri during the Second Five-Year Plan. One of them is to be located near Bhakra-Nangal.

SULPHUR

Native sulphur in deposits of large size is unknown in India though some occurrences have come to light in the hill ranges in the north of India, and small deposits of native sulphur produced by bacterial action on sulphates derived from sea-water have been found in the coastal tract of Masulipatnam and in the Barren Island.

There are occurrences in Puga and Kashmir but they are situated in a difficult terrain.

As there is no production of sulphur in India, the country's requirements are met from imports, for which the recent figures are given below :—

Year	Quantity (cwt.)
1952-53	1,478,818
1953-54	878,287
1954-55	1,519,485
1955-56	1,095,411
1956-57	1,999,142

The mineral pyrites is another source of sulphur. It is found widely scattered in Amjor (Bihar), Taradevi (Simala), Lashital (Kashmir), Ingaldhal, Chitaldrug (Mysore), Polur (Madras). Substantial quantities of pyrites are associated with the gold deposits of Wynad in the Nilgiris District of Madras.

Copper pyrites deposits are also a source of sulphur. Some of the Indian coal e.g. Assam coal and Rewa coal are high in sulphur. It has been estimated that one ton of sulphur can be extracted from the wasting of every 100 tons of coal.

The industrial development of the country largely depends on sulphuric acid. Its production went up from 107,000 tons in 1951 to 108,000 tons in 1956. A target of 470,000 tons, representing a 300 per cent increase over the present output, has been set for the Second Plan.

COPPER

India has only a small supply of copper. The country produces on an average 7,600 tons of fine refined copper per year, which is mostly utilised in the manufacture of brass for utensils and coins. The country's entire requirement of electrolytic copper is imported.

The production of refined copper in 1956 was 7,628 tons and in 1957 it was 7,848.

The production of the ore in 1956 was 388,190 tons, and in 1957 it was 403,929.

The more recent figures of import of the copper metal are given below :—

Year	Quantity (000 cwt.)	Value in Rs. crores
1953-54	540	8.7
1954-55	362	8.7
1955-56	701	16.1

The only area for copper ore in India is being worked by the Indian Copper Corporation at Ghatala, Bihar, whose smelting plant is six miles away from the place.

There are other areas in the country where the ore might be worked. The more important of these are the Singhbhum copper belt of Bihar, Sikkim, Jaisaiguri and Darjeeling district (W. Bengal), Khairi, Daribo (Rajasthan), Tehri Garhwal (U.P.) and Gani (Indore). Exploration in Rajasthan, Sikkim, U.P. and Andhra continues.

SALT

The country has been not only self-sufficient in salt since 1951 but has now (1957) an exportable

surplus of over 100 lakh maunds. As late as 1947 or 1948 the country had had to import about 120 lakh maunds each year to make up for the deficit.

The First Five-Year Plan envisaged a production of 887 lakh maunds (3.1 million tons) in 1955-56. This target was surpassed in 1953 when 861 lakh maunds (3.16 million tons) of salt were produced.

The production in 1956 was 889 lakh maunds (3.26 million tons).

The Second Plan target is 1,000 lakh maunds (3.7 million tons) in 1960-61.

The salt-producing areas are :

The coastal regions of Bombay, Kerala, Madras, Andhra, Orissa and West Bengal for salt from sea-brine ;

Rajasthan from lake brine as well as subterranean brine ;

Kharaghoda, Kuda, Jasdan, Dahigam, Bajana in the Little Rann of Kutch all in Bombay for manufacture from subterranean brine ;

Mandi, for rock salt, in Himachal Pradesh.

The total fixed capital in the salt industry is estimated at Rs. 8.45 crores. In 1950-51 the total investment was about Rs. 5.8 crores, of which Rs. 0.9 crore were invested in the public sector. In 1954-55 the total investment was Rs. 8.3 crores, of which Rs. 1.1 crores were invested in the public sector.

The statistics of production of salt are given below (in lakh maunds) :

1946	479	1952	769
1947	516	1953	861
1948	635	1954	739
1949	556	1955	811
1950	713	1956	889
1951	744	1960-61 (target)	1,000

The capacity for production is unlimited. Actual production is limited by market conditions.

With the increase in production the exports have also increased. The statistics are as follows (in lakh maunds) :

1949	2
1956	73 72

During the period Dec. 1956 to Sept. 1957, 90,000 metric tons of salt were exported to Indonesia under a Trade Agreement between the Government of Indonesia and the State Trading Corporation of India.

The total number of labourers employed per day in the salt industry in 1956 was 41,554 out of which 3,281 were employed in the public sector.

Machinery is hardly in use except in some factories in Kutch and Saurashtra where a few processes are mechanized.

There are both licensed and unlicensed manufacturers. The latter are engaged in work on areas of 10 lakh acres and less. The number of licensed manufacturers is 4,298.

Salt is subject to the levy of a cess under the Salt Cess Act of 1953. To encourage the small-scale part of this industry Government exempted it from the payment of cess with effect from 15th May 1955. The small-scale manufacture was defined as manufacture by persons whose holdings did not exceed 10 acres. Later with effect from 23rd April 1956 all manufacturers with holdings of 10 acres to 100 acres were asked to pay a cess at the rate of only one anna a maund, while those with larger holdings continued to pay cess at the rate of two annas a maund.

There are one Central Board and five regional Boards—in Bombay, West Bengal and Orissa, Andhra, Madras, Rajasthan—to advise the Government on the proper utilisation of the proceeds of the salt cess.

To induce smaller manufacturers to join together to form co-operative societies a number of concessions are made.

As mentioned above there were no imports during 1956. The Indo-Pakistan Trade Agreement concluded in July 1955 to import 10 lakh maunds of rock salt into India was extended upto 31st Jan. 1957. There was however no import under this Agreement.

The standard of edible salt has been raised from 94 per cent to 95 per cent sodium chloride content with effect from 1st January, 1957.

The Salt Control Board has decided to impose control on unlicensed salt manufacture.

Ten test laboratories in the Madras region, one in the R.S.S. Division and two in the Bombay region have been opened.

Under the Second Five-Year Plan developments are proposed along the following lines: establishment of laboratories, development of works and improvement of brine and of water supply, purchase of plant and machinery, medical and educational facilities and other amenities for the staff.

An expenditure of Rs. two crores is to be incurred both in the public and private sectors.

A scheme for sinking shafts into Mandi mines has been approved. This is expected to increase the production from 1.5 lakh maunds to 4 lakh maunds.

The Salt Commissioner prepares every year a programme of distribution to every State based on per capita consumption. The supply from the source to the consuming areas is regulated under a zonal scheme.

The Salt Department is now under the Ministry of Commerce and Industry. The head of the Department is designated Salt Commissioner; the headquarters are in New Delhi. He is assisted by four Regional Officers, one each at Sambhar, Bombay, Madras and Calcutta.

A Committee has been set up by the Government of India to enquire into the working of the salt industry and recommend measures for its development.

RARE METALS

The recent technological advances for meeting the rigorous demands of modern times have focussed the attention of the various countries on the possibilities of using new metals or modifying known metals. Some of the rare metals which were scientific curiosities till recently are now being produced on a commercial scale in Western countries. It is known that the soils of India contain ores from which some of these rare metals can be recovered.

The Government of India and the Kerala Government have jointly floated a joint-stock company, the Indian Rare Earths Ltd., to process the monazite sands in the State. The Company now extracts a mixture of oxides of rare earths containing cerium, lanthanum, praseodymium, neodymium and ten other metals of the rare earth group.

Cerium is now being extensively used in glass manufacture, cores of cinema electrodes, catalyst in chemical manufacture, as abrasive in optical glass fabrication and in some structures of steel.

The use of thorium salts in the manufacture of incandescent gas mantles is well known. It is also used in glass manufacture, benzene synthesis, metallurgy and cloth impregnation. Intensive search has located deposits of pitch blend containing a high percentage of uranium oxides in Rajasthan. A belt of uranium minerals over 150 miles long has been found in Bihar and there are sporadic occurrences in Madras as well.

Vanadium is of great value to the manufacture of certain types of steel. Appreciable reserves bearing titaniferous iron ores containing about 3 per cent oxides of vanadium have been discovered in Bihar. Tungsten ore accepted as of strategic importance is found in parts of West Bengal and Rajasthan. Chromite ore occurs mostly in Chitaldurg (Mysore) and Singhbhum (Bihar). The minerals containing columbium

and tantalum used to prevent weld decay and corrosion respectively have been traced in small quantities in the mica producing areas like Nellore, Monghyr, Gaya, Mysore and Kerala.

Beryllium used in metallic springs and in manufacturing X-ray tubes is produced from the ore known by that name. It is found in Rajasthan, Bihar and Nellore in Andhra. Gallium and germanium are found in coal. More recently a rich source in the mineral sphalerite was reported from Nepal. The National Metallurgical Laboratory at Jamshedpur is examining the economics of Mysore and Singhbhum chromite and of low-grade chrome ores from Talur (Mysore) and has evolved a new electrolytic technique for separating beryllia from beryl.

The National Chemical Laboratory of Poona has developed quick methods for estimating vanadium, beryllium, uranium and germanium.

Lithium is an important light metal of strategic significance. In India lithium minerals were first noticed as early as in 1874, and are commonly found as constituents of granite pegmatites. The sources are Pihara (Bihar), Jodhpur, Bastar (Madhya Pradesh) and Ooregam (Mysore). Kashmir is reported to have crystalline white blocks in a valley north of the famous sapphire mines. Nevertheless no systematic survey of the resources has yet been undertaken.

What is believed to be probably the world's biggest deposits of radioactive minerals was located "somewhere in North East India"

by the Indian Atomic Energy Department early in 1957.

Investigations carried out showed that the deposit had over 3.8 million tons of ore containing 800,000 tons of thorium of concentration of about 10 per cent. and 10,000 tons of uranium of concentration of 0.3 to 0.4 per cent.

The deposits also contain about 80 million tons of ilmenite. It is reported that further investigation might lead to doubling the present estimates.

The deposit is, therefore, considered more important than the famous beach deposits of Kerala, hitherto regarded as one of the world's richest deposits.

India's total reserves of uranium are reckoned at 30,000 tons and of thorium at 500,000 tons.

QUANTITY AND VALUE OF MINERAL PRODUCTION IN INDIA

(Value in '000 Rupees).

COMMUNITY DEVELOPMENT PROJECTS

It was proposed that during the First Plan period 1961-66 the Community Development Projects should cover one-fourth of the country's villages.

This meant the initiation of work on 1,200 Community Development Blocks, covering 1,20,000 villages with a population of about 80 millions.

In the Second Five-Year Plan, the entire country was to be covered with about 5,000 Blocks, of which 40 per cent would be marked for intensive development.* About 3,49,000 workers would be required.

The whole programme was estimated to cost Rs. 263 crores. The Second Plan allotment is Rs. 200 crores.

The Community Development Programme was inaugurated in 1952 October in different parts of the country. The programme has progressively expanded from year to year.

At the end of 1957 the projects covered about 276,000 villages with a rural population of 152 millions.

Of this coverage, about 41 per cent was under the intensive development phase and the rest under the National Extension Service.*

The programme embraces all aspects of development in the socio-economic life of the rural community and has been designed so as to:—(i) Provide a clear target of physical accomplishments against which the work of the Government agency could be measured in precise form; (ii) bring the Government agency closer to the people thereby bridging the gap between the people and the Government; (iii) bring the people's representatives nearer to the people so as to provide the necessary leadership; (iv) develop representative institutions of the people from the ground upwards; (v) bring about a coalition between the people's representatives and the people's servants manning the Government agency for a concerted effort for the building of a new India.

Each Block comprises 100 villages, covering about 160 sq. miles, a cultivated area of about 50,000 acres and a population of about 66,000.

It is estimated that there would be about four Blocks in each district in a State out of which one or more might be selected for intensive development.

Generally speaking, a project is to be completed in three years, the period being broken into five stages: conception, three months; initiation, six months; operation, 18 months; consolidation, 6 months; and finalization, 3 months.

The period of operation of the first 55 Community Projects and 53 Community Development Blocks which were started on 2nd October, 1952 and 1953, respectively, ended on 30th September 1956.

The execution of the uncompleted works in these Projects/Blocks on that date was however allowed to be continued upto 31st March, 1957 within the available savings. In certain cases, however, where the work was not likely to be

completed by 31st March, 1957 and the quantum of unused funds was of some magnitude, the period of operation was further extended for periods ranging from three months to one year.

The following table shows the total number of post-intensive blocks, Community Development Blocks and N.E.S. Blocks at the end of 1957:

Series.	No. of blocks allotted.	No. of villages covered.	Population covered (in millions).
1	2	3	4
Post Intensive Blocks.			
1952-53	202	27,388	16.9
1953-54	56	8,682	4.4
Community Development Blocks. (By conversion from N.E.S. Blocks)			
1955-56	152	21,438	12.4
1956-57	250	35,752	18.3
1957-58	99	13,965	5.6
National Extension Service Blocks.			
1954-55	50	6,765	3.8
1955-56	246	34,898	17.4
1956-57	495	66,870	33.4
1957-58	570	57,000	37.6
Total	*2,120	2,72,756	149.8

* Of these 1,054 were taken up during the First Plan period.

For the development of backward areas inhabited by Scheduled Castes and Tribes, 43 special multipurpose projects financed jointly by the Ministries of Home Affairs and Community Development have been started in the various States.

The total schematic expenditure per project is Rs. 27 lakhs for a period of 5 years (Rs. 15 lakhs to be provided by the Ministry of Home Affairs and Rs. 12 lakhs by the Ministry of Community Development). These blocks will be treated as intensive development blocks from their inception.

In order to assist in keeping up the tempo of work in the Projects, Blocks which have reverted to the post-intensive phase an expenditure of Rs. 30,000 per annum per block has been allowed for a period of three years for programmes relating to Local Works and Social Education.

As mentioned above, it has been decided that during the Second Five Year Plan the whole country should be covered with National Extension Service Blocks and not less than 40 per cent of the N.E.S. Blocks should be converted into Community Development Blocks for the purpose of intensive development.

This means starting of about 3,800 additional N.E.S. Blocks of which at least 1,120 are to be converted into C.D. Blocks during the Second Plan period.

A provision of Rs. 200 crores for Community Development and N.E.S. has been made in the Second Plan.

In view of the limited provision in the Second Plan, the estimated ceiling expenditure on a C.D. & N.E.S. Block has been reduced from Rs. 15 lakhs to Rs. 12 lakhs and from Rs. 4.5 lakhs to Rs. 4 lakhs, respectively.

The rate of achievement in respect of the development programme in the Community Development and National Extension Service areas is higher than in the rest of the country.

The comparison of achievements relates to development in respect of agriculture, education, health, communications, etc.

Expressed as a percentage of the achievements in the rest of the country, the position is as follows:—

1. Agriculture:—consumption of nitrogenous and phosphatic fertilisers 259 per cent, wasteland reclaimed 207 per cent and minor irrigation works 122 per cent.
2. Co-operation:—agricultural credit societies 680 per cent; membership of agricultural co-operative societies 405 per cent.
3. Education:—primary schools in rural areas 148 per cent; junior basic schools in rural areas 470 per cent; cadets who participated in A.C.C. and N.C.C. camps 285 per cent.
4. Rural Health:—hospitals and dispensaries 304 per cent; maternity and child welfare centres 271 per cent.
5. Roads 759 per cent.
6. Statutory panchayats 211 per cent.

A significant contribution of the programme during the past few years is that it has reinforced the trend for the co-ordination of the development and welfare activities among the various departments of the Government both at the Centre and in the States.

Village institutions have played an important part in enlisting the participation of the people in the execution of development programme. Thus, considerable use is being made of local bodies like the panchayats, co-operative societies, and union boards for the execution of development programmes.

In some areas success has been achieved by entrusting development activities to *ad hoc*, non-statutory and non-elective bodies, such as, the Gram Vikas Mandals in parts of Madhya Pradesh and Bombay, the Gram Mangal Samities in Orissa, the Gram Seva Sanghams in parts of Madras and the Palli Unnayan Samities in West Bengal.

Students and N.C.C. Cadets have also played an important part in development activities in many places.

There is also close co-operation now between the Gramdan and Community Development movements. Only the Community Development staff does not take part in securing gramdan from the people.

It is now agreed that all works of village improvement within the jurisdiction of panchayats such as paving of streets, construction of culverts, new wells, roads etc. should be entrusted to panchayats. They should be authorised to plan and execute works upto a limit of Rs. 2,000 for a period of three years provided an equal amount in cash, kind or labour is contributed by the people.

* The new plans have changed the perspective somewhat. The distinction between intensive development and N.E.S. will be abolished. And complete coverage will be achieved only in 1963. See below.

COST OF DEVELOPMENT—SUMMARY

	(Rs. in crores)
1. Total expenditure committed on the programme taken up in the First Five Year Plan (excluding short-term credit) ..	96.5
2. Estimated actual expenditure during First Five Year Plan ..	55.0
3. Spill-over from the First Plan to the Second Plan ..	41.5
4. Total expenditure committed on the programme to be taken up in the Second Five Year Plan ..	268.5
5. Expenditure falling during the Third Five Year Plan ..	104.6
6. Expenditure during Second Five Year Plan ..	163.9
7. Expenditure during the Second Plan including spill-over from the First to the Second Plan ..	205.4
8. Provision for Training Schemes directly administered by Community Projects Administration ..	2.5
9. Provision for Local Works and Social Education at Rs. 25,000 and Rs. 5,000 respectively per annum for all Blocks which will have completed operation as Community Development Blocks during the Second Five Year Plan ..	5.1
10. Provision for certain special schemes like model villages, sample surveys, pilot projects, research, publications, etc. ..	5.0
11. Total expenditure during the Second Five Year Plan period ..	218.0
12. Less 7½ per cent probable shortfall in expenditure and/or efficiency cut ..	16.4
13. Net provision required to be made in the Second Five Year Plan ..	201.6
or ..	200
(rounded)	

COST OF BLOCKS

	(Rs. in lakhs)
Cost of a N.E.S. Development Block for three years ..	4.00
Share of Centre ..	2.95
Share of State ..	1.05
Short-term loans ..	3.00
Cost of a C. Development Block for three years ..	12.00
Share of Centre ..	9.36
Share of State ..	2.64

N.E.S. Block

Block Headquarters :	
(a) Personnel ..	1.00
(b) Transport equipment, furniture, etc. ..	0.10
(c) Project Office, Seeds store, Information centre, etc. ..	0.25
Animal Husbandry and Agricultural Extension :	
Irrigation } ..	0.75
Reclamation } ..	
Health and Rural Sanitation ..	0.40
Education ..	0.40
Social Education ..	0.20
Communications ..	0.30
Rural Arts, Crafts and Industries ..	
Housing for Project staff and Rural Housing ..	0.60
Total ..	4.00

C.D. Block	
Block Headquarters :	
(a) Personnel ..	2.00
(b) Transport ..	0.45
(c) Office equipment, furniture, etc. ..	0.15
(d) Project Office, Seeds store, Information centre, etc. ..	0.25
Total ..	2.85
Animal Husbandry and Agricultural Extension Demonstration equipment ..	
Irrigation, Reclamation (including soil conservation, contour bunding, etc.) ..	4.00
Health and Rural Sanitation :	
(1) (a) Dispensary—recurring expenditure ..	0.20
(b) Dispensary building ..	0.10
(c) Dispensary equipment ..	0.10
(2) Drinking water supply ..	0.50
(3) Drainage and Sanitation ..	0.25
Education ..	0.70
Social Education (including audio-visual aids and women, youth and children's programmes) ..	0.70
Communications ..	1.00
Rural Arts, Crafts and Industries ..	0.50
Housing for Project staff and Rural Housing ..	1.00
Grand Total ..	12.00

PHYSICAL ACHIEVEMENT

People's contribution in the various community project and National Extension Service blocks in the country till September 1956 amounted to Rs. 32.96 crores, according to a Government review of the progress of the community project and N.E.S. schemes from October 1952 to September 1956. The contribution was offered in cash, kind and labour.

The total Government expenditure on these schemes during the period was Rs. 56.30 crores—about Rs. 49 crores for community project blocks and Rs. 7 crores for N.E.S. schemes.

The people's contribution came to nearly 60 per cent of the Government expenditure.

In the case of N.E.S. blocks particularly, the people's contribution valued at over Rs. 7 crores exceeded the Government's expenditure by Rs. 3 lakhs.

The value of the people's contribution in the community project areas was about Rs. 26 crores.

Of the total Government expenditure on various schemes approximately Rs. 425 lakhs were spent on animal husbandry and agricultural

extension. Irrigation and land reclamation accounted for Rs. 924 lakhs and Rs. 93 lakhs respectively. Nearly Rs. 510 lakhs were utilised for health and rural sanitation and Rs. 368 lakhs for education.

Among other items of expenditure were social education Rs. 213 lakhs, communications Rs. 623 lakhs, and rural arts, crafts and industry Rs. 183 lakhs. About Rs. 68 lakhs were spent on housing.

A total of 16.67 lakh acres of land was reclaimed and 28.5 lakh acres brought under irrigation. The area of land brought under fruits and vegetables was 2.16 lakh acres and 5.57 lakh acres respectively. The number of key village centres started was 3,838.

Under the community development scheme, 981 primary health centres were started up to the end of September 1956. The number of maternity and child welfare centres set up was 947.

In the sphere of education, 20,000 new schools were started and 7,794 ordinary type of schools were converted into the basic type.

Besides, 53,000 adult education centres and 1.55 lakh community centres were started and 12.84 lakh adults were made literate. Over one lakh organisations such as youth clubs, farmers' unions and mahila samities, were developed.

Construction of over 7,000 miles of pucca and 42,000 miles of kacha roads indicates the progress made in the field of communications. An additional 30,000 miles of existing kacha roads were renovated. Sixty-five thousand new houses and 6,154 model houses were built during the period.

Under the rural arts and crafts scheme of the community development programme, 2,040 demonstration-cum-training centres were started and 75,000 persons received refresher and basic training.

The number of new co-operative societies started during this period was 41,000 bringing the total number of new members enrolled to 23.3 lakhs.

In the sphere of local self-government, 28,000 panchayats and other statutory bodies and 46,000 non-statutory bodies like village councils, vikash mandals, etc. were started during the period under review. These organisations of the people have been taking an increasingly larger share in planning and implementation of the schemes with the technical aid of experts provided by the Government.

On 30th Sept. 1956 there were 876 Block Development Officers. The shortage here was 18. The number of Village Level Workers was 10,043, the shortage here being 238.

These last figures are exclusive of those for Bombay and Mysore.

EXPENDITURE

Government expenditure and people's contribution in the community projects/blocks and N.E.S. blocks upto Sept. 30, 1956 are given in the table below :

	Government expenditure		People's contribution	
	(Rs. crores)	% of 'pro rata' targets	Value in Rs. crores	Value per 1,000 persons (Rs.)
Community Projects/Blocks				
1. 1952-53 Series (Oct. '52 to Sept. '55)	19.92	81	7.78	4,680
2. 1953-54 Series (Oct. '53 to Sept. '55)	3.89	64	1.54	3,468
3. 1955-56 Series (converted C.D. Blocks)	2.66	38	2.53	2,470
N. E. S. Blocks				
4. 1953-54 Series (Oct. '53 to Sept. '54)	2.69	64	3.60	3,501
5. 1954-55 Series (Oct. '54 to Sept. '55)	2.15	63	2.71	1,684
6. 1955-56 Series (Apr. '55 to Sept. '56)	0.22	27	0.54	640
Total ..	31.08	72	18.70	2,823

Note : Expenditure includes cost of imported equipment, received upto 31st March, 1956. People's contribution includes cash, kind and labour.

The total Government expenditure upto Sept. 1965 including the cost of imported equipment amounted to Rs. 19.92 crores. This is about 81 per cent of the target expenditure for the period.

Government expenditure as percentage of target expenditure for the period on different items was as follows: State and project headquarters 122; Agriculture and Animal Husbandry 82; Irrigation 65; Reclamation 51; Health and Sanitation 65; Education 76; Social educa-

tion 92; Communications 64; Arts and Crafts 46; All fields 81.

Expenditure on sets of projects was as follows:

Community Development Blocks 1953-54: Rs. 3.39 crores (64 per cent of target); Community Development Blocks 1955-56 (converted from N.E.S.): Rs. 2.66 crores (38 per cent); N.E.S. Blocks 1953-54: Rs. 2.69 crores (64 per cent); N.E.S. Blocks 1954-55: Rs. 2.15 crores

(63 per cent); N.E.S. Blocks 1955-56: Rs. 0.22 crores (27 per cent).

The money available from the U.S. Government—the Indo-American Technical Co-operation Fund—for the import of equipment for the community development projects is \$12,771,860. In 1955-56 equipment worth 1.6 million dollars was imported. Besides this, equipment worth Rs. 6 lakhs was procured from indigenous manufacturers.

ADMINISTRATION

The administrative structure is somewhat like this:

At the very top in Delhi is the Ministry of Community Development with a Minister in charge, who is a member of the Government of India.

Matters of basic policy go before a Central Committee consisting of members of the Planning Commission and the Ministers of Food and Agriculture and Community Development with the Prime Minister as Chairman.

In each of the States there is a State Development Committee consisting of the Chief Minister and Ministers in charge of the development departments, for laying down general principles.

There is a Development Commissioner who acts as secretary of the Committee. He is the leader of a team consisting of the heads of the development departments or secretaries to Government in those departments. In some States the Chief Secretary himself may be the Development Commissioner. In others States it may be someone else with the rank of an Additional Chief Secretary. In any case his rank is never below that of a Secretary to Government.

At the District level there is a District Development or Planning Committee. This Committee will consist among others of the district heads of the development departments and Chairman and Vice-Chairman of the District Board.

The Collector of the District will be the Chairman of this Committee, and the District Development Officer (also called Extension or Planning Officer) will be the secretary.

At the sub-divisional level the Revenue Divisional Officer may act as the Extension or Development Officer or there may be an assistant to him who will be entrusted with the work of an Extension Officer.

There are information centres at Block headquarters. By the end of 1961 all Blocks will have information centres.

The core of the whole organization is the multi-purpose village worker (Gram Sevak) who is directly in touch with the villager and instructs, guides and educates him in his day to day work, and the technical supervisor whose duty is to supervise the work of a group of the village level workers.

A multi-purpose village worker will generally be in charge of about 10 villages.

As he is greatly over-worked, it is now proposed to give him an auxiliary.

The agency in the village through which much of the administration will be carried on such as distribution of improved seeds will be the village panchayat.

In each project area there will be seven Social Education Organizers, three of whom will generally be women. Of these seven one will be the Chief Education Organizer.

The trained technical personnel includes besides, of course, the village level workers and social education organizers the following categories: agricultural extension supervisors, veterinary doctors, co-operative and panchayat officers, school teachers, doctors, compounders, sanitary inspectors, lady health visitors, midwives, engineers, overseers, mechanics.

The existing staff of the various development departments (Agriculture, Animal Husbandry, Medical, Education, Public Works, Cottage Industries, Co-operation) has been absorbed in the N.E.S. organization. Thus it can be assumed that about one-fourth of the staff required already exists in the area.

The majority of the Development Blocks are under the C.P.A., the rest of the Blocks and all the training centres for the staff are under the Ministry of Food and Agriculture.

Staff requirements for covering the whole country with National Extension and Community Projects are given below:

Staff Requirements

CATEGORY.	N. E. S. Blocks 2,404.		N. E. S. Blocks 2,624 for intensive development.		TOTAL.
	Per Block.	Total.	Per Block.	Total.	
ADMINISTRATION:					
Block Development Officer ..	1	2,404	1	2,524	4,928
Ministerial staff including drivers ..	6	14,424	15	37,860	52,284
AGRICULTURE:					
Agricultural Graduates ..	1	2,404	1	2,524	4,928
Multipurpose Village-level Workers	10	24,040	12	30,288	54,328
ANIMAL HUSBANDRY:					
Veterinary Doctor ..	1	2,404	1	2,524	4,928
Stockman	2	5,048	5,048
Memengers	2	5,048	5,048
CO-OPERATION:					
Co-operative Inspector ..	1	2,404	1	2,524	4,928
EDUCATION:					
School Teachers	62	1,56,488	1,56,488
SOCIAL EDUCATION:					
Social Education Organisers ..	2	4,808	2	5,048	9,856
MEDICAL:					
Doctors	1	2,524	2,524
Compounders	1	2,524	2,524
Sanitary Inspector	1	2,524	2,524
Lady Health Visitor	1	2,524	2,524
Midwives	4	10,096	10,096
Sweepers	2	5,048	5,048
WORKS:					
Engineers	1/3	841	841
Overseers ..	1	2,404	2	5,048	7,452
ARTS & CRAFTS:					
Supervisors	2	5,048	5,048
Mechanics	3	7,572	7,572
Total ..		55,292		2,98,625	3,48,917

Including certain other categories, the total requirements are of the order of 350,000 persons.

For Block Development Officers the training centres are at Nilokheri, Hyderabad and Ranchi. As on Dec. 31, 1955, 756 Block Development Officers had been trained, and 59 were undergoing training at the three Development Officers' Training Centres.

Forty-three centres for training Gram Sevaks (Village Level Workers) have been set up. The annual out-put from the 43 centres will be 5,000.

The training centres for Gram Sevaks are located as follows: Samalkot (Andhra), Jorhat (Assam), Patna, Munshapur (Bihar), Anand Manji (Bombay), Dharwar (Mysore), Powarkheda (Madhya Pradesh), Sindewahi (Madhya Pradesh), Gandhigram (Madras), Parli (Kerala), Koliangir (Orissa), Nilokheri (Punjab), Batala (Punjab), Bakshi-ka-Talab (Uttar Pradesh), Nawalbagh (Uttar Pradesh), Chiragon (Uttar Pradesh), Ghaspur (Uttar Pradesh), Gorakhpur, Bulandshahr (Uttar Pradesh), Burdwan Farm (W. Bengal), Fulia

I (West Bengal), Fulia II (West Bengal), Himsyatsagar (Andhra), Antri (Madhya Bharat), Mandya (Mysore), Nabha (Punjab), Kotah (Rajasthan), Junagadh (Bombay), Mavelikara (Kerala), Baitargah (M.P.), Masobora (Himachal Pradesh), Nowgong (M.P.), Srinagar (Jammu and Kashmir).

Gopannapalam (Andhra), Khannapara (Assam), Signal (Bihar), Bhavani Sagar (Madras), Betul (M.P.), Tharua (M.P.), Chinsurah (W. Bengal), Rajinder Nagar (Punjab), Bombay, Padgampura (Kashmir), Sheoganj (Rajasthan).

"Workshops" are being established in twenty of the extension training centres for imparting training to gram sevaks and village artisans in smithy and carpentry with special emphasis on repairs and manufacture of improved agricultural implements.

Home economics wings are being attached to 25 of the extension training centres to train 20 women annually at each centre. In addition to this 2 more auxiliary centres had been sanctioned one each in the States of Madhya Pradesh

at Indore under the auspices of Kasturba Trust Centre, and the other at Amravati (Bombay) under the auspices of the Shivali Educational Institute, Amravati. These centres will also provide training facilities for 20 women village level workers in each centre. The duration of the course at each of the total 27 home science centres is 12 months.

Group Level Workers give support to V.L.W.'s in the solution of difficult problems. It has been decided to train 2,200 personnel of this category each year.

Each Development Block requires three Group Level Workers, one each for agriculture, animal husbandry, co-operation and panchayats. The total requirements of each category is about 5,000. Existing facilities are enough for meeting requirements of trained personnel in basic agriculture. As regards animal husbandry the present annual turn-over is about 275 to 300 graduates. Ten new colleges have been sanctioned for conducting two-year emergency diploma courses, and five additional shifts in the existing colleges having a four-year course. As a result of this 1,000 diploma holders and 340 graduates will be available in 1957 and 1959 respectively.

For the training of co-operative officers, 3 centres have been set up at Uttarpara (W. Bengal), Kutah (Rajasthan), Gopalpur (Orissa). Five more were proposed to be set up. The course will be of 10 months' duration with an interval of six weeks' study tour. Each centre will train 100 trainees a year.

The Social Education Training centres (now there are nine) are located as follows:

Gandhiagram (Madras), Nilokheri (Punjab), Allahabad, Santiniketan, Himayatsagar (Andhra), Baroda, Belur Math, Ranchi, Udaipur.

Of these the centre at Allahabad trains Chief Social Education Organizers. The training period is five months. Each centre will train 180 persons a year.

There is a centre at the Baroda University to give a specialized supplementary training. The course is of three months' duration and the annual out-turn 100 trainees a year.

The centre at Nilokheri is administered directly by the C.P.A., while the others are run under the auspices of established institutions.

The expenses of training the education organisers are shared among the Government of India, the T.C.A. and the Ford Foundation.

In the field of health, existing facilities are adequate to meet the requirements of doctors, compounders and sanitary inspectors. Twenty-seven schools for the training of auxiliary nurse mid-wives, 6 for mid-wives, and 9 for lady health visitors were in operation.

Block Development Officers are trained at: Dipatoli camp, Ranchi (Bihar), Nilokheri (Punjab), Himayatsagar (Andhra).

Public Health training centres are at: Arni (Madras), Singur (W. Bengal), Nafajgahr (Delhi), Ranchi.

There are arrangements for the training of operators of heavy equipment such as tractors, road-rollers, graders, rippers and also for multi-purpose overseers.

NEW PLANS

The future development of the community projects is to be rephased under a new work plan which the Ministry of Community Development expects to initiate from April 1958.

The revision entails the abolition of the present distinction between the three phases of operation viz. N.E.S., community development and post-intensive and will ensure a vigorous and more intensive development programme extending over a longer period than at present.

The N.E.S. stage at present extends over three years during which a relatively less comprehensive programme is executed within a budget ceiling of Rs. 4 lakhs and with a skeleton staff.

This is followed by another three years of intensive community development with a fuller complement of staff and a provision of Rs. 8 lakhs.

Thereafter, the block enters the post-intensive stage when only Rs. 30,000 is available annually.

It is felt that development activities in the rural areas must be intensive, continuous, and of substantial duration. The rigid demarcation between the existing phases thus becomes artificial and unsuited to the requirements of the time and instead the implementation of the programme in two stages of five years each is contemplated.

A certain staggering of the Plan coverage will become inevitable as a result of the revised pattern.

The Second Plan contemplates bringing the entire country under N.E.S. by April 1961.

According to the latest proposal, the complete coverage will be achieved by October, 1963.

The new proposals largely conform to the recommendations of the Balvantrai Mehta study team.

The new arrangement implies the automatic conversion of the existing N.E.S. blocks into community development blocks with an increased budget provision. The funds provided for the first and second phases will be Rs. 12 and Rs. 5 lakhs respectively for each block.

The revised budget pattern is intended for operation during the rest of the Second Plan period.

In the Third Plan, necessary funds for all blocks, including the post-intensive, will, it is envisaged, be provided by pooled blockwise allotment from the normal departmental allocations and various all-India boards.

The revised schedule will help relieve the present acute shortage of trained basic and supervisory personnel. It will also tone up the working of the programme by avoiding recruitment of workers of marginal calibre and qualifications.

THE STUDY TEAM ON COMMUNITY DEVELOPMENT AND N.E.S.

The Study Team for Community Development and National Extension Service, appointed in December, 1956, by the Committee on Plan Projects, presented its report to Pandit Govind Ballabh Pant, the Home Minister, on November 25, 1957.

The terms of reference of the Study Team, headed by Mr. Balvantrai G. Mehta, were of a comprehensive nature aiming at greater efficiency in the implementation of the programme. Its recommendations, some of which are of very far-reaching effect are now being studied by the Central Government (December 1957).

DEMOCRATIC DECENTRALISATION

Observing that democratic decentralisation alone can lead to effective rural development, the Team has suggested a three-tier system, composed of Village Panchayats, Panchayat Samitis and Zila Parishad, in the districts.

The village panchayats, according to the Team, should be graded on the basis of their performance and efficient ones should be entrusted with the work of revenue collection. They should get some commission for this work and also a statutorily prescribed share from Panchayat Samitis.

The duties of village panchayats will include provision of water supply, sanitation, lighting, maintenance of roads, land management, welfare of backward classes and collection and maintenance of records.

The Gram Sevaks will work as the Development Secretary of the panchayat.

Panchayat Samiti is an innovation suggested by the Study Team. The Samiti will have its jurisdiction co-extensive with the Development Block and will be constituted by indirect election from village panchayats.

Its functions will cover all aspects of development of agriculture, minor irrigation works, local industries, public health, primary schools, welfare work, and the collection and maintenance of statistics.

All Central and State funds spent in a Block area will be assigned to the Samiti to be spent by it directly or indirectly, and the Samiti will also act as an agent of the State Government in executing special schemes of development entrusted to it.

The report has suggested some sources of revenue for the Samiti in addition to grants-in-aid it will receive from the State Governments.

The annual budget of the Panchayat Samiti will have to be approved by the Zila Parishad. The Parishad will consist of the Presidents of Samitis in the district, M.P.s, M.L.A.s and the district level officers.

ECONOMIC DEVELOPMENT

The Team points out that hitherto more emphasis has been laid on welfare schemes than on specific programmes of economic development and recommends that the emphasis should shift without delay.

About the order of priorities to be assigned to different fields of activity the Team suggests

supply of drinking water, improvement of agriculture and animal husbandry, co-operative activity, rural industry and health followed by others.

The Team has recommended the abolition of the present system of dividing the development programme into three phases of N.E.S., Intensive Development and post-intensive Development as it leads to two-fold waste and frustration on account of the non-availability of resources in the N.E.S. and P.I.D. stages; and suggests that there should be a continuing programme of six years, unspent funds of each year being carried forward to the following year.

It also suggests that the original budget ceiling of Rs. 15 lakhs should be restored and the first phase of six years should be followed by another with a budget ceiling of Rs. 5.5 lakhs.

The Team has also recommended that the decision to cover the entire country with the Development Blocks during the Second Plan period should be revised and the date extended by at least three years.

About the existing organisational structure and the methods of work the Team has made a number of suggestions.

It suggests that the number of Gram Sevaks per Block should be increased to about 20 so that his circle does not exceed 800 families or 4,000 persons and that all field workers at a level below the Block in the departments of Agriculture, Harijan Welfare etc. should be pooled and their duties and functions be assigned to the Gram Sevaks within his charge.

For carrying out welfare work among women and children the Team feels that complete responsibility should be vested with the States, the Centre functioning from one single point only as an advising, co-ordinating and financing agency and that a satisfactory programme for child welfare, limited to few lines only, be evolved for a few selected areas in the first instance.

A number of suggestions regarding welfare work among the tribals have also been made.

Also, comprehensive suggestions have been made by the Team about the recruitment of and improvising the training programme for different categories of officials.

The Team feels that there is a need for greater attention to the agricultural sector in the schemes of Community Development. It recommends, *inter alia*, distribution of improved seeds, setting up of seed multiplication farms, increasing local production of chemical fertilisers and increased use of green manure, farmyard manure and night soil compost. Emphasis has also been laid on the need for eliminating pests and diseases affecting agricultural production. Extensive soil conservation measures, improved farming practices, effective policy regarding land reforms, better irrigation facilities, effective agricultural research are some of the other measures stressed by the Team.

In regard to co-operation, the team says that a multi-purpose co-operative society for a village

or a group of villages working in close association with local Panchayats, as against societies for different lines of activity, is the only correct course to be followed.

It also recommends that the entire rural credit should be canalised through the agencies of co-operatives and the farmers should be able to have productivity loans at an interest not exceeding 8½ per cent and the credit-worthiness of the borrowers should give place to credit-worthiness of purposes in advancing loans.

INDUSTRIES, EDUCATION

The Team suggests that an effective programme of co-ordination between the cottage, village and small scale industries and of collaboration among various All-India Boards should be worked out by pooling funds, personnel, agencies of supervision and inspection to avoid waste and inefficiency. Quality control along with provision of credit and marketing facilities, organisation of guilds of prominent artisans in each Block and of supply co-operatives are some of the other recommendations made by the Team.

The Team says that the aim of social education should be to acquaint people with the meaning of citizenship and the way democracy functions, to induce them to learn how to read and write

to impart proper training for refinement of emotions and to instil a spirit of toleration among them. The social education organizer, says the Team, deserves to be assigned a definite position in the education department so that he may function effectively.

The Team has made a number of suggestions to enable the non-governmental agencies to participate in the community development work by giving them ample discretion to plan and work out the programme and also by making funds available for the purpose.

NOTE OF DISSENT

A note of dissent submitted by Mr. B. G. Rao, a member of the Team, says that he is unable to agree with his colleagues on three points, viz., the appointment of Gram Sevaks as the Development Secretary of the Panchayat, the organisation at the centre co-ordinating various community development activities in the country, and the field organisation for social education.

He says that the appointment of a Gram Sevak as Development Secretary will tie him to desk work at the cost of field work and thus affect his utility as an extension worker. Regarding the second point, since the Union Ministry of Community Development has no policy-making functions it should be abolished and a division within the Planning Commission should be entrusted with its activities.

STATE-WISE DISTRIBUTION OF PROJECTS

An Operational Agreement signed in May 1952 provided for the starting of 55 projects.

The distribution and location of these projects is given in the following table :

Andhra

1. Project—Kurnool-Cuddapah Canal Area.
2. Project—Kakinada-Peddapuram—East Godavari District.
3. Project—Nizamabad District.
4. Block—Lakshwarum (Warangal District).

Assam

1. Project—Cachar District.
2. Project—Darrang District.
3. Block—Garohills, tribal area.
4. Block—Golaghat, tribal area.

Bihar

1. Project—Darbhanga-Monghyr Districts.
2. Project—Shahabad District.
3. Project—Ranchi District.
4. Project—Patna District.
5. Block—Santal Parganas District.

Bombay

1. Project—Mehsana District.
2. Project—Kolhapur District.
3. Project—Thane-Kolaba Districts.
4. Block—Sabarkantha District.
5. Project—Amravati District.
6. Project—Solapur District.
7. Block—Kutch District.

Madhya Pradesh

1. Project—Raipur District.
2. Project—Hoshangabad District.
3. Project—Bastar District.
4. Project—Sehore-Raisen.
5. Block—Nagod-Raghuraj Tehsil.
6. Project—Gird District.
7. Project—Nimar District.

Madras

1. Project—Coimbatore District.
2. Project—Madurai District.

Orissa

1. Project—Kalahandi District.
2. Project—Balasore District.
3. Project—Ganjam District.

Punjab

1. Project—Gurdaspur District.
2. Project—Ambala District.
3. Project—Jullundur District.
4. Block—Nalokheri.
5. Two Blocks—Faridabad.
6. Project—Rohtak District.
7. Project—Dhuri Tehsil (Sangrur District).

Uttar Pradesh

1. Project—Gorakhpur District.
2. Project—Azamgarh District.
3. Project—Faizabad District.
4. Project—Mainpuri District.
5. Project—Jhansi District.
6. Project—Almora District.

West Bengal

1. Block (composite)—Birbhum District, Sadar Sub-division.
2. Block (composite)—Birbhum District, Sadar Tehsil.
3. Block (composite)—Birbhum District, Rampurhat Tehsil.
4. Block (composite)—Burdwan District, Burdwan-Sadar-Katwa Tehsil.
5. Block (composite)—Burdwan District, Burdwan-Sadar Tehsil.
6. Block (composite)—24 Parganas District, Sadar Tehsil.
7. Block (composite)—Midnapore District, Jhargram Tehsil.
8. Block (composite)—Nadia District, Ranaghat Sub-division.

Mysore

1. Project—Shimoga District.
2. Project—Belgaum District.
3. Project—South Kanara District.
4. Project—Raichur District.
5. Project—Gubarga District.
6. Block—Coorg.

Rajasthan

1. Block—Sawai Madhopur.
2. Block—Bikaner-Ganganagar District.
3. Block—Alwar District.
4. Block—Kota District.
5. Block—Fali District.
6. Block—Udaipur District.
7. Block—Dungarpur District.
8. Block—Pannagar (Ajmer).

Kerala

1. Project—Trichur District.
2. Project—Trivandrum District.
3. Project—Malabar area.

Delhi

1. Block—Allpur area.

Himachal Pradesh

1. Project—Sirmur.
2. Block—Saidar (Bilaspur).

Manipur

1. Block—Thoubal Tehsil.

Tripura

1. Block—Nutanhavelli and Old Agartala.

North-East Frontier Agency

1. Block—Ahor Hills District.

Jammu and Kashmir

1. Badgam Block.
2. Ladakh Block.
3. Mansar Block.

SECOND SET OF PROJECTS

In December 1952 a supplement to the first operational agreement was signed, whereby 55 new Development Blocks were to be started.

Andhra

- 2 DEVELOPMENT BLOCKS.
1. Chittoor District.
2. Ichapuram—Srikakulam District.

Assam

3 DEVELOPMENT BLOCKS

1. North Lakhimpore Block consisting of 8 Mouzas of the Ranganadi Circle of the Lakhimpore District.
2. Nowgong Block consisting of whole or parts of seven Mouzas of the Nowgong District.
3. Aijal, Mazo Hills District.

Bihar

2 DEVELOPMENT BLOCKS

1. Shikarpur Development Block, District Champaran.
2. Hura Development Block, District Munger.

Bombay**9 DEVELOPMENT BLOCKS**

1. Vallia Mahal and some villages in Jhagdia Taluk—Broach District.
2. Kalol—Panch Mahals District.
3. Mandangad and some villages in Dapoli Taluk in Ratnagiri District.
4. Malegaon in Nasik District.
5. Shahada in West Khandesh.
6. Chikhtali—Buldana District.
7. Bendaure—Bhir District.
8. Nanded-Khandar—Nanded District.
9. Kalawad—Halar District.

Madhya Pradesh**8 DEVELOPMENT BLOCKS**

1. Waraseoul Block, District Balaghat.
2. Bihuriband Block, District Jabalpur.
3. Bazar-Gorakhpur Block, District Mandla.
4. Pachor, District Rajgarh.
5. Mandasaur, District Mandasaur.
6. Saechi, Raisen District.
7. Panna, Panna District.
8. Jataia, Tikamgarh District.

Madras**4 DEVELOPMENT BLOCKS**

1. Chingleput Chingleput District.
2. Ambasamudram—Trichy District.
3. Chidambaram—South Arcot District.
4. Dindigul—Madurai District.

Orissa**3 DEVELOPMENT BLOCKS**

1. Sundargarh Block, District Sundergarh.
2. Nayagarh Block, District Puri.
3. Bargarh Block, District Sambalpur.

Punjab**5 DEVELOPMENT BLOCKS**

1. Taran Taran, District Amritsar.
2. Kulu, District Kangra.
3. Thanesar, District Karnal.
4. Narainagar, District Ambala.
5. Bhatinda, District Bhatinda.

Uttar Pradesh**8 DEVELOPMENT BLOCKS**

1. Bah—District Agra.
2. Dataganj-cum-Jalahabad—Basin of the river Sut in District Badaun and Shahjahanpur respectively.
3. Deoband—District Saharanpur.
4. Nagar—District Basti.
5. Dudhi—District Mirzapur.
6. Jaunsaar Bawar-cum-Jaunpur Rawaln Basu of the river Jauuna in District Dehra Dun and Teori (Garhwal) respectively.
7. Phulpur—District Allahabad.
8. Billalgauna, District Tehri Garhwal.

West Bengal**3 COMPOSITE BLOCKS**

1. Habra Block, Sub-division Baraset, District 24-Parganas.
2. Sonamukhi Block, District Bankura.
3. Dinahata Block, District Cooch-Behar.

Mysore**2 DEVELOPMENT BLOCKS**

1. Indi in Bijapur District.

U.S.A.: Inclusive of the proceeds of the wheat loan of 1951, \$100 million, and P.L. 480 assistance (\$234 million as loan \$54 million as grant), the total U.S. aid allotted as at the end of

June 1957 stood at \$840 million (Rs. 400 crores). In the initial stages of the Indo-U.S. Aid Programme, the entire aid was offered as a grant. In 1954-55 however, it was laid down that about

75 per cent of U.S. funds were to be treated as a loan, to be expended mainly on the purchase of surplus agricultural commodities available in U.S. Accordingly, a long-term loan of \$190

* Figures are in million dollars except the figures in brackets which are in Rs. crores.

Note: Items 1, 2, 8, 5 are on Government account.

In November 1957, another loan of \$ 32.5 million was granted to TISCO for the expansion of steel production facilities.

million (Rs. 61.9) crores was made available to India during the period 1954-55 to 1956-57 towards the purchase of surplus wheat and cotton as well as machinery and steel.

Since 1954-55 a distinction was made between development assistance and technical assistance. The development assistance allocation for 1956-57 was \$62.5 million and the allocation for technical assistance was \$10 million.

The U.S. aid is being utilised on mutually agreed projects such as import of fertilisers, iron and steel for agricultural and industrial use, construction of tube wells, and supply of essential items of equipment like locomotives and wagons for the railways, vehicles, agricultural implements and visual aid for community projects.

In August 1956, an agreement was signed between India and U.S. Governments providing a sum of \$360 million (Rs. 171.5 crores) for the purchase of agricultural commodities under U.S. Public Law 480. This Agreement provides for the purchase of wheat worth \$200 million, rice worth \$26.4 million, cotton worth \$70 million, tobacco worth \$6 million and dairy products worth \$3.5 million. From the sale proceeds, India will get a long-term loan of \$234 million (Rs. 111.4 crores) and a grant of \$54 million (Rs. 25.7 crores) towards the execution of development projects, while U.S. would retain \$72 million for her use in India.

In January 1958, the U.S. Government announced a loan offer of \$225 million to be met partly from the Export-Import Bank and partly from the Development Loan Fund.

Earlier in March 1957, five U.S. commercial banks jointly offered a loan of \$11.2 million (Rs. 5.3 crores) to Air India International to meet a part of dollar costs involved in the purchase of three jet aircrafts from Boeing Corporation.

A new U.S. loan was arranged in March 1958—150 million dollars from the Export-Import Bank and 75 million dollars from the Development Loan Fund. For details see under 'U.S. Aid to India'.

Canada: Capital assistance provided by Canada from 1951 amounted to \$80 million (Rs. 40.9 crores). This has been used for the purchase of wheat, trucks and buses for the Bombay State Transport Corporation, locomotives and loco-

motive boilers for Indian railways, and heavy equipment for Mayurakshi project and Umtru and Kundah Hydro-electric Projects. A part—of the 1956-57 allocation (\$5 million) was utilised for the setting-up of an Atomic Reactor of the NRX type for the Atomic Research Centre at Bombay estimated to cost \$7.5 million.

During 1957-58 besides the usual allocation, Canada has also offered a loan of approximately \$25 million towards the purchase of Canadian wheat.

Australia: The total aid allocated by Australia is of the order of £A 10.4 million (Rs. 10.8 crores). In the first two years, the funds were utilised to purchase wheat and flour as well as construction equipment for the Tungbhadra Project and electrical equipment for the Ramagundam Project in Hyderabad. The allocations for the subsequent years are being used for the supply of radio equipment and diesel cars and wagons for railways.

New Zealand: At the inception of the Colombo Plan, New Zealand offered £1 million towards meeting a part of the capital cost of The All-India Medical Institute. A further allocation of £250,000 was made in 1954-55 towards the supply of equipment for dairy schemes in India. In 1955-56, an additional sum of £400,000 was allotted for the Delhi Milk Supply Scheme.

U.K.: Assistance from the U.K. has been offered mainly for research and demonstration equipment for the technical institutes. During the year 1956-57, the Government of U.K. granted a loan of £15 million (Rs. 20 crores) towards the erection of the Durgapur steel plant. The Indian Steel Consortium, London, have arranged for bank credits of £11.5 million (Rs. 15.3 crores) with a syndicate of British banks.

U.S.S.R.: The U.S.S.R. has granted export credit to the value of Rs. 63 crores towards the construction of the Bhilai steel plant. The rate of interest is 2½ per cent per annum and repayable in 12 equal annual instalments.

In November 1956, Russia offered a further credit of Rs. 60 crores for financing industrial projects included in the Second Plan, such as

heavy machine building works, mining machinery plant, power station at Neyveli, optical glass factory and development of Korba coal fields.

Norway: Norway extended in 1953 a sum of Rs. 6.6 million (Krs 10 million) for a pilot project on fishery development in Kerala. In 1955-56 an additional sum of Rs. 10 million was offered to expand the activities of the same project as well as to develop a new fishery centre at Cochin.

Ford Foundation: From September 1951 upto July 1957 the Ford Foundation extended aid totalling \$15.1 million (Rs. 6.4 crores) towards the training of personnel for rural development, encouraging small-scale industries and fostering education, research and training and cultural interchange.

France and Japan: Towards the end of 1957-58 France offered suppliers' credits totalling Rs. 28 crores. In Feb. 1958 Japan agreed to make available yen credits of Rs. 24 crores.

West Germany: Interim credit in respect of the Rourkela Steel Plant: Rs. 13.16 crores at 6 per cent interest.

Technical Assistance: India has received substantial technical assistance from Australia, Canada, New Zealand, U.K., U.S., West Germany and from the United Nations and its Specialised Agencies. Under the Technical Co-operation Scheme of the Colombo Plan, the Commonwealth countries undertook to provide books and equipment worth Rs. 6 million for technical institutes and research centres.

Training facilities for Indians Overseas are also provided by U.S., U.K., Australia, etc.

As on June 30, 1957, the U.S. provided 350 experts and training facilities for 633 Indian nationals.

The Colombo Plan provided 130 experts and training facilities for 933 persons.

The United Nations Technical Assistance Programme provided the services of 282 experts and training facilities for 589 Indian nationals. The West German Government have offered Rs. 50 lakhs in the form of plant and equipment and services of a number of German experts.

REPAYMENT OF LOANS

Mr. B. B. Bhagat, Deputy Minister of Finance, laid a statement on the table of the Lok Sabha on March 8, 1958 showing the total amount of money that would fall due for payment by India deferred payment arrangements.

The statement is as follows:

to various foreign countries from 1960-61 to 1970-71 on account of repayment of loans and

(Crores of rupees)

	Repayment of Loans	Repayment on account of Deferred Payment Arrangements	
		Public Sector	Private Sector
1960-61	15.90	3.84	8.09
1961-62	3.06	5.71	8.65
1962-63	2.50	4.85	7.20
1963-64	2.50	1.13	3.04
1964-65	2.65	0.93	1.04
1965-66	2.77	0.41	0.44
1966-67	2.83	0.10	0.19
1967-68	3.62	—	—
1968-69	4.38	—	—
1969-70	4.54	—	—
1970-71	4.69	—	—
	49.50	16.97	29.55

Note:—(1) The amounts falling due for repayment of loans have been worked out in respect of loans or portions of loans actually received so far.

(2) Repayments falling due on account of deferred payment arrangements have been indicated on the assumption that the full amount arranged for with the approval of Government has been or will be utilised.

(3) The figures in the above statement are approximate.

What the total burden during the next few years would be was explained by the Prime Minister on March 11, 1958.

The "really difficult" time, Mr. Nehru said, would start after two years. While in 1958-59 and 1959-60 India would be required to pay back Rs. 23 crores and Rs. 35 crores respectively, in 1960-61 it would have to pay Rs. 92 crores, in 1961-62 Rs. 123 crores and in 1962-63 Rs. 107 crores.

The payment would thereafter taper off to Rs. 48 crores and Rs. 37 crores and "so on"

In 1963-64 and 1964-65 and the subsequent years.

Mr. Nehru explained that the repayment during these three years would be heavy because the Rs. 95 crores standby credit from I.M.F. would have to be paid back.

He also explained that the liabilities he had listed related only to loans and credits already received and did not include any further assistance that might be available hereafter.

U. N. AID TO INDIA

During 1956 the sum of money allotted to India for the Expanded Programme of Technical Assistance was U.S. dollars 2,679,171 and the sum contributed by India was U.S. dollars 450,000.

The total cost of the projects undertaken under the expanded technical assistance in 1956 in U.S. dollars was 1,933,351.

The contributions pledged by the Governments for the entire Expanded Programme of Technical Assistance for 1956 and 1957 were U.S. dollars 28,833,000 and 30,794,000 respectively. Indian contribution for this period, \$450,000 and \$500,000 respectively.

The total amounts obligated during 1956 classified under different agencies are as follows (figures in U.S. dollars):

UNTAA: 788,630; ILO: 67,443; FAO: 410,218; UNESCO: 243,712; ICAO: 19,306 and WHO: 404,042; Total: 1,933,351.

During 1956 ninety-nine experts were engaged under the Expanded and Regular Programme of Technical Assistance: 17 by UNTAA; 11 by ILO; 30 by FAO; 19 by UNESCO; 2 by ICAO; 19 by WHO and 1 by WMO.

During that year, 163 experts were assigned to India: 22 by TAA; 10 by ILO; 43 by FAO; 19 by UNESCO; 2 by ICAO and 67 by WHO.

The total fellowships awarded to Indians both under the expanded and regular programmes during the year were 226: UNTAA 129; ILO 20; FAO 12; UNESCO 17; ICAO 4 and WHO 44.
